Section 300.10(f) of the interim rule requires the Administrator to file with the Commission any other materials not specified in Subpart B which are otherwise required to be developed by the Administrator, specifically under Subsection 7(i)(5) of the Act.

2. *Section 300.11—Technical Support for the Rate Schedule.* Section 300.11 establishes the technical supporting data required to be filed by the Administrator in support of a request for confirmation and approval. The supporting data is divided into two related categories: data statements and analysis of that data. For purposes of consistency and ease of reference, § 300.11(a) of the interim rule specifies the content of six basic statements which are considered to provide the basic underlying data that is required to develop a study to demonstrate that the proposed rates are sufficient to assure repayment of the Federal investment and other costs over a reasonable period of years.

The date statements are identified as: Statement A—Sales and Revenues; Statement B—Power Resources; Statement C—Capitalized Investments or Costs; Statement D—Interest Expenses; Repayment of Investments and Debt Capital; Statement E—Operation, Maintenance and Other Annual Expenses; and Statement F—Cost Allocations.

Section 300.11(b) requires the Administrator to provide an analysis of the information submitted in Statements A through F. The Administrator is authorized to use any appropriate analytical methodology, including a Power Repayment Study.

Traditionally, the various Federal power marketing agencies (PMAs), have used the so-called Power Repayment Study (PRS) method to demonstrate that forecasted annual project or system revenues will be adequate to recover forecasted annual costs and to recover the Federal investment within a reasonable period of years. A PRS is prepared to determine whether the revenues that can be obtained from existing wholesale rates will be sufficient to repay all obligations assigned to the power system within the established repayment periods. Repayment studies are based upon year-by-year forecasts of system revenues and costs over the repayment period. There is no annual schedule of capital repayment. The test of sufficiency of revenues is whether the capital investment can be repaid within the overall repayment period established for each power project, each increment of investment in the transmission system, and each block of irrigation assistance. This approach to repayment scheduling has the effect of averaging the year-to-year variation in costs and revenues over the repayment period.[12]

The normal payout period for a Federal reservoir project has been administratively and statutorily established at 50 years. An analyst preparing a PRS in the early phase of a project's life may, therefore, be required

[11] Interim Rule, "Sales of Electric Power to the Bonneville Power Administration—Methodology and Filing Requirements," (Docket No. RM81-41), issued October 1, 1981. 46 FR 50517, October 14, 1981.

[12] H. Rep. 7406, Committee on Interior and Insular Affairs, Hearing before the Subcommittee on Irrigation and Reclamation, 89th Congress, 1st Sess. (September 9 and 10, 1965) at 72.

to forecast conditions 50 years in the future.

In a recent report, the General Accounting Office recommended that the BPA revise its methodology for use in the 1983 BPA rate proposal. On January 16, 1981, the Assistant Secretary of Energy for Resource Applications (the predecessor to the Assistant Secretary for Conservation and Renewable Resources) approved a staff recommendation to encourage BPA to explore other methodologies that may be more appropriate for use under the Northwest Power Act. It is the responsibility of the Administrator to develop whatever analytical techniques may be required to demonstrate that revenues will be adequate to meet statutory requirements.

Changes in the methodological approach may require consultation with Congress and other Federal agencies.

If the Administrator develops a new method of analysis, the Commission encourages the Administrator to seek staff guidance, pursuant to § 300.2 of this rule, before filing a new method of analysis.

C. Subpart C—Commission Rate Review and Approval

Subpart C of the interim rule establishes procedures that relate specifically to interim approval of rates.

1. *Section 300.20—Interim Confirmation and Approval.* Under § 300.20(a), the Administrator is required to tender a complete request for approval of a rate on an interim basis under Part 300 not later than 90 days prior to the requested effective date.

Section 300.20(c) sets forth those actions the Commission may take on a request for interim rate acceptance. The fundamental prerequisite is that the Administrator file an application that complies with the requirements of Part 300. Upon receipt of a complete application, the Commission may take any of three possible courses of action. First, it may order the rate schedule into effect on an interim basis, effective on the date requested by the Administrator or such other time as the Commission may otherwise order. Second, if the Administrator's application is either patently deficient with respect to the filing requirements of Part 300 or fails to comply with the applicable provisions of the Northwest Power Act, the Commission may reject the application. Finally, the Commission may deny the Administrator's interim rate request and review the application for final confirmation and approval.

Section 300.20(c) states that the Commission will approve rates on an interim basis only if such rates are subject to refund with interest. The interest rate methodology adopted conforms with the rate or rates of interest charged to the BPA by the U.S. Treasury during the period unless another form of refund is ordered by the Commission.

Section 300.20(d) provides for publication of notice of acceptance of rates, or any other Commission action specified in § 300.20(b), both in the **Federal Register** and by mail.

IV. Certification of No Significant Economic Impact

The Regulatory Flexibility Act (RFA) requires certain analyses of proposed agency rules that will have a "significant economic impact on a substantial number of small entities."

Pursuant to section 605(a) of the RFA, the Commission hereby finds that the analysis requirements set forth in the rulemaking do not apply to this rulemaking, for the following reasons.

This rule imposes requirements only on the BPA. The BPA is not a "small entity" under the RFA.

The primary purpose of this proposal is to establish procedures for the confirmation and approval of BPA rates for compliance with statutory standards. Under the Pacific Northwest Act, the Commission does not itself set rate levels as it may under the Federal Power Act. The procedures are designed to avoid delays which in the past have accompanied the filing of BPA rates and to implement the Congressional directive to process rate schedules expeditiously. The rules will enable the Commission to place a rate into effect and to reach a decision quickly about its compliance with the statute.

Because this rule applies only to BPA and is procedural in nature, it will not create any impact upon small entities. Hence, the Commission believes a certification of no significant economic impact is entirely proper.

V. Comment Procedures

The Commission invites public comment on the interim rule. The Commission seeks comment particularly on the issues raised relating to confirmation and approval of BPA rates on an interim basis. All comments and views will be considered before the Commission takes final action in this docket.

Written comments on the interim rule must be received by the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, no later than February 5, 1982. Comments should refer to Docket No. RM82–6. Fourteen copies of each comment should be submitted with the original.

Written comments will be placed in the Commission's public files and will be available for inspection during regular business hours in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426.

VI. Effective Date

In accordance with the provisions of 5 U.S.C. 553 (b) and (d), the Commission finds good cause to make Part 300 effective on an interim basis at the time of its issuance and to conduct public procedures during the interim effective period. The Northwest Power Act requires implementation of interim rate approval procedures, if any, by December 5, 1981, and this requirement makes advance notice and comment impracticable at this time. Since any rate which could be placed into effect under this interim rule would be subject to the refund, with interest, of any charges determined upon further analysis to be excessive in light of statutory standards, the Commission believes that an immediate effective date is consistent with the public interest. If the Commission were unable to establish generic procedures for approving rates on an interim basis, there could be undue delays in placing BPA rates into effect which would be contrary to both the legislative intent to expedite treatment of BPA rates and the public interest. The Commission will receive and consider comments on the interim rule.

(Pacific Northwest Electric Power Planning and Conservation Act, 16 U.S.C. 830–839h (1980); Federal Power Act, as amended, 16 U.S.C. 792–828c; Bonneville Project Act, 16 U.S.C. 832–8321; Flood Control Act of 1944, 16 U.S.C. 825s; Federal Columbia River Transmission System Act, 16 U.S.C. 838–838k; Department of Energy Organization Act, 42 U.S.C. 7101–7552 (1978); E.O. 12009, 3 CFR 142 (1978))

In consideration of the foregoing, the Commission amends Chapter I, Title 18 of the Code of Federal Regulations, as set forth below, effective on an interim basis on the date of issuance.

By the Commission.

Kenneth F. Plumb,

Secretary.

1. Chapter I is amended by adding to the Table of Contents, in the proper sequence, Subchapter L, containing Part 300, to read:

SUBCHAPTER L—REGULATIONS FOR FEDERAL POWER MARKETING AGENCIES UNDER THE PACIFIC NORTHWEST ELECTRIC POWER PLANNING AND CONSERVATION ACT, THE BONNEVILLE PROJECT ACT, THE FLOOD CONTROL ACT OF 1944, AND THE FEDERAL COLUMBIA RIVER TRANSMISSION SYSTEM ACT

Part
300 Confirmation and approval of the rates of the Bonneville Power Administration.

2. Chapter I is amended by adding Subchapter L, containing Part 300, to read:

PART 300—CONFIRMATION AND APPROVAL OF THE RATES OF THE BONNEVILLE POWER ADMINISTRATION

Subpart A—General Provisions

Sec.
300.1 Applicability and definitions.
300.2 Staff guidance.

Subpart B—Filing Requirements

300.10 Application for confirmation and approval.
300.11 Technical support for the rate schedule.

Subpart C—Commission Rate Review and Approval

300.20 Interim acceptance and review.

Authority: This Part is established under the Pacific Northwest Electric Power Planning and Conservation Act, 16 U.S.C. 830–839h; Federal Power Act, as amended, 16 U.S.C. 792–828c; Bonneville Project Act, 16 U.S.C. 832–832l; Flood Control Act of 1944, 16 U.S.C. 825s; Federal Columbia River Transmission System Act, 16 U.S.C. 838–838k; Department of Energy Organization Act, 42 U.S.C. 7101–7552; E.O. 12009, 3 CFR 142 (1978).

Subpart A—General Provisions

§ 300.1 Applicability and definitions.

(a) *Applicability.* This part sets forth procedures governing the filing, review, and disposition of the rate schedules for the sale or transmission of power and energy established by the Administrator of the Bonneville Power Administration under the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act). Except as otherwise provided, the Commission's General Rules of Practice and Procedure will apply to any filings, hearings, or other procedures under this Part.

(b) *Definitions.* For the purposes of this Part, the definitions in section 3 of the Pacific Northwest Electric Power Planning and Conservation Act, 16 U.S.C. 839a, and the following definitions apply.

(1) "Cost evaluation period" means a period, commencing with the end of the historic period, as defined in paragraph (b)(3) of this section, and continuing through the proposed rate approval period, as defined in paragraph (b)(7) of this section, during which future estimates of costs and revenues may be modified by the Administrator to reflect changing conditions.

(2) "Electric service" means any transmission or sale of electric power and energy by the Bonneville Power Administration, including capacity sales, energy sales, firm power sales, transmission services, or any combination of these services, and the utilization by the Bonneville Power Administration, by means of ownership, contractual arrangements, leasing, or other arrangements, of any facility to provide such sales or services.

(3) "Historic period" means the period, commencing with the date of first commercial operation of a powerplant or transmission facility and ending on the last day of the latest year for which actual cost data are available, provided that the period does not end more than 18 months before the date on which the Administrator tenders the rate schedule for filing with the Commission.

(4) "Initial capital investment" means the cost of acquisition or construction of a power facility or non-power facility which has been assigned by the Administrator to be repaid from the power revenues of the Bonneville Power Administration, including any cost of planning, design, land acquisition, construction, interest during construction, and testing incurred before the date on which the facility becomes operational or revenue-producing.

(5) "Interest group" means an aggregation of initial investments, additions, replacements, or other capitalized costs which is required to be repaid at a common interest rate.

(6) "Power repayment study" or "PRS" means a study of the annual repayment of production and transmission investments and other costs through the application of revenues during the repayment period.

(7) "Proposed rate approval period" means the period during which the Administrator proposes to collect revenues for electric service under a rate schedule filed for Commission confirmation and approval under this part.

(8) "Rate schedule" means a statement by the Administrator describing:

(i) Electric service, as defined in paragraph (b)(2) of this section;

(ii) Rates and charges which the Bonneville Power Administration establishes for, or in connection with, its electric service; and

(iii) Classifications and other provisions which directly affect such rates and charges.

(9) "Replacement" means any substitution of a unit of property with another unit of like character.

§ 300.2 Staff guidance.

The Administrator or a designee may seek guidance from Commission staff prior to submitting an application under section 7 of the Northwest Power Act, with respect to the appropriate form and content of such application.

Subpart B—Filing Requirements

§ 300.10 Application for confirmation and approval.

(a) *General provisions.*—(1) *Contents of filing.* Any application by the Administrator of the Bonneville Power Administration for confirmation and approval of rate schedules must include, as described in this section, a letter of request for rate approval, a notice of filing suitable for publication in the **Federal Register**, the rate schedule, the Administrator's Record of Decision, and the technical supporting information required under § 300.11.

(2) *Incorporation of information by reference.* Any information required under this subpart that has previously been submitted to the Commission in substantially the same form as specified in this section may be incorporated by reference only.

(3) *Notice of deficiency.* The Director of the Office of Electric Power Regulation will notify the Administrator of any deficiencies in the filing and permit the Administrator 30 days from receipt of the notice of deficiency, or such additional time as the Director may provide, to correct the deficiency specified by the Director.

(4) *Protest and intervention.* In the Notice of Filing supplied by the Administrator under paragraph (d) of this section and published by the Commission in the **Federal Register**, the Commission will provide for an opportunity to protest or intervene in the final confirmation and approval proceeding for the filed rate schedule.

(b) *Letter of request for rate approval.* A letter of request for rate approval must contain the following information:

(1) A description of the period for which the rate is proposed to be effective, delineated by an effective date and an expiration date, and a request, if any, for interim approval of the rate;

(2) A brief description of the filed rates and charges and estimates of annual sales and revenues for the rate

approval period under both and filed rate schedules;

(3) A description of how the filed rate differs in rate level or rate structure from the existing rate schedule currently effective;

(4) A list identifying all documents submitted for Commission consideration; and

(5) The names and addresses of all customers of the Bonneville Power Administration and other persons who have requested to be informed of the Commission's decision.

(c) *Notice of filing.* The notice of filing, suitable for publication in the **Federal Register**, must contain the following information:

(1) The number of the rate schedule or contract;

(2)(i) The dollar amount and percent increase in rates, if the rate change would increase annual revenues during the rate period; or

(ii) A concise description of the rate schedule change, if the filed rate would not increase annual revenues during the rate period;

(3) A brief description of the reasons for the proposed change;

(4) A statement whether interim approval is requested;

(5) The date on which the rate schedule is tendered with the Commission;

(6) The proposed effective date of the rate schedule; and

(7) The proposed rate approval period.

(d) *Rate schedules.* A filed rate schedule, as defined in § 300.1(b)(8), must indicate the following, as appropriate:

(1) The class of customer to which each rate schedule will apply and service areas or zones which will be affected by the filed rate;

(2) The type of use or class of service to which each schedule is applicable;

(3) The character and conditions of service;

(4) The monthly or annual rate to be applied to capacity and energy services or other services;

(5) The method of computing the billing demand;

(6) Special provisions, such as discounts, penalties, power factor adjustments, service interruptions, unauthorized overruns, and other similar provisions which may affect the rates and charges; and

(7) The period of effectiveness of the rates.

(e) *Administrator's record of decision.* A record of decision must include:

(1) A chronological discussion of the procedural history of the ratemaking process, including meetings held with the general public, required under section 7(i) of the Northwest Power Act;

(2) A discussion of issues raised by customers or the public and how such issues were resolved;

(3) A discussion of all statutory, regulatory, or other requirements which governed the Administrator's decision;

(4) A description of any methodology used for determining revenue requirements and for developing appropriate rate structures; and

(5) Any cost-of-service studies used by the Administrator in developing the filed rate.

(f) *Additional filing requirements.* The Administrator must file with the Commission any other information required to be developed under subsection 7(i)(5) of the Northwest Power Act, in relation to the record of decision.

§ 300.11 Technical support for the rate schedule.

The Administrator must submit, in conjunction with any application under § 300.10, the technical support data described under paragraph (a) of this section and the analysis of data described under paragraph (b) of this section.

(a) *Data.*—(1) *Statement A—Sales and Revenues.* Statement A must include:

(i) Sales and revenues for each rate schedule for the last five years of the historic period, as defined in § 300.1(b)(3);

(ii) For the cost evaluation period, the estimated annual sales and revenues for the existing and each proposed rate schedule, including an aggregation of any revenues from sources not covered by the rate schedule according to general classifications of such revenues;

(iii) Brief explanations of how sales and revenue estimates are prepared and explanations of any changes in sales or revenues during the historic period.

(2) *Statement B—Power Resources.* Statement B must contain a list of the capacity and energy resources for the last five years of the historic period and for the cost evaluation period, used to support the sales and revenues figures contained in Statement A. The statement should identify resources according to the powerplant and any purchase or exchange agreement.

(3) *Statement C—Capitalized Investments or Costs.* (i) Statement C must contain, for all power facilities and those non-power facilities which have been assigned to be repaid from power revenues, a tabulated listing of annual capitalized investments (not excluding retirements) made during the historic period and investments in plant which will be revenue-producing during the cost evaluation period, as defined in § 300.1(b)(1). The tabulation must include such items as the initial capital investment including interest during construction, additions, replacements, and capitalized deferred annual expenses.

(ii) Investments tabulated under this subparagraph must be described as follows:

(A) All investments must be described according to interest group, as defined in § 300.1(b)(5);

(B) For each investment listed, the statement must indicate the year in which the investment is due to be repaid;

(C) Investments data may be arranged so as to conform with financial accounting practices of the Bonneville Power Administration;

(D) Investments made during the last five years of the historic period and any investments projected after that period must be categorized according to the type of investment, such as additions or specified major replacements, and the expected service life and required repayment date. For any projected replacements, the statement must describe any methods used to estimate the annual replacement costs and the price level used to estimate costs;

(E) Facilities financed through the issuance of revenue bonds must be identified; and

(F) The statement must describe the authority or administrative procedure used for adoption of each interest rate.

(4) *Statement D—Interest Expenses; Repayment of Investments and Debt Capital.* (i) For each capitalized investment and cost listed in Statement C, Statement D must describe, by interest group:

(A) The total unpaid balance outstanding at the end of the historic period;

(B) Payments made on principal and interest during each of the last five years of the historic period; and

(C) Annual payments expected to be made through the cost evaluation period.

(ii) The statement must describe how the interest expense was determined for each type of investment and include examples of such computations.

(5) *Statement E—Operation, Maintenance and Other Annual Expenses.* Statement E must contain, for the last five years of the historic period and for the cost evaluation period, as appropriate, a tabulation of actual and projected operation and maintenance, administrative and general, purchased power, wheeling, and any other expenses, other than interest, that are

required to be recovered on an annual basis from power revenues. If purchased power and other similar expenses are derived from more than one source, the statement must list expenses for each individual source. The statement must explain any significant deviations from trends in expenses or any extraordinary expenses. The statement must explain the price level used for estimating expenses.

(6) *Statement F—Cost Allocations.* Statement F must contain, for each multiple-purpose reservoir project, unit, division, or system, a table or other summary showing total investments costs, the total annual operation and maintenance costs, and the allocation of all such costs among the various authorized purposes. The statement must show the amount of power costs allocated to irrigation functions, and any changes from previous allocations, and the procedure used in allocating such costs. Any description of allocations already in the Commission's files need not be shown.

(b) *Analysis of supporting data.* An analysis of the data provided under this section must be supported by an appropriate methodology developed by the Administrator.

(1) *Power Repayment Study.* Any Power Repayment Study (PRS) submitted for this purpose must be developed using currently approved rates for estimating future revenues. If the filed rates differ from the current rates, the Administrator must provide a PRS which uses the proposed rates for estimating future revenues. Unless otherwise required by statute, a PRS must contain only those investments in plant which will be in commercial operation during the proposed rate approval period, except replacements. Forecasts of costs beyond the cost evaluation period must be based on conditions prevailing during the cost evaluation period, unless unusual circumstances warrant otherwise.

(2) The Administrator may use a method other than a PRS to support filed rates.

Subpart C—Commission Rate Review and Approval

§ 300.20 Interim acceptance and review.

(a) *Time of filing.* Any rate schedule for which the Administrator requests interim approval must be tendered for filing with the Commission, in the form and with the materials specified in Subpart B, not later than 90 days prior to the date such rate schedules are requested to be made effective on an interim basis.

(b) *Action on request for interim rate acceptance.* Upon receipt of an application that complies with the requirements of this Part, the Commission may take any of the following actions, based on an evaluation of the application:

(1) Order the rate schedule into effect on an interim basis, effective on the date requested by the Administrator or at such time as the Commission may otherwise order;

(2) Deny the Administrator's interim rate request and reject the application, if the Commission determines that the Administrator's application is:

(i) Patently deficient with respect to the filing requirements of this Part; or

(ii) Fails to comply with the applicable provisions of the Pacific Northwest Electric Power Planning and Conservation Act; or

(3) Deny the Administrator's interim rate request and review the application for final confirmation and approval of the rate schedule pursuant to the provisions of this part.

(c) *Condition of acceptance.* (1) *Condition.* If the Commission places a rate schedule into effect on an interim basis under paragraph (b)(1) of this section, such rates are subject to refund with interest under this paragraph.

(2) *Refund.* If any rate which the Commission makes effective on an interim basis exceeds the rate which is confirmed and approved by the Commission as a final rate, the Administrator must refund with interest any portion of the rate increase collected during the interim period which exceeds the final rate. The Administrator may make refund under this part by means of a net energy billing which reflects the value of any overcharge or by other appropriate methods.

(3) *Interest.* Except as otherwise provided by the Commission, the Administrator shall compute any amount of interest based on the revenues collected subject to refund and required to be refunded under paragraph (c)(2) of this section by using the rate of interest or a weighted average of all rates of interest charged to the Bonneville Power Administration by the U.S. Treasury during the period for which the computation is made.

(d) *Notice.* The Commission Secretary will publish in the **Federal Register** a notice of any action taken under paragraph (b) of this section and will mail notice to any interested person identified in the Administrator's filing.

BILLING CODE 6717-01-M

DEPARTMENT OF STATE

22 CFR Parts 124 and 126

[Dept. Reg. No. 108.815]

Revision of Controls on Exports of Munitions List Articles to the People's Republic of China

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The International Traffic in Arms Regulations (ITAR) are amended to delete the People's Republic of China from the list of countries which are denied licenses and other approvals by the U.S. Department of State for U.S. Munitions List exports. Requests for such approvals will now be considered on a case-by-case basis in accordance with standard procedures.

EFFECTIVE DATE: December 14, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. William B. Robinson, Director, Office of Munitions Control, Department of State, Washington, D.C., (703) 235-9755, or Mr. Charles Hartley, Deputy Director, (703) 235-9756.

SUPPLEMENTARY INFORMATION: The International Traffic in Arms Regulations (ITAR) state that it is a policy of the United States to deny approval for U.S. Munitions List exports to certain enumerated countries, including the People's Republic of China (22 CFR 126.01). This policy has been changed with respect to the People's Republic of China so that requests henceforth for licenses and other approvals for that country will be considered in accordance with the standard procedures of the Office of Munitions Control and on a case-by-case basis. (The requirement in 22 CFR 124.10(i) for the incorporation, in manufacturing license and technical assistance agreements, of a statement that articles produced thereunder may not be transferred to certain enumerated countries, will be similarly altered.)

PART 124—MANUFACTURING LICENSE AND TECHNICAL ASSISTANCE AGREEMENTS

Accordingly, 22 CFR, Chapter I, Subchapter M, is amended as follows:

§ 124.10 [Amended]

1. Section 124.10(i) is amended by removal of "Communist China".

PART 126—PROHIBITED SHIPMENTS, TEMPORARY SUSPENSION OR MODIFICATION OF REGULATIONS, EXEMPTIONS, AND RELATION TO OTHER PROVISIONS OF LAW

§ 126.01 [Amended]

2. Section 126.01 is amended by removal of "Communist China".

Because these regulatory changes involve the foreign affairs functions of the United States, these amendments are adopted as a final rule. (See 5 U.S.C. 553(a); 22 CFR 128.01. See also E.O. 12291, February 17, 1981, 46 FR 13193, sec. 1(a)(2).)

James L. Buckley,

Under Secretary for Security Assistance, Science and Technology.

BILLING CODE 4710-25-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 166

Defense Contracting; Reporting Procedures on Defense Related Employment

AGENCY: Office of the Secretary, DOD.

ACTION: Amendment of final rule.

SUMMARY: This rule is the fiscal year 1981 update of the section listing DoD contractors receiving negotiated contract awards of $10 million or more. The regulation is published to comply with the provisions of section 410, Pub. L. 91-121, November 19, 1969.

EFFECTIVE DATE: September 30, 1981.

FOR FURTHER INFORMATION CONTACT: Mrs. Cynthia V. Springer, Office of the Director for Information Operation and Reports, Washington Headquarters Services, The Pentagon, Washington, DC 20301. Telephone (202) 694-5614.

SUPPLEMENTARY INFORMATION: In FR Doc. 70-15846 appearing in the **Federal Register** on November 25, 1970 (35 FR 18040), the Office of the Secretary of Defense published a final rule establishing criteria, prescribing procedures, and assigning responsibilities for monitoring contracting within the Department of Defense. Subsequently, paragraphs (a) and (d) of § 166.11, which constitute the list of DoD contractors receiving negotiated contract awards for $10 million or more, were updated for fiscal years 1971 (36 FR 18464); 1972 (37 FR 18727); 1973 (38 FR 25990); 1974 (39 FR 32985); 1975 (40 FR 44135); 1976 (41 FR 20466); 1977 (43 FR 1617); 1978 (44 FR 3049); 1979 (44 FR 75631); and 1980 (45 FR 83486).

PART 166—REPORTING PROCEDURES ON DEFENSE RELATED EMPLOYMENT

Accordingly, for FY 1981, § 166.11 of this part is revised to read as follows:

§ 166.11 Department of Defense contractors receiving negotiated contract awards of $10 million or more.

BILLING CODE 3810–01–M

VETERANS ADMINISTRATION

41 CFR Parts 8–1 and 8–74

General Policies and Special Procurement Controls

AGENCY: Veterans Administration.

ACTION: Final rule.

SUMMARY: This revision amends the Veterans Administration Procurement Regulations by eliminating Office of Personnel Management loyalty checks for the procurement of outside training; allowing for the procurement of short-term conference space in the District of Columbia; requiring National Sanitation Foundation certification for food service equipment purchased by Dietetic Service; providing for the procurement of supplies and equipment by consignment agreement; and revising the requirements for technical review to include consignment agreements.

EFFECTIVE DATE: This rule is effective December 14, 1981.

FOR FURTHER INFORMATION CONTACT:

Tim Ganous or David S. Derr, Policy and Interagency Service, Office of Procurement and Supply, 810 Vermont Avenue, NW, Washington, DC 20420, Telephone (202) 389–2334.

SUPPLEMENTARY INFORMATION: The authority to make an administrative determination that a proposed contractor for training VA employees does not advocate the overthrow of the U.S. Government, which was previously vested in the Office of Personnel Management, has been delegated to contracting officers. The procurement of conference facilities in the District of Columbia is prohibited when not specifically appropriated for by Congress (4 U.S.C. 34). However, the Comptroller General has decided that this restriction does not apply to the rental of short-term conference space (Decision B–183743). The requirement that food service equipment be certified by the National Sanitation Foundation presently applies only to procurements in relation to new construction. This requirement is being extended to the procurement of all such equipment for use by Dietetic Service. The Office of Procurement and Supply has determined that, under certain circumstances, it may be in the best interest of the Veterans Administration to accomplish the procurement of supplies and equipment by consignment agreement. Controls for the use of consignment agreements are established.

The Administrator hereby certifies that this final rule, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (5 U.S.C. 601–612). Pursuant to 5 U.S.C. 605(b), this final rule is therefore exempt from the initial and final regulatory flexibility analysis requirements of section 603 and section 604. The reason for this certification is because this rule is not likely to result in a major increase in costs to consumers

or others, or to have other significant adverse effects.

Approved: December 3, 1981.

Robert P. Nimmo,
Administrator.

PART 8–1—GENERAL

41 CFR Parts 8–1 and 8–74 are amended as follows:

1. In § 8–1.403–52, paragraph (a) is revised to read as follows:

§ 8–1.403–52 Processing for legal review.

(a) *Department of Medicine and Surgery field stations, VA Marketing Center, VA Supply Depots.* (1) Proposed contracts or agreements specified in paragraph (a) (1), (2), (3) (iii) through (vi), (4), (5) and (6) of § 8–1.403–51 will be forwarded by the contracting officer directly to the Assistant Deputy Administrator for Procurement and Supply. The Assistant Deputy Administrator for Procurement and Supply will review the submissions and forward them directly to the General Counsel.

(2) Proposed sharing agreements and contracts for specialized medical services specified in paragraph (a)(3) (vii) and (viii) of § 8–1.403–51 will be forwarded to Central Office in accordance with § 8–3.204(d) for review and submission to the General Counsel.

(3) Proposed interagency agreements specified in paragraph (a)(3)(ix) of § 8–1.403–51 will be forwarded by the approving official to the Assistant Deputy Administrator for Procurement and Supply. The Assistant Deputy Administrator for Procurement and Supply will review the submissions and forward them directly to the General Counsel.

(4) Proposed utility connection agreements specified in paragraph (a)(3)(ii) of § 8–1.403–51 will be forwarded by the contracting officer directly to the Director, Engineering Service. The Director, Engineering Service will review the submissions and forward them to the General Counsel through the Assistant Deputy Administrator for Construction.

(5) Proposed change orders specified in paragraph (b) of § 8–1.403–51 will be forwarded by the contracting officer directly to the Director, Engineering Service. The Director, Engineering Service, will review the submissions and forward them to the General Counsel.

(6) Proposed final decisions or settlement agreements specified in paragraph (b) of § 8–1.403–51 will be forwarded by contracting officer directly to the Assistant Deputy Administrator for Procurement and Supply. The Assistant Deputy Administrator for Procurement and Supply will review the submissions and forward them to the General Counsel.

(7) Proposed revisions to contract clauses specified in paragraph (c) of § 8–1.403–51 will be forwarded by contracting officer directly to the Assistant Deputy Administrator for Procurement and Supply. If concurred in, the Assistant Deputy Administrator for Procurement and Supply will forward them directly to the General Counsel.

* * * * *

2. Section 8–1.403–60 is revised to read as follows:

§ 8–1.403–60 Technical review.

Certain contracts not subject to the legal review requirements of § 8–1.403–51 are subject to a prior technical review for compliance with procurement regulations as provided in this section. Negotiated contracts, including 8(a) set-asides, expected to exceed $50,000, formally advertised contracts (including Step One of two-step procurements) expected to exceed $100,000, and all consignment agreements, regardless of anticipated dollar value, will be reviewed by the Assistant Deputy Administrator for Procurement and Supply, prior to award, except that the requirement for review is not applicable to contracts related to the Loan Guaranty Program, formally advertised construction contracts, architect-engineer contracts or to contracts awarded by the Office of Construction.

(a) The procedure for obtaining the technical review will be the same as that specified for legal review in § 8–1.403–52 except that where paragraphs (b) and (c) of that section indicate submission of documents to the General Counsel, the documents will be forwarded to the Assistant Deputy Administrator for Procurement and Supply.

(b) The documents to be submitted for review are the same as for legal review as specified in § 8–1.403–53.

(c) Upon completion of the technical review, the Assistant Deputy Administrator for Procurement and Supply will advise the appropriate Central Office activity (for field station contracts) or contracting officer (for Central Office contracts) as to approval or as to any changes required to comply with procurement regulations. Where changes are required, immediate action will be taken to amend the solicitation or proposed contract.

(d) The technical review will be completed as expeditiously as possible with due regard to the date by which the contract is needed. Conversely, contemplated effective dates of proposed contracts will take into consideration the need for technical review.

3. In § 8–1.405, paragraph (a)(1) is revised to read as follows:

§ 8–1.405. Ratification of unauthorized contract awards.

(a) * * *

(1) Contracting officers shall not ratify contractual commitments made by other personnel of the Veterans Administration without prior approval. At field stations, the approving authority is the head of the field station concerned. For Central Office contracting officers, the approving authorities are the heads of the concerned departments and staff offices, and the Director, Office of Administration. This approval authority shall not be redelegated.

* * * * *

PART 8–74—SPECIAL PROCUREMENT CONTROLS

4. In § 8–74.113, paragraphs (b) and (c)(1) are revised to read as follows:

§ 8–74.113 Telecommunications equipment.

* * * * *

(b) The descriptive literature to be furnished by the contractor after award, required by the clause in § 8–7.150–18, is to be reviewed and approved by the Office of Data Management and Telecommunications prior to delivery and/or installation by the contractor. Promptly upon receipt of the descriptive literature, contracting officers will forward it together with a copy of the contract, the formal specification, or the detailed purchase description to the Assistant Deputy Administrator for Procurement and Supply (93).

(c) Solicitations, including those for construction, for telecommunications equipment based on "brand name or equal" purchase description (see FPR 1–1.307–4 to 1–1.307–9 inclusive) are subject to the following:

(1) Prior to award, contracting officers will forward to the Assistant Deputy Administrator for Procurement and Supply (93) the abstract of bids, one copy of each offer received, including descriptive literature and pertinent letters, and the comments and recommendations of the contracting officer.

* * * * *

§ 8–74.114 [Amended]

5. In § 8–74.114, *Paid use of conference facilities*, paragraph (d) is removed.

6. A new § 8–74.116 is added to read as follows:

§ 8–74.116 Food service equipment.

(a) All new food service equipment purchased for Dietetic Service through other than the Defense General Supply Center (DGSC) sources must meet requirements set forth by the National Sanitation Foundation (NSF).

(b) The contracting officer will accept an affixed NSF label and/or documentation of the certification by NSF from the contractor as evidence that the subject equipment meets sanitation standards issued by the Foundation.

(38 U.S.C. 210(c); 40 U.S.C. 486(c))

BILLING CODE 8320–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 32 and 33

Addition of Fourteen National Wildlife Refuges to the List of Open Areas; Migratory Bird Hunting, Upland Game Hunting, Big Game Hunting, and Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule adds a number of refuges to the lists of open areas for migratory bird hunting; upland game hunting; big game hunting, and sport fishing. It has been determined that this action would be in accordance with the provisions of all applicable laws, would be compatible with the principles of sound wildlife management, would otherwise be in the public interest, and that such uses are compatible with the major purposes for which each refuge was established. The hunting of migratory birds, upland game, big game, and sport fishing, subject to annual special regulations, will provide additional public recreational opportunities.

EFFECTIVE DATE: December 14, 1981.

FOR FURTHER INFORMATION CONTACT: William C. Reffalt, Division of Refuge Management, U.S. Fish and Wildlife Service, Washington, D.C. 20240; Telephone 202–343–4791.

SUPPLEMENTARY INFORMATION: The author of this document is Ronald L. Fowler, U.S. Fish and Wildlife Service, Washington, D.C. 20240, 202–343–4305. As a general rule, most areas within the National Wildlife Refuge System are closed to hunting and sport fishing until officially opened by rulemaking. On September 1, 1981, there was published (46 FR 43858) a proposed rulemaking adding 14 refuges to the lists of open areas for migratory game birds, upland game, big game, and sport fishing.

The public was provided a 30-day comment period and was advised that pursuant to the requirements of Section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), an environmental assessment had been prepared on each of these proposals. These assessments are available for public inspection and copying at Room 2024, Department of the Interior, 18th and C Streets NW, Washington, D.C. 20240, or by mail from the Director at the address given above. On the basis of these assessments it has been determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment.

No comments were received concerning the proposed rule.

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Act requires that: (1) Any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) funds are available for the development, operation, and maintenance of the permitted forms of recreation. The proposed use authorized by these regulations will not interfere with the primary purposes for which these refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Impact Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

Because of the time limitation involved to coordinate the State and Federal hunting regulations and the rapid approach of the hunting seasons, the Department of the Interior has concluded that "good cause" exists within the meaning of 5 U.S.C. 553(d)(3), of the Administrative Procedure Act to expedite the implementation of this rulemaking; therefore the effective date of this final rule is December 14, 1981.

Note.—The Department of the Interior has determined that this document is not a "major rule" within the meaning of Executive Order 12291 (46 FR 13193) and that the rulemaking would not have a "significant economic effect on a substantial number of small entities" within the meaning of the Regulatory Flexibility Act (Pub. L. 96–354).

Accordingly, after consideration of all interests and concerns, 50 CFR Parts 32 and 33 are amended by the addition of Overflow National Wildlife Refuge, Bogue Chitto National Wildlife Refuge, Upper Ouachita National Wildlife Refuge, Mathews Brake National Wildlife Refuge, Morgan Brake National Wildlife Refuge, Panther Swamp National Wildlife Refuge, Lamesteer National Wildlife Refuge, Cedar Island National Wildlife Refuge, Mackay Island National Wildlife Refuge, Lake Zahl National Wildlife Refuge, Lower Hatchie National Wildlife Refuge, Tennessee National Wildlife Refuge, McFaddin National Wildlife Refuge, and Seedskadee National Wildlife Refuge in §§ 32.11, 32.21, 32.31, and 33.4 as follows:

(16 U.S.C. 460k, 668dd)

Dated: November 18, 1981.

J. Craig Potter,

Acting Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 81-35643 Filed 12-11-81; 8:45 am]

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 652

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Extension of emergency interim rule.

SUMMARY: An emergency regulation in effect through December 8, 1981, implements certain provisions of Amendment 3 to the Fishery Management Plan for Atlantic Surf Clam and Ocean Quahog Fisheries. This notice extends the emergency regulation from December 9, 1981, through January 23, 1982. The extension will continue protection of the resource, while providing more flexibility and fishing opportunity for fishermen than would be available under the regulations which would otherwise be effective.

DATES: Emergency rule effective from December 9, 1981 through January 23, 1982.

FOR FURTHER INFORMATION CONTACT: Frank Grice, Chief, Fisheries Management Division, Northeast Region, National Marine Fisheries Service, State Fish Pier, Gloucester, Massachusetts 01930-3097. Telephone 617-281-3600.

SUPPLEMENTARY INFORMATION: Under section 305(e)(2) of the Magnuson Fishery Conservation and Management Act, emergency interim regulations implementing provisions of Amendment 3 to the Fishery Management Plan for Atlantic Surf Clam and Ocean Quahog Fisheries were published on October 28, 1981 (46 FR 53181). The rulemaking stated that the regulations would be effective for 45 days and that they could be repromulgated for an additional 45-day period, if necessary. The amendment: (1) provides a flexible procedure which allows the Secretary to specify annual quotas from within a prescribed range; (2) sets a 5½ inch size limit for surf clams in the mid-Atlantic area; (3) extends the portion of the year during which make-up periods can be claimed for fishing time lost due to bad weather; (4) allows vessel operators to determine themselves if weather conditions are severe enough to claim a make-up period; (5) extends the surf clam fishing week to include Sunday; (6) provides increased opportunity for vessel operators to change their surf clam fishing schedules; and (7) eliminates the fee for issuance of a replacement vessel permit. The intended effect of the amendment is to increase the operational flexibility of fishermen and other small business entities affected by the management of the fisheries. The Assistant Administrator for Fisheries, NOAA, had determined that the emergency situation described in the rulemaking continues to exist, and therefore extends the emergency regulations through January 23, 1982.

Classification

The Administrator of NOAA determined on October 23, 1981, that this action is not a major rule under E.O. 12291 and does not require a regulatory impact analysis. The Federal paperwork burden, as defined by 44 U.S.C. 3501 *et seq.*, is not increased for any level of business. Requirements of the Regulatory Flexibility Act are not applicable because the emergency rule was not published as a notice of proposed rulemaking.

Dated: December 8, 1981.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

[FR Doc. 81-35578 Filed 12-9-81; 1:17 pm]

BILLING CODE 3510-12-M

Proposed Rules

Federal Register
Vol. 46, No. 239
Monday, December 14, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 309

Disclosure of Exempt Records by Corporation Personnel

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Proposed rulemaking.

SUMMARY: The FDIC is proposing to amend its regulations on disclosure of information to permit insured nonmember banks to directly disclose copies of FDIC examination reports to their parent holding companies and individual shareholders without prior FDIC approval, if certain conditions are met. The FDIC currently authorizes such disclosure at its discretion, if requested in writing to do so. The amendment is expected to reduce FDIC's cost of handling the requests. Banks are expected to benefit in terms of efficiency and cost by making the disclosure directly.

DATE: Comments must be received by February 12, 1982.

ADDRESS: Send comments to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429. Comments may be hand delivered to Room 6108 between the hours of 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Pamela E. L. LeCren, Attorney, Legal Division, (202–389–4433), Room 4126–E, or Barbara I. Gersten, Attorney, Legal Division, (202–389–4422), Room 4105–I, 550 17th Street NW., Washington, D.C. 20429; or Clinton Futrell, Special Assistant to the Director, Division of Bank Supervision (202–389–4404), Room 5050, 550 17th Street NW., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION: The following information is being set out in compliance with FDIC Statement of Policy Regarding Development and Review of FDIC's Rules and Regulations adopted by the Board of Directors on May 21, 1979. No regulatory flexibility analysis as set out in the Regulatory Flexibility Act, Pub. L. No. 96–354 (to be codified in 5 U.S.C. 601–612) will be undertaken. This is done under authority of section 3 of that Act which says that no flexibility analysis need be done if the head of the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. For the reasons set out in the discussion to follow, the Board of Directors of the FDIC is hereby certifying that the amendment being proposed for comment will not have a significant economic impact on a substantial number of small entities.

The proposed amendment will authorize insured nonmember banks to routinely release copies of examination reports to their parent bank holding companies or majority shareholders without prior approval from the FDIC where certain conditions are met. Those conditions are (1) that the holding company or individual shareholder own in excess of 50 percent of the stock of the bank, (2) that the board of directors of the bank adopt a resolution authorizing the report to be copied and forwarded to the parent or the individual shareholder, and (3) that the bank obtain a receipt from the parent or individual shareholder acknowledging the following three things (a) receipt by the board of directors of the parent or the individual, (b) that the report is to be retained for the parent or shareholder's exclusive use, and (c) that the report, while duplicated and furnished by the bank, is the property of the FDIC and no further release will be made without the prior approval of the FDIC. The disclosing bank will be required to retain the receipts for a three-year period to aid the FDIC in determining compliance with the regulation.

Part 309 of FDIC's regulations currently permits a bank to make direct disclosure if permission is received from the Director of FDIC's Division of Bank Supervision in response to a written request. 12 CFR 309.6(c)(7). The Director must determine that there is good cause to authorize release. Release may be subject to whatever conditions are felt necessary in order to insure confidentiality of the report and protect the integrity of the bank. No blanket authorization for routine disclosure is available under § 309.6(c)(7). Disclosure of the report may also be made under authority of 12 CFR 309.6(c)(6) which authorizes the Director of the Division of Bank Supervision, or anyone designated by the Director, to approve release of examination reports to any third party where good cause is shown. The authority to approve disclosure of examination reports under § 309.6(c)(6) was delegated to FDIC's Regional Directors in the case of parent holding companies and individual shareholders that own in excess of 50 percent of the stock of the bank. A charge of $10 is imposed for each disclosure. Current operating procedures are as follows. Disclosure occurs on a routine basis once a written request is received. Conditions on release may be imposed in order to protect the confidentiality of the report, the financial integrity of the bank, and the privacy interests of any individual named in the report. The board of directors of the bank must adopt a resolution approving the request that the FDIC release the report. When the report is released, it is accompanied by a transmittal letter reminding the parent or shareholder that the report is being furnished solely for the purpose of assisting the FDIC in the supervision of the bank, that the report is still the property of the FDIC, and that the report is confidential.

The only extent to which the proposed amendment would alter existing disclosure procedures would be to allow the bank to directly transmit the examination report on a routine basis. The amendment is being proposed in order to eliminate FDIC's administrative burden in processing requests under § 309.6(c)(6). (Few, if any, requests are made to the Director of the Division of Bank Supervision under § 309.6(c)(7).) This proposal in no way alters FDIC's current position that all FDIC reports are the property of the FDIC and are confidential. As indicated the decision to permit release to parent holding companies and majority shareholders is attributable solely to the supervisory needs of the FDIC as parent holding companies and majority shareholders are in a unique position to aid the FDIC in achieving supervisory goals.

The cost to the FDIC of processing requests under § 309.6(c)(6) is approximately $50 per report. This figure is based upon personnel time and material costs. FDIC regional office personnel must follow a twelve-step procedure each time a report is released, something which takes 2–3 hours from

start to finish. It is anticipated that during the 1981 calendar year, FDIC's regional offices will process and release under §309.6(c)(6) approximately 800 reports in response to requests made by approximately 500 to 600 banks. As an alternative to amending the regulation as described, the FDIC has considered simply raising the fee charged to the requesting bank. Raising the fee, however, would not offset the staff time involved in processing requests, whereas the proposed amendment would free the staff for other responsibilities. If the proposed amendment is not adopted, however, the FDIC will find it necessary to seriously consider raising the fees in order to cover the costs associated with releasing the reports.

The amendment would shift the burden of reproduction and distribution of the reports to insure nonmember banks in addition to the task of obtaining and retaining the necessary receipts. We have no way of quantifying the costs associated with that shift. Any cost figure would have to be tied to the size of the report, which will vary with the institution, and the administrative mechanisms of each bank to deal with reproduction, distribution, and recordkeeping. We can estimate to some extent the number of banks that would be affected by the change. Approximately 2,833 insured nonmember banks supervised by FDIC are members of bank holding company systems. Of the 2,833 banks, approximately 2,358 have more than 50 percent of their stock held by a parent holding company. (We do not have figures readily available to determine how many of the total number of insured nonmember banks are held by individual shareholders who own more than 50 percent of their stock.) In proposing the amendment, the FDIC is assuming that the costs to any one particular bank should not be higher than the cost currently imposed by the FDIC in processing fees and may in fact be significantly less. Even if the cost is higher, that figure would certainly be less than any increased fee which would cover FDIC's $50 per report processing costs. Any decrease or increase in costs to the banks associated with the proposed change would not, in the FDIC's opinion, differ depending upon the size of the bank due to the nature of the change. The change will not affect the competitive status of banks.

As referenced earlier, the FDIC's Board of Directors is certifying that this amendment will not have a significant economic impact on a substantial number of small entities. This determination was based upon the following: (1) Any impact produced by the amendment should affect each institution differently, depending not upon the size of the institution, but upon the efficiency with which it handles administrative matters. (2) any impact would seem to be limited to a one time cost outlay per year in amounts that cannot be described as significant, and (3) the cost of retaining the necessary receipts should be minimal.

The proposed amendment will be submitted to the Office of Information and Regulatory Affairs of the Office of Management and Budget for review and approval as required by the Paperwork Reduction Act of 1980 (12 U.S.C. 3501 *et seq.).*

PART 309—DISCLOSURE OF INFORMATION

In view of the foregoing, it is proposed that 12 CFR Part 309 be amended as follows:

1. The authority citation for Part 309 reads as follows:

Authority: Sec. 2(9) "Seventh" and "Tenth" Pub. L. No. 797, 64 Stat. 881 as amended by Title III, Sec 309, Pub. L. No. 95–630, 92 Stat. 3677 (12 U.S.C. 1819 "Seventh" and "Tenth").

2. In Part 309, § 309.6(c)(7)(iii) is redesignated § 309.6(c)(7)(iv) and a new § 309.6(c)(7)(iii) is added to read as follows:

§ 309.6 Disclosure of exempt records by Corporation personnel.

* * * * *

(c) *Disclosure authorized.* * * *

(7) *Reports of examination and other exempt records-disclosure by banks or other third parties.* * * *

(iii) Any subsidiary bank of a bank holding company may reproduce and furnish a copy of any report of examination of the subsidiary bank to the parent holding company without prior approval by the Director of the Division of Bank Supervision and any bank may reproduce and furnish a copy of any report of examination of the disclosing bank to a majority shareholder if the following conditions are met:

(A) The parent holding company or shareholder owns in excess of 50 percent of the voting stock of the bank or subsidiary bank,

(B) The minutes of the board of directors of the bank or subsidiary bank contain a resolution of authorizing the reproduction and furnishing of each specific report,

(C) The disclosing bank obtains a receipt from the board of directors of the parent holding company or the shareholder stating that the parent holding company or shareholder had received the report which will be retained for the exclusive use of the parent holding company or shareholder, and that the report will not be disclosed or made public in any manner without the prior written approval of the Director of the Division of Bank Supervision as provided in § 309.6(c)(7)(ii) of the Corporation's regulations.

Receipts obtained pursuant to § 309.6(c)(7)(iii)(C) are to be retained by the bank or subsidiary bank for a period of three years after each disclosure.

* * * * *

By Order of the Board of Directors, December 1981.

Hoyle L. Robinson,

Executive Secretary.

[FR Doc. 81–35580 Filed 12–11–81; 8:45 am]

BILLING CODE 6714–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 81–NW–70–AD]

Airworthiness Directive; Boeing Model 707/720, 727, 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking; extension of comment period.

SUMMARY: This document extends the comment period for a Notice of Proposed Rulemaking issued on October 20, 1981, (46 FR 54381). That NPRM would require repetitive inspection and repair as necessary of the control cabin "E–F" window post on Boeing Model 707/720, 727 and 737 series airplanes.

DATES: The comment period for this NPRM is hereby extended from December 1, 1981, to January 4, 1982.

ADDRESS: Send comments on the proposed rule in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket, Docket No. 81–NW–70 AD, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Don Gonder, Airframe Branch, ANM–120S, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767–2516.

SUPPLEMENTARY INFORMATION: Notice of Proposed Rulemaking (NPRM), Docket

No. 81–NW–70–AD, was published in the **Federal Register** on November 2, 1981, (46 FR 54381). This proposed rule would require repetitive inspection and repair as necessary of the "E–F" window post as well as the steel doubler sandwich between the window post outboard chord and body skin. Failure to detect cracking could lead to failure of the window post with resultant rapid decompression.

The closing date for comments in the original NPRM was December 1, 1981. This date was predicated on timely release of Boeing Service Bulletins 737–53–1023, Rev. 6, and 727–53–86. Rev. 6, which contain the current inspection procedures specified in the NPRM. Due to delays in Boeing's preparation of the bulletins, 737–53–1023, Rev. 6, was not published until October 30, 1981; and 727–53–86, Rev. 6, is not due for release until November 25, 1981. To allow operators time to review these service bulletin revisions, an extension of the comment period to January 4, 1982, is required.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—Since this action merely extends the time period for public comment on a Notice of Proposed Rulemaking and imposes no additional burden on any person, it may be made effective in less than 30 days. It is neither a proposed nor final rule and, therefore, is not subject to Executive Order 12291, the Regulatory Flexibility Act, or DOT Regulatory Policies and Procedures (47 FR 11031; February 26, 1979).

Issued in Seattle, Washington, on December 3, 1981.

Robert O. Brown,

Acting Director, Northwest Mountain Region.

[FR Doc. 81–35593 Filed 12–11–81; 8:45 am]

BILLING CODE 4910–13–M

[Airspace Docket No. 81–AAL–15]

Proposed Establishment of Gambell, AK, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a transition area in the vicinity of Gambell, AK. This action would provide controlled airspace needed to accommodate prescribed instrument approach procedures.

DATE: Comments must be received on or before January 13, 1982.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Alaskan Region, Attention: Chief, Air Traffic Division, Docket No. 81–AAL–15, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, AK 99513.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Robert Maxey, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81–AAL–15." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a transition area to provide controlled airspace in the vicinity of Gambell, AK. A nondirectional radio beacon has been installed at Gambell, AK, and two instrument approach procedures have been developed which use this aid. The transition area is needed to provide protected airspace to accommodate these instrument approach procedures. The transition area would extend upward from 700 feet above the surface within 4.5 miles east and 9.5 miles west of the Gambell, AK, NDB (lat. 63°46'57"N., long. 171°44'15"W.) 352°T(340°M) bearing extending from the NDB to 18.5 miles north of the NDB and within 4.5 miles west and 9.5 miles east of the NDB 172°T(160°M) bearing extending from the NDB to 18.5 miles south of the NDB. Section 71.181 of Part 71 was republished on January 2, 1981 (46 FR 540).

ICAO Considerations

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of, and Annex 11 to, the Convention on International Civil Aviation, which pertains to the establishment of air navigational facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to ensure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace

under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) as follows:

By adding Gambell, AK, Transition Area to read as follows:

Gambell, AK

That airspace extending upward from 700 feet above the surface within 4.5 miles east and 9.5 miles west of the Gambell, AK, NDB (lat. 63°46'57" N., long. 171°44'15" W.) 352°T(340°M) bearing extending from the NDB to 18.5 miles north of the NDB and within 4.5 miles west and 9.5 miles east of the NDB 172°T(160°M) bearing extending from the NDB to 18.5 miles south of the NDB.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on December 8, 1981.

B. Keith Potts,

Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 81-35518 Filed 12-11-81; 8:45 am]

BILLING CODE 4910-13-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1201

Safety Standard for Architectural Glazing Materials; Proposed Partial Revocation of Standard Concerning Modulus of Elasticity Test, Hardness Test, and Indoor Aging Test for Plastic Glazing Materials

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed partial revocation of rule.

SUMMARY: The Consumer Product Safety Commission proposes to partially revoke the Safety Standard for Architectural Glazing Materials by eliminating requirements for a modulus of elasticity test and a hardness test, applicable to all plastic glazing materials; and for an indoor aging test, applicable to plastic glazing materials intended for indoor use. The Commission is proposing this partial revocation because it has preliminarily determined that these tests for plastic glazing materials are not reasonably necessary to eliminate or reduce an unreasonable risk of injury associated with plastic glazing materials. If the proposed partial revocation is issued on a final basis, plastic glazing materials would no longer be subject to the architectural glazing standard. The proposed partial revocation does not affect any other type of glazing material which is now subject to the standard.

DATES: (1) Written comments concerning the proposed partial revocation should be submitted on or before February 12, 1982. Comments received after this date will be considered to the extent practicable. 2. An opportunity for presentation of oral data, views, or arguments is scheduled for January 26, 1982 at 9:30 a.m. Those wishing to make oral presentations should notify the Office of the Secretary in writing by January 19, 1982. A summary or copy of the testimony is requested to be submitted to the Office of the Secretary by January 22, 1982.

PROPOSED EFFECTIVE DATE: The Commission proposes an effective date for any final rule based on this proposal ranging from the date of publication of such a final rule to a date 180 days after publication of a final rule. The Commission specifically solicits comments and information concerning the appropriate effective date for the partial revocation.

ADDRESS: Comments should refer to "Plastic Glazing" and should be sent, preferably in five copies, to: Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Received comments and other material pertaining to the proposed partial revocation may be seen in, or copies obtained from, the Office of the Secretary, 1111 18th Street, N.W., 3rd floor, Washington, D.C. 20207.

Presentation of oral data, views, or arguments is scheduled to be held at the Commission's Third Floor Hearing Room at 1111 18th Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Harry I. Cohen, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, (301) 492-6453.

SUPPLEMENTARY INFORMATION: .

Background

On January 6, 1977, the Consumer Product Safety Commission issued the Safety Standard for Architectural Glazing Materials (16 CFR Part 1201) to eliminate or reduce unreasonable risks of injury associated with breakage of architectural glazing materials by accidental human impact. (1)[1] The standard became effective on July 6, 1977.

Types of glazing materials which are now subject to the standard include tempered glass, laminated glass, annealed glass, and plastics. However, this proceeding is concerned only with the requirements of the standard which are applicable to plastic glazing materials.

The standard prescribes an impact test to assure that glazing materials used in certain architectural products either will not break when impacted with a specified energy, or will break with characteristics which are less likely to present an unreasonable risk of injury. As an alternative to the impact requirements, the standard contains provisions which pass plastic glazing materials if they meet the requirements

[1] Numbers in parentheses identify reference documents listed in Bibliography at the end of this notice.

for modulus of elasticity (flexibility) and hardness set forth in § 1201.4(e)(1)(iii) of the standard. (1)

The standard also prescribes an indoor aging test, applicable only to plastics intended for indoor use, to assure that those materials retain their ability to pass the impact test or alternative requirements for modulus of elasticity and hardness after exposure to a specified cycle of changes in temperature and humidity. (1)

When the standard was issued in 1977, it also contained an accelerated environmental durability test for plastic glazing materials intended for outdoor exposure. This test was intended to ensure that plastic glazing materials, after simulation of exposure to outdoor conditions, would retain a portion of their original impact strength, as measured by a device commonly called a "Charpy impact testing machine."(1)

However, on October 6, 1980, the Commission took final action to partially revoke the architectural glazing standard by eliminating the accelerated environmental durability test for plastic glazing materials intended for outdoor exposure. (2) The Commission took this action because it had concluded that the accelerated environmental durability test for plastics was not reasonably necessary to eliminate or reduce an unreasonable risk of injury associated with plastic glazing materials. The partial revocation became effective on April 6, 1981.

Thereafter, an association of manufacturers of plastic glazing materials brought an action for judicial review of the Commission's partial revocation of the standard eliminating the accelerated environmental durability test. This action, *Plastic Safety Glazing Committee et al.* v. *C.P.S.C.* (No. 80–3795), is now pending before the United States Court of Appeals for the Sixth Circuit.

Petition

On March 11, 1981, the Plastic Safety Glazing Committee (PSGC) petitioned the Commission to revoke the remaining requirements of the architectural glazing standard applicable to plastics. (3, 4, 5, 6, 10) On March 17, 1981, the Court of Appeals for the Sixth Circuit granted PSGC's motion to delay further consideration of the action for judicial review of the partial revocation deleting the accelerated environmental durability test for plastics to allow the Commission time to act on PSGC's petition. (7)

In that petition, PSGC asserts that the remaining requirements applicable to plastic glazing materials are not reasonably necessary to eliminate or reduce an unreasonable risk of injury associated with plastics. The petition states that the modulus of elasticity and hardness requirements are not performance tests related to safety of plastic glazing materials, but are instead a definition of plastic by reference to its flexibility and softness. The petition also asserts that the indoor aging test has no relation to safety, citing a portion of the record of the proceeding which led to the issuance of the architectural glazing standard. (6)

Another concern expressed by PSGC's petition is that by retaining the modulus of elasticity and hardness tests, and the indoor aging test for plastic glazing materials, the Commission's standard preempts state and local building code provisions which require either an accelerated environmental durability test or an actual outdoor weathering test for plastic glazing materials intended for outdoor exposure. The petition asserts that these accelerated or natural weathering requirements for plastics are safety related. (6)

The petition was referred to the Commission's technical staff for revaluation. In a briefing package to the Commission, the staff expressed agreement with the assertion in the petition that the remaining requirements of the standard applicable to plastics are not related to elimination or reduction of injuries. (9)

Relationship of Requirements to Safety

As stated above, the standard was issued to eliminate or reduce unreasonable risks of injury associated with breakage of glazing materials used in certain architectural products by accidental human impact. The stated purpose of the tests in the standard is to assure that glazing materials used in the products which are subject to the standard either will not break, or will break with characteristics less likely to result in injury than the breakage characteristics of glazing materials which do not comply with the standard.

After consideration of a technical analysis of the three tests in the standard applicable to plastics (16), the Commission has preliminarily determined that the hardness test, the modulus of elasticity test, and the indoor aging test are not reasonably necessary to reduce or eliminate an unreasonable risk of injury associated with plastic glazing materials for the following reasons.

None of these tests can be used to predict whether an item of plastic will break or not break if impacted at a specified energy. None of these tests can be used to predict breakage characteristics which may result from impacting an item of plastic at a specified energy. Consequently, none of these tests can be used to predict whether an item of plastic glazing material is likely to break from human impact; or if breakage occurs, whether injuries to consumers are more likely to result. (16)

Injury Information

The Commission has also reviewed injury information concerning plastic glazing materials. (12) Both before and after issuance of the standard, only a small number of injuries associated with plastic glazing were being treated in hospital emergency rooms. Based on the relatively small number of these reported injuries, and their limited severity, the Commission concludes that broken plastic glazing materials do not present a serious hazard.

The staff briefing package did not address the petition's assertion that an accelerated environmental durability test or an outdoor weathering test is related to safety of plastic glazing materials. The petition from PSGC did not contain any information on that point which had not already been considered by the Commission during the proceeding which led to the revocation of the accelerated environmental durability test for plastics.

After consideration of this information, the Commission has reason to believe that the remaining requirements in the standard applicable to plastic glazing materials are not related to the elimination or reduction of injuries. The Commission also has reason to believe at this time that plastic glazing materials presently are not a significant source of consumer injuries.

Economic Considerations

If the remaining requirements for plastics are eliminated from the standard, manufacturers of plastics would no longer be required to conduct testing to assure that their products meet those requirements for purposes of supporting certificates of compliance with the standard. (19) Section 14 of the Consumer Product Safety Act, (CPSA, 15 U.S.C. 2063) requires that each manufacturer of a product which is subject to a consumer product safety standard must issue a certificate of compliance with the applicable standard, and base that certificate upon a test of each product, or upon a reasonable testing program.

The Commission estimates, however, that any cost savings to the plastics industry from revocation of the remaining requirements would not be

significant in relation to total sales of plastic glazing materials. (19)

If the Commission revokes the remaining requirements applicable to plastics, state and local requirements for plastics would not longer be preempted by the Commission's standard. For that reason, an indirect effect of revocation of the remaining requirements could be the adoption or enforcement of requirements for plastics by state or local governments. Additionally, such action by states or local jurisdictions could preclude the use of some types of plastics, particularly in applications involving outdoor exposure. At this time, the Commission is unable to predict the specific requirements which state or local governments are likely to adopt, if any, or the effect of such adoption on the market for plastics. (19) However, such effects would not be a direct result of the elimination of requirements for plastic glazing from the Commission's safety standard for architectural glazing materials.

Impact on Small Businesses

Section 603 of the Regulatory Flexibility Act (RFA, 5 U.S.C. 603) requires agencies to prepare and make available for public comment an initial regulatory flexibility analysis of the impact of any proposal on small entities, including small businesses. Section 605(b) of the RFA provides that an agency is not required to prepare a regulatory flexibility analysis if the agency certifies that the proposal, if issued on a final basis, will not have a significant economic impact on a substantial number of small entities.

The partial revocation proposed below, if issued on a final basis, will remove some existing requirements applicable to manufacturers of plastic glazing materials, and will not by itself, impose any new requirements or other obligations on any person or firm. The Commission is aware of the possibility that if existing requirements applicable to plastics are removed from the architectural glazing standard, state and local governments will be able to impose their own requirements for plastic glazing materials. However, as indicated above, the Commission is not able to predict the specific requirements, if any, which state or local governments are likely to adopt.

Since a partial revocation based on the proposal would impose no obligation on any person or firm, the Commission hereby certifies that it will not have a significant economic impact on a substantial number of small businesses.

Conclusion

In order to revoke a consumer product safety standard, section 9(h) of the CPSA (15 U.S.C. 2058(h)) requires the Commission to make an affirmative finding that the standard is not "reasonably necessary to eliminate or reduce an unreasonable risk of injury."

After considering information about the inability of the remaining tests applicable to plastics to predict whether an item of plastic glazing materials will break if impacted at a specified energy, or whether, if breakage occurs, injuries to consumers are likely to result; information about injuries associated with plastic glazing materials; and economic information about the remaining requirements applicable to plastics, the Commission has preliminarily concluded that those requirements are not "reasonably necessary" to eliminate or reduce an unreasonable risk of injury and are not in the public interest.

Stay of Enforcement

In the Rules section today's issue, the Consumer Product Safety Commission publishes notice of suspension of enforcement of the elasticity test, hardness test, and the indoor aging test for plastic glazing materials. See the Table of Contents of this **Federal Register** for the proper page number.

Environmental Considerations

The Commission's environmental review procedures state at 16 CFR 1021.5(c)(1) that issuance, amendment, or revocation of a consumer product safety standard normally has little or no potential for affecting the human environment. For this reason, provisions of 16 CFR 1021.5(c)(1) do not require an environmental assessment nor an environmental impact statement for the partial revocation proposed below. The Commission does not foresee any special or unusual circumstances surrounding the proposed partial revocation which could necessitate an environmental review. Consequently, preparation of a draft environmental impact statement is not required.

Effective Date

Section 9(h) of the CPSA (15 U.S.C. 2058(h)) provides that a rule amending or revoking a consumer product safety standard will specify the effective date, which shall not exceed 180 days from the date of publication by the Commission of the final rule, unless the Commission finds, for good cause, that a later effective date is in the public interest.

The Administrative Procedure Act (5 U.S.C. 553(d)), provides that a rule which relieves a restriction or grants an exemption may take effect immediately. It is the Commission's view that the partial revocation proposed below is such a rule that could be issued as a final rule to take effect immediately.

The Commission recognizes that any change in an existing standard on which the regulated industry has relied in making business decisions can result in a degree of market disruption while production methods, inventories, marketing plans and other activities are adjusted to meet new conditions.

Setting a delayed effective date for such a change is one means of lessening the potential disruption by giving affected parties an opportunity to make appropriate adjustments before the change becomes effective. At the same time, a delayed effective date for a change which the Commission has determined is in the public interest could unnecessarily deprive consumers or others affected by the change of benefits which the Commission has determined they should receive.

In the present situation, the Commission has no reliable information concerning the potential market effects of issuing the partial revocation proposed below as a final rule either with an immediate or delayed effective date. The Commission therefore specifically solicits comments and information on this question. If any interested person believes a delayed effective date would be appropriate, the Commission would appreciate specific suggestions concerning the length of the delay.

Accordingly, the Commission gives notice that the effective date of any final rule may range from the date of publication to 180 days following publication of the final rule. The decision as to the effective date will be based on the Commission's evaluation of the comments and information received in response to this notice and other available information concerning the potential effects of various effective dates.

Proposal

In accordance with section 9(h) of the Consumer Product Safety Act, as amended by the Consumer Product Safety Amendments of 1981 (Pub. L. 92–573, as amended by Pub. L. 97–35, 15 U.S.C. 2058(h)) and the Administrative Procedure Act (5 U.S.C. 553), the Commission proposes to partially revoke the Safety Standard for Architectural Glazing Materials to eliminate the modulus of elasticity test,

the hardness test, and the indoor aging test for plastic glazing materials, by making the following changes to Part 1201 of Title 16 of the Code of Federal Regulations:

PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

1. In 16 CFR 1201.1(b), the first sentence is revised to read as follows:

§ 1201.1 Scope, application and findings.

* * * * *

(b) *Application.* This part 1201 shall apply to glazing materials, as that term is defined in § 1201.2(a)(11), for use in the architectural products listed in paragraph (a) of this section; and to those architectural products listed in paragraph (a) of this section if they are made with, or incorporate glazing materials, as that term is defined in § 1201.2(a)(11).

* * * * *

2. In 16 CFR 1201.1(d), the following footnote 1 is added:

(d) *Findings [1]—The degree and nature of the risk of injury the rule is designed to eliminate or reduce.* * * *

[1] The Commission's findings apply to the architectural glazing standard as issued at 42 F.R. 1428, on January 6, 1977. Since that date, the Commission has revoked portions of the standard which prescribed requirements for "glazed panels" (45 FR 57383) and an accelerated environmental durability test for plastic glazing materials intended for outdoor exposure (45 FR 68002, October 6, 1980). [If issued on a final basis, this proposed partial revocation will eliminate all requirements applicable to plastic glazing materials from the standard.] However, the findings have not been revised and they are therefore, not fully applicable to the remaining requirements of the standard.

3. In 16 CFR 1201.2 paragraph (a)(11) is revised to read as follows:

§ 1201.2 Definitions.

* * * * *

(a) * * *

(11) "Glazing material" means glass, including annealed glass, organic coated glass, tempered glass, laminated glass, wired glass; or combinations thereof where these are used:

(i) In openings through the architectural products listed in § 1201.1(a), or

(ii) As the architectural products themselves, e.g. unframed doors.

* * * * *

2. In 16 CFR 1201.2 paragraph (a)(23) is removed and reserved.

In 16 CFR 1201.3(b), a second sentence is added, to read as follows:

§ 1201.3 General requirements.

* * * * *

(b) * * * Any material not listed in the definition of "glazing material" in § 1201.2(a)(11) is not subject to this Part 1201.

§ 1201.4 Test procedures.

1. In 16 CFR 1201.4(a)(1), Table 1, "Accelerated Tests," is revised to read as follows:

* * * * *

TABLE 1.—ACCELERATED TEST (APPLICABLE PARAGRAPHS)

Glazing materials	Specimen	Test equipment	Exposure	Criteria for passing
Laminated glass	§ 1201.4(c)(1) and (c)(3)(i)	§ 1201.4(b)(3)(i)	§ 1201.4(d)(2)(i)	§ 1201.4(e)(2)(i)
Organic coated glass	§ 1201.4(c)(1) and (c)(3)(ii)(B)	§ 1201.4(b)(3)(ii)	§ 1201.4(d)(2)(ii)(B)	§ 1201.4(e)(2)(ii)(B)
Tempered glass	Exempt			
Wired glass	Exempt			
Annealed glass	Exempt			

2. In 16 CFR 1201.4(a)(2), the second sentence is revised to read, as follows:

(a) * * *

(2) * * * However, tempered glass, wired glass, and annealed glass are not required to be subjected to the accelerated environmental durability tests.

* * * * *

3. In 16 CFR 1201.4 paragraph (b)(3)(iii) is removed and reserved.

4. In 16 CFR 1201.4 paragraph (c)(3)(iii) is removed and reserved.

5. In 16 CFR 1201.4 paragraph (e)(1)(iii) is removed and reserved.

6. In 16 CFR 1201.4 paragraph (e)(1)(iii) is removed and reserved.

Proposed effective date and stay of enforcement. The Commission proposes an effective date for any final rule based on this proposal ranging from the date of publication of such final rule to a date 180 days after publication of a final rule. In a separate rule document, the Commission is staying enforcement of all provisions of the standard applicable to plastic glazing materials pending issuance of any final rule based on this proposal.

(Sec. 9(h), Consumer Product Safety Act, as amended by the Consumer Product Safety Amendments of 1981 (Pub. L. 92–573, as amended by Pub. L. 97–35, 15 U.S.C. 2057(h)) and 5 U.S.C. 553)

Dated: December 8, 1981.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 12 and 180

Regulations Pertaining To Reparations and Arbitration

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rules.

SUMMARY: The Commodity Futures Trading Commission proposes to amend its rules governing the arbitration proceedings which must be conducted by contract markets, the availability of reparations procedures, and the content and effect of the cautionary language which must be included in pre-dispute arbitration agreements between futures commission merchants, floor brokers, or associated persons and their customers. At present, the Commission's rules allow contract markets to allocate the costs of arbitration among parties thereto. Customers may seek reparations under section 14 of the Commodity Exchange Act notwithstanding their execution of a pre-dispute arbitration agreement with a futures commission merchant, floor broker or associated person. The Commission's rules similarly permit a customer to seek reparations when a futures commission merchant, floor broker or associated person notifies the customer of its intention to submit a dispute to arbitration, pursuant to a pre-dispute arbitration agreement. The Commission's rules also require that the agreement contain bold-faced language which advises the customer of his or her right of election.

The amendments which the Commission proposes to adopt would: (1) authorize the use of binding pre-dispute arbitration agreements which would effectively eliminate the right of a customer who voluntarily enters into such an agreement to seek reparations with respect to a dispute arising under the agreement; (2) provide the customer with a choice of arbitration forums; and (3) require contract markets to provide that their members will bear the costs of the proceedings, including additional costs associated with arbitration by a "mixed panel." The proposal is designed to promote the use of arbitration as a dispute-resolution alternative to reparations proceedings. The Commission also is seeking comment from interested persons with respect to whether its arbitration rules should be amended to address certain related issues.

DATE: Comments on the proposed rules should be submitted on or before February 12, 1982.

ADDRESS: Send comments to: Ms. Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581.

FOR FURTHER INFORMATION CONTACT: Wendy E. Robinson, Attorney, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581 (202) 254-8955.

SUPPLEMENTARY INFORMATION: Section 5a(11) of the Commodity Exchange Act, as amended ("Act"), 7 U.S.C. 7a(11) (1976), requires contract markets to establish fair and equitable procedures, through arbitration or otherwise, for the settlement of customers' claims up to $15,000 against the contract market's members or their employees, provided that the customers' use of such procedures is voluntary. Part 180 of the Commission's regulations, 17 CFR 180.1-180.6, establishes the minimum requirements for a fair and equitable procedure and otherwise implements section 5a(11) of the Act. In particular, § 180.2(a), 17 CFR 180.2(a), compels contract markets to provide customers with the choice of a decisionmaking body consisting of at least a majority of persons who have no association with the contract market, its members or their employees (commonly called a "mixed panel"). Contract market rules may provide that any costs incurred as a result of having a mixed panel may, in the panel's discretion, be assessed against the losing party or otherwise allocated among the parties. Similarly, under paragraph (e), 17 CFR 180.2(e), decisionmaking bodies (whether mixed panel or other) are permitted to assess or allocate general fees and costs attendant to the proceedings as they see fit.

Section 180.3(a) of 17 CFR 180.3(a), reiterates that a customer's use of a contract market's dispute settlement procedures must be voluntary, and further, states that those procedures must prohibit the use by any of the contract market's members of binding pre-dispute agreements except as prescribed by paragraph (b) of that rule.

Subparagraph (1) of § 180.3(b), 17 CFR 180.3(b)(1), provides that signing an agreement by which the customer agrees, prior to the time a claim or grievance arises, to submit such claim or grievance to any settlement procedure may not be made a condition for the customer to utilize the services of a futures commission merchant ("FCM"), floor broker or associated person ("AP"). In addition, the rule states that the pre-dispute agreement may not require the customer to waive the right to seek reparations pursuant to section 14 of the Act, 7 U.S.C. 18 (1976).[1] FCMs, floor brokers or APs must advise customers, when they intend to submit a dispute to arbitration, that the customer has 45 days to elect to institute reparations proceedings, and the agreement must advise the customer of this right of election.

In an FCM, floor broker or AP utilizes a pre-dispute agreement, it must contain

[1] Regulation § 180.3(b)(3), 17 CFR 180.3(b)(3).

bold-faced, cautionary language of the kind set forth in paragraph (b)(4) of § 180.3, 17 CFR 180.3(b)(4), which advises the customer that signing the agreement is voluntary, and informs him of the aforementioned right of election. Finally, § 180.3(b)(5), 17 CFR 180.3(b)(5), permits an FCM, floor broker or AP to use an agreement which specifies a forum for dispute resolution other than a contract market, provided the other forum's procedures comply with the Commission's standards prescribed by § 180.5.

Part 12 of the Commission's regulations, 17 CFR 12.1–12.102, implements section 14 of the Act and establishes guidelines for reparations proceedings. Section 12.21 of 17 CFR provides that any person complaining of a violation of the Act or regulations by a Commission registrant or person required to be registered may petition the Commission for a reparation award pursuant to a determination that a violation has occurred and that the complainant is entitled to damages sustained as a result of such violation. Paragraph (a) of that rule specifies the items which the complaint must contain, including a statement that no arbitration proceeding or civil court litigation based on the same facts and against the same parties has been instituted or is pending.[2] Although the rules do not explicitly require such action, it is the Commission's practice to stay reparations actions if the complainant indicates that other proceedings have been instituted or are pending.[3]

Background

When section 14 of the Act was adopted, Congress made clear that the reparations procedure was intended to supplement and be a form of dispute resolution complementary to the arbitration procedures required of, and established by, contract markets under section 5a(11) of the Act. As stated in the House Agriculture Committee Report, the Commission was to have ". . . original jurisdiction to consider all such complaints [arising from violations of the Act] which have not been resolved through the informal settlement procedure required of the contract markets and registered futures associations under the bill."[4] The Committee added that:

> "The procedure is intended as a separate remedy designed to *supplement* the informal 'settlement procedures' contemplated of the contract markets and registered futures associations which are required under other sections of the legislation (H.R. 13113, sections 209 and 301). The Committee expects the Commission to publish regulations, commensurate with these related provisions of the Act, to implement and coordinate these three types of grievance proceedings and their utilization and availability for resolution of disputes. It is the intent of the Committee that those complaints which can be resolved informally and settled without a formal proceeding through the mechanism contemplated of the contract market or a registered futures association should be encouraged to be resolved in such manner. (emphasis supplied) [5]

The Commission first implemented section 14 of the Act through the adoption of Part 12 of its regulations.[6] In its general statement with respect to those rules, the Commission noted the availability of other remedies: "These reparations rules provide the procedures by which a claimant may pursue one of the remedies the law will permit for the recovery of claims. The other available remedies are arbitration and the filing of a lawsuit in an appropriate state or federal court."[7] The Commission also stated that, "The rules establish procedures for persons with complaints against. . . floor brokers, futures commission merchants, commodity trading advisors, commodity pool operators and persons associated with a futures commission merchant or agent thereof, to get just, speedy and inexpensive adjudication of their claims."[8]

Subsequently, the Commission adopted the rules governing contract market arbitrations which comprise Part 180 of the regulations.[9] Originally, proposed § 180.3 would have prohibited the use of any agreement whereby a customer would be bound to a dispute settlement procedure prior to the time a claim or grievance arose. However, after careful consideration of the comments received, many of which were adverse to that prohibition, the Commission amended the proposed rule to permit the use of such agreements under prescribed conditions. In proposing the amendments, the Commission recognized that:

> * * * unless there is binding arbitration, futures commission merchants and other registered persons will have no recourse except to the courts for settling disputes with customers. This will increase the time in which a dispute may be unresolved and entail greater expense that will ultimately be borne by customers as a cost of doing business. For those reasons, the Commission believes that binding arbitration agreements are to be encouraged. Nevertheless, the Commission believes that it must establish requirements that will assure customers . . . do not *unknowingly or involuntarily waive rights* and remedies available under the Commodity Exchange Act. (emphasis supplied) 41 FR 27526 (July 2, 1976).

Thus, the Commission's primary concerns were that customers have a choice whether to enter a pre-dispute agreement, *i.e.*, that they would not be precluded from utilizing the FCM's floor broker's or AP's services should they decide not to sign such an agreement, and that customers have the opportunity to make an informed decision concerning the effects of entering a binding arbitration agreement. As a result, the amendments to the rule which the Commission ultimately adopted require that the agreement contain the bold-faced, cautionary language set forth in § 180.3(b)(4). [10]

Basis for Amendments

It is apparent that, during the time in which the Commission's rules have been effective, reparations proceedings have been instituted in many more instances than arbitration proceedings.[11] The

---

[2] § 12.21(a)(7), 17 CFR 12.21(a)(7).

[3] When the Commission adopted the rules governing reparations, it stated:

> "The Commission is of the opinion that the utilization of either an arbitration proceeding or civil court litigation is a waiver of the remedies available under the reparation procedures if the arbitration proceeding or court litigation is pursued to a final decision on the merits. In order to prevent the utilization of the reparation procedures while an arbitration proceeding or civil court litigation is pending, based on the same facts set forth and against the same party or parties named in a complaint, the Commission has determined to require the complainant to set forth in the complaint any pending arbitration proceeding or court litigation based on the facts set forth and against the same party or parties named in the complaint (§ 12.21(a)(7)). Should such an arbitration proceeding or court litigation be pending at the time the reparation complaint is filed with the Commission, the Commission will ordinarily stay the reparation proceeding pending a decision by the arbitration panel or court."

[9] 41 FR 27520 (July 2, 1976). Because of numerous objections to certain aspects of proposed regulation § 180.3, the Commission delayed adoption of the rule in order to propose additional amendments and seek public comment thereon. *See* 41 FR 27526 (July 2, 1976).

[10] In hearings conducted by the Commission on March 5, 1976, certain FCM's testified that they would refuse to deal with persons who would not sign pre-dispute arbitration agreements. Inasmuch as the Commission believed that such action would preclude a "voluntary" act by a customer, as required by section 5a(11) of the Act, it proposed the bold-faced language which must be included in the agreements to inform customers that signing them may not be made a condition for the utilization of the services of an FCM, floor broker or AP. *See* 41 FR 27526 (July 2, 1976).

[11] In 1980, a total of 56 customer/member arbitrations were filed with the four largest exchanges, while during fiscal 1980, the

Continued

conduct of reparations proceedings is only one of many regulatory functions assigned to the Commission under the Act. In executing its numerous other regulatory functions, the Commission must allocate the limited budget and manpower resources available for their performance. Many of the Commission's other functions are critical in nature and have consumed a substantial portion of those resources, thus contributing to a considerable backlog in pending reparations proceedings.

The Commission believes that the time delays and resulting escalation in costs both to customers and opposing parties are contrary to the stated purposes of its reparations procedures and Congress' view that reparations was to provide a supplement to, rather than a replacement for, dispute resolution through arbitration. As noted above, the Commission adopted Part 12 of the regulations in order to implement the Congressional objective that reparations provide a supplemental forum for the "just, speedy and inexpensive adjudication" of claims. Because the procedures are not fulfilling the purposes for which they were established, the Commission has determined that, consistent with the legislative history of sections 5a(11) and 14 of the Act, it may be appropriate to amend its regulations to encourage the use of arbitration as a less costly and time-consuming alternative.

Arbitration proceedings are available to customers of contract market members by reason of the section 5a(11) mandate which requires contract markets to provide a dispute settlement forum. All contract markets currently have the capability to conduct such proceedings. In addition, under § 180.3(b)(5), customer agreements used by FCMs, floor brokers and APs may specify forums other than contract markets, provided the procedures of those forums comply with § 180.5. At present, the American Arbitration Association, New York Stock Exchange, Inc. and National Association of Securities Dealers, Inc. provide possible alternatives to contract markets for dispute resolution through arbitration. Despite this prevalence of forums, as well as the shorter time periods and lower costs (if any) associated with arbitration, customers have overwhelming initiated reparations (or other litigative) proceedings rather than arbitration. This has resulted in reparations serving as a substitute for, rather than a supplement to, arbitration.

The Commission believes that the public interest would be served by encouraging greater use of the various arbitration alternatives and discouraging what has evolved into an over-utilization of reparations procedures. Toward this end, the Commission has identified certain factors which apparently have led customers to choose reparations over arbitration. Those factors include the additional costs associated with opting for a panel of "disinterested" arbitrators, and particularly, the cost of traveling to the exchange which would conduct the proceeding. In contrast, customers seeking reparations pay only an initial filing fee of $25.00;[12] and proceedings are conducted in relatively close and more convenient locations. Additionally, the administrative law judges who preside over reparations hearings are not associated with contract markets or their members and thus, may be perceived by customers as more impartial than the arbitration panels provided by exchanges.

On the basis of the comparable experience under reparations and contract market arbitration procedures to date, it appears that the overwhelming proportion of customers with claims against contract market members do not perceive current arbitration opportunities to offer the same degree of fairness and equity as reparations proceedings. The Commission is of the opinion that, in order to realize the Congressional objective of reparations as a supplemental dispute resolution vehicle, it may be necessary to elevate current arbitration standards to provide customers with advantages comparable to those which they currently perceive as available only in reparations. Promoting arbitration as a dispute resolution procedure in this manner would also further the favorable legislative and judicial policies toward that alternative.[13]

Description of Proposed Amendments

The Commission believes its objective of encouraging the use of arbitration proceedings in lieu of reparations can be accomplished primarily through facilitating the use of voluntary pre-dispute arbitration agreements. Accordingly, the bulk of the amendments proposed by the Commission relate to 180.3(b). First, a proposed amendment to § 180.3(b)(2) would replace the existing language which requires separate endorsement by the customer if the pre-dispute arbitration agreement is contained as a clause or clauses of a broader agreement. The rule as amended would require that the agreement containing the cautionary language be a separate document specifically endorsed by the customer.[14]

Second, in order that a customer would not be bound to arbitration is an unfavorable or distant forum without his or her consent, new paragraph (b)(3) would state that a pre-dispute agreement must advise the customer that he or she may select an arbitration forum when a dispute arises. The FCM, floor broker or AP would be required to supply the customer with a list of at least two forums and the rules of procedure of those forums within 10 days after the receipt of the customer's notice that he or she intends to submit a dispute to arbitration. Should an FCM, floor broker or AP seek to initiate proceedings, notice to that effect would have to be accompanied by the list of forums and their appliable rules. One of the possible forums on the list would have to be the contract market upon which the transaction giving rise to the dispute was executed or could have been executed, or a registered futures association designated by such contract market, unless the FCM or AP is not a member of such contract market.[15] Either the contract market, its designee or another organization on the list would have to provide the customer with the opportunity to choose a site for the arbitration proceeding from among several cities throughout the country, so as to allow the customer to select a reasonably convenient location, and each forum would be required to provide the customer with the opportunity to choose a "mixed panel". Of course, an FCM, floor broker, or AP would be free to include additional

---

Commission's Reparations Section, which processes complaints from persons who apply for reparations awards received 1101 complaints. Thus far in 1981, there have been a total of 40 customer/member arbitrations filed with the same four exchanges, while the Commission received 1417 complaints in fiscal 1981.

[12] 17 CFR 12.27. Overall, however, reparations may be more costly, since the Commission estimates that approximately 75% of the customers whose complaints are forwarded to oral hearings choose to be represented by attorneys. In contrast, preliminary responses from the exchanges indicate that approximately 18% of those who seek arbitration have counsel to present their claims.

[13] *See e.g.*, Section 3 of the Railway Labor Act, 45 U.S.C. 153 (1976); *Andrews v. Louisville and Nashville R. R. Co.*, 406 U.S. 271 (1972); *Wilko v. Swan*, 346 U.S. 427, 431–32 (1953); *Kimbrough v. Holiday Inn*, 478 F. Supp. 586 (E.D. Pa. 1979).

[14] In addition, the paragraph would be renumbered (b)(1) and the current (b)(1) would become (b)(2).

[15] If the FCM or AP is not a member of the contract market on which the transaction was or could have been executed, the FCM or AP would be required to list two alternative forums.

organizations on the list, provided their procedures comply with Commission § 180.5.

Third, regardless of whether a pre-dispute is entered into, as a means of limiting costs to customers the Commission proposes to amend § 180.2(a) to delete the current provision which permits the costs incurred as a result of electing a mixed panel to be allocated among the parties. In addition, the Commission would amend § 180.2(e) to require contract markets to adopt rules compelling members to bear the costs associated with conducting an arbitration proceeding, with the exception of any applicable initial filing fee. Those costs would include the expense, if any, of having a mixed panel arbitrate the dispute,[16] and other charges incurred in the arbitration.[17] To discourage customers from bringing frivolous claims, the amendment to § 180.2(e) would state that the arbitrators may assess fees against the customer upon a finding that he or she initiated the proceeding in bad faith. Proposed new paragraph (b)(4) of § 180.3 would require a pre-dispute arbitration agreement to reflect that costs associated with arbitration, as set forth in § 180.2(e), would be borne by the FCM, floor broker or AP.

Fourth, paragraph (b)(5) of § 180.3 would be entirely new, inasmuch as the 45-day right of election of the reparations remedy would be eliminated. It would state instead that a customer signing a pre-dispute agreement must be advised that he is waiving the right to seek reparations before the Commission on any claim which might arise under the agreement. In addition, the amendment would require that bold-faced language to that effect immediately precede the customer's signature.

Fifth, paragraph (b)(4) would become (b)(6) and be amended to reflect the above changes by incorporating some of the new requirements into the bold-faced language. In addition, the Commission proposes to reword the first two sentences of the first paragraph of boldface. The Commission believes that the change may evidence the benefits which may be obtained through arbitration and, thus, encourage customers to utilize arbitration rather than reparations.

Finally, § 12.21, which sets forth the information that must be included in a complaint filed pursuant to the reparations rules, would be amended to state explicitly the Commission's policy and the waiver effect of signing a pre-dispute arbitration agreement. Specifically, language would be added to the preamble of that rule to preclude a person who has voluntarily signed such an agreement from filing a complaint for reparations if the alleged violation occurred while the complainant was party to an effective pre-dispute arbitration agreement.

* * * * *

The Commission invites all interested persons to submit their views on the proposed amendments on or before February 12, 1982.

In proposing these amendments, the Commission also considered a number of other issues related to the initiation and conduct of arbitration proceedings. In particular, the Commission is concerned that customers who do not sign pre-dispute arbitration agreements may thereby forfeit the possible advantages which would be conferred by such agreements if the Commission adopts the proposed amendments. The Commission also notes that one attribute of reparations is an evolving body of law which may be relied upon by industry participants and customers in ascertaining their rights and responsibilities under the Act and the Commission's regulations. The Commission questions whether utilization of diverse arbitration forums could result in a non-uniform application of the commodities laws, regulations and applicable self-regulatory rules.

Accordingly, the Commission also requests that commentators address the following related issues: (1) whether § 180.3 should be amended further to provide that a customer would have the right to elect arbitration in a forum of his choice when a dispute arises, even though he or she did not enter into a pre-dispute agreement; (2) whether, in any event, the bold-faced paragraph set forth in § 180.3(b)(6) should contain a statement advising the customer that he or she may submit a dispute to arbitration at the time one arises notwithstanding the fact that he or she does not enter into a pre-dispute agreement; (3) whether the Commission's encouragement of arbitration as a forum for dispute resolution in lieu of reparations bears with it a risk that diverse arbitration forums will not uniformly apply the Act, Commission regulations or self-regulatory rules in making determinations of law; and (4) whether the Commission should propose or implement any additional rules or procedures designed to assure that such questions of law are uniformly determined and subsequently applied.

Finally, the Commission would appreciate any additional comments which would help it to identify other factors which may discourage the use of arbitration as a means of resolving commodities-related disputes, as well as any suggestions with respect to the Commission's goal of reducing the number of reparations proceedings and increasing the utilization of arbitration to resolve disputes.

Certification Under Regulatory Flexibility Act

The Regulatory Flexibility Act, Pub. L. No. 96-354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* ("RFA"), requires agencies to consider whether proposed rules will have a significant economic impact on a substantial number of small entities.[18] The Commission does not believe that these proposed changes will have a significant adverse impact on the parties affected. Rather, the proposal is intended to reduce costs to FCMs, floor brokers and APs by decreasing the number of reparations in which they participate and by minimizing the need for FCMs and APs to travel to the location of an exchange in order to participate in an arbitration proceeding. Costs associated with arbitration proceedings, therefore, should be significantly lower than those currently associated with reparations. Accordingly, pursuant to Section 3(a) of the RFA, 5 U.S.C. 605(b), the Chairman, on behalf of the Commission, certifies that these rules, if promulgated, will not have a significant economic impact on a substantial number of small entities. However, the Commission particularly invites comment from any small firms which believe that promulgation of these rules will have a significant economic impact upon them.

Pursuant to the authority in sections 5(a)(11), 8a(5) and 14 of the Commodity Exchange Act, as amended, 7 U.S.C. 4a(j), 12a(5), and 18, the Commission proposes to amend §§ 12.21, 180.2(e) and 180.3(b) of Chapter I of 17 CFR as follows:

---

[16] The Commission believes that the costs of a mixed panel would not be as significant a burden for FCMs, floor brokers or APs as for customers, particularly in view of the anticipated savings to such parties in costs associated with reparations.

[17] The Commission intends that "other charges" would encompass expenses involved in the initial arbitration but would not necessarily include fees which are personal to the customer (*e.g.*, attorney's fees, travel expenses) or generated after the proceeding has terminated (*e.g.*, copies of the record). *See* Commission regulation 180.2(d)(4), 17 CFR 180.2(d)(4).

[18] The Commission has recently published its proposed determination that neither a contract market nor a futures commission merchant is a "small entity" within the meaning of the RFA. 46 FR 23940 (April 29, 1981).

PART 12—RULES RELATING TO REPARATION PROCEEDINGS

1. Section 12.21 of Part 12 is proposed to be amended by revising the introductory paragraph as follows:

§ 12.21 Complaint.

Any person complaining of a violation of any provision of the Act or a rule, regulation or order thereunder by any person who is registered or required to be registered with the Commission under Sections 4d, 4e, 4k or 4m of the Act as a futures commission merchant, floor broker, person associated with a futures commission merchant or agent thereof, commodity trading advisor or commodity pool operator may, at any time within two years after the cause of action accrues, apply to the Commission for a reparation award by petitioning the Commission to determine the amount of damages, if any, to which the complainant is entitled as a result of the violation and to issue an order directing the offender to pay that amount to the complainant on or before a date fixed by the order; provided, however, that any person complaining of such violation may not apply to the Commission pursuant to this rule if the person complaining of the violation was a party to an effective aggreement which complies with § 180.3 of these regulations at the time the alleged violation occurred; and provided further than no such application shall be considered with respect to claims that arise prior to January 23, 1975.

* * * * *

PART 180—ARBITRATION OR OTHER DISPUTE SETTLEMENT PROCEDURES

2. Section 180.2 of Part 180 is proposed to be amended by revising paragraphs (a) and (e) as follows:

§ 180.2 Fair and equitable procedure.

* * * * *

(a) The procedure shall be objective and impartial. Customers must be provided with the choice of a panel or other decision-making body having at least a majority of the persons serving thereon who are not members or associated with any member of a contract market, or employee thereof, and who are not otherwise associated with a contract market. The rules of a contract market may, with proper notice, require the customer to request such a panel or other such decision-making body at the time of submission of the claim or grievance to the procedure. *Ex parte* contacts by any of the parties with members of any panel shall not be permitted.

* * * * *

(e) The procedure shall provide adequate notice to the parties in advance of a submission of a claim or grievance, or counterclaim (permitted by § 180.4 of this Part), of the nature and amount of any fees or costs which may be assessed against customers utilizing the procedure. Fees or costs shall be reasonable, particularly in relation to the complexity and amount of the claim or grievance or counterclaim, if any, presented. The rules of a contract market must provide that a contract market member which is a party to an arbitration proceeding will pay all costs, other than any applicable initial filing fee or as otherwise excluded under these regulations, unless the arbitrators in a particular case determine that the customer has acted in bad faith in initiating the proceeding.

* * * * *

3. Section 180.3 of Part 180 is proposed to be amended by revising paragraphs (b)(1) through (b)(5) and adding (b)(6) as follows:

§ 180.3 Voluntary procedure and compulsory payments.

* * * * *

(b) * * *

(1) The predispute arbitration agreement (agreement) shall be a separate document, which the customer must specifically endorse, and contain the cautionary language and other provisions specified in this section;

(2) Signing the agreement may not be made a condition for the customer to utilize the services offered by the futures commission merchant, floor broker or associated person;

(3) The agreement must advise the customer that, at such time as he or she may notify the futures commission merchant, floor broker or associated person that he or she intends to submit a claim to arbitration, or at such time as the futures commission merchant, floor broker, or associated person notifies the customer of its intent to submit a claim to arbitration, the customer will have the opportunity to elect a qualified forum for conducting the proceeding. Within 10 business days after receipt of such notice from the customer, or at the time the futures commission merchant, floor broker or associated person so notifies the customer, the futures commission merchant, floor broker or associated person must provide the customer with a list of two or more organizations whose procedures qualify it to conduct arbitrations in accordance with the requirements of § 180.5 of this Part, together with a copy of the rules of each forum. The list must include: (A) the contract market, if available, upon which the transaction giving rise to the dispute was executed or could have been executed or a registered futures association designated by such contract market; and (B) at least one other organization which will provide the customer with the opportunity to select the location of the arbitration proceeding from among several major cities in diverse geographic regions and which will provide the customer with the choice of a panel or other decision-making body having at least a majority of persons serving thereon who are not members or associated with a member of any contract market or employee thereof, and who are not otherwise associated with any contract market (mixed panel).

(4) The agreement must acknowledge that the futures commission merchant, floor broker or associated person will pay all costs of the forum which conducts an arbitration proceeding under this agreement, other than any applicable initial filing fee, including those costs associated with providing a mixed panel, unless the arbitrators in a particular case determine that the customer has acted in bad faith in initiating the proceeding.

(5) The customer must be advised that by signing the agreement, he or she will waive the right to seek reparations under Section 14 of the Act and Part 12 of these regulations. Cautionary language to that effect must appear in boldface as set forth below and immediately precede the line provided for the customer's signature.

(6) The agreement must include cautionary language, to the following effect:

THE COMMODITY FUTURES TRADING COMMISSION (CFTC) RECOGNIZES THAT THE OPPORTUNITY TO SETTLE DISPUTES BY ARBITRATION MAY IN SOME CASES PROVIDE MANY BENEFITS TO CUSTOMERS, INCLUDING THE ABILITY TO OBTAIN EXPEDITIOUS RESOLUTION OF DISPUTES WITHOUT INCURRING SUBSTANTIAL COSTS. THE CFTC REQUIRES, HOWEVER, THAT EACH CUSTOMER INDIVIDUALLY EXAMINE THE RELATIVE MERITS OF ARBITRATION AND THAT YOUR CONSENT TO THIS ARBITRATION AGREEMENT BE VOLUNTARY. YOU NEED NOT SIGN THIS AGREEMENT TO OPEN AN ACCOUNT WITH [NAME]. SEE 17 CFR 180.1–180.6.

BY SIGNING THIS AGREEMENT, YOU MAY BE WAIVING YOUR RIGHT TO SUE IN A COURT OF LAW. FURTHERMORE, BY SIGNING THIS AGREEMENT YOU ARE WAIVING YOUR RIGHT TO ELECT TO PETITION

THE CFTC TO INSTITUTE REPARATIONS PROCEEDINGS UNDER SECTION 14 OF THE COMMODITY EXCHANGE ACT WITH RESPECT TO ANY DISPUTE WHICH MAY BE ARBITRATED PURSUANT TO THIS AGREEMENT.

_____, Customer

BILLING CODE 6351-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[FCC 81-483]

American Telephone & Telegraph Co.; Petition for Waiver of a Certain Section of the Commission's Rules

AGENCY: Federal Communications Commission.

ACTION: Order denying petition for waiver.

SUMMARY: Commission denies American Telephone and Telegraph's petition for waiver of § 64.702 of the Commission's Rules, which allows AT&T to offer enhanced telecommunications services only through a separate corporate entity. The Commission finds that AT&T has failed to meet its burden in showing that denial of the requested waiver will foreclose the availability of Custom Calling Services II or impose unreasonable costs upon consumers in the form of higher prices for the services. This action requires AT&T to provide Custom Calling Services II only through a separate corporate entity.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Steven A. Zecola, Policy and Program Planning Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554. Telephone No. (202) 632-9342.

SUPPLEMENTARY INFORMATION:

Adopted: October 7, 1981.

Released: October 20, 1981.

By the Commission: Commissioners Quello and Fogarty concurring in the result.

I. Introduction

1. We have before us a petition for waiver of § 64.702 of the Commission's Rules, 47 CFR 64.702 [46 FR 19852; April 1, 1981; 46 FR 32039, June 19, 1981], which allows AT&T to offer enhanced telecommunications services only through a separate corporate entity. On behalf of the Bell System Operating Companies (BOCs) AT&T seeks permission for the BOCs to provide Custom Calling Services II (CCS–II), directly to their customers, instead of providing it through a separate corporation as required by § 64.702.[1] AT&T describes CCS–II telephone services as "call answering and advance calling, together with an optional remote access feature." AT&T Petition at 3. Call answering permits the automatic answering of simultaneous incoming calls to a customer's telephone when the customer's line is busy or, after a specified number of rings, when the customer does not answer. Call answering also permits callers to leave recorded messages for later retrieval by the customer. The second feature, advance calling, permits customers to record messages for subsequent transmittal to designated telephones at specified or non-specified times. The third feature, remote access, is described as an optional adjunct to call answering and advance calling which permits a CCS–II customer to access the other two features from Touch Tone service equipped telephones at distant locations. AT&T does not intend the waiver to allow provision of data services. It notes that "as presently structured, CCS–II services are not capable of reliably storing and transmitting digital data." AT&T Petition at 14.

2. AT&T waiver request is limited to the offering of CCS–II at voice storage systems (VSS) within the United States at which VSS equipment is installed on or prior to December 31, 1989. Additional CCS–II equipment may be added after that date to provide service and meet customer demand but only from those locations where equipment had been installed on or prior to December 3, 1989. The duration of the requested waiver is the technological life of the equipment, which AT&T estimates at fifteen years. AT&T's best estimate of the duration of the waiver, therefore, is until December 31, 2004.

3. Fifteen parties filed comments on the CCS–II Waiver Petition. AT&T and four other parties filed reply comments. ANPA's Opposition was filed three days after the deadline for comments and was accompanied by a Motion for Acceptance of Late-Filed Comments. There have been no objections to ANPA'S motion and we hereby grant it. Dusty's Answering Service, Inc. and Delphi Communications Corp. have filed supplemental comments which were received two and two and one-half months, respectively, after the authorized pleading cycle. AT&T has filed a motion to deny and strike these late pleadings. Dusty's Answering and Delphi responded, in part, to arguments first raised in AT&T's Reply and their late-filed pleadings represent the only opportunity these parties had to respond to AT&T's new arguments. In order to permit full and fail participation in this proceeding, we deny AT&T's motion. In so doing, however, we wish to make it clear that we did not find it necessary to rely upon the late filed pleadings in reaching our decision and we do not see that any valid purpose will be served by further extending the reply cycle, as AT&T has requested. We believe the record is ripe for disposition. Appendix A contains a list of all parties participating in this proceeding as well as the acronyms by which certain parties are identified throughout this order.

4. For the reasons explained below, we have concluded that AT&T's request for waiver must be denied.

Background

5. In the **Final Decision** in the *Second Computer Inquiry* we divided telecommunications services into two categories, "basic" services (which were to be subject to Title II regulation), and "enhanced" services (which were not to be subject to regulation). Basic services were defined as the common carrier offering of transmission capacity for the movement of information. Enhanced services were defined as services:

> Offered over common carrier transmission facilities used in interstate communications, which employ computer processing applications that act on the format, content, code, protocol or similar aspects of the subscriber's transmitted information; provide the subscriber additional, different, or restructured information; or involve subscriber interaction with stored information." [47 CFR 64.702(a), 77 FCC 2d at 498].

This demarcation has several benefits. Foremost is the fact that it frees the more dynamic enhanced services field from any possible inhibitory effects of regulation, while at the same time it provides for continued public interest regulation of the basic communications services upon which our national telecommunications industry is founded.

6. Having established in the *Final Decision* a firm boundary separating regulated basic services from

[1] *See Amendment of Section 64.702 of the Commission's Rules and Regulations (Second Computer Inquiry)* 77 FCC 2d 384 (*Final Decision*), *on reconsideration*, 84 FCC 2d 50 (*Reconsideration order*), *appeal pending sub nom. C.C.I.A* v. *F.C.C.*, Case No. 80-1471 (D.C. Cir. 1980).

unregulated enhanced services, we preceeded to address the mechanism through which carriers might offer these services to customers. We required that AT&T and GTE, because of their ability to subsidize non-Title II activity with monopoly generated revenues, offer enhanced services only through a separate subsidiary.[2]

7. The *Final Decision* also discussed the contention of several parties that the Commission's concerns regarding anticompetitive conduct could be alleviated by implementation of an adequate accounting mechanism. Although we recognized accounting to be a "fundamental regulatory tool" used in the fulfillment of our statutory responsibilities, we noted that accounting was "by no means . . . a substitute for structural separation." *Id.*, para. 210 Rather, we viewed "separation and accounting as part and parcel of a single regulatory mechanism." *Id.* We stated that

> Where a carrier has the incentive and ability to engage in sustained cross-subsidization, or predatory pricing, accounting may be employed to assist in the identification of such practices, but it cannot prevent the misallocation of joint and common costs associated with the provision of basic and enhanced services if provided by the same entity. On the other hand, the separation requirement serves as a structural check on the proper allocation of costs between basic and enhanced services. [*Id.*, para. 210].

We also pointed out that, in our view, the separate subsidiary requirement was the only practical means of obligating AT&T to offer competitors equality of interconnection to basic transmission facilities. *Id.* at paras. 229, 231.

8. On *Reconsideration* in the *Second Computer Inquiry* we affirmed the basic/enhanced dichotomy. *Id.*, para. 12. We also addressed specifically the question of whether storage and retrieval information services which did not involve modification of the stored information should be classified as basic rather than enhanced. These services, we stated, are dependent upon the availability of common carrier facilities, but "the end product is not the offering of a common carrier communications service." *Id.* In addition, we asserted that the inclusion of storage and retrieval services within the basic category would "destory any meaningful regulatory boundary that otherwise exists and unduly expand the common carrier offering beyond one of providing the appropriate communications pipeline for the transmission of information to services in which communications is merely a factor of production." *Id.*

9. In this context we rejected arguments by AT&T that CCS-II should be considered a basic service. We observed that the advanced calling and call answering features of CCS–II represented the offering of an "information retrieval service" and as such could not be fairly classified as a basic service. *Id.* at para. 16. Since CCS–II was an enhanced service, we found that it shoud only be offered through a separate subsidiary.

10. AT&T further argued, however, that even if CCS–II were held not to be a common carrier service, the Commission should still permit it to "* * * be provided as part of an integrated basic transmission network on the theory that * * * [CCS–II] must be offered in the network to be efficiently offered or ubiquitously available." *Id.*, para. 18. We rejected this argument as well. We stated that the issue "* * * is whether compelling reasons exist for allowing various services, even though enhanced, to be offered through network computer facilities of those carriers that would otherwise be subject to the separate subsidiary requirement" and that "[b]ased on the record in this proceeding * * *, evidence has not been presented that warrants such a determination." *Id.* We noted that:

> To the contrary, parties such as Delphi Communications Corp., IBM and CBEMA demonstrate that current voice storage services, and specifically AT&T's Custom Calling II features, actually employ entirely separate computer facilities which need not be colocated with the carrier's central office facilities to be provided or ubiquitously available on an economic basis. [*Id.*]

11. Nevertheless, we did recognize that circumstances might arise in which strict adherence to structural separation might foreclose the availability to consumers of certain enhanced services if, for example, state of the art technology dictates that only through the use of network facilities could the carrier provide a given enhanced service, or if complying with the separate subsidiary requirement results in the imposition of unreasonable costs upon consumers. *Id.*, para. 19. In the event that such situations arose, we were prepared to consider waiver of the separation requirement "for a specific service" after notice and opportunity for comment. *Id.*, para. 19. We noted, in addition, that in considering grant of a waiver we would need to determine whether the offering of services through the subsidiary would impose upon consumers unreasonable costs which were not counterbalanced by the benefits which we believe separation will afford.

12. It was also made clear that a party seeking waiver of the separation requirement carried the burden of demonstrating that the public interest concerns which gave rise to the structural separation requirement were outweighed in the individual case. We stated that:

> Petitioners carry the burden of demonstrating that concerns about any cross-subsidization or other anticompetitive effects which may arise from grant of a waiver are outweighed by the possibility of imposition of unreasonable costs upon consumers, or unavailability of an enhanced service, if the waiver is not granted. As part of a waiver request, a petitioner will be expected to provide detailed economic and technical information to support its assertions. [*Id.* at para. 21].

III. Discussion

A. The Standards for Waiver

13. Any applicant for waiver of an agency rule faces a "high hurdle" when seeking to avoid the proscription of a generally applicable determination. *WAIT Radio* v. *FCC*, 418 F. 2d 1153, 1157 (D.C. Cir. 1969). The applicant must clearly demonstrate that the general rule is not in the public interest when applied to its particular case and that the grant of the waiver will not undermine the public policy served by the rule. *Id.* In those instances in which this agency acts by rule rather than case-by-case adjudication, it does so in the expectation that all parties subject to the rule will conform to its dictates.

14. Regulatory uncertainty is detrimental to the progressive evolution of the telecommunication marketplace. Numerous firms invest in development and production of products and services based upon their understanding of this agency's regulatory policies.[3] Expectations should be disturbed only upon a clear showing of changed conditions, in which case the agency may alter its rule, or where a party is able to demonstrate special circumstances, waive the rule.

15. Moreover, where waiver is found to be in the public interest, it is generally expected that the waiver will not be so broad as to eviscerate the rule.

[2] On reconsideration we exempted GTE from the structural separation requirements because we found the benefits of "maintaining the separate subsidiary requirements for carriers other than AT&T [do] not outweigh other public considerations" 84 FCC 2d at para. 71.

[3] Regulatory intervention in the marketplace inevitably influences the ability of market entrants to compete with each other. Indeed, regulatory decisions must account for competitive effects. *See McLean Trucking Co.* v. *United States*, 321 U.S. 67 (1944); *Northern Natural Gas* v. *FPC*, 399 F. 2d 953 (D.C. Cir. 1963); *United States* v. *FCC*, 652 F. 2d 72 (D.C. Cir. 1980).

Rather, the waiver must be tailored to it the specific contours of the exceptional circumstances.

16. The general stringency of the waiver standard is echoed in the specific requirements for waiver adopted in our *Computer II* decision. We made it clear in that decision that a carrier seeking a waiver from the separation mandated in *Computer II* must carry the burden of showing that the waiver is in the public interest by demonstrating—in specific detail—that our "concerns about cross-subsidization or other anticompetitive affects * * * are outweighed by the possibility of imposition of unreasonable costs upon consumers or unavailability of an enhanced service * * *." *Reconsideration*, para. 21.

17. In evaluating AT&T's case for a waiver, we are struck by the many difficulties it presents. First, we are troubled by the apparent breadth of the waiver sought. AT&T's request here is not for a narrowly tailored waiver intended to make available a specialized service to a limited class of customers, but rather for an exception which would permit AT&T to provide every basic transmission customer voice storage enhanced services until the year 2004. Although AT&T has not enlightened us on this point, it may be expected that the revenues for CCS–II will eventually be quite large. Additionally, once we allow a waiver as extensive as that requested by AT&T in this case, the economics of providing any enhanced service through a separate subsidiary will be altered. Specifically, the marginal costs of providing additional enhanced services using some form of voice storage within the basic network would be decreased and the net cost of providing such service outside the basic network would be increased. Thus, the grant of a waiver here would put us on the proverbial "slippery slope" and create considerable uncertainty as to what new enhanced services we will allow to be provided through the basic network.

18. Second, once enhanced services are introduced into the basic network we have no way of effectively policing against possible cross-subsidization between such enhanced services and the basic monopoly services provided by AT&T. As we have shown, it has been this Commission's consistent view—and that view, if anything, is reinforced by the record in this proceeding—that accounting regulations are inadequate by themselves to guard against possible cross-subsidy between AT&T's regulated and unregulated services.

19. The fact that AT&T's request is limited to voice services is of small comfort. We have found in our order on *Reconsideration* that CCS–II may be used for data services now, and we have also determined, after considerable investigation, that any distinction between voice and non-voice services is illusory. *Id.* at para. 14. We certainly do not intend to prevent CCS–II customers from employing their facilities to the fullest extent. It would be extremely inefficient to impose an artificial barrier on the use of CCS–II facilities which would result in an irrational market segmentation. Although AT&T states that CCS–II is not capable "at the present time" of being used effectively for data purposes, it is possible that at some future date it can be modified to attain such capability. If that occurs we could not automatically preclude users from employing it for data purposes. Moreover, even if the waiver granted AT&T would specifically preclude data use, we cannot exclude the possibility that AT&T would later seek an additional waiver to accommodate newly found versatility which commenting parties claim is present in the system now. In such an event, a decision on the extension of the waiver must be based on a fresh examination of the public interest rather than on any prior promise or claim by AT&T in this proceeding.

20. Third, the structural separation of the Computer Rule was designed in part to require AT&T to offer equal interconnection arrangements to competing vendors. It was our view that efficient consumer utilization of the telephone network would be maximized if enhanced service vendors were not impeded in achieving network interconnection, or forced to incur additional interconnection costs beyond those incurred by the carrier's own subsidiary. Our objective was to give the carrier the incentive to provide an underlying facility which all enhanced service vendors could utilize equally. Absence of such an adequate facility or equality of interconnection would bias the unregulated enhanced service market in favor of the regulated carrier. We believe that grant of the waiver will in all likelihood reduce or eliminate AT&T's incentive to provide reasonable interconnection. The carrier, in fact, would be benefited if it were able to decline or delay equal interconnection to competitors while its own service established a market position. We cannot ignore the fact that the grant of a waiver under the circumstances present here would make it more difficult for us to meet our responsibility to insure interconnection to enhanced service vendors on an evenhanded basis.

21. Fourth, it is clear that we have previously addressed the question which AT&T raises in this proceeding. We have explicitly rejected the notion that CCS–II should be provided as part of the basic network. If we are to reverse our previous judgment it must be on the basis of either new evidence or a reinterpretation of our existing standards. In this case, this is an especially heavy burden because, although eighteen months old, the rule has not been given an opportunity to work. We are certainly not dealing with one of those instances in which a regulation has been outmoded by technological or economic change, and we are not compelled to make exception to it in order that users not be deprived of a new service. Indeed, as is clear from the above discussion, our regulatory plan for enhanced services was adopted with CCS–II in full view and contemplation.

22. As we show in the following sections, AT&T has not met the stringent test for waiver required in this case. It has not demonstrated that the application of the separation rules will result in unreasonable costs to consumers because of technical impossibility or economic infeasibility as so recently enunciated in our *Computer II* decision.

B. Technical Showing

1. AT&T's Contentions

23. AT&T asserts that its technical showings alone are sufficient to satisfy our waiver criteria. It notes that as its CCS–II services are now designed they rely upon an integrated configuration of a Voice Storage System (VSS) with its Electronic Switching System (ESS). AT&T represents that it is technically impossible for a separate subsidiary to offer the CCS–II package as it is currently designed. AT&T concedes that redesign of the system to permit a separate subsidiary or other vendors to provide such services is feasible, but states that "these entities could not independently provide a total service." AT&T Petition, p. 18. Under existing technology, the subsidiary or a vendor must still rely in part upon the Bell Operating Companies (BOCs) to provide these services because "[t]he ESS equipment, which is an inextricable part of the BOCs' network, performs essential functions in the provision of all CCS–II type services." *Id.*, p. 18. AT&T claims that, if the system were redesigned so that the separate subsidiary or other vendors could avail

themselves of the network components now required to offer CCS–II type services, the resulting services would be different from those which AT&T would provide under the requested waiver. The difference would be that "[c]all answering and advance calling would no longer be available on a completely usage-sensitive and casual basis, tailored to the needs of the light user." *Id.*, p. 19.

24. While AT&T has conceded that the CCS–II package could be offered through a separate subsidiary or other vendor, it claims that the system redesign required to accommodate such non-integrated operation "would be costly and time consuming, resulting in a delay of the introduction and availability of CCS–II-like services for a minimum of three years." AT&T Petition, p. 22. AT&T then lists the changes required within the ESS. The current CCS–II dialing plan would have to be augmented to include multiple vendor identification numbers and at least one additional access code. Central office line translations would have to be modified to include the identification number of the separate subsidiary or other vendor authorized by a customer for call answering. New translations would have to be developed, programmed and implemented to accommodate the separate subsidiary and other vendors. The ESS equipment would have to be programmed with additional software safeguards that insure that changes would be made in a customer's line translations only by the customer or an authorized vendor.

25. Other changes include augmentation of the ESS equipment to provide it with the capability of recording CCS–II transactions; hardware or software changes or both in the ESS equipment to verify that the vendor system properly returns answer supervision; the revision of ESS screening functions; and the development and implementation of new procedures for backing up and validating recent changes in customer line translations. Trunk testing routines would also have to be revised, and a new service order process, involving the development and implementation of additional ESS equipment software, would have to be formulated for adding, subtracting, and changing vendor related information in the ESS office. Finally, the current customer service order process would have to substantially modified.

26. AT&T states that the VSS also would have to undergo redesign. The modifications identified by AT&T consist of: augmenting the VSS translation function to enable the VSS to retain complete authorized customer service profiles and billing information; enhancing the VSS billing capacity to enable the separate subsidiary to recover charges from customers after it has been billed by the BOC for basic services; and reprogramming the VSS to permit acceptance of customer service orders. The VSS would also require alternate support systems and modified trunk testing procedures.

27. Because ESS software changes "have already been committed through the second quarter of 1984," AT&T estimates that it would require a minimum of three years to develop a system plan for non-integrated provision of voice storage and retrieval services. AT&T warns that this timetable may be optimistic. For significant software development it would need at least one additional year. AT&T estimates that the costs to the BOCs for required redesign of the ESS equipment would be $22.5 million, and to the separate subsidiary $6.5 million for redesign of the VSS equipment.

28. In its Petition, AT&T states that installation and testing of CCS–II equipment has been completed in Philadelphia, Dallas, New York City and Chicago by the Bell Operating Companies which serve these areas. Each operating company, according to the petition, has invested between $2–3 million for equipment and $250,000 for initial deployment. AT&T Petition, pp. 11–12. CCS–II equipment for use by operating companies in Indianapolis, Cleveland and Milwaukee is in various stages of manufacture and installation. AT&T states that these companies will incur cancellation charges imposed by the manufacturer, Western Electric, if the orders are not ultimately fulfilled. *Id.*, p. 12. In addition, Bell of Pennsylvania deferred the filing of a tariff for CCS–II service pending resolution of this proceeding.

29. AT&T has also asked that, if the waiver is granted, we clarify the status of state tariff requirements in the case of an enhanced service offered through the network by the BOCs pursuant to Commission waiver. Since we are not granting the waiver sought, it is not necessary for us to address the issue of state tariff jurisdiction for enhanced services at this time.

2. Comments of Opposing Parties

30. Several parties addressed AT&T's technical showing. The comments provide considerable detailed criticisms of each of AT&T's allegations. Most fundamentally, the parties question the technical criteria upon which AT&T seeks a waiver. For example, CBEMA submits that AT&T has "confuse[d] the term 'state-of-the-art technology' with the state of design of the CCS–II service as implemented by AT&T." CBEMA Opposition, p. 31.[4] Ford Industries, Inc. points out that the "petition is premised upon the mistaken view that the technology relevant to information storage and retrieval is static," with "AT&T bas[ing] its argument for a waiver entirely upon 'existing technical conditions'." Ford Industries Opposition, p. 3. IBM represents that, "[i]n the present case, 'state-of-the-art technology' is capable of modifying network ESS equipment so that CCS–II type services can be provided by an FSS [fully separated subsidiary] and by independent vendors." IBM Opposition, p. 13. Xerox notes that "the Petition acknowledges that no *technical* difficulty precludes the offering of CCS–II in a separated, competitive environment." Xerox Comments, p. 4 (emphasis in original).

31. The parties argue further that AT&T's previous discretionary decisions should not constitute the basis for waiver. Exxon claims that "AT&T unabashedly has designed the ESS to accommodate only its VSS service and has set the stage for denying comparable access to competitors." Exxon Comments, p. 12. ECS Telecommunications, based upon the attached affidavit of Robert J. Nacon, asserts that "[w]hile this Commission was actively considering a refinement of the basic service/enhanced service dichotomy in the Computer II Inquiry, Bell Laboratories, AT&T, and Western Electric were busily designing and engineering the CCS–II system to function exclusively within the telephone network so that prospective competitors could not obtain the substantial technological features and interfaces enjoyed by CCS–II in a monopoly environment." ECS Motion, p. 8. SPCC states that AT&T "[s]imply * * * made imprudent design decisions." SPCC Comments, p. 20. In short, the parties contend that the waiver should not be granted merely because the necessary technology has not yet appropriately been incorporated into AT&T's system configuration.

32. As described above, AT&T contends that the redesign effort now required to provide CCS–II through a separate subsidiary would be costly and time-consuming, resulting in a delay of

[4] One of the conditions under which the Commission would consider granting a waiver is that if "state-of-the-art technology dictates that only through the use of network facilities could the carrier provide a given enhanced service." 84 FCC 2d 50, 57 (1980).

the introduction and availability of CCS–II like services for a minimum of three years. To support this claim, AT&T lists all the changes to the ESS and VSS required to complete the redesign effort. Several parties dispute AT&T's contention and two, SPCC and ECS, challenge each of the redesign modifications, claiming that the complexity of each has been grossly exaggerated.[5] Because it is difficult to comprehend the meaning of these criticisms without reviewing AT&T's assertions, we will repeat the redesign efforts that AT&T claims are necessary as we summarize the parties' objections concerning such efforts.

33. AT&T asserts that the current CCS–II dialing plan would have to be augmented to include multiple vendor identification numbers and at least one additional access code. In response to this, ECS notes that a new sophisticated digit interpretation program can be substituted for AT&T's proposed numbering access plan. SPCC says that only casual customers and very small businesses without PBXs will require vendor identification digits. This means that it is relatively easy to employ a two-digit code to identify a vendor or AT&T's subsidiary. The parties feel these factors refute AT&T's allegation that substantial expansion of the ESS digit reception and analysis program is necessary.

34. AT&T also claims that central office line translations would have to be modified to include the identification number of its separate subsidiary or other vendor authorized by a customer for call answering. In response, ECS states the ESS computer program is already capable of interfacing with multiple VSS systems and keeping track of which customer goes to which system. SPCC submits that only a two-digit vendor code needs to be provided in the customer's line translation. Thus the parties opposing the waiver believe that any changes to central office line translations would be minimal.

35. AT&T says new translations would have to be developed, programmed and implemented to accommodate the separate subsidiary and other vendors. ECS, however, counsels that any ESS system has the capability of keeping track of hundreds of separate groups of facilities between central offices today. SPCC says that the connection from an ESS office to the vendor can be made using Direct Inward Dialing. The parties therefore consider AT&T's allegation of the need for new translations to accommodate the separate subsidiary and other vendors to be without merit.

36. AT&T states the ESS equipment would have to be programmed with additional software safeguards that insure that changes would be made in a customer's line translations only by the customer or an authorized vendor. ECS claims that the magnitude of the job of providing additional software safeguards in the ESS for security purposes is less than AT&T implies, while SPCC believes that a two-digit vendor identification code would obviate the need for such changes.

37. AT&T also alleges the ESS equipment would have to be augmented with the capability of recording CCS–II transactions. In contrast to this position, ECS asserts that augmenting the ESS to provide a capability for recording CCS–II transactions is unnecessary. SPCC claims that the billing that BOCs must complete is for leased lines, rendering any requirement for detailed transaction information null.

38. Continuing the list of modifications to the ESS which it asserts would be needed to provide CCS–II through a separate subsidiary, AT&T states that hardware or software changes or both would be required in the ESS equipment to verify that the vendor system properly returns answer supervision. ECS claims, however, that hardware and software changes necessary in the ESS equipment to verify that the vendor system properly returns answer supervision represent a trivial matter that requires only a positive signal from the vendor before it places the call in the talking state. SPCC states no such changes are necessary because the Direct Inward Dialing trunks would provide the same signaling and answer supervision that is currently available.

39. In response to AT&T's claim that ESS screening functions would require revision, ECS proffers that such revision is an insignificant modification which actually would result in a small savings. SPCC questions whether revision is even necessary because advance calls need only be treated as regular direct distance dialing calls by the BOC.

40. According to AT&T, new procedures would have to be developed and implemented for backing up and validating recent changes in customer line translations. ECS submits that it is perfectly feasible that the vendor and the separate subsidiary provide the necessary backup information for their respective customers, if AT&T lost this information due to a system failure. SPCC notes that changes can be made to a vendor's software to enable the same procedure for retrieving backup data as currently exists in AT&T's system design. Thus, the parties dispute the contention that additional expenses will be incurred by the BOCs for developing and implementing new procedures to validate recent changes in customer line translations.

41. AT&T also foresees modifications to the service systems underlying provision of CCS–II through a separate subsidiary. First, it claims that trunk testing routines would have to be revised. ECS asserts that alleged revisions to the trunk testing routines would result in a division of responsibility for trunk testing that would not be significantly different from that which now exists between AT&T and the independent telephone companies. SPCC says no trunk testing revisions are needed since trunk testing routines already exist for leased Direct Inward Dialing trunks, and these trunks can be used effectively to interconnect vendors to the ESS.

42. Additionally, according to AT&T, it would not only have to formulate a new service order process, involving the development and implementation of additional ESS software for adding, subtracting and changing vendor-related information, but also would have to modify substantially the current customer order process. ECS, however, states that a new service order process can easily be provided for by ESS generic computer programs which allow for easy addition, deletion and feature changes to trunk group translation. SPCC submits no new service order process is necessary since AT&T already has in place an order process for leasing Direct Inward Dialing trunks. Responding to AT&T's claim that substantial modification to the customer service order process is necessary, ECS argues that all of the necessary customer service information would come automatically from the vendors directly to the ESS over the interconnecting trunk facilities. SPCC finds no changes are necessary because call answering services can be initiated and terminated by the customer using a procedure similar to the existing one.

43. AT&T states that the VSS also would have to undergo redesign. The modifications identified by AT&T consist of: augmenting VSS translation functions to enable the VSS to retain complete authorized customer service profiles and billing information; enhancing the VSS billing capacity to

[5] Other parties also contest AT&T allegations. CBEMA, for example, asserts that some of the modifications require no more than implementation of the system used for CCS–I. CBEMA Opposition, p. 31–36. Delphi disputes in great detail many of the modifications that AT&T claims are necessary for a multiple vendor environment and concludes that AT&T claims are impossible to accept.

enable the separate subsidiary to recover charges from customers after it has been billed by the BOC for basic services; and reprogramming the VSS to permit acceptance of customer service orders. The VSS also would require alternate support systems and modified trunk testing procedures.

44. With respect to AT&T's allegations of the changes necessary to the VSS, ECS notes that a simple microcomputer can provide the ability to keep track of necessary billing and service profiles. ECS finds no change in the VSS equipment is required for billing capability. The billing can be performed with the same microcomputer referred to above. ECS submits that the new system required to interface with various network support systems are a necessary cost for all competitors. It says this function is subsidized under the current operations. ECS admits that trunk testing procedures may need to be improved for subsidiary and vendor access to the BOC switching equipment, but says that outside entities can help identify and correct malfunctions, thereby actually simplifying trouble reporting procedures. Regarding the alleged modification of VSS equipment to accept customer service orders, ECS observes that no change in the design of the VSS is necessary if such orders are entered into an offline computer which interfaces with the VSS equipment.

45. More generally, ECS believes that additional costs for VSS equipment changes represent part of a normal operation of any competitive call answering service organization. SPCC agrees, noting that these additional costs arise totally as a consequence of conscious design decisions by AT&T.

46. Several parties challenge AT&T's contentions regarding the time and cost required to redesign the VSS and ESS equipment on other grounds. Delphi notes that the estimated redesign costs "equal the total R & D costs for the initial development of CCS–II," even though "none of the changes involved appear to call for substantial departures from existing technology." Delphi Opposition, p. 30. SPCC submits that "the three-year time period AT&T asserts is required is not a function of engineering or programming, but rather it is a function of AT&T's planning and scheduling process." SPCC Comments, p. 23. Finally, ECS states that "the great bulk of the design and engineering of CCS–II occurred between 1977 and 1979—a two year period—and there is simply no rational explanation or support for the assumption that modest softward changes (see Petition at page 28) will somehow require three more years." ECS Motion, p. 15.

47. The parties also attempt to negate AT&T's appeal for favorable treatment of its Petition on equity grounds, that is, because of the magnitude of the redesign costs. SPCC says these redesign costs pale "when compared with the amounts AT&T can be expected to earn." SPCC Comments, p. 34. Delphi notes that it "alone has invested at least as much in the development of DELTA as AT&T has invested in CCS–II." Delphi Opposition, p. 6.

48. The final issue in AT&T's technical showing concerns service to the casual user. Several parties challenge AT&T contention that the casual user will not be served if its Petition is denied. Delphi, while noting that "AT&T's ability to accommodate 'casual' users depends upon less genuine service economies than upon . . . inter-service subsidies," claims that "a competitive offering, such as DELTA, can serve casual users even under existing technology, and that billing and credit procedures could be optimized if competing vendors have access to ESS identification functions and to AMARS [Automatic Message Accounting Recording System.]" Delphi Opposition, pp. 27, 43. CBEMA argues that "[a]ll that AT&T can, admittedly, offer with CCS–II, and that which makes CCS–II feasible on such a casual basis, is the billing of the service on the subscriber's telephone bill with the attendant ability to cut-off phone service for non-payment." CBEMA Opposition, p. 39 (emphasis omitted). CBEMA concludes that there is no technical limitation to the offering of casual call answering service and that the separate subsidiary could undertake the same service as AT&T proposes for CCS–II if the subsidiary considered that there was a sufficiently lucrative market for casual, bill-by-the-call service. As noted, Delphi, for example, says that it stands ready to serve the casual user provided the necessary interconnection facilities are available.

49. Commenting parties also state that a delay in the introduction of CCS–II will not disadvantage consumers, including casual users, because substitute services are available in the marketplace. SPCC provides in its comments perhaps the most comprehansive summary of alternative services now available to consumers:

> Delphi Communications Corp., a subsidiary of Exxon has developed its own system, and has had a prototype system operating in the San Francisco bay area for over three years. Delphi should be able to deliver production units by late 1981. Electronic Communications Systems, Inc. (ECS) in Dallas, has developed its Voice Message System. ECS presently has its own system serving customers there and in New York City. Additionally, ECS has sold Voice Message Systems to several customers. IBM has developed a system which it calls Voice Mail. Televoice International, Inc. of Santa Clara, California and STC Communications Corporation of Broomfield, Colorado are also designing and developing systems to compete in the marketplace. NEC of Japan, BNR in Ottawa, Ontario and others also have equivalent voice store-and-forward systems on the drawing boards. Some manufacturers such as Televoice and Delphi are seeking not only to produce the systems but also to provide the service. Delayed voice services can also be expected to be provided by other companies already providing telecommunications services. For example, the value added carriers are reportedly developing store-and-forward systems for their packet-switched systems. MCI Telecommunications Corporation has announced that it intends to add delayed voice store-and-forward services to its list of offerings. [SPCC Opposition, p. 11].

50. CBEMA also challenges the AT&T claim that the services comprising OCS–II are either innovative or unique. It claims that "in the market allegedly targeted by AT&T, the demand for call answering and advanced calling services is now being met on a regular basis through customer premises telephone answering equipment and through a variety of automated and/or semi-automated centralized answering services." CBEMA Opposition, p. 6. In short, the parties believe that refusal to grant the requested waiver will in no way deny consumers the features of call answering and advance calling.

3. AT&T's Response

51. AT&T has chosen not to rebut in any detail the major criticisms levied against its technical showing. In response to the criticisms of AT&T's showings concerning the design modifications, the time to develop and implement the modifications, and the cost of the modifications, AT&T submits "[t]he design modifications represent AT&T's considered judgement as to appropriate engineering solutions to meet the three requirements referred to above and, at the same time, to preserve to the extent reasonably possible the desirable features and operations of the current CCS–II design." AT&T Reply, p. 31. It simply says "AT&T affirms that the design modifications, and associated costs and time, specified in the Petition are reasonable in relation to the redesign objectives." *Id.*, p. 32 (footnote omitted). AT&T argues further that, "because the FSS economically cannot provide CCS–II-type services, AT&T submits that the actual implementation

of the modifications, the precise design required, and associated time and cost, are not legitimate issues in the consideration of the waiver request." *Id.* (footnotes omitted).

52. With respect to service to the casual user, AT&T attempts to supplement its showing that the casual user will not be served if its Petition is denied. AT&T explains why each of the services proffered in the comments as serving the casual user really cannot do so, with the exceptions of terminal answering devices, telephone answering services. AT&T further argues that, even with the necessary network interfaces, "neither the FSS nor any other vendor could offer CCS–II-type services to a potential customer unless the customer previously had established an account with the FSS or other vendor." AT&T Reply, p. 17. AT&T concludes that "speculation [concerning the supply of CCS–II to the casual and small business user] is not a proper basis for the Commission to deny the certainty of service availability which will result if the waiver is granted." *Id.*, p. 18.

4. Discussion

53. In judging AT&T's technical showing we must first determine whether denial of the Petition will foreclose the availability of call answering and advance calling to consumers, given the state-of-the-art technology. In this regard, AT&T confirms our understanding that it is *technically* possible for it to provide call answering and advance calling through a fully separated subsidiary. AT&T Petition, pp. 19–28. Additionally no technical reason is proffered for the separate subsidiary's alleged inability to serve the occasional or light user with CCS–II services. The only reason AT&T provides for the subsidiary's inability to serve the casual user relates to the different billing arrangements that are available for the BOCs. AT&T believes the casual user (not now served by terminal answering devices, telephone answering services and similar services) can be served only on a usage sensitive basis without prior subscription. AT&T Petition, p. 19; AT&T Reply, pp. 7, 14–15. We view this as an economic argument and thus it will be addressed in the next section. As we will explain, we believe that the casual user will not be denied call answering and advance calling if AT&T's Petition is denied.

54. Rather than arguing it is technically impossible to provide CCS–II through its separate subsidiary, AT&T has narrowed the scope of its argument by claiming the requisite "redesign effort would be costly and time consuming, resulting in a delay of the introduction and availability of CCS–II-like services for a minimum of three years." AT&T Petition, p. 22. We cannot base a grant of the petition upon such a rationale. With respect to the alleged time delay, we note that parties opposing the Petition have seriously questioned AT&T's inability to complete the necessary modifications for such a long period of time.[6] AT&T's only response to those comments is that "AT&T affirms that the design modifications and associated * * * time, specified in the Petition are reasonable in relation to the redesign objectives." AT&T Reply, p. 32.[7]

55. We are deeply troubled by the lack of support for this judgment. The criticisms of AT&T's analysis are substantial enough to require persuasive rebuttal and cannot be dismissed lightly. Moreover, without insight into the decisional factors leading to AT&T's scheduling process, including the time required for implementing each of the necessary actions, AT&T's judgment in this instance appears to be highly subjective. For example, AT&T simply states that "ESS software changes to be introduced in the ESS during 1981, 1982 and 1983 already have been committed * * *. Therefore, a minimum of three years would be required to develop a system plan, detailed requirements and software, test and integrate the software, and test all early applications of the software." AT&T Petition, pp. 28–29.

56. In essence, by tying the delay of three years in the introduction of CCS–II to prior management decisions about planned changes in ESS software, AT&T seeks to establish a principle of granting a waiver of our structural separation requirements based on a management decision concerning software scheduling priorities. While we do not challenge those priorities here, we note that AT&T is free to modify them, and therefore has the choice to introduce CCS–II in less than three years if it desires.

57. In this regard, we think it is significant that no argument is advanced suggesting that AT&T is unable to devote more funds to implement the necessary design modifications at an earlier date. Changing the software program for the #1 ESS requires considerable expertise. Nevertheless, we urge AT&T to recognize its obligation to provide prompt and reasonable access to its local bottleneck facilities, including the #1 ESS. *Bell Telephone Company of Pennsylvania* v. *FCC*, 503 F. 2d 1250 (3rd Cir. 1974), *cert. denied*, 422 U.S. 1026 (1975). As we shall discuss later, provision of reasonable access to AT&T's local exchange facilities is expected to lead to robust development of call answering and advance calling services, including the availability of service to the casual user.

58. The second reason that we reject AT&T's argument that CCS–II-like services cannot technically be provided under current regulations for a minimum of three years is simply that many entities are already providing voice storage services. The available services and equipment have been described extensively in the record and we have summarized them above. Therefore, we believe that, if there is an immediate and pressing need for voice storage services that the AT&T subsidiary chooses not to, or cannot, meet, alternative services and equipment are available in the marketplace. We recognize that outside vendors will require network interfaces to the ESS to provide call answering (although not necessarily advance calling) service to users that do not have a switch at the customer premises such as a private branch exchange. However, in these instances, if there is a significant demand for call answering service, terminal answering devices are ubiquitously available in the marketplace. In sum, AT&T has not provided sufficient reason for us to conclude that the state-of-the-art technology forecloses the near-term or long-term availability of call answering and advance calling services if the petition is not granted.

59. With respect to the cost of redesign alluded to in AT&T's Petition, we believe the question for us to resolve devolves to one of whether AT&T has established equities in favor of granting the waiver because of its existing investment in CCS–II. AT&T contends that it has invested approximately $30 million in CCS–II development and that a similar expenditure would be required to modify the ESS and VSS to conform to a non-integrated other vendor environment. Here again we are troubled by an apparent lack of information. For example, it is not apparent why the relatively modest modifications contemplated would require an expenditure equivalent to the entire cost of development to date. Nor is it clear how much of this expenditure might ultimately prove useful to AT&T

[6] These comments have been summarized above. For further discussion, see ATAE Opposition at 18–21; CBEMA Opposition at 31–36; Delphi Opposition at 29–33; ECS Motion at 10–15.

[7] AT&T contends further that, "because the FSS economically cannot provide CCS–II-type services, AT&T submits that the actual implementation of the modifications, the precise design required, and associated time and cost, are not legitimate issues in the consideration of the waiver request." AT&T Reply, p. 32 (footnotes omitted).

or its subsidiary in development of related equipment or services. As of May 1980, the time the *Final Decision* was issued in the *Second Computer Inquiry*, AT&T was aware that enhanced services, including voice storage and automatic call answering services, must be provided through a separate subsidiary. *See id.* at paras. 98, 223. Thus, for any expenditures incurred after this date, AT&T's equitable claims are less compelling than if it had no notice of our intent regarding CCS–II. However, even for expenditures incurred before the *Final Decision* was issued, all parties to the *Second Computer Inquiry* were on notice that we might take actions which would influence their participation in enhanced services markets. The Commission cannot be expected to be held to building upon the *status quo* when seeking to impose a regulatory policy. *General Telephone Company of the Southwest* v. *United States*, 449 F. 2d 846 (5th Cir. 1971).

60. In addition, any amounts lost to AT&T or its subscribers must be balanced against the serious problems which grant of the waiver would create. Many firms have invested significant sums, in certain instances equivalent to that by AT&T in CCS–II development, in the face of the same level of regulatory uncertainty. Any consideration of equities favoring AT&T in this proceeding must be balanced against equities favoring competing vendors and, even more important, the interests of users. As noted earlier, grant of the waiver requested by AT&T would make it more difficult to police cross-subsidy and, as a consequence, the cost to monopoly ratepayers might well exceed the relatively small amounts expended by AT&T on CCS–II thus far.[8] Moreover, the lack of structural separation for AT&T would eviscerate the Commission's ability to ensure nondiscriminatory access to AT&T's bottleneck facilities which, in turn, would stifle competition and innovation.

C. Economic Showing

1. AT&T's Contentions

61. In its Petition, AT&T further asserts that its economic showings alone are sufficient to satisfy the waiver criteria. AT&T submits that the costs of providing CCS–II service would increase by 75 percent if the service were provided through a separated subsidiary. AT&T finds this cost increase to be high so as to foreclose recovery through price increases.

62. AT&T's economic analyses purport to show the relative economic viability of offerings of CCS–II services by the BOCs and the separate subsidiary. The studies were based on the provisions of CCS–II over a ten-year period in a serving area of approximately 300,000 main stations. The study for the separate subsidiary, however, was conducted "with the number of CCS–II customers reduced by one-third." AT&T Petition, p. 30. This reduction was assumed "because of the unavailability of CCS–II services to casual users, and the operational differences of FSS-provided CCS–II-like services under present technology." *Id.*, p. 33. Revenues per customer were inflated at the rate of two percent per year for both the BOC and the separate subsidiary. AT&T also reported that "[m]arket research studies and a service trial show that price increases [today] would result in reductions in the number of residence customers and total revenues." AT&T Petition, p. 34.

63. With respect to costing methodology, the "BOC analyses considered the incremental economic effects of providing CCS–II." AT&T Petition, B–2. The separate subsidiary analysis also considered the incremental effects of providing CCS–II. Ongoing ESS and VSS investments were inflated at the rate of 7 percent per year. Ongoing trunk facilities investment was inflated by the rate of 10 percent per year. Cost of capital for the BOC was 14½ percent, while it was specified to be 17 percent for the separate subsidiary. The economic life of the VSS equipment was assumed to be 10 years in both analyses. Billing and marketing expenses were inflated at the rates of 5 and 10 percent, respectively.

64. The studies' results, according to AT&T, show that "the estimated internal rate of return of 27% for the BOC provision of CCS–II exceeds the cost of capital for the BOC of 14.5% * * * by a sufficient margin to assure that ratepayers will not be burdened by a BOC provision of CCS–II." AT&T Petition, p. 32. With respect to the separate subsidiary's provision of CCS–II, "[t]he economic results show an internal rate of return of 2% and a payback period of far longer than 10 years, if ever." *Id.*, p. 33. Based on this analysis, AT&T concludes that "the FSS could not undertake to offer CCS–II-like services under these circumstances." *Id.*

65. AT&T also provided a reference analysis specifying the same number of customers as used in the economic analysis of the BOC provision of CCS–II, even though AT&T describes this procedure as "unrealistic." The result here is an "internal rate of return of 18% [which] just about breaks even with the 17% cost of capital used in the FSS analysis." *Id.*, p. 34. However, AT&T finds this return "insufficient to justify the risk of the FSS making the capital investment using existing technology." *Id.*, p. 35.

2. Comments of Opposing Parties

66. Several parties have responded to AT&T's economic analyses. The criticisms are far ranging, although the majority agree that AT&T has provided insufficient factual data to support its conclusions. IBM describes AT&T's economic analyses as "conclusory economic projections, purportedly supported by unsupplied market research studies." IBM opposition, p. 14. IBM finds that "it is impossible to assess the validity of AT&T's projections in the absence of the underlying studies." *Id.* ATAE notes that "AT&T has totally failed to provide the Commission (or any interested parties) with any 'detailed economic and technical information' to support its claims as required by the Commission in its Reconsideration Order." ATAE Opposition, p. 18. The Justice Department finds that AT&T "has presented only unsupported assertions with minimal factual detail." Justice Opposition, p. 9. Justice concludes that "AT&T has failed to meet its burden and its petition should be denied summarily." *Id.*

67. The parties also attack the assumptions used in AT&T's analyses. For example, SPCC, noting that AT&T's "results are wholly dependent on the assumptions used to generate them," points out that AT&T uses "a model that requires 37 assumptions * * * in a period of highly erratic national economic performance." SPCC Comments, pp. 25, 29. ATAE says that "[w]hile AT&T describes the myriad of assumptions upon which its assertions are based, it provides no detailed factual support for these assumptions." ATAE Opposition, p. 31.

68. One set of assumptions that has particularly disturbed the commenting parties is that the separate subsidiary is assumed to capture one-third fewer subscribers and less revenues than the BOC because the subsidiary allegedly cannot serve the casual user. ANPA claims that "AT&T fails to explain the basis for its conclusion that its CCS–II customer base will decline by 33 percent if the service is provided through a separate subsidiary as required by § 64.702." ANPA Comments, p. 5. Delphi,

[8] Although $30 million is a substantial amount in absolute dollar terms, it is less impressive as an equitable consideration when compared to the billions of dollars which enhanced services are expected to generate over the next decades.

while noting that "a competitive offering, such as DELTA, can serve casual users even under existing technology," says that "AT&T assumes that the average revenue per customer per year is the same in all three analyses. However, in the separated offering, casual customers are assumed to have dropped out and therefore revenues per customer should be higher." Delphi Opposition, p. 43. Xerox asserts that "[e]ven assuming the loss of some 'casual' users, the effect on the volume of business and revenues would not be proportionate to the percentge of casual users as compared to regular customers. The unjustified projection of a one-third reduction in revenues, while keeping costs constant, calls into question the validity of the economic analyses underlying the Petition." Xerox Comment, p. 7.

69. ECS points out that "anyone can make a number of different assumptions of market penetration, numbers of customers, frequency of calling, etc., to come up with virtually any set of annual revenue requirements and estimated revenues." ECS Motion, p. 18. In this regard, CBEMA notes that "the analysis assumes revenues per CCS–II customer of $124 per year (for monthly customers only). Yet the Bell-Pa. tarriff imposes a minimum monthly rate of $12.00, per month, e.g. $144.00 per year." CBEMA Opposition, p. 37. SPCC submits that AT&T "should have documented the expected reduction in quantity of service demanded as the price of service increases. Using that data, AT&T should then have composed its estimated average revenues per customer for service through the network and through a subsidiary with its data on customers' willingness to pay. In this way it could have determined the approximate number of customers who would, in fact, choose to forego service rather than pay the alleged higher price AT&T required for service provided through its separate entity *vis-a-vis* the BOCs." SPCC Comments, p. 26.

70. Many parties also criticized the assumptions and estimates in AT&T's economic showing relating to the analysis of costs for CCS–II. Ford claims that "AT&T does not present or explain the critical method by which the investment was 'derived'," nor does it "present or identify the costs it allegedly examined in making its calculation." Ford Opposition, p. 27. Ford also finds that "AT&T provides no explanation of how it computed a major portion of FSS expenses." *Id.*, p. 18. SPCC takes the same approach to AT&T's economic analysis, saying "[i]t totally lacks any description of cost methodology." SPCC Comments, p. 29.

71. Several parties directly opposed AT&T's costing methodology. Xerox submits that, "[i]f waivers are to be granted on the basis of economic infeasibility, more should be required than mere current cost savings for dominant carriers using incremental cost allocations." Xerox Comments, p. 20. CBEMA asserts that "AT&T's economic analysis suffers a threshold if not fatal defect—as already noted, it is apparently based on an incremental analysis of expenses for the integrated CCS–II service, but assumes that the structurally separated subsidiary will be starting 'from scratch' in making the offering." CBEMA Opposition, p. 36.

72. The opposing parties also attacked AT&T's costing methodology on more specific grounds. The Justice Department believes that the "Commission should reject as frivolous any attempt by AT&T to cite * * * intra-corporate charges it has imposed on itself as evidence of the cost of having to offer CCS–II in a competitive mode." Justice Opposition, p. 13. IBM similarly finds several detailed faults with the methodology AT&T relied upon to perform its economic analysis. First, "AT&T has charged much higher maintenance and administrative costs to the FSS version of CCS–II than it would if the above centralized systems were in place." IBM Opposition, p. 15. Second, the significant difference in cost of capital is attributable to "AT&T's arbitrary choice of giving the BOC version the full advantage of AT&T's embedded monopoly cost of capital while burdening the FSS version with the cost of what is normally the most expensive type of financing—all-equity financing." *Id.* Third, "AT&T uses significantly different tax lives for the VSS equipment in the BOC and FSS version." *Id.* at 16.

73. Xerox criticizes the analysis "for maintaining the cost of service at a constant level while reducing the customer base." Xerox Comments, p. 7. SPCC, noting that AT&T relies extensively on [Net Present Value] investment criteria for most of its engineering economy studies," says "[t]here is a missing element of the economic analysis, the total absence of NPV results." SPCC Comments, p. 31.

3. AT&T's Response

74. AT&T has sought to rebut the major criticisms levied against its economic showing by other parties. Most significantly, to the criticisms that the economic analysis fails to provide any real economic support data, AT&T responds that its "Petition is not a tariff filing" and that full "disclosure [of economic information] at the level of granularity customary in tariff filings would deprive AT&T of its proprietary rights without increasing the Commission's ability to resolve the very different issues in this proceeding." AT&T Reply, pp. 34–35. AT&T further urges that, since CCS–II "is likely to be an untariffed enhanced service, and surely not one subject to the Commission's tariff regulation," the Commission "would be inconsistent, and would place the petitioner at an unfair competitive disadvantage, if it required that a Petition for Waiver parallel a tariff filing." *Id.*, p. 35. Similarly, in response to criticisms alleging that AT&T employed an improper incremental cost analysis, AT&T states that "[i]t should not be required * * * to make and defend its decisions concerning enhanced services on the basis of standards intended for the economic regulation of tariffed services." *Id.*, p. 36.

75. In response to the other criticisms of its economic analysis, AT&T runs its model through a few other iterations and provides the bottom line calculations for each of these iterations.[9] In all cases, its conclusion remains unchanged. CCS–II services can be provided profitably by AT&T only if its petition is granted.

4. Discussion

76. In judging AT&T's economic analysis we must determine whether denial of the Petition will impose uneasonable costs upon consumers in the form of significantly higher prices for the services or, in the extreme, economically foreclose the provision of the service to the public. We have specifically stated that, "[a]s part of a waiver request, a petitioner will be expected to provide detailed economic * * * information to support its assertions." 84 FCC 2d 50, 57 (1980). Moreover, as discussed above, because of the significance of this requested waiver, it is particularly important that we be fully apprised of the relevant facts in this instance. These facts must provide "good cause" for granting the waiver. 47 CFR 1.3.

[9] Specifically, AT&T has adjusted its analysis by assuming that the separate subsidiary would achieve 24 percent less revenue for CCS–II than a Bell System Operating Company providing an integrated service. Previously this figure was assumed to be 33 percent. The result is that the internal rate of return for the separate subsidiary increases from 2 percent to 12 percent with the adjustment. Additionally, as discussed below, AT&T provides the result of a net present value test of the economic projections relied upon in its Petition.

77. AT&T has failed to meet this test in several respects. First, AT&T has provided us with little factual information and no economic support data. The economic showing is based upon marketing studies and economic projections that have not been placed in the record or made available to us by other methods. We do not even know such a basic statistic as the total revenue that AT&T expects from the service. Our understanding of the basic premises of the analysis—such as AT&T's inability to market CCS–II to larger users—is virtually nil.[10] Under these circumstances it is impossible to determine the validity of AT&T's assumptions and projections.

78. AT&T's reason for not submitting the necessary factual information is that the "Petition is not a tariff filing" and that the "disclosure of such data * * * would deprive AT&T of its proprietary rights." AT&T Reply, pp. 34, 35. This logic escapes us. We have rendered a long history of decisions which, although not relating to tariff filings, nevertheless have required substantial information from the moving party in order to receive a "hard look".[11] AT&T's Petition totally fails to substantiate its allegations and, therefore, renders it difficult, if not impossible, to give the Petition a hard look.

79. AT&T also has not explained why the data is confidential or what its competitors will do with the data. In fact, a careful reading of its pleadings suggests that AT&T believes that no one else can provide the service. In any event, the concern that the data is confidential cannot justify withholding information from this Commission. All relevant cost support data must be filed to receive a waiver of § 64.702 of the Commission's Rules. Of course a protective order can be issued if the Commission deems it appropriate.

80. Second, a gleaning of the limited data AT&T has made available suggests that AT&T's conclusion from its analysis concerning the feasibility of a CCS–II offering by the separate subsidiary, despite claims to the contrary, is not very robust. For example, in its Reply Comments, AT&T applies a "net present value" test to its working assumptions and estimates for the separate subsidiary and, while relaxing only one of those parameters, finds the result to be positive. *See* AT&T Reply at 44. Our understanding of the net present value test is that if the resulting figure is positive, the project can be accepted as a viable one.[12]

81. The one assumption that AT&T relaxes concerns the amount of revenue the separate subsidiary can garner from CCS–II customers compared to a BOC. By assuming no loss in revenue for the separate subsidiary, the subsidiary's offering, as explained above, appears viable. AT&T, however, classifies this assumption as unrealistic because the subsidiary will not be able to serve the casual user. We disagree. There are numerous methods that the separate subsidiary can employ to serve the casual user. For example, AT&T, through its telephone operating companies, could offer billing services on a nondiscriminatory basis to all voice storage vendors, including the separate subsidiary. The subsidiary also may arrange to have bills charged directly to one of the ubiquitous charge plans, thereby avoiding the alleged problems of theft of service or the requirement of prior subscription.

82. Moreover, and perhaps most importantly, even if AT&T is correct in asserting that the occasional user can be served only on "a usage sensitive basis without prior subscription" (AT&T Reply, p. 15), it does not follow that such a requirement would seriously discourage usage. The traditional practice in the telecommunications industry in cases where a customer does not have an established line of credit is to require a deposit. Given the small assessments a casual user would be charged for CCS–II, the deposit required to establish an account would not be large enough to discourage many users from subscribing to the service.

83. We also believe it is incumbent upon AT&T to inform us and other interested parties of the sensitivity of its results to other changes in its assumptions and underlying projections. The following examples may be illustrative of the areas that seem ripe for sensitivity analysis. First, AT&T could have calculated the economic analysis over a fifteen year period, instead of a ten year period as it has done. We note that AT&T requests a waiver for fifteen years from the date of installation of its Voice Storage Systems. Second, AT&T could have varied its assumption concerning revenues per customer. AT&T assumes this figure to increase by only 2 percent per year, while at the same time it uses estimates for expenses and costs that increase from 5 to 10 percent per year. In essence, AT&T argues that consumers only will be willing to pay less for CCS–II in real dollars over time. AT&T's assumption for revenues in this regard seems to fly in the face of the available information.[13]

84. It should be obvious that we could proceed to speculate about other of AT&T's assumptions. However, we must agree with ECS in that "anyone can make a number of different assumptions of market penetration, numbers of customers, frequency of calling, etc., to come up with virtually any set of annual revenue requirements and estimated revenues." ECS Motion, p. 18. AT&T must show, or enable us to determine, how sensitive its results are to changes in the underlying assumptions. Based upon the information we have now, the economic showing does not support the conclusion that AT&T's separate subsidiary cannot economically provide CCS–II.

85. In any event, the fact that AT&T might not be willing to provide CCS–II services if its petition is not granted does not necessarily foreclose the availability of similar services to consumers. Provided the necessary interconnection facilities are available from the local telephone companies, the record clearly demonstrates that other entities are willing to risk their capital to provide voice storage services similar to CCS–II services. We would point out that provision of the necessary facilities in this regard will benefit AT&T as well because it will lead to more efficient and

[10] AT&T says that although large business users were canvassed in its market study, it "believes that CCS–II does not offer the same advantages to large business users that it does to residential and small business users." AT&T Reply, p. 16, n. * * *. Based upon this belief, AT&T has determined that it "has no present plans to market CCS–II to large business customers." *Id.* We have two fundamental problems in understanding this reasoning. First, AT&T has not supplied any marketing studies to enable us to ascertain the purchasing behavior of large business users. Second, AT&T provides no indication of the sensitivity of its results to changes in its presumption concerning large business users. What will happen to its economic projections, for example, if large business users subscribe to CCS–II for nighttime service?

[11] *See, e.g., WAIT Radio* v. *FCC*, 418 F.2d 1153, 1157 (1969), where the Court said that allegations "stated with clarity and accompained by supporting data, are not subject to perfunctory treatment, but must be given a 'hard look'," quoting *Pikes Peak Broadcasting Co.* v. *FCC* 422 F.2d 671, *cert. denied* 315 U.S. 979 (1969). *See also WTCN Television, Inc.*, 1 FCC 2d 337 (1965), and *compare Carolina Broadcasting Co.*, 18 FCC 2d 482, 484 (1969), where we said "the burden [of the petitioner], of course, becomes more difficult as the deviation from the standard specified in the rules increases."

[12] *See, e.g.*, J.F. Weston and E.F. Brigham, *Managerial Finance* at 146 (4th Ed. 1972); *see also AT&T, Engineering Economy* at 291 (3rd Ed. 1977). By employing an internal rate of return test with these same assumptions, AT&T estimates that the separate subsidiary will earn 18 percent on its investment. Since the assumed cost of capital of 17 percent for the separate subsidiary includes a risk factor, AT&T is technically incorrect in saying the 18 percent return "is insufficient to justify the risk of the FSS making the capital investment using existing technology." AT&T Petition, p. 35.

[13] *See, e.g.*, International Resources Development, Inc., *Store and Forward Switching* (1980).

extensive use of AT&T's core network.[14] While AT&T attempts to disparage the willingness of others to provide voice storage services, this appears to represent a classic example of where a modicum of experience is worth more than a multitude of analyses.[15] We believe that competition in the marketplace is the only definitive way to resolve this dispute between the parties, based on the evidence available in this proceeding. AT&T has failed to convince us that others will not be able to provide the service ubiquitously.

86. Finally, we believe that AT&T's finding of a 75 percent increase in cost attributable to providing CCS–II services through its separate subsidiary cannot withstand close scrutiny. This reported difference is primarily due to incremental analysis employed for the BOC provision of CCS–II services.[16] However, whenever any enhanced service shares joint and common costs with the regulated services provided by AT&T, fully distributed costing methodologies must be employed. *American Telephone and Telegraph Co.* (Docket No. 18128), 61 FCC 2d 587 (1976), *as modified on rehearing sub nom. Aeronautical Radio, Inc.* v. *FCC*, 642 F.2d 1221 (D.C. Cir. 1980), *cert. denied*, 49 LW 3780, 3787 (1980). With application of this costing methodology, we expect that the reported cost differential between the BOC provision and the separate subsidiary's provision of CCS–II services would diminish markedly.

87. For these reasons, we find that AT&T has failed to meet its burden of showing that denial of its Petition will impose unreasonable economic costs upon consumers. Indeed, a careful reading of its showing suggests that the separate subsidiary may, very well, be able to provide CCS–II economically.

D. Costs of Granting the Waiver

88. In the *Reconsideration Order*, we said:

> Petitioners carry the burden of demonstrating that concerns about any cross-subsidization or other anticompetitive effects which may arise from grant of a waiver are outweighed by the possibility of imposition of unreasonable costs upon consumers, or unavailability of an enhanced service, if the waiver is not granted.

84 FCC 2d 50, 58 (1981).

89. In its petition, AT&T does not address the costs involved with the increased risks of cross-subsidization or other anticompetitive effects, except to mention that "an allocation procedure * * * will be implemented by the BOCs in order to attribute the investments and expenses associated with CCS–II. In addition, the BOCs will separately identify the revenues associated with CCS–II." AT&T Petition, p. 35.

90. Parties opposing AT&T's petition claim that granting the petition would impose substantial costs on consumers. The Justice Department notes that, if AT&T is permitted to carry out the plan described in the petition, "[n]o other company will be able to interface with the ESS central office for the purpose of providing custom calling services." Justice Opposition, p. 5. Justice also finds that "the waiver sought by AT&T is yet another attempt to use its monopoly power over local exchange services, and the associated essential facilities, to obtain a position of market power in competitive services." *Id.* Finally, Justice submits that "[s]ince, under the AT&T proposal, the CCS–II equipment will be intertwined with the local central office equipment, and will employ facilities also used for local exchange service, the local ratepayers may be paying for much of the CCS–II enhancement." *Id.*, p. 6.

91. ATAE purports to show that "the granting of a waiver will effectively prohibit the provision of competitive service offering to the general public by others for both technical and economic reasons." ATAE Opposition, p. 23. Ford states that "grant of the waiver would sacrifice a unique opportunity to establish innovative and competitive information storage and retrieval services." Ford Opposition, p. 7.

92. The parties provide numerous specific examples of why structural safeguards are necessary for AT&T's provision of CCS–II and, conversely, why elimination of these safeguards would be costly. For example, Delphi, noting that "AT&T's reliance on BOC credit and billing services * * * provides an indirect, non-monetary subsidy of CCS–II," emphasizes that "AT&T gives no assurance that its use of BOC customer billing systems will be acquired on a fully compensatory basis." Delphi Opposition, p. 25.

93. Dusty's submits that, "[i]f the BOC were enabled by a grant of the Petition to provide competing TAS [telephone answering service], it would be impossible to protect the integrity of the TAB [telephone answering bureau] customer list." Dusty's Opposition, p. 3. Exxon finds that, "in order to arrange for specialized transmission service, Exxon necessarily would have to disclose to its competitor, AT&T, considerable information concerning the technical parameters of a proposed enhanced services offering. Such circumstances represent an untenable competitive situation for Exxon, which could be avoided if the structural separation were retained as originally conceived." Exxon Opposition, p. 15.

94. SPCC submits "there is nothing in AT&T's Comments which demonstrates that AT&T is capable of accurately allocating costs between regulated and unregulated services." SPCC Comments, p. 38. Indeed, after providing numerous detailed examples, SPCC concludes that "[t]he integration of regulated and unregulated services will be an accounting nightmare." *Id.*, p. 39. Delphi agrees, noting that the Commission already has found that accounting alone cannot prevent the misallocation of joint and common costs associated with the provision of basic and enhanced services if the same entity provides both.

95. Exxon, pointing to the Commission's concerns in the *Second Computer Inquiry* regarding joint use of physical space, states tht AT&T "proposes no offsetting safeguard against the potential abuses from the joint use of physical space." Exxon Opposition, p. 7. Delphi concurs with this assessment, stating that "the co-location of enhanced and basic service elements within the same central offices" is "inherently discriminatory against other enhanced service vendors." Delphi Opposition, p. 39.

96. Exxon, among others, emphasizes that "[o]f particular concern is the potential for a carrier to establish means for discriminating against other enhanced service vendors 'through such mechanisms as the manner in which a subsidiary is able to interconnect or through its charges for the facilities necessary to interconnect enhanced services with the underlying network where the need for such facilities by its own subsidiary might be eliminated'." Exxon Opposition, p. 7, quoting the Commission at 77 FCC 2d at 477–78. Exxon continues by stating that the "Commission acknowledged that the organizational costs of establishing a separate subsidiary and the dedication of separate resources to the dominant carrier's enhanced activities were far outweighed by the anticipated benefits." Exxon Opposition, p. 5. Exxon notes that "it is these institutional factors and cost

[14] *See, e.g.*, "Voice mail arrives in the office," Business Week, June 9, 1980. *See also Final Decision* at para. 209.

[15] *Cf. American Telephone and Telegraph* v. *FCC*, 572 F.2d 17, 23 (2nd Cir. 1978), where the Court held that a dispute concerning economic impact "is the kind of issue where a month of experience will be worth a year of hearing" (quoting *American Airlines Inc.* v. *CAB*, 350 F.2d 624, 633 (en banc 1966), *cert. denied*, 385 U.S. 845 (1966)).

[16] For a discussion of AT&T's costing methodology, *see* AT&T Petition at 31; B–2; AT&T Reply at 36.

elements which AT&T now labels 'unreasonable' in the instant request." *Id.* IBM notes that the "Petition does not demonstrate that the cost of providing CCS–II through the FSS would be substantially more burdensome than the cost of providing any other enhanced service through the FSS during the same time period." IBM Opposition, p. 15. The Department of Justice, citing *WTCN Television, Inc.*, 1 FCC 2d 337, 339 (1965), contends that "a cost-benefit analysis is an integral part of AT&T's burden since in seeking a waiver of the Commission's rules, a party must analyze the feasibility of other, less anticompetitive alternatives." Justice Opposition, p. 10. Justice finds that "AT&T has made no attempt to demonstrate whether, if at all, CCS–II services, if offered by the Bell Operating Companies, would have tangible benefits that outweigh the costs of the potential for cross-subsidization and other unacceptable effects upon ratepayers." *Id.*

97. Other parties sound this same warning. Delphi, for instance, submits that "AT&T has failed altogether to address the adverse effects of the proposed waiver." Delphi Opposition, p. 14. CBEMA concludes that AT&T's "failure to discuss, much less refute, the potential concerns for cross-subsidization, the lack of a tariff for the basic service elements of CCS–II, and/or other anticompetitive effects of the requested waiver (a burden on the petitioner clearly imposed by the Commission in the Reconsideration) is, *prima facie*, grounds for dismissal of the Petition." CBEMA Opposition, p. 21.

98. In reply to these arguments, AT&T simply states that its economic analysis establishes that granting the waiver will not result in cross-subsidization and that no other risk of anticompetitive behavior exists because network interfaces are available to other vendors. For example, AT&T asserts that the "use of BOC resources in the BOC provision of CCS–II services, on a compensatory basis, as proposed herein, is in no way anticompetitive." AT&T Reply, p. 28. Additionally AT&T states that "[t]his reply shows that any claimed anticompetitive effects raised by the Comments are without merit, and that there is no basis for any concern regarding such claims." *Id.*, p. 54. In essence, AT&T implicitly argues that no benefits will be foregone if its Petition is granted.

99. We cannot accept AT&T's position in this regard. The two major concerns which led this Commission to impose a separate subsidiary requirement upon AT&T were its ability to cross-subsidize enhanced services and its ability to discriminate in the provision of interconnection facilities to enhanced service providers. *Final Decision*, 77 FCC 2d at 463–64. The record here does little to dissipate those concerns.

100. For example, with respect to the question of discriminatory access, we note that AT&T has designed its network precisely in a manner that precludes outside vendors from having comparable interconnection facilities.[17] Because of the incentive that AT&T has to preclude competitors, the Commission has been careful to note that the importance of the control of local facilities cannot be overstated. *Id.* at 468. Granting the petition before us, however, would automatically give AT&T an advantage in the voice storage segment of the enhanced service market. It would also provide AT&T with the ability to provide discriminatory access. The result undeniably will be a reduction in competition in this market. Granting the petition also can reasonably be expected to chill the desire of other business entities to enter the enhanced service market generally.[18]

101. With respect to cross-subsidization, the problem of appropriate accounting methodology for a non-separated CCS–II service offering is readily apparent. AT&T's thirteen-page description of CCS–II costs and revenues in Appendix B of its reply comments is replete with examples of expenses and investment for CCS–II that are held in common with the provision of regulated services. The lack of precision by which joint and common costs are allocated is well known. The Commission has previously concluded with respect to AT&T that accounting alone "cannot prevent the misallocation of joint and common costs associated with the provision of basic and enhanced services." 77 FCC 2d at 464. We believe that granting the petition will impose substantial costs upon consumers in the form of increased risks of cross-subsidization and discriminatory access to AT&T's local bottleneck facilities.

E. Other Matters

102. Several parties have filed Motions for hearing, discovery and the provision of network interfaces by AT&T to competitive vendors of call-answering and call-forwarding services. ECS requests the opportunity to take oral depositions and obtain production of documents pertinent to the issues raised in AT&T's Petition, and moves that the Commission conduct an evidentiary hearing. ECS Motion, p. 26. ATAE submits a detailed list of requests to which it believes AT&T should initially be required to respond before relief is considered. ATAE Opposition, p. 33–37. ATAE maintains that, "should the Commission elect to go forward on the petition as filed, the Commission should then use its powers to direct and allow a full and complete examination of the factual questions raised through its discovery and hearing process." *Id.*, p. 11. ECS and SPCC request that competitive vendors receive equivalent access to the ESS equipment as provided to the BOCs in the current CCS–II design. ECS Motion, p. 26; SPCC Comments, p. 41. Finally the Department of Justice submits that, should the Commission choose not to deny AT&T's petition summarily, "it should hold an evidentiary hearing to determine whether, in fact, the public interest will be served by granting the waiver." Justice Opposition at 3. Because of the disposition of this proceeding, we are dismissing the ATAE and ECS requests as moot. The ECS and SPCC requests that we order equivalent access to the Bell ESS will not be addressed because they are not properly raised in this proceeding.

IV. Conclusion

103. For reasons we have elaborated upon fully above, we are denying AT&T's petition for waiver. AT&T has not provided sufficient justification for us to conclude that the state-of-the-art technology forecloses the availability of services similar to CCS–II if the Petition is not granted. AT&T also has failed to provide the factual information needed to determine whether the economic analysis relied upon in its petition is sound. Based upon the information it does provide in its pleadings, however, its economic analysis does not appear to support the conclusions reached. Additionally, the record developed in this proceeding offers no reasonable basis to believe that call answering and advance calling services cannot be offered economically under the current regulatory scheme, if the local telephone companies provide the requisite interconnection facilities. Finally, and perhaps most importantly, we find that granting AT&T's petition would be likely to create potentially substantial costs to consumers. Not only would the ability of AT&T to cross-subsidize its enhanced services without detection increase

[17] Some parties have argued that this was intentionally done as a matter of marketing strategy. *See, e.g.*, the Reply Comments of ECS Telecommunications, Inc., especially the affidavit of Robert J. Nacon. We reach no judgment in that regard.

[18] *See, e.g.*, the Oppostion of Exxon at p. 14. *Cf. Final Decision*, 77 FCC 2d at 463–464.

significantly, but the competitive evolution of the enhanced voice storage market would also be jeopardized because of the difficulty of compelling AT&T to provide nondiscriminatory access to its local bottleneck facilities. These costs could be expected to compound themselves throughout the life of the waiver request. Final Decision, 77 FCC 2d at 463–64. Given these findings, the result of the calculus we must weigh is clear. We deny AT&T's petition for waiver.

V. Ordering Clauses

104. Accordingly, it is ordered, pursuant to Sections 4(i) and 4(j) of the Communications Act of 1934, As Amended, and § 1.3 of the Commission's Rules, 47 CFR 1.3, that the AT&T Petition for Waiver of § 64.702 of the Commission's Rules, 47 CFR 64.702, to provide Custom Calling Services II is denied.

105. It is further ordered that the ATAE requests for information and conducting of a hearing into this matter is dismissed as moot.

106. It is further ordered that the motion to take oral depositions, obtain production of documents, and that the Commission conduct an evidentiary hearing, filed by ECS, is dismissed as moot.

107. It is further ordered that the Motion for Acceptance of Late-Filed Comments submitted by the American Newspaper Publishers Association is granted.

108. It is futher ordered that AT&T's Motion to deny and strike the late filed pleadings of Dusty's Answering Service and Delphi Communications Corp. is denied.

109. It is further ordered that the Secretary shall cause a copy of the decision to be published in the **Federal Register.**

Federal Communications Commission.

William J. Tricarico,

Secretary.

[BC Docket No. 81-741; RM-3727; RM-3876; FCC 81-493]

Proposed Authorization of Transmission Teletext by TV Stations

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein addresses the possible authorization of teletext transmissions by broadcast television stations. Two petitions for rulemaking regarding teletext, one from CBS, Inc. (RM–3727) and the other from the United Kingdom Industry Group (RM–3876), are included, in part, in this proceeding. The Federal Communications Commission believes that teletext, a new form of broadcast operation, offers substantial opportunities for extending and diversifying the service of television stations and for improving the efficiency of spectrum utilization. The proposed rules would authorize teletext transmissions in the vertical blanking interval and allow licensees to use their own discretion with respect to the kind of service to offer and the technical system they use for transmissions.

DATES: Comments must be submitted by January 11, 1982 and reply comments by February 10, 1982.

FOR FURTHER INFORMATION CONTACT: Alan Stillwell, Broadcast Bureau, (202) 632–6302.

SUPPLEMENTARY INFORMATION:

Adopted: October 22, 1981.

Released: November 27, 1981.

1. The Commission is today initiating a proceeding to study the possible authorization of teletext service by television stations. This new form of broadcast operation, which would be transmitted in the vertical interval of the video signal, appears to offer substantial opportunities for diversifying television service into new areas and for improving the efficiency of spectrum usage. Teletext development has been pursued extensively in several foreign countries in recent years and there is now apparent interest in introducing this service in the United States. In keeping with the Commission's responsibility to regulate use of the radio frequencies in accordance with the public interest, we believe it is important to provide a regulatory environment that is conducive to the emergence and implementation of new technology and new uses of the spectrum.[1] Our goal in this proceeding is, therefore, to create such an environment for teletext.

2. The Commission also received petitions from CBS, Inc. (RM–3727) and the United Kingdom Teletext Industry Group (RM–3876) asking for the issuance of rules that would authorize teletext service. These petitions make separate requests that the Commission adopt a single system for technical operation. Since both petitions are closely related to the issue raised herein, we are incorporating parts of them into this proceeding. However, as discussed below, the Commission does not believe that it is necessary or desirable to specify a single system for technical operation. Therefore, those portions of the petitions that request adoption of standards for a single system are being denied.

3. The term teletext is generally used to describe broadcast systems that superimpose alphanumeric and/or graphic information on a television signal in addition to regular programming. Teletext signals are transmitted in the vertical blanking interval and do not interfere with the reception of regular programming.[2] They can only be viewed on receivers that are equipped with special decoder circuitry. Since authorization of such data signals has not been considered in the past, they are not permitted under the Commission's current standards for

---

[1] See sections 307 (a) and (b) of the Communications Act of 1934, as amended.

[2] It is also technically feasible to transmit teletext on all 525 lines of the television signal. However, such "full field" teletext transmission would, by definition, replace a station's regular service. The Commission is not raising the issue of whether teletext might be allowed to supplant normal television service. We are limiting this proceeding to consideration of authorization of teletext in the vertical blanking interval only.

television transmissions.[3] This proceeding will study the possible amendment of these rules to permit teletext service.

4. Teletext has the potential to serve a wide variety of applications. Some of those identified thus far, such as closed captioning for the deaf, are related to a station's regular programming activities, while others are wholly independent services. Examples of non-program related information that can be provided through teletext include weather reports, news, comparative shopping prices, and community bulletins. Such information can be transmitted as either an "advertiser supported" service or a subscription service. In addition, commercial data and messages can be disseminated over teletext. These examples are but a few of those that have been identified thus far. However, no one knows which, if any, of these services will ultimately find favor in the market.

5. A related service, known as "videotex," is emerging concurrently with teletext for use on common carrier and cable communications systems. Videotex can provide interactive (two way) capability and is thus able to offer more extended capabilities than teletext. It is not yet clear what effect, if any, videotex will have on teletext development.

6. Three major teletext systems have been competing for acceptance in the United States: 1) The British teletext system; 2) the French "Antiope" system; and 3) the Canadian "Telidon" system. Operational tests of each of these systems have been conducted on a number of television stations over the last two years. Results of these tests demonstrate that teletext is compatible with the technical environment of television in this country.[4] Several stations are also now engaged in trials to study non-technical aspects of teletext such as operation of an information service and user interests.[5]

7. More recently, the parties involved in the technical development process have been engaged in various efforts to develop a consensus for a common system or for a framework that would allow operation of multiple design concepts. The proposal for a "North American Broadcast Teletext Standard," as produced jointly by the developers of the Canadian Telidon system, CBS Inc., the American Telephone and Telegraph Company (AT&T), and the developers of the French Antiope system, represents one such effort.[6] This hybrid system incorporates features from the French and Canadian approaches and also includes some enhancements not found in either of these other systems. Its rules and formats (protocol) for presentation and display functions correspond to the "Presentation Level Protocol" developed by AT&T for use in videotex applications.[7] The AT&T presentation protocol is not, in itself, a fully complete teletext specification but instead is one part of a seven level specifications structure.[8] The intent of this design concept is to promote an environment in which a user can access all teletext and videotex data bases regardless of the type of equipment that is used. In a similar move the Conference of European Postal and Telegraph Authorities (CEPT) has tentatively announced a new videotex standard that incorporates features of the British, French, and German systems into a single European standard.[9]

8. Recognizing the potential of teletext services, the Broadcast Television Systems Committee of the Electronics Industry Association has established a subcommittee to study possible standards for the U.S. Studies are also being conducted by the CCIR and the CCITT looking towards international standards.

9. It is apparent from the comments received in response to the CBS and United Kingdom petitions and from other activity on the part of the broadcast and related industries that there is substantial interest in developing teletext service and that such service would constitute a fuller and more effective use of the television frequencies. On this basis, the Commission considers teletext to be consistent with the public interest and thus believes it appropriate to undertake action that proposes authorizing teletext service and allowing its development. However, the Commission also recognizes that authorization of teletext transmissions by reserving lines of the vertical interval for it might preclude some other use of the vertical blanking interval that may arise in the future. We therefore carefully note the distinction between a policy that reserves spectrum for the exclusive use of a service and one that authorizes service but could allow other uses in the same spectrum area, albeit at a different time or geographic location.

10. In matters concerning authorization of a new service, the Commission generally has two decisions to make: (1) Whether to permit the new use and; if so, (2) the environment for its technical operation. These decisions can be highly interrelated, depending on how many different uses are possible under the service and how many technical designs can be devised to serve these uses. The level of complexity associated with this interrelationship tends to increase as the number of uses and designs increases. Teletext is a multi-purpose concept that embodies several known applications and probably others that have not yet emerged. Some of these uses may be able to use a common design while others may require different technical capabilities that are not necessarily complementary.

11. In developing a policy for teletext, the Commission intends to be guided by the principle that the best approach to regulation is one that achieves its objectives with the least government intervention in the affairs of both business firms and consumers. The Commission holds the opinion that intervention in the decisions of free enterprises and consumers is justifiable only where markets fail to satisfy public policy objectives and the benefits of correcting the failure through government action outweigh attendant costs or where a recognized public interest objective could be better achieved by direct action.

12. In the case of teletext, the available evidence appears to indicate that the forces of competition and the open market are well suited to obtaining the kinds and amounts of service that are most desirable in terms of the public interest. There are clearly many divergent applications and uses for this new form of broadcasting. The need for and importance of the different uses for teletext are likely to vary by market and even within markets by stations and by

[3] See § 73.682 of the Commission's rules.

[4] The first teletext tests were conducted by KSL–TV in Salt Lake City and CBS, Inc. over stations in Los Angeles and St. Louis. The KSL experiment used a modified version of the British CEEFAX system. The CBS tests were more extensive and involved both the CEEFAX and Antiope systems.

[5] Stations KNXT and KCET in Los Angeles, WFLD in Chicago, and WETA in Washington, are currently engaged in teletext market trials.

[6] This system was proposed by CBS in a modification of their petition. The CBS proposal was supported by the French and Canadian system developers in their response to the British petition.

[7] AT&T, "Videotex Standard: Presentation Level Protocol," May 1981.

[8] This design concept follows the International Standard Organization's standards for an open systems interface that are designed to allow the different aspects of a system to be sensitive to one another while maintaining functional independence. The seven level structure helps produce an environment in which information can be exchanged without regard to terminals or the transmission medium that is used. These standards are described in ISO/TC 97/SC16 "Reference Model For Open Systems Interconnection "Doc N227", June 1979 and ISO/TC 74/SC98 Dec. 1981 (Rev).

[9] The alpha-mosaic portion of the CEPT standard is not compatible with the corresponding portion of the proposed North American Standard.

user groups. Moreover the pattern of demand for services is likely to shift over time with changes in the needs and interests of users and in response to developments in other areas of communications technology. Finally, new technological developments may well be in the offing in the future.

13. With these factors and principles in mind, the Commission is proposing to adopt rules that would establish an open environment policy for teletext. Our proposal would allow licenses to exercise their own discretion in activities and operations relating to teletext and thus provide the freedom of choice necessary to establish service based on their present needs and to respond to changes in demand and technical options. We are thus proposing to place responsibility for the determination of service and technical issues in the private sector and eliminate the expenses, delays, and value judgements associated with government regulation.

14. One of the major benefits of the open environment approach is that it would provide a mechanism for resolving the trade-offs among the various systems' characteristics and prices that pose such difficult problems for regulatory decision makers. These matters would be dealt with through the forces of the marketplace. Another feature of the market approach is that it would permit the processes of change and development associated with both user preferences and technology to evolve unencumbered by the costs and delays associated with changing government regulations and avoids the possibility that government action might arbitrarily obsolete existing equipment. This kind of flexibility seems particularly important in the present context where teletext development seems far from mature.

15. The Commission's major performance concern under an open environment policy is that teletext signals not interfere with other radio services. This concern extends to the regular program service of the originating station as well as the services of other broadcast and non-broadcast stations. There is substantial evidence from the experiments of CBS, KSL–TV, and others that teletext can be broadcast without producing interference to other stations or causing degradation of the normal service of the originating station. The use of transmission systems other than those that have already been tested would be also permitted as long as they meet the non-interference standards proposed herein.

The Proposed Rules

16. The open environment plan provides service authorization subject only to certain minimum standards designed to prevent interference. Licensees would otherwise be free to make their own decisions as to whether to offer teletext service and to the technical system they use for it. The proposed authorization would allow both consumer subsecription and business services as well as advertiser supported services that may or may not be related to regular programming.

17. To be consisitent with the theme of maximum freedom for licensees, teletext would be treated as an anciallary service. Stations would not be required to observe service guidelines or other performance standards. The only restriction on activities using the vertical interval would be that they adhere to the definitional limitations for teletext described below.

18. The rules we are proposing include standards for some interference-related technical parameters and a definition of the type of transmissions to be considered teletext. The purpose of these proposed rules is to set forth the nature of the teletext authorization, to define the segment of the vertical interval in which teletext transmissions are permitted, and to assure that such transmissions will not cause unacceptable degradation or interference to the aural or visual transmissions of the originating station or to other broadcast or non-broadcast radio services. The technical parameters that we intend to study in relation to this proposal include the specific vertical interval lines that may be utilized, the bit transmission rate, the transmitted pulse shape, and the signal level. We are also interested in information concerning any additional parameters pertinent to interference that may be associated with transmission methods other than those digital systems now being tested.

19. We are proposing that lines 14 through 18, 20 and 21 authorized for teletext use at this time.[10] Lines 17 and 18 could not, under present rules, be used by stations with remote controlled transmitters.[11] This proposal would thus immediately upon adoption provide a maximum of seven lines for teletext data transmissions. Tests conducted by CBS and others indicate that digital data signals can be inserted on these lines without producing degradation of normal program reception. We wish to emphasize that this proposal is only to authorize the use of these lines and that we do not intend to reserve them exclusively for teletext. If new uses and services are developed for the vertical interval in the future, we anticipate that such applications will be given full consideration, without prejudice to what would be an existing teletext authorization.

20. In proposing to allow teletext to use line 21 on an equal access basis with closed captioning transmissions, we recognize that this has the potential to affect the competitive relationship between teletext and the captioning system that is not in place. The Commission is also aware that a substantial number of Line 21 decoders are currently in use. We would like comment on the impact of our proposal on television service for hearing impaired persons. In addition, we invite interested parties to submit information concerning the kinds of service that teletext can provide for this segment of the population.

21. From the information on currently available systems, it appears that teletext has the capability of providing captioning services that are in many respects superior to those of the existing captioning system and also offers many new features with potential value for all television users. Thus, while we are not considering the elimination of the authorization for the existing captioning system, we do recognize the advantages inherent in an advanced data system for serving the needs of a multiplicity of viewers. The authorization embodied in the proposed rules is sufficiently broad to allow stations to use the Line 21 system for captioning programs. Under this proposal the current authorization and standards for the Line 21 system that are in § 73.682(a)(22) of the rules would clearly be redundant and unnecessary. We are therefore proposing that if the rules for the open environment are adopted, the Line 21 rules be replaced with the new authorization. In making this proposal we wish to emphasize again that it is not our intention to rescind authorization for the Line 21 system or to discourage in

[10] These lines are generally those that are not reserved for other purposes or on which teletext pulse transmissions would not be visible on sets now in use. See § 73.682 of the Commission's Rules. In addition, the Commission is considering a proposal that would authorize transmission of a station identification code (SID) on line 20 (BC Docket 78–309). This would be an optional use and would not preclude use of line 20 for teletext. Also, use of Line 14 would be limited to a 40 IRE signal level (see table I in Appendix A).

[11] The Commission currently has under consideration a notice of proposed rule making to study possible changes in the requirement for VITS (BC Docket 81–239). Teletext policy may ultimatedly be affected by the outcome of Commission action on this matter.

any way its use. We are merely proposing to eliminate duplicative text in the rules.

22. In addition to the line use authorizations proposed above, we also wish to address a plan for the possible use of lines 10–13 in the future. This would allow stations to reduce their information access time, increase their page inventory, or some combination of the two.[12] Tests conducted by KCET–TV and others indicate that signals transmitted on these lines produce noticeable degradation on some, primarily older, receivers.[13] In order to make lines 10–13 available in the future, without additional rule making, we are proposing that use of these lines by authorized according to the schedule on Table I in Appendix A.[14] This approach would allow teletext on these lines when it could be expected that sets that would experience degradation would no longer be in use. Table I also provides for increased signal strength on line 14 in the future. We are suggesting that the standard for a tolerable level of visual degradation be that teletext signals affect no more than one percent of the total receiver population.

23. The phase-in approach for lines 10–14 would enable receiver manufacturers to design in the necessary circuitry to insure that their receivers will have complete vertical retrace blanketing with no visible degradation. It would also serve to notify receiver manufacturers of the planned future availability of the remaining unused vertical interval lines. It is the Commission's understanding that to modify receiver designs to accommodate use of lines 10–14 would not add to the price of receivers. The alternative approach would be to wait until the natural process of product development yields receivers that blank active signals on these lines and then initiate a further rule making. Comment is invited concerning information about all aspects of this plan. Information is desired regarding the extent of visual degradation caused by signals on lines 10–14 on sets in use today and the outlook for reduced degradation in the future. We would also like any available cost data for possible receiver redesigns that would overcome this interference problem.

[12] Teletext information is typically organized in a page format where each page corresponds to one screen of data.

[13] KCET Teletext Project, "The Viewers Perception of Teletext Transmissions on Lines 10–14 of the Vertical Broadcast Interval," (Los Angeles), July 16, 1980.

[14] The data on Table I is based on the KCET experiment.

24. Bit transmission rate, pulse shape and pulse amplitude are all closely interrelated in determining the overall performance quality of a system and its potential for causing interference. A higher bit rate will allow more data to be transmitted in a given interval of time but will also tend to produce more errors due to ghosting caused by terrain and other factors. A high bit rate combined with a pulse shape containing harmonics is more likely to cause interference to the aural and visual signals of its own and other channels.[15] The use of higher transmission rates require higher signal levels and narrower (shorter) pulses.

25. The pulse shape that generally has been employed in the teletext experiments is the raised cosine with some rolloff.[16] The CBS tests were done with a 100 percent raised cosine pulse shape. This requires little pulse shaping at the transmitter but requires extra processing at the decoder. The 100 percent raised cosine shape may pose a problem for cable systems due to significant power at the band edges. On cable systems that carry signals on adjacent channels, the power at the band edges of a signal may "spill over" to the adjacent channels. With a 55 percent roll-off pulse shape, as used in the Telidon transmission system, there is zero power at the band edges. This appears to be most compatible with cable systems but the possibility for overshoots increases.[17] These overshoots could be picked up and treated as a sync pulse by a process amplifier which would result in degradation of the regular television picture. In order to minimize the opportunity for interference from this source, we are proposing that data pulses be shaped to limit spectral energy to the nominal video baseband.

26. The binary signal code used in the known systems is for zero IRE units to represent "0" and for the maximum signal level to indicate "1." A positive pulse of 70–100 IRE units appears to provide an adequate range for the signal strength flexibility that maybe needed to compensate for any spectral, terrain or other factors with which individual licensees may have to contend.[18] This range also appears to provide sufficient flexibility in power to accommodate the designs of various alternative systems. We note that a signal amplitude of 50 IRE units and a relatively slow data rate are used in the line 21 captioning system.[19] Comment is invited regarding all aspects of the signal strength question. We desire information about any limitations that specification of signal strength may place on the further development of teletext systems and on the extent of interference or picture degradation that may result from the use of higher amplitude signals.

27. We are requesting comment concerning the extent to which it may be necessary or desirable to impose other limits or standards on the signalling methods used for teletext in order to prevent interference. Parties are asked to focus their responses on why they believe the rules proposed herein do not provide adequate protection from interference and to suggest alternative standards or performance ranges that would assure such protection.

28. Both CBS and the United Kingdom group have suggested in their proposals that the Commission approve the use of an adaptive equalizer pulse to provide a reference signal for a device that can compensate for multipath reflections. An equalizer device of this type can be used to correct ghosting of both teletext and regular television signals. We recognize the potental value of this technique for reducing errors through signal enhancement and are proposing that an adaptive equalizer pulse be permitted on any of the vertical interval lines authorized for teletext. Comment is invited on this proposal and on the alternative suggested by CBS that the reference signal be included in a portion of the television synchronization waveform (lines 1–9).

29. In its decision regarding authorization of the line 21 captioning service, the Commission specified that priority treatment be accorded to visual emergency messages that are transmitted pursuant to Section 73.635 of the rules.[20] This was done to resolve potential conflicts between open and

[15] Of the various bit rates that have been tested and discussed thus far, 5.727272 Megabits/Sec. appears to be the highest rate that is suitable for teletext under U.S. television standards. This rate is 364 times the line frequency and 8/5 times the frequency of the color subcarrier. It may also be advantageous to use some other reference. The data rate could be related to the horizontal line rate. For example, the Canadian 525 line version of Telidon transmits data at 4.58 Mb, which is 291 times the horizontal line frequency.

[16] After shaping, the spectrum of the NRZ data wave form is determined by a Nyquist filter with a roll-off of 100% followed by a phase corrected low-pass filter with cut-off frequency of 4.1MHz. A 100 percent roll-off denotes a pure cosinusoid wave form, while percentages less than 100 percent indicate the presence of harmonics.

[17] An overshoot is an excessive response to a unidirectional signal change. Sharp overshoots are sometimes referred to as "spikes."

[18] The CBS proposal suggests a signal level of 70 IRE units. The KSL tests demonstrated that a signal level of 100 IRE units could also be used above line 14 without causing degradation of the visual picture.

[19] See § 73.682(a)(22)(i) of the Commission's rules

[20] See 63 FCC 2d 388.

closed captioning "during a single emergency." The Commission desires to preserve this solution in cases where teletext captions may conflict with emergency captions on the regular visual image. Therefore, we are proposing that any captioning arrangement used in connection with a teletext service provide a facility for giving way to visual emergency messages.

30. In order to offer the widest possible opportunity for development of individual facets of teletext service, the range of services authorized under the open environment plan should be broad and unrestricted. Nevertheless, we are not at this time proposing that all types of data transmission be authorized on the vertical interval but are instead limiting this proceeding to teletext. Since teletext is generally understood to be a visual medium, we propose to define it as a data system for transmission of textual and graphic information intended for display on viewing screens.

31. Applications such as control functions or data transmissions intended for purposes other than the viewing screen and not otherwise permitted under the current rules would not be permitted under this proposal. We wish to state that in taking this approach we are not indicating any adverse position with respect to these other uses but are merely limiting the scope of this proceeding to teletext. Comments are requested as to whether the definition of teletext should be expanded to include data transmissions not necessarily intended for visual display. If possible, we prefer that comments include a statement of the suggested expanded definition.

32. It is likely that equipment manufacturers will develop and market external decoder devices that can be attached to existing television receivers to enable them to display teletext material. We would like specific comment as to whether such external decoders should be treated as a Class I TV device under Part 15 of the Commission's rules or should they be considered a receiver under Part 15, Subpart C.[21]

33. The proposed changes to Part 73 of the FTC Rules that would embody the principles and standards for an open environment policy toward teletext as discussed above are set forth in Appendix A. Comments and suggestions are encouraged on any and all of these proposals. Parties are also invited to suggest specific alternatives for improvements or modifications to any of our proposals.

34. We recognize that if teletext were regulated under an open environment approach it is possible that a single system might emerge through the natural forces of the market to become a *de facto* technical standard. So long as such a standard would evolve through fully legitimate processes, the Commission would consider it an acceptable result that is consistent with our policy objectives. Whatever the outcome of the market process would be, the Commission might choose to review and evaluate the performance of open environment policy after it had been in effect for a reasonable period of time.

Teletext and Cable Television

35. Teletext transmissions, especially those at higher data rates, have the potential for producing interchannel interference on cable systems and some head-end processor equipment may not pass teletext signals without a high error rate. These kinds of difficulties may pose particular problems in the case of local "off-air" stations that our rules require cable systems to carry. In order to better understand the cable impact issue, we are asking for comment on these questions;

(1) What problems does retransmission of teletext signals pose for cable head-end processors and what are the options for eliminating these problems?

(2) To what extent might teletext produce interchannel interference if television signals are carried on adjacent cable channels? How might such interference be overcome?

(3) Will small reflections in a cable distribution plant cause excessive data error rates?

(4) What would it cost to make cable systems compatible with teletext signals?

36. Another issue that the Commission may need to address concerns the possibility that cable systems may wish to delete the teletext signals of television stations and perhaps replace them with teletext or data from another source. To examine this matter we need responses to two questions:

(1) If teletext were to be designated an ancillary service as we are proposing, should cable systems be permitted to delete teletext signals or to replace a television station's teletext signals with those from another source?

(2) If such a policy were adopted, should it apply to "must carry" stations only or to all over-the-air broadcasts that are retransmitted on cable?

Procedural Matters

37. Pursuant to the Regulatory Flexibility Act of 1980, the Commission finds as follows:

I. *Reason for action.* It appears that use of a portion of the television vertical blanking interval for teletext would provide opportunities for extending and diversifying service from television stations and for improving the efficiency of spectrum utilization. This type of service is currently not permitted under § 73.682 of the Commission's rules.

II. *The objective.* The Commission is proposing to authorize teletext service in order to allow development of a new aspect of broadcasting that has come into existence through relatively recent technological advances.

III. *Legal basis.* The proposed action is authorized under section 303 of the Communications Act of 1934, as amended, which charges the Commission with the responsibility to explore new and improved uses of radio.

IV. *Description, potential impact and number of small entities affected.* The authorization of teletext transmissions by television stations could be expected to have a beneficial effect on most parties involved in providing or using such service. The proposed modification of the rules would be permissive, authorizing service but not requiring it. The authorization would have its most direct effect on television stations, permitting them to engage in a new form of business activity. At present, none of the lines in the vertical blanking interval is authorized for any activity that is not related to control functions or regular programming. There are approximately 1025 television stations, including both commercial and noncommercial broadcasters. Manufacturers of electronic equipment related to both transmitting and receiving/decoding teletext signals would also be affected. The number of potential manufacturers, while unknown, is expected to be substantial since component parts suppliers as well as assemblers of final products would be involved. Other groups on which this authorization could be expected to have important economic effects are information suppliers and teletext producers. Information providers include entities such as the weather bureau, the police department (traffic reports), community service organizations, and businesses that supply the basic material that is presented on the data service. Teletext producers are the groups that organize the material from the information providers and prepare it for display. These groups could be part of a station's

[21] The Commission is considering a change of terminology from "Class I TV device" to "TV interface device (Docket 79-244).

regular staff or could function independently on a franchise basis. The number of information providers is potentially very large, while the teletext producers will likely be one group per station offering the service.

The following is a listing of the types of entities, many of which are small, that are expected to be affected by teletext authorization and a description of the expected impacts:

1. Broadcast television stations would have the option to engage in an additional line of business. They would not be required to offer teletext service if it would not be profitable.

2. Manufacturers of electronic equipment would have the opportunity to increase their product lines to include teletext encoding, transmitting, and decoding equipment. These firms would likely also have substantial other product lines so that teletext business would not be expected to have a significant impact on them, although it would contribute additional revenue.

3. Information providers would have another medium for dissemination of news, bulletins, and other material. This would allow local governments, community service groups, and other ready access to the broadcast format and might reduce their overall publicity exenses.

4. Small business would most likely have available a new outlet for advertisement. This would have a positive effect on their business activity.

5. Teletext and user organizations would benefit from the availability of a new source of information with new features and operating efficencies.

V. *Recording, recording keeping and other compliance requirements.* None.

VI. *Federal rules which overlap, duplicate or conflict with this rule.* None.

This notice discusses an open environment policy for teletext. Another possible alternative which the Commission has rejected for reasons discussed above, would be to adopt a single system standard or some intermediate policy between open environment and a single system. The only other alternative would be not to authorize teletext.

38. In order to provide opportunity for the further development and testing of technical systems, the Commission intends to continue to grant special temporary authority (STA's) and experimental test authority for teletext to those licensees who submit requests.

39. With respect to the requests for rulemaking submitted by CBS, Inc. and the United Kingdom Teletext Industry Group, to the extent that these petitions are inconsistent with the proceeding opened herein they ARE DENIED. Other matters addressed in these petitions are being included in this proceeding.

40. Accordingly, it is proposed to amend Part 73 of the Commission's Rules and Regulations as set forth below.

41. Authority for the actions taken herein is contained in sections 4(i), and 303 (a), (b), (c), (d), (e), (f), (g), (h), (n) and (r) of the Communications Act of 1934, as amended.

42. Pursuant to procedures set out in §§ 1.4, 1.415 and 1.419 of the Commission's Rules and Regualtions, interested parties may file comments on or before January 11, 1982, and reply comments on or before February 10, 1982. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings.

43. In accordance with § 1.419 of the Commission's rules, an original and five copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission. Members of the general public who wish to participate informally in the proceeding may submit one copy of their comments, specifying docket number BC 81–741.

44. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

45. For further information concerning this proceeding contact Alan Stillwell, Broadcast Bureau, (202) 632–6302. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, *ex parte* contacts presented to the Commission in proceedings such as this one will be disclosed in the public docket file.

46. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentations requested by the Commission. If a member of the public does wish to comment on the merits of this proceeding in this manner, he or she should follow the Commission's procedures governing *ex parte* contacts in informal rule making. A summary of these procedures is available from the Commission's Consumer Assistance Office, FCC, Washington, D.C. 20554. Phone (202) 632–7000.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

PART 73—RADIO BROADCAST SERVICES

1. It is proposed that § 73.681, which contains definitions applicable to television technical standards, be amended by adding this definition, in its proper alphabetical order:

73.681 Definitions.

* * * * *

Teletext. A data system associated with a television broadcast signal that is used for the transmission of textual and graphic information intended for display on the screens of suitably equipped receivers.

* * * * *

2. It is proposed to revise § 73.682(a)(22) to read as follows:

73.682 Transmission standards.

(a) * * *

(22) Specific scanning lines in the vertical blanking interval may be used for the purpose of transmitting teletext signals, subject to the following conditions:

(i) Teletext signals may be transmitted on both fields of lines 14–18, 20 and 21. Lines 17 and 18 may not be used by stations with transmitters operated by remote control since such operation requires use of the VITS as specified in § 73.676.

(ii) No observable degradation shall be caused to any portion of the visual or aural signals.

(iii) Teletext signals shall not produce emissions outside the authorized television channel bandwidth. Data pulses shall be shaped to limit spectral energy to the nominal baseband.

(iv) Transmission of emergency visual messages pursuant to § 73.1250 shall take precedence and shall be cause for interrupting teletext caption presentations.

(v) A reference pulse for a decoder-associated adaptive equalizer filter designed to improve the decoding of teletext signals may be inserted on an otherwise unused line in that portion of vertical blanking interval approved for teletext.

(vi) All lines authorized for teletext transmissions may be used for other purposes upon prior approval by the Commission.

(vii) Lines 10–14 may be used for teletext transmissions according to the schedule set forth in Table I.

TABLE I

	1981	1982	1983	1984	1985	1986	1987	1988	1989	1990	1991

Appendix B—Teletext Comments

1. Twenty-four parties submitted comments and or replies in response to the CBS proposal. The respondents were generally divided among three basic policy positions: 1) No rule making now; 2) rule making now, but with no specified position regarding the standards suggested by CBS; and 3) rule making now, with an indicated preference for the CBS proposal. A list of the parties submitting comments on the CBS petition follows this discussion.[1]

2. Eleven respondents are opposed to the initiation of a rule making proceeding at this time to establish standards for teletext service.[2] The majority of this group states that it would be premature to set such standards now. They argue that teletext technology and system concepts are still in the developmental stages and that standards would tend to freeze this process when there are many questions concerning both technical issues and user applications about which more information is needed.

3. Technical matters said to require more investigation and research include equipment cost, teletext compatibility with cable retransmission of broadcast signals and with subscription television systems, the relationship between teletext and videotex, closed captioning for the hearing impaired, and alternative for providing flexibility for extension of service in the future. A number of commenters opposed to rule making now suggest that such action be deferred at least until the Electronic Industries Association's teletext subcommittee completes its study and releases its report and recommendations. This report is expected to address many of these issues and to recommend a single system for adoption as the U.S. standard. ABC cites color television standards and AM stereo standards as a reminder of the need to proceed cautiously on adoption of teletext standards.

4. Four commenting parties also suggest that there may be avantages to coordinating system selection with Canada and other international teletext users. The Canadians state that Canada and France are now working towards a common approach to a transmission scheme and that considerable progress has been achieved in evolving a common system for teletext.

5. Another consideration mentioned by opponents of rule making now is that very little is known about user demand for teletext in this country or about the likelihood for its economic success. To date, there has been no licensed teletext service operating in the U.S. nor has any market or user oriented teletext experiment been completed. The Canadian Government, the Subscription Television Association, and the NCTA argue that adoption of standards at this time would arbitrarily restrict uses without sufficient information to justify such action. They suggest that we withhold action until the results of field trials conducted in both the U.S. and Canada are available.

6. In their initial response, the NTIA takes a position in favor of a combined inquiry and rule making proceeding to consider teletext standards. They urge caution in moving to a single system standard before a complete record is developed and there is a clear commitment on the part of the industry to bring a teletext service to the market. NTIA further suggests that only non-system sensitive standards such as definition of teletext, transmission of bit rate, and screen character/row format be proposed as rules at this time. Selection of a system standard could be considered in an inquiry to develop a factual record for a possible future rule making. In their reply comments, they modify this position and recommend that there be no inquiry and that all teletext issues, including selection of a standard system, be considered in the rule making proceeding. This change results from their concern that the delays inherent in the regulatory process would impede the progress of the introduction of teletext service to the American public. A rule making would allow the Commission to adopt a system standard if the comments support such action. If the comments do not provide the information necessary to support standards, then the Commission could issue a further notice of proposed rule making and thus in effect accomplish the two-step procedure they suggest in their earlier remarks.

7. ABC raises a concern about the effect of teletext authorization on alternative use of the vertical blanking interval. They argue that, even though CBS proposes only authorization of use rather than dedication of lines 10 through 16 for teletext, once teletext becomes even minimally established it is highly doubtful that the Commission would authorize any alternative use for the space. Because of this and the lack of any evidence of significant demand for teletext service in this country, they feel it may be advisable to allow additional time for alternative use proposals to emerge.

8. In general, the respondents did not argue against the merits of the specific standards proposed by CBS or the need for authorization of teletext service. The prevailing view was that the CBS system should be considered along with other systems at such time as rule making to authorize service would be appropriate. There were, however, a few exceptions to this general pattern.

9. The United Kingdom Teletext Group (United Kingdom) and the Canadian government, the proponents of CEEFAX and Telidon, respectively, offer comparative statements of the advantages of their systems in relation to the Antiope system proposed by CBS. United Kingdom asserts that decoders for their system would be one-third cheaper than Antiope because most of the information processing activity is accomplished at the transmission point rather than at the receiver. This obviates the need for expensive processing circuitry in the decoder units that consumers will buy either separately or as an integrated part of a television set. They also claim that their system is less susceptible to interference, transmission errors, and multipath effects than is the Antiope system. The Canadians argue that the system proposed by CBS would be less flexible than Telidon. A successful transition from the CEEFAX capability to that of Telidon could be achieved only by preparing and transmitting all pages with graphics twice, in both the old and new formats in order to accommodate different decoders. Thus there would be a serious obsolescence problem involving both terminal and data bases if an alpha-mosaic graphics standard is adopted with the intent of a later transition to alpha-geometric graphics. The transition from limited to high performance Telidon terminals

[1] The comments of the San Juan Unified School District and letters of seven hearing-impaired students from within this district were treated as a single response in the counts of totals expressed herein.

[2] Those opposed to rule making at this time include: ABC, the Government of Canada, the North American Philipo Corp., the National Captioning Institute, the Electronics Industries Association, the San Juan Unified School Distric (informal), the National Cable Television Association, the Corporation for Public Broadcasting, the GTE Telenet Communications Corp., the Public Broadcasting Service, and the Subscription Television Association.

does not involve the same serious problems since all terminals recognize the alpha-geometric code. The Canadians also criticize the use of a five-bit rather than an eight-bit header. They assert that the eight-bit header provides for superior error correction and recovery capability and is necessary for full field (full screen) teletext transmissions. If the five-bit standard were adopted there would be a risk of obsoleting early decoders designed to work only on the vertical blanking interval.

10. The National Captioning Institute (NCI) and several others argue that a number of issues related to captioning need to be resolved before any action on teletext and on the CBS petition, in particular, is appropriate. Their position is that the Commission must require that the captioning provided by any teletext service be receivable by the home viewer at least to the same extent that the underlying visual and aural television is received and that any teletext service must always be capable of providing reliable captioning service. They are also concerned that teletext might interfere with service on the Line 21 captioning system that is currently in use and therefore ask the Commission to require that any captions transmitted on teletext also be transmitted on Line 21. The essence of the latter issue is that many hearing-impaired individuals have already or will soon acquire, separate Line 21 decoders or television sets equipped with integrated decoders. If captioning is not available on both systems, it would be necessary to purchase a second, expensive decoder in order to be able to access all of the available captioned programs.

11. Five respondents favored the initiation of a rule making proceeding to consider teletext standards at this time but chose not to take a position with respect to the substantive standards the Commission should adopt.[3] The NAB urges the Commission to commence rule making at the earliest possible time so that teletext transmissions could begin in the near future and thus enable licensees to expand their service to viewers. The NAB, along with the Information Industry Association (IIA), further argue that delay might interfere with efforts to make teletext compatible with videotex systems. They point out that compatibility between the two types of systems would facilitate the use of a single decoder and thereby permit more efficient use of receiver equipment. Cable television systems and common carriers are not burdened by the technical constraints on the broadcast signal and thus can implement videotex systems without the prior approval of the Commission. United Kingdom agrees that rule making is appropriate now, but as discussed above, they believe that their system would be a more appropriate standard than the system proposed by CBS.

12. The remaining seven respondents urged the Commission to move forward expeditiously with rule making to authorize teletext service and to adopt standards as proposed by CBS.[4] The consensus opinion among the supporters of the CBS proposal was that the research conducted thus far has provided sufficient information for the Commission to make a decision on standards and that the system proposed by CBS has proven to be an effective and practical method for teletext operation and offers the sophistication needed to provide for flexibility and extension in the future. They believe that teletext approval and standards for it are needed as soon as possible to prevent the public from being deprived of a valuable information resource. Westinghouse, in its reply comments, endorses the CBS petition with the statement that unfolding technology is enhanced by its use.

13. Antiope Videotex Systems (AVS), the owner of Antiope technology in the U.S., states that Anitiope's asynchronous technology offers a software based, variable format approach. They argue that the Antiope/Didon system is superior to the fixed format technology of the British system because it maintains the distinction between the means of transmitting the data within the television signal and the actual message the data contains.[5] This allows any size display on any type of display device. AVS argues that the "polyglot C" version of the British system, which overcomes some of the limitations of the basic fixed format technology, is only a "band-aid" beause it introduces complexities that require additional page attributes to be transmitted and requires a more complex decoder. They also claim that all comparative studies conducted to date show that the variable format system and fixed format system are comparably rugged. The variable format would also provide for more efficient use of the spectrum because it does not require transmission of meaningless information such as blanks to fill a line. Finally, they point out that the variable format is decoder-independent and thus allows each manufacturer many options in decoder design. By contrast, the fixed format system is claimed to be decoder dependent and, as a result, manufacturer options are dictated by the transmission system. United Video states that it has tested the Antiope system successfully on its satellite common carrier service.

14. In contrast to the more cautious approach recommended by NCI, two other respondents representing interests associated with the hearing impaired endorse the CBS petition and encourage the Commission to take action to adopt the proposed standards as quickly as possible. The WGBH Educational Foundation, which has provided open captioned programming for the past decade, states their belief that teletext offers unprecedented opportunities for better and more extensive communications service for the hearing impaired. Teletext features which they foresee as useful in serving the hearing impaired are multiple levels of text for different viewers, unrestricted placement of captions, variable color and font size, supplementary information pages, and graphics.

15. Marshall Wick suggests that the deaf population would probably form a proportionately greater initial part of the market for decoders even if teletext had no captions.[6] He points out that communication for the deaf is visual and that the ability to examine a weather or news report that hearing impaired persons cannot obtain by phone or radio is very important to the hearing impaired. As a deaf individual himself, he agrees with the WGBH assessment of the potential for teletext to provide new service to the hearing impaired and also agrees with the NCI argument that teletext captions should also be carried on the Line 21 system to avoid the possibility that such closed captioning would be overlooked in the proliferation of new services.

16. In summarizing these comments, we find that almost all of the commenting parties agree that teletext should be authorized and that the Commission should select a single technical system to serve as the standard for the United States. The main topics of disagreement are whether or not teletext development has progressed to the point where sufficient information is available for the Commission to make a sound determination regarding standards and, among the proponents of the three systems competing for acceptance at this time, which system would be most appropriate. The primary trade-off among the available systems appears to be decoder cost versus system sophistication especially with respect to extensibility for future applications. Other technical issues that were said to need attention include the relationship between teletext and videotex and the compatibility of teletext transmissions with carriage of broadcast signals on satellite and cable systems. The major service questions raised in the comments relate to service for the hearing impaired. Representatives of this group are both enthusiastic about the potential teletext offers for new services and concerned for the impact of teletext on the current Line 21 captioning service.

17. In their reply comments, CBS argues that nothing in the comments filed alters their conclusion that standards are necessary to foster teletext development and that additional studies are not necessary for adoption of standards. It is their belief that more than seven years of experimental and regular operation throughout the world and several tests in the United States have provided sufficient information to go forward with rule making. They also argue strongly for a single system standard rather than an approach that would permit multiple systems to coexist. They point out that television receiver manufacturers would be aware of potential consumer resistance to decoders

[3] Those supporting this position include: the NAB, the National Telecommunications and Information Administration, the United Kingdom Industry Group, and NBC.

[4] The respondents supporting rule making to adopt teletext standards as proposed by CBS are: Community Telecasters of Southern California (CTSC), Antiope Videotex Systems, Inc., the WGBH Educational Foundation, United Video, Inc., Westinghouse, Telease, Inc., and Marshall Wick.

[5] Didon is the transmission system utilized by Antiope.

[6] Mr. Wick is an assistant professor at Gallaudet College, a school for the deaf and hearing impaired located in Washington, D.C.

that might become obsolete and therfore would not make sets equipped with decoders. In answer to NCI's statements regarding the potential harm of teletext to service for the hearing impaired, CBS questions whether impeding the opportunity of hearing impaired persons to take advantage of the superior capabilities of teletext while encouraging them to purchase decoders for an already antiquated system best serves the interests of these individuals. Finally, CBS maintains that teletext is not only compatible with videotex but that fair and effective competition between the two requires that the Commission begin rule making to adopt a standard. They cite the IIA comments in pointing out that teletext transmissions cannot begin until authorized by the Commission, whereas videotex operations do not require such approval.

Separate Statement of Commissioner Mimi Weyforth Dawson re: Authorization of Transmission of Teletext by TV Stations

The Commission's action today provides the opportunity for the prompt implementation of teletext in the United States. Development of teletext has taken place largely outside the United States and has resulted in various system designs. Today we have adopted a rulemaking to permit all systems access to the vertical blanking interval (VBI). The citizens of this country will not, by this decision, be limited to a single system and, thus, will have the opportunity to respond to any service a provider may wish to make available. Moreover, consumers will not be frustrated while a regulatory body engages in an inane debate over how many angels can dance on the head of the standard setting pin.

It has been reported that representatives of the competing systems are negotiating compatability standards which may permit development of a single decoder for all receivers. By our action today, I believe we are contributing to the incentive for successful resolution of the compatibility question. Regardless of the outcome of these negotiations, teletext service can now proceed unhampered by technical constraints generated at the earliest stage of this services development. The rapid growth of technology cries out for approaches which permit implementation of service today without unduly hamstringing tomorrows developments.

Our action today clearly reflects, in my opinion, a positive step in the regulatory process. We have opened the VBI for new users, we will permit use of the VBI in a non-interference manner to all the people, particularly the hard of hearing, without undue delay, and we are permitting ingenuity to continue to grow without unnecessary government constrainfs.

Among the important technical questions we must address in this rulemaking are those essential to assure proper use of the VBI so as to prevent interference with signals of other stations and the regular visual and aural signals of the originating stations. The technical standards that are to be set pertain to the specific vertical interval lines to be used, the bit transmission rate, the transmitted pulse shape and the signal level. It is important that we identify the minimum technical parameters for the maximum utilization of the VBI for this and other services. This can be done without impeding the ability of service providers to bring new opportunities to the public.

[FR Docket No. 81-823; RM-3474; RM-3522; FCC 81-549]

Beacon Operation in Amateur Radio Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amend the Amateur Radio Service Rules to define certain types of experimental transmissions as "beacon operation." The proposal also includes rules to govern this type of operation, including provisions to permit beacon operation under automatic control. Amateur radio operators would like to expand the use of experimental transmissions for determining radio propagation conditions and adjusting equipment, however they feel that current requirements that a control operator be present at all times during the operation effectively limits this use. The proposed provisions to permit automatic control would allow beacon operation without a control operator being in attendance. Amateur operators have also expressed concern about some experimental transmissions being used to harass bona fide operations. The proposed rules include provisions to curtail this abuse.

DATES: Comments are due by March 15, 1982 and replies by April 15, 1982.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Steve Lett, Private Radio Bureau, Rules Division, (202) 632-7597.

SUPPLEMENTARY INFORMATION:

Adopted: November 24, 1981.

Released: December 9, 1981.

Introduction

1. Notice of proposed rule making in the above-entitled matter is hereby given.

2. The Commission has before it at this time two petitions for rule making. The first, RM-3474, was submitted by the Johns Hopkins University Applied Physics Laboratory Amateur Radio Club and received by the Commission on June 28, 1979. This petition requests the Commission to "establish a new class of operation to be called 'Beacon Operation'" and "to permit unattended automatic control of amateur stations engaging in 'Beacon Operation' under specific provisions." Detailed rule changes are also proposed by the petition to meet these requests. The petition claims that these changes will enable amateur operators to better utilize their stations as an aid in the detection of unusual propagation conditions and as an aid in adjusting and checking-out amateur radio equipment.

3. The second petition, RM-3522, was submitted by Charles Spencer *et al* and received by the Commission on October 22, 1979. This petition requests that § 97.89 paragraph (b) of the Commission's rules be amended to require that an amateur station terminate transmissions authorized by that paragraph if other amateur operators and the Commission determine that such operation is causing undue interference. The provisions of that paragraph authorize one-way transmissions "for the measurement of emissions, temporary observation of transmission phenomena, * * * and similar experimental purposes * * *." These transmissions are often referred to by the amateur community as "beacon transmissions." The petition claims that this term is finding increasing use as a guise for malicious operations.

4. The Commission desires to provide amateur operators the greatest freedom possible in their experimental activities. However, this must be balanced by a regulatory structure that avoids subversion of the intent of the Rules for the purpose of causing malicious interference. The two petitions show merit in these respects and the Commission finds it appropriate to propose rules based upon them.

Background

5. As noted above, § 97.89 paragraph (b) of the Commission's rules authorizes experimental transmissions by amateur stations that are not addressed to another amateur station.[1] Continuous or periodic transmissions authorized by this provision are often used by amateur operators to study propagation conditions and to develop and test theories regarding the causes and effects of such conditions. Usually, amateur operators attempt to receive those transmissions from certain other stations in order to determine propagation conditions at any given time. The authorization in paragraph (b) also provides a means for amateur operators to test and adjust their equipment by receiving such transmissions from other amateur stations.[2]

6. Currently, the rules prohibit automatic control[3] of most amateur radio stations including those operating as "beacons."[4] These stations must have a control operator at an authorized control point during all periods of operation.[5] Since one of the functions of a beacon is to aid other stations in determining propagation conditions; and since these conditions are often unpredicitable, particularly in the VHF and UHF bands,[6] the Commission has granted numerous Special Temporary Authorizations (STAs) to amateur licensees to allow them to operate beacons in the amateur bands by automatic control. These authorizations permit the continuous, uninterrupted operation of a beacon transmitter over a period of months without requiring the control operator's presence at a control point during operation.[7] This, in turn, makes it practical for licensees to engage their stations in long-term beacon operation and results in the availability of reliable signals to alert other operators to changes in propagation conditions as they occur. The continuous availability of beacon singals is also an added convenience to those using them for equipment test purposes.

7. As a final background note, the Commission has recently found that some operators allegedly operate "beacons" to intentionally harass legitimate operations (e.g. networks and repeaters). This seems to be one instance of increased amateur-to-amateur malicious interference and is a situation the Commission will not tolerate.

Proposal

8. The Commission proposes to specifically classify beacon operation as a form of amateur radio operation defined in the rules and regulations. It is further proposed to permit automatic control of amateur stations engaged in beacon operation. These proposals are intended to expand the opportunity for experimentation by amateur operators and facilitate more reliable communications by permitting unattended transmissions to alert operators to changing propagation conditions. Stations operating under STAs have demonstrated that automatic control is adequate for most beacon operation and there is no apparent reason to continue to prohibit such control for this form of operation.

9. We propose to limit beacon operation, whether manually or automatically controlled, to certain portions of the amateur frequency bands above 28 MHz. RM–3474 requests that only the following frequencies be made available for beacon operation: 28.05 to 28.10 MHz, 50.025 to 50.075 MHz, 144.04 to 144.06 MHz, 220.025 to 220.075 MHz, 222.025 to 222.075 MHz, 431.9 to 432.0 MHz and all amateur frequencies above 1215 MHz. The frequencies we have selected to propose fall within the same bands as those proposed by RM–3474, however, they are a compromise between that request and the commonly accepted American Radio Relay League[8] band plans. The frequencies we propose are set forth in the Appendix.

10. We are proposing to limit beacon operation to certain frequencies in order to prevent beacon transmissions from being used to harass other operations. We are also proposing this limitation to avoid compounding interference to existing operations due to increased beacon activity which may result from the authorization of automatic control. This reasoning agrees with RM–3474 and RM–3522. Another clear benefit we anticipate as a result of these frequency limitations is that operators will be better able to locate beacon transmissions occurring within each of the amateur bands.

11. We realize that this frequency limitation proposal would prohibit manual beacon operation currently authorized on frequencies below 28 MHz as well as such operation on frequencies above 28 MHz where it would not specifically be permitted. We are proposing the rules in this form since there appears to be no demonstrated need for beacon operation below 28 MHz. This is substantiated by the fact few STA requests have been received by the Commission for automatically controlled beacon operation on these frequencies. We believe there is sufficient two-way communications activity below 28 MHz to serve most of the functions of a beacon operation. Furthermore, the congestion on these bands would make continuous beacon operations undesirable from the standpoint of interference. However, we will continue to entertain STA requests for authorization to perform beacon operations below 28 MHz and above 28 MHz where they would not otherwise be allowed, provided that the request demonstrates a unique need for such operations. In situations where a beacon style operation outside of the authorized beacon frequencies would be so limited in nature as to not warrant an STA, transmissions authorized by § 97.65 paragraph (a) of the Rules may be

---

[1] Section 97.89 paragraph (b) reads, in its entirely, "Amateur stations may be used for transmitting signals, or communications, or energy, to receiving apparatus for the measurement of emissions, temporary observation of transmission phenomena, radio control of remote objects, and similar experimental purposes and for the purposes set forth in § 97.91."

[2] Although § 97.89 paragraph (b) also authorizes the "radio control of remote objects," that provision is not a part of this proceeding except as explained in paragraph 17 of the above text.

[3] Automatic control is defined in § 97.3 paragraph (m) of the rules as "* * * the use of devices and procedures for control (of an amateur radio station) so that a control operator does not have to be present at the control point at all times."

[4] Although "beacon," "beacon transmission," and other related terms are not currently defined in the rules, in the interest of simplicity they will be used throughout the text to refer to activities described in paragraph 5.

[5] Section 97.79 paragraph (b) reads, in part, "Every amateur radio station, when in operation, shall have a control operator at an authorized control point. The control operator shall be on duty, except where the station is operated by automatic control."

[6] The UHF bands are those frequencies between 30 and 3000 MHz.

[7] Typically, the Commission has made Speical Temporary Authorizations for this purpose effective for a period of 180 days.

[8] The American Radio Relay League is an association of radio amateurs that has developed informal recommendations for situating compatible forms of operation on certain frequencies segregated from other, noncompatible forms of operation in each amateur band. These "band plans" have gained widespread acceptance by amateur operators.

adequate to carry out the intended objective.[9]

12. We propose to limit the emissions of stations in beacon operation below 450 MHz to A, A1, F and F1. These emission modes should be adequate for carrying our virtually all types of experimentation and equipment adjustment commonly associated with beacon operation while also conserving spectrum. We would limit the frequency shift of F1 emissions to 900 Hz in order to conserve spectrum as well. Using these emission modes, the amount of spectrum that we have proposed authorizing for use by beacon operations in the 144 MHz and 420 MHz bands should be sufficient to support enough stations to meet the usual objectives of such operation. We have proposed authorizing somewhat more spectrum for beacon operations in the 28 MHz and 50 MHz bands since propagation at these frequencies often has a range long enough to limit frequency reuse. Widely varying propagation conditions on these bands might prompt the establishment of more beacon operations, also warranting slightly more spectrum. We have proposed authorizing somewhat more spectrum for beacon operations on the 220 MHz band since there is little congestion in this band and since this would be consistent with the American Radio Relay League band plan and the request of RM–3474.

13. RM–3474 suggested "that beacons should not be permitted to emit overpowering signals over large local areas" stating that such operation "would be counter-productive and could become a source of interference to various amateur activities and hence lead to friction within the amateur community." The petition recommends that "(s)tations engaging in Beacon operation * * * be limited to a transmitter power output of no more than 100 watts."

14. We agree that the power of a station engaged in beacon operation should be limited in order to avoid interference. We also believe that a reasonable power limitation should not hamper the objectives of beacon operation. With this intent, consideration was given to applying an effective radiated power (ERP) limitation to beacon operation as the most appropriate form of interference protection for other co-channel operations. However, we recognize that it may be desirable to employ directional antennas in some instances of beacon operation and that regulations limiting ERP may be complex or ambiguous for such situations. Consequently, we are proposing a power input limitation since this would be less ambiguous and consistent with our current regulations regarding operating power measurements. We have selected 100 watts as a reasonable compromise to propose for a power input limitation.

15. We propose, in accordance with RM–3474, to require stations engaged in beacon operation to identify themselves at least once each minute. This seems appropriate since identification of a beacon transmission is generally essential to its usefulness. We would also require beacon transmission to be identified by an "operation designator" similar to those required for repeater and auxiliary operation. That is, the station call sign would be followed by the word "beacon" or the telegraphy abbreviations "BCN" or "B." Automatic identification made using telegraphy would be limited to a maximum speed of 20 words per minute by existing requirements of § 97.84 paragraph (g) of the rules.

16. We have included in our proposed rules a paragraph which explicitly states that the Commission may order the termination of any beacon operation that it deems improper. This is proposed to insure compliance with the intent of the Rules and meets the request of RM–3522. We have also included a paragraph which would prohibit beacon operation on more than one frequency in the same band, from the same location. This is proposed to prevent a station from monopolizing frequencies authorized for beacon operation. We anticipate that amateur operators engaged in bona fide beacon operations would take part in an informal coordination program in situations where this is necessary to avoid mutual interference.

17. Finally, we propose an editorial change in the Rules which would specifically classify radio control operation [10] as a form of amateur radio operation defined in the rules and regulations. This is proposed strictly in the interest of maintaining the readability of the Rules after their amendment to define beacon operation. No substantive change is proposed.

Conclusion

18. Notice if hereby given that it is proposed to amend 47 CFR Part 97 in accordance with the proposal set forth below.

19. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rule making until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex exparte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex exparte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231. A summary of the Commission's procedures governing *ex parte* contacts in informal rulemakings is available from the Commission's Consumer Assistance Office, FCC Washington, DC 20554, (202) 632–7000.

20. Authority for issuance of this Notice is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended (47 U.S.C. 154(i) and 303(r)). Pursuant to applicable procedures set forth in § 1.415 of the Commission's Rules, interested persons may file comments on or before March 15, 1982, and reply comments on or before April 15, 1982. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into

[9] Section 97.65 paragraph (a) reads, "Type A emission, where not specifically designated in the bands listed in § 97.61, may be used for short periods of time when required for authorized remote control purposes or for experimental purposes. However, these limitations do not apply where type A emission is specifically designated."

[10] Radio control operation being those forms of radio communication currently authorized by § 97.89 paragraph (b) as "* * * radio control of remote objects."

consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

21. In accordance with § 1.419 of the Commission's Rules, 47 CFR 1.419, formal participants must file an original and five copies of their comments and other materials. Participants who wish each Commissioner to have a personal copy of their comments should file an original and eleven copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

22. The Commission has determined that sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354) do not apply to this rule making proceeding since this proposal simply recommends a procedural change in amateur radio operations. While the proposal is primarily deregulatory in nature, certain new restrictions would be placed on amateur operations. However, these new restrictions would neither compel amateur operators to acquire any new or different equipment, nor interfere with commonly employed practices. Consequently, there would be no economic impact on small businesses, small organizations or small governmental jurisdictions.

23. It is ordered that the Secretary shall cause a copy of this Notice to be served upon the Chief Counsel for Advocacy of the Small Business Administration and that the Secretary shall also cause a copy of this notice to be published in the **Federal Register**.

24. For further information on this proceeding, contact Steve Lett, Federal Communications Commission, Private Radio Bureau, Washington, DC 20554, (202) 632-7597.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 97—AMATEUR RADIO SERVICE

It is proposed that Part 97 of the Commission's rules and regulations, 47 CFR Part 97, be amended as follows:

1. In § 97.3, paragraph (l) would be revised to read as follows:

§ 97.3 Definitions.

* * * * *

(l) Amateur radio operation. Amateur radio communication conducted by amateur radio operators from amateur radio stations including the following:

Fixed operation. Radio communication conducted from the specific geographical land location shown on the station license.

Portable operation. Radio communication conducted from a specific geographical location other than that shown on the station license.

Mobile operation. Radio communication conducted while in motion or during halts at unspecified locations.

Repeater operation. Radio communication, other than auxiliary operation, for retransmitting automatically the radio signals of other amateur radio stations.

Auxiliary operation. Radio communication for remotely controlling other amateur radio stations, for automatically relaying the radio signals of other amateur radio stations in a system of stations, or for intercommunicating with other amateur radio stations in a system of amateur radio stations.

Beacon operation. One-way radio communication conducted in order to facilitate measurement of radio equipment characteristics, adjustment of radio equipment, observation of propagation or transmission phenomena, or other related experimental activities.

Radio control operation. One-way radio communication for remotely controlling objects or apparatus other than amateur radio stations.

* * * * *

2. In § 97.61, paragraph (a) would be revised and paragraph (e) would be added to read as follows:

§ 97.61 Authorized frequencies and emissions.

(a) The following frequency bands and associated emissions are available to amateur radio stations for amateur radio operation, other than repeater, auxiliary and beacon operation, subject to the limitations of § 97.65 and paragraph (b) of this section:

Frequency band	Emissions	Limitations (see paragraph (b))
kHz		
1800-1900	A1, A3	
1900-2000	A1, A3	1,2
3500-4000	A1	
3500-3775	F1	
3775-3890	A5, F5	
3775-4000	A3, F3	4
4383.8	A3J/A3A	13
7000-7300	A1	3,4
7000-7150	F1	3,4
7075-7100	A3, F3	11
7150-7225	A5, F5	3,4
7150-7300	A3, F3	3,4
14000-14350	A1	
14000-14200	F1	
14200-14275	A5, F5	
14200-14350	A3, F3	
MHz		
21.000-21.450	A1	
21.000-21.250	F1	
21.250-21.350	A6, F5	
21.250-21-450	A3, F3	
28.000-29.700	A1	
28.000-28-500	F1	
28.500-29.700	A3, F3, A5, F5	
50.0-54.0	A1	
50.1-54.0	A2, A3, A4, A5, F1, F2, F3, F5.	
51.0-54.0	A0	
144-148	A1	
144.1-148.0	A0, A2, A3, A4, A5, F0, F1, F2, F3, F5.	
220-225	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5.	
420-450	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5.	5,7
1215-1300	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5.	5
2300-2450	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	5,8
3300-3500	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	5,12
5650-5925	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	5,9
GHz		
10.000-10.500	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5.	5
24.000-24.250	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	5,10
48.000-50.000	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	
71.000-76.000	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	
165.000-170.000	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	
240.000-250.000	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	
Above 300.000	A0, A1, A2, A3, A4, A5, F0, F1, F2, F3, F4, F5, P.	

* * * * *

(e) The following amateur frequency bands and emissions are available for beacon operation: 28.08–28.10 MHz, 50.06–50.08 MHz, 144.05–144.06 MHz, 220.05–220.06 MHz, 222.05–222.06 MHz and 432.07–432.08 MHz using type A0, A1, F0 or F1 emissions (When type F1 emission is employed in these bands, the frequency shift shall be less than 900 Hz.); all amateur frequency bands above 450 MHz using emission types authorized under paragraph (a) of this section. Limitations of paragraph (b) of this section apply.

3. In § 97.67, paragraph (e) would be added to read as follows:

§ 97.67 Maximum authorized power.

* * * * *

(e) Within the limitations of paragraph (b) of this section, the power input to the transmitter final amplifying stage of an amateur radio station in beacon operation shall not exceed 100 watts, exclusive of power for heating the cathode of a vacuum tube(s).

4. In § 97.84, the introductory text of paragraph (d) would be revised and paragraph (d)(3) would be added to read as follows:

§ 97.84 Station identification.

* * * * *

(d) When an amateur radio station is in repeater, auxiliary or beacon operation, the following additional requirements shall apply:

* * * * *

(3) When identifying by radiotelephony, a station in beacon operation shall transmit the word "beacon" at the end of the station call sign. When identifying by radiotelegraphy, a station in beacon operation shall transmit the fraction bar DN followed by the letters "BCN" or "B" at the end of the station call sign. This station identification shall be made at intervals not to exceed one minute during any period of operation.

* * * * *

5. A new § 97.87 would be added to read as follows:

§ 97.87 Beacon operation.

* * * * *

(a) A station in beacon operation shall not concurrently operate on more than one frequency in the same amateur frequency band, from the same location.

(b) A station in beacon operation, either locally controlled or remotely controlled, may also be operated by automatic control when devices have been installed and procedures have been implemented to ensure compliance with the rules when a duty control operator is not present at a control point of the station.

(c) Operation shall cease upon notification by the Commission or any Engineer-in-Charge of a Commission field facility that the station is operating improperly or causing undue interference to other operations. Beacon operation shall not resume without prior approval of the Commission or Engineer-in-Charge.

6. In § 97.89, paragraph (b) would be revised to read as follows:

97.89 Points of communications.

* * * * *

(b) Amateur stations may transmit one-way signals to receiving apparatus while in beacon operation or radio control operation.

7. Section 97.91 would be revised to read as follows:

97.91 One-way communications.

In addition to beacon operation and radio control operation, the following kinds of one-way communications, addressed to amateur stations, are authorized and will not be construed as broadcasting: (a) Emergency communications, including bona fide emergency drill practice transmissions; (b) Information bulletins consisting solely of subject matter having direct interest to the amateur radio service as such; (c) Round-table discussions or net-type operations where more than two amateur stations are in communication, each station taking a turn at transmitting to other station(s) of the group; and (d) Code practice transmissions intended for persons learning or improving proficiency in the international Morse code.

Notices

Federal Register
Vol. 46, No. 239
Monday, December 14, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

Elimination of Legal Size Paper

At the request of the Archivist of the United States and upon recommendation of its Court Administration Committee, the Judicial Conference of the United States adopted the 8½×11 inch paper size standard for use throughout the Federal Judiciary and directed the elimination of the use of legal size paper measuring 8½×14 inches. During the transaction period from now until December 31, 1982, both 8½×11 inch and 8½×14 inch size paper will be accepted by United States courts (unless previously adopted local court rules prohibit filing on 8½×14 inch size paper).

Effective January 1, 1983, the 8½×11 inch paper size will be the only accepted size in all Federal courts. No requirement will be imposed to use both sides of a sheet of paper.

For further information contact Mr. Rick McBride, Chief, Management Services Branch, Administrative Office of the United States Courts, Washington, D.C. 20544, telephone (FTS) 633–6067.

Done at Washington, D.C. this 9th day of December, 1981.

William E. Foley,

Director.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

1981 Crop Price Support Rates—Ohio Filler, Connecticut Valley Broadleaf, Connecticut Valley Havana Seed, New York and Pennsylvania Havana Seed, Southern Wisconsin, Northern Wisconsin, and Puerto Rican Tobacco

AGENCY: Commodity Credit Corporation (CCC), USDA.

ACTION: Notice of determination of 1981-Crop Price Support Rates for Tobacco.

SUMMARY: This notice sets forth the price support rates applicable to eligible grades of 1981-crop Ohio filler, Connecticut Valley Broadleaf, Connecticut Valley Havana Seed, New York and Pennsylvania Havana Seed, Southern Wisconsin, Northern Wisconsin, and Puerto Rican tobaccos. Price support is made available to eligible producers of these types of tobacco in accordance with Section 106 of the Agricultural Act of 1949, as amended.

DATE: Effective December 14, 1981.

FOR FURTHER INFORMATION CONTACT: Harry D. Millner, ASCS, (202) 447–4281.

This notice sets forth the rates at which eligible grades of 1981-crop tobacco of the types specified herein will be supported. These rates reflect a price support level which has been determined in accordance with the formula prescribed in Section 106 of the Agricultural Act of 1949, as amended. Since there are no options to be considered in connection with this determination, an Impact Analysis has not been prepared.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified "not major" since these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increase in costs to consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment investment, production, innovation, or an ability of United States—based enterprises to compete with foreign enterprises in domestic or export markets.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice of determination since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 53 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

The title and number of the Federal Assistance Program to which this notice applies as set forth in the catalog of Federal Domestic Assistance are: Title: Commodity Loan and Purchases; Number: 10.051. This action will not have a significant impact specifically on area and community development. Therefore, review as established by Office of Management and Budget (OMB) Circular A–95 was not used to assure that units of local government are informed of this action.

Price support for Ohio filler, Connecticut Valley Broadleaf, Connecticut Valley Havana Seed, New York and Pennsylvania Havana Seed, Southern Wisconsin, Northern Wisconsin, and Puerto Rican tobaccos is made available each year to producers of these types of tobacco by CCC through a producer-owned cooperative marketing association in accordance with regulations codified at 7 CFR Part 1464. Price support is mandatory for eligible kinds of tobacco at the level determined in accordance with Section 106 of the Agricultural Act of 1949, as amended. The level of support for the 1981 crop of tobacco is determined under Section 106 by multiplying the support level for the 1959 crop of eligible kinds of tobacco by the ratio of the average of the index of prices paid by farmers, including wage rates, interest, and taxes for the three calendar years 1978–80 (which is 851) to the average index of such prices paid by farmers, including wage rates, interest, and taxes for the 1959 calendar year (which is 298). The resulting ratio is 2.86. The support level for the 1981 crop of each eligible kind of tobacco is, therefore, 286 percent of the 1959 level.

The support rates determined by the Secretary for the various grades of 1981-crop tobacco as set forth in this notice reflect the statutorily required support level.

Since the Secretary of Agriculture has no discretion in determining the level of support for 1981 crops of Ohio filler, Connecticut Valley Broadleaf, Connecticut Valley Havana Seed, New York and Pennsylvania Havana Seed, Southern Wisconsin, Northern Wisconsin, and Puerto Rican tobaccos and must establish such level in accordance with the formula prescribed by Section 106 of the 1949 Act, it has

been determined that no further public rulemaking is required with respect to the price support rates specified herein.

Accordingly, the Secretary has determined that the following price support rates will be in effect for the 1981 crops of Ohio filler (Types 42–44), Connecticut Valley Broadleaf (Type 51), Connecticut Valley Havana Seed (Type 52), New York and Pennsylvania Havana Seed (Type 53), Southern Wisconsin (Type 54), Northern Wisconsin (Type 55), and Puerto Rican (Type 46) tobaccos:

BILLING CODE 3410-11-M

Coronado National Forest Grazing Advisory Board; Meeting

The Coronado National Forest Grazing Advisory Board will meet in the Federal Building, Room 7X, 301 West Congress, Tucson, Arizona at 10:00 a.m., January 19, 1982. The purpose of this meeting is to discuss allotment management planning, the use of range betterment funds, and to elect board officers.

The meeting will be open to the public. Persons who wish to attend should notify Larry Allen, Coronado Supervisor's Office, telephone 602-792-6418. Written statements will be filed with the board before or after the meeting.

The board has established the following rule for public participation: Nonmembers are asked to withhold comments until the close of business.

December 4, 1981.

R. B. Tippeconnic,

Forest Supervisor.

BILLING CODE 3410-11-M

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations (See, 14 CFR 302.1701 et seq.)

Week Ended December 4, 1981.

Subpart Q Applications

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Date filed	Docket No	Description
Nov 30, 1981	40270	Kodiak Western Alaska Airlines, Inc., c/o Richard P. Taylor, Steptoe & Johnson, 1250 Connecticut Avenue, N.W., Washington, D.C. 20036. Application of Kodiak Western Alaska Airlines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests to add the following points to its current certificate of public convenience and necessity for Route 141: Aniak, Alaska; Barrow, Alaska; Barter Island (Katkovik), Alaska; Bethel, Alaska, Bettles, Alaska; Cordova,. Alaska; Fairbanks, Alaska; Ft. Yukon, Alaska; Galena, Alaska; Hilo, Hawaii; Juneau, Alaska; Homer, Alaska; Honolulu, Oahu, Hawaii; Iliamna, Alaska; Kailua-Kona, Hawaii, Hawaii; Kahului, Maui, Hawaii, Kamuela, Maui, Hawaii; Kaunakakei, Molokai, Hawaii; Kenai, Alaska; Kotzebue, Alaska; Lanai, Lanai, Hawaii; Lihue, Kauai, Hawaii; McGrath, Alaska, Mekoryuk, Alaska, Nome, Alaska, Umiat, Alaska; Unalakleet, Alaska; Valdez, Alaska; Yakutat, Alaska. Conforming Applications, motions to modify scope, and Answers may be filed by December 28, 1981.
Dec 2, 1981	40276	Servicio De Carga Aerea, S.A. d/b/a Central Amenca Air Cargo, c/o Roy Nerenberg, 1825 K Street NW., Suite 720, Washington, D.C. 20006. Application of Servicio De Carga Aerea, S.A. d/b/a Central America Air Cargo pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests a foreign air carrier permit to authorize air transportation of property and mail in non-scheduled and charter operations between the terminal point San Jose, Costa Rica; the intermediate points Panama City, Panama; Managua, Nicaragua; San Salvador, El Salvador; San Pedro Sula and Tegucigalpa, Honduras; Guatemala City, Guatemala; Belize, Belize, Belize; Mexico City, Mexico; and the terminal point Miami, Florida. Answers may be filed by December 29, 1981.
Nov 3, 1981	40172	Sunjet International Airlines Limited, c/o Herbert Alan Dubin Baskin and Sears, 818 Connecticut Avenue, N.W., Washington, D.C. 20006. Amended Application of Sunjet International Airlines Limited to embrace service to the intermediate points on UK Route 9 as provided for in Section 3 of Annex 1 of the Air Services Agreement between United Kingdom and United States signed at Bermuda on July 23, 1977, specifically Bahamas, Barbados, Dominican Republic, Grenada, Guadeloupe, Guyana, Haiti, Jamaica, Martinique, St. Maarten, St. Martin, Trinidad & Tobago, Antigua, Dominica, St. Lucia, St. Vincent, Belize, British Virgin Islands, Cayman Islands, Montserrat, and Turks & Caicos Islands, to be served as intermediate points in scheduled and charter foreign air transportation of persons, property and mail on UK Route 9, between St. Kitts, B.W.I. and Miami, Florida. Answers may be filed by December 31, 1981.

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

Commuter Fitness Determination

The Board is proposing to find the following carriers fit willing and able to provide commuter air carrier service under section 419(c)(2) of the Federal Aviation Act, as amended, and that aircraft used in this service conform to applicable safety standards.

Order	Applicant	Response date
81-12-37	Sun Aire Lines	Dec. 23, 1981
81-12-38	North American Airlines, Inc. d/b/a/ Air Miami.	Dec. 18, 1981.
81-12-42	Shasta Air, Inc.	Dec. 28, 1981
81-12-46	New England Airlines, Inc.	Dec. 29, 1981
81-12-47	Greater Pacific Airways, Inc.	Dec. 29, 1981

All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed in Attachment A of the respective orders and file response or additional data for Orders 81-12-38, -42, -46, and -47 with the Special Authorities Division, Room 915, and for Order 81-12-37 with the Essential Air Services Division, Room 921, 1825 Connecticut Avenue, N.W. Washington, D.C. 20428.

The complete text of the orders is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request to the above address.

For further information contact: Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, Washington, D.C. 20428 for Orders 81-12-37: Barbara Pfeiffer, (202) 673-5354; for Order 81-12-38: Ms. Joyce Snovitch, (202) 673-5074; for Order 81-12-42: Mr. James Lawyer, (202) 673-5088; for Order 81-12-46 Mr. J. Kevin Kennedy, (202) 673-5918; for Order 81-12-47: John McCamant, (202) 673-5082.

By the Civil Aerinautics Board: December 9, 1981.

Phyllis T. Kaylor,
Secretary.

[Docket 40269]

Visit USA Fare/Export Inland Contract Rate Investigation; Postponement of Prehearing Conference

Notice is hereby given that the prehearing conference in the above-entitled matter orginally scheduled to be held on December 23, 1981, is hereby postponed until January 28, 1982, at 10:00 a.m. (local time) in Hearing Room "D", Universal North Building, 1875 Connecticut Avenue, N.W., Washington, D.C. before the undersigned administrative law judge.

The Bureau of International Aviation and the Bureau of Compliance and Consumer Protection will circulate their prehearing conference materials on or before January 8, 1982, and the other parties on or before January 22, 1982. The submissions of the other parties shall be limited to points on which they differ with the Bureaus and shall use the numbering and lettering used by the Bureaus to facilitate cross-referencing. The January 8 and January 22nd are dates for actual delivery of materials and not mailing dates.

Dated at Washington, D.C., December 8, 1981.

John M. Vittone,
Administrative Law Judge.

DEPARTMENT OF COMMERCE

International Trade Administration

Application for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, on or before January 4, 1982.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 2119 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00035. Applicant: Naval Research Laboratory, 4555 Overlook Avenue, S.W., Washington, D.C. 20375.

Article: Electron Beam Microfabrication System. Manufacturer: Cambridge Instruments Ltd., United Kingdom. Intended use of article: The foreign article is intended to be used in research in a number of areas involving electron devices and electro-optical devices. In nearly every area of device research, future progress depends on the capability for fabricating test devices and structures with smaller geometries, more accurate geometries, and tighter parameter control. At NRL, the capability for fabricating complex, state-of-the art devices is centered in the Micro-electronics Fabrication Facility. This facility, though a part of the Electronics Technology Division (Code 5200), serves as a research "tool" for work done throughout NRL. The acquisition of this lithography capability would permit NRL to advance its device research, especially in the area of very small devices and very accurate geometry devices, in a very significant way. Application received by Commissioner of Customs: November 2, 1981.

Docket No. 82–00037. Applicant: Yale University, Dept. of Engineering & Applied Science, P.O. Box 2159, Yale Station, New Haven, CT 06520. Article: Optically Contacted Fabry Perot Assembly. Manufacturer: IC Optical Systems Ltd., United Kingdom. Intended use of article: The article is intended to be used as an intracavity spectral tuning element in a broadband pulsed dye-laser. This is expected to narrow the laser emission linewidth to approximately 3 Angstroms. The dye-laser is to be employed in experimental studies on possible population inversions in the atomic levels of hydrogen in a laser-produced plasma. This work is being pursued by a graduate student in partial fulfillment of the degree of Doctor of Philosophy. Application received by Commissioner of Customs: November 2, 1981.

Docket No. 82–00038. Applicant: Texas Department of Health, 1100 West 49th Street, Austin, TX 78756. Article: Electron Microscope, Model H–600–3 and Accessories. Manufacturer: Hitachi Scientific Instruments, Japan. Intended use of article: The article is intended to be used for studies of human tissues in both normal and infected modes as seen by a diagnostic microbiology laboratory, and related to investigations of infectious disease processes in tissues, especially kidney, spleen, brain and integument. Experiments will consist of application of current technology to existing problems in clinical microbiology, such as the application of immunochemical techniques to the problem of rapid indentification of viruses, and the identification of cellular receptor sites of bacteria and protozoa as detected with ferritin-labelled antibodies. Further research will consist of classification of viral particles directly from exudative material by morphology. The article will also be used for educational purposes at many levels which will include the use of materials and actual human cases for teaching medical and veterinary students, pathology interns and residents, laboratory technicians and students of microbiology. Application received by Commissioner of Customs: November 2, 1981.

Docket No. 82–00039. Applicant: University of Southern California, Dept. of Biological Sciences, University Park, Los Angeles, CA 90007. Article: (3) Micromanipulators, MP1–2 with Accessory. Manufacturer: Narishige Scientific Instrument Laboratory, Japan. Intended use of article: The articles are intended to be used in the courses: Neurobiology Laboratory, BISC 422L, Comparative Physiology of Animals—BISC 437L and Neurobiology, BISC 564 to train students in the technique of intracellular electrical recording from living cells for which the articles are indispensable. Application received by Commissioner of Customs: November 2, 1981.

Docket No. 82–00040. Applicant: Geophysical Institute, University of Alaska, 903 Koyukuk Ave., No., Fairbanks, AK 99701. Article: Wide Band Digital Imaging System. Manufacturer: MacDonald Dettwiler & Associated Ltd., Canada. Intended use of article: The article is intended to be used for studies of geophysical episodic events such as navigation hazards, wildfires, floods, volcanic eruptions, river freezeup and breakup, and sea-ice morphology. The experiment to be conducted involves acquisition of raw spacecraft data in real-time and the generation of high-resolution photographic images in color and black and-white on an immediate basis without the delays of many weeks which are involved with existing channels for distribution of data from most earth-sensing satellites. the objectives of the research are to develop the means to provide custom-processed satellite data products in near real-time of important episodic events relating to geophysical phenomena in the state of Alaska. Application received by Commissioner of Customs: November 6, 1981.

Docket No. 82–00041. Applicant: Harris Hospital-Methodist, 1300 West Cannon Street, Fort Worth, Texas 76104. Article: Electron Microscope, Model JEM–100CX and Accessories. Manufacturer: Jeol Ltd., Japan. Intended use of article: The article is intended to be used primarily and clinically (1) to better characterize certain human pathologic states which cannot be specifically diagnosed by light microscopy, as an aid to the appropriate treatment of the patients, (2) to confirm diagnoses made by light microscopy, initially regarded as equivocal, and (3) to obviate the use of special tissue stains whenever possible because of the difficulty in interpretation and their questionable value. Research usage will be (1) to acquire a better understanding of the pathophysiology of human tissue, i.e., bone marrow, liver, and kidney through the study of cellular ultrastructure, (2) to identify infectious and noninfectious virus particles as well as to reveal viruses that cannot be replicated in cell cultures or laboratory animals or observed indirectly by conventional virological or serological methods, and (3) to study the ultrastructure of hepatoparenchymal damage in an effort to develop a more accurate correlation of the various liver function tests than can be provided by chemical analysis alone. The article will also be used to provide education and training for microscopists at both the technical and professional levels. Application received by Commissioner of Customs: November 6, 1981.

Docket No. 82–00043. Applicant: Auburn University, Auburn, Alabama 36849. Article: Surface Analysis System; XPS, UPS, AES, ISS. Manufacturer: Leybold-Heraeus GMBH & Co., West Germany. Intended use of article: The article is intended to be used for studies of surfaces, thin films, interfaces of various elements, organic/inorganic compounds, and absorbed gases. Experiments to be conducted include preparation and reaction of materials in selected atmospheres followed by study using the available surface analysis techniques. The objectives pursued in the course of the investigations will be to obtain an understanding of the physics and chemistry of surfaces and interfaces. Included will be the determination of chemical composition and structure of surfaces and interfaces of the surface atoms. Such measurements are essential to the research objectives of: novel catalyst design, better fabrication procedures for thin film semiconducting devices, and the study of coal surfaces under reaction (gasification or liquefaction). The article will also be used in the training of M.S. and Ph. D. students during the course of their thesis research. Application

received by Commissioner of Customs: November 9, 1981.

Docket No. 82–00044. Applicant: U.S. Department of Agriculture, Plant Stress Laboratory, PPHI, Bldg. 177B, BARC-East, Beltsville, MD 20705. Article: Electron Microscope, Model H–300 with Film Desiccator and Holders. Manufacturer: Hitachi Scientific Instruments, Japan. Intended use of article: The article is intended to be used for studies of ultrastructural features of cells including observations of membranes, ribosomes, golgi and other cellular organelles. Experiments will be conducted in an effort to increase food and fiber quality and production. Application received by Commissioner of Customs: November 9, 1981.

Docket No. 82–00045. Applicant: Lyndon B. Johnson Space Center, Houston, TX 77058. Article: Red Filter for Precision Approach Path Indicator. Manufacturer: Barrel Lighting Co., Ltd., United Kingdom. Intended use of article: The article is intended to be used in a test evaluation at Northrup Strip, NM using T–38 aircraft and the Shuttle Training Aircraft to determine the suitability of this apparatus to the approach to landing portion of Shuttle Operations. Application received by Commissioner of Customs: November 9, 1981.

Docket No. 82–00046. Applicant: USDA, SE/ARS, Biological Control of Insects Research Laboratory, Box A, Research Park, Columbia, MO 65205. Article: Electron Microscope, Model JEM 100S and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to examine and study various types of microorganisms (bacteria, viruses, fungi, protozoa) and biological specimens (organs and cells) of invertebrate, especially insects. Phenomena to be studied include the effects of these microorganisms on organs and tissue as well as the ultrastructure morphology and characteristics of these microorganisms. Experiments to be conducted will include:

(a) Characterization of the morphology and ultrastructure of viral entities as well as components of bacterial, fungal and protozoan cells.

(b) Studies of the various chemical and biological agents on sub-cellular components (both *in vivo* and *in vitro*) of cells and tissue of invertebrates.

(c) Effects of microorganisms on non-homologous and homologous cells.

(d) Mode of absorption, penetration, replication and synthesis of invertebrate viruses in homologous and non-homologous hosts.

(e) Studies on the development and formation of antibodies in the hemolymph of insects exposed to microorganisms and to multicellular invertebrate as well as changes in the cellular and subcellular ultrastructure of hemocytes of insects.

(f) Characterization of mutants and recombinants based on physiological and biochemical reactions to histochemicals as well as ultrastructures and morphology.

(g) Detection and description of the ultrastructure of receptor cells which permit benefical predators and parasites to seek out potential hosts.

(h) Characterization and description of membrane(s) and wall structure(s) of viral inclusion bodies as well as microscopic-capsular spheres.

(i) Anaylsis and observation of cells specially labeled with radioactive isotopes utilizing autoradiographic procedures.

Application received by Commissioner of Customs: November 9, 1981.

Docket No. 82–00047. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, Livermore, CA 94550. Article: Imacon 500, Ultrafast Streak Camera. Manufacturer: Hadland Photonics, Ltd., United Kingdom. Intended use of article: The article is intended to be used for studies of metals such as Al, Au, Cu, U, Be, Mo. The equations of state of these metals are to be investigated under the conditions of ultra-high pressure. The shock velocities in the metals noted above will be used to determine the material equation of state along the Hugoniot curve (the locus of final states reached by shock waves of varying strengths). The shock velocity measurement is central to this investigation. Application received by Commissioner of Customs: November 9, 1981.

Docket No. 82–00048. Applicant: The Regents of the University of California, Riverside; Material Management Department, Riverside, CA 92521. Article: Saddle Field Neutral Source. Manufacturer: Ion Tech Ltd., United Kingdom. Intended use of article: The article is intended to be used as the central element of a specially-constructed fast atom bombardment (FAB) source for a fourier transform mass spectrometer. This instrument is being modified to permit gas-phase studies of molecular species with masses in the 10,000–20,000 dalton range. In order to accomplish this, these involatile materials must be volatilized and ionized. That is the purpose of the saddle field gun. by incorporation of the gun in the instrument's direct insertion sample probe it is expected that bombardment of samples with both xenon and argon neutral atoms with energies of circa 5 KeV will be possible. Once the unique research instrument is constructed it will be used for advanced graduate-level training of students studying for the Ph. D. and M.S. degrees in Analytical Chemistry. Application received by Commissioner of Customs: November 18, 1981.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–25–M

Drycleaning Machinery From West Germany; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on drycleaning machinery from West Germany. The review covers the two known manufacturers and exporters of this merchandise to the United States presently covered by the finding and separate time periods for each firm up to June 30, 1980. The review indicates the existence of dumping margins for each firm.

As a result of the review the Department has preliminarily determined to assess dumping duties for those firms equal to the calculated differences between United States price and foreign market value on each of their shipments during the periods of review. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 14, 1981.

FOR FURTHER INFORMATION CONTACT: Betsy E. Stillman or David R. Chapman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–4833/2657).

SUPPLEMENTARY INFORMATION:

Background

On November 8, 1972, the Department of the Treasury published in the **Federal Register** an antidumping finding with respect to drycleaning machinery from

West Germany (T.D. 72–311, 37 FR 23715).

On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 became effective. Title I replaced the provisions of the Antidumping Act of 1921 ("the 1921 Act") with a new title VII to the Tariff Act of 1930 ("the Tariff Act"). On January 2, 1980, the authority for administering the antidumping duty law was transferred from the Treasury Department to the Department of Commerce ("the Department"). The Department published in the **Federal Register** of March 28, 1980 (45 FR 20511–20512) a notice of intent to conduct administrative reviews of all outstanding dumping findings. As required by section 751 of the Tariff Act, the Department has conducted an administrative review of the finding on drycleaning machinery from West Germany. The substantive provisions of the 1921 Act and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by this review are shipments of drycleaning machinery, currently classifiable under item 670.4100 of the Tariff Schedules of the United States Annotated (TSUSA). The Department knows of two firms engaged in the manufacture and exportation of drycleaning machinery to the United States and presently covered by the finding.

This review covers one firm for all time periods up to June 30, 1980, the most recent date for which information is available, during which the company shipped drycleaning machinery to the United States and for which appraisement instructions ("master lists") were not issued by Treasury. The review for the other firm covers the one-year period from July 1, 1979 to June 30, 1980. We will analyze this firm's sales of drycleaning machinery made during previous unreviewed periods, and certain machines sold during the most recent period, in a subsequent administrative review.

The issue of the Department's obligation to conduct administrative review of entries, unliquidated as of January 1, 1980 and covered by previously issued master lists, is under review. Liquidation has been suspended pending disposition of the issue.

United States Price

In calculating United States price, the Department used exporter's sales price, as defined in section 772 of the Tariff Act or section 204 of the 1921 Act.

Exporter's sales price was based on the packed price from the firm's U.S. affiliate to the first unrelated purchaser in the United States. Where applicable, deductions were made for U.S. duty, brokerage fees, ocean freight, insurance, U.S. and foreign inland freight, handling and demurrage. We also made deductions, where applicable, for discounts and selling expenses. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value, the Department used home market price, as defined in section 773 of the Tariff Act or section 205 of the 1921 Act. The foreign market value was adjusted, where applicable, for discounts and for differences in packing. We made deductions for technical assistance, differences in credit costs and for commissions to unrelated parties in accordance with section 353.15 of the Commerce Regulations and § 153.10 of the Customs Regulations. Adjustments were also made for differences in similar merchandise in accordance with § 353.16 of the Commerce regulations and § 153.11 of the Customs regulations. In accordance with § 353.15(c) of the Commerce regulations we made allowances for actual selling expenses incurred in the home market up to the amount of selling expenses incurred in the United States. All selling expenses in the U.S. were deducted from the resale price in accordance with section 772 of the Tariff Act. This was accomplished by deducting all U.S. selling expenses which remained after deducting such expenses to offset the commission paid in the home market.

Additional claims for adjustments for selling expenses were disallowed when they were determined not to be selling expenses or were not properly quantified. We did not allow claims for adjustments to home market price for selling expenses for one respondent because that respondent did not separate U.S. direct from U.S. indirect selling expenses. We could not, therefore, establish the limit to the exporter's sales price offset required by section 353.15(c) of the Commerce Regulations. Level of trade adjustments were disallowed because they were not properly quantified. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Firm	Time period	Margin (percent)
Boewe Maschinenfabrik Gmbh	7/1/79–6/30/80	65.95
Seco Maschinenbau Gmbh & Co. Kommandtgesell-schaft	1/1/78–6/30/80	10.56

Interested parties may submit written comments on these preliminary results on or before January 13, 1982 and may request disclosure and/or a hearing on or before December 29, 1981. Any request for an administrative protective order must be made no later than December 21, 1981. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all entries made with export dates during the time periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions separately on each shipper directly to the Customs Service.

Further, as provided by § 353.48(b) of the Commerce Regulations, a cash deposit based upon the margins calculated above shall be required on all shipments of drycleaning machinery entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and §353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 7, 1981.

BILLING CODE 3510–25–M

Viscose Rayon Staple Fiber From Italy; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping finding.

SUMMARY: On October 8, 1981, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on

viscose rayon staple fiber from Italy. The review was limited to the only known exporter, Snia Fibre S.p.A. (formerly Italviscosa), and to the period June 1, 1980 through May 31, 1981. Interested parties were given an opportunity to submit written or oral comments on these preliminary results. We received no comments.

EFFECTIVE DATE: December 14, 1981.

FOR FURTHER INFORMATION CONTACT: J. Linnea Bucher or David R. Chapman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–4273/2657).

SUPPLEMENTARY INFORMATION:

Background

On June 13, 1979, an antidumping finding with respect to viscose rayon staple fiber from Italy was published in the **Federal Register** as Treasury Decision 79–168 (44 FR 33878–9). On October 8, 1981, the Department of Commerce ("the Department") published in the **Federal Register** the preliminary results of its administrative review of the finding (46 FR 49936–7). The Department has now completed that administrative review.

Scope of the Review

The imports covered by this review are shipments of viscose rayon staple fiber, except solution dyed, in noncontinuous form, not carded, not combed and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments), currently classifiable under items 309.4320 and 309.4325 of the Tariff Schedules of the United States Annotated (TSUSA). The Department knows of one Italian exporter of viscose rayon staple fiber to the United States. That firm is Snia Fibre, S.p.A. (formerly Italviscosa). The review covered the period June 1, 1980 through May 31, 1981.

Final Results of the Review

The Department received no written comments or requests for disclosure or a hearing. Therefore, the final results of our review are the same as those presented in the preliminary results of review. There are no known shipments to the United States during this time period and no known unliquidated entries.

As provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated duties based upon the most recent margin calculated, that is 18.6 percent of the entered value, shall be required on all shipments of viscose rayon staple fiber from Italy entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review. The Department intends to conduct the next administrative review by the end of June 1983.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and section 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

December 7, 1981.

BILLING CODE 3510–25–M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: a. Name: Manomet Bird Observatory (P288); b. Address: Manomet, Massachusetts 02345.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals: Harbor seal (Phoca vitulina concolor) 5.

4. Type of Take: Up to five(5) rehabilitated, beached/stranded harbor seals will be fitted with a radio transmitter and released at Stage Point, Massachusetts. Animals will be monitored to determine wintering haul-out sites, daily movements, feeding times, frequency, and locations, basic population parameters, and the physiological and biological demands of a free-swimming harbor seal.

5. Location of Activity: Animals will be released at Stage Point, Massachusetts.

6. Period of Activity: 2 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee on Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, on or before January 13, 1982. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: December 8, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Patent and Trademark Office

Public Advisory Committee For Trademark Affairs; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee meeting:

The Public Advisory Committee for Trademark Affairs will meet from 9:00 a.m. until 5:00 p.m. on January 12, 1982, at the Stouffer's National Center Hotel, 2399 Jefferson Davis Highway, Arlington, Virginia.

The Committee was first established in 1970 and was reestablished in 1979 to advise the Patent and Trademark Office of steps that can be taken to increase the effectiveness of administration of the Trademark Act and to provide a continuing source of information from the private sector to the government.

The agenda for the meeting is as follows:

(1) Trademark Fees.

(2) Trademark Pendency.

(3) Trademark Automation.

(4) Operations of the Trademark Trial and Appeal Board.

(5) Proposed Revisions to Trademark Rules of Practice.

(6) Trademark Examining Operation Reorganization.

The meeting will be open to public observation; approximately twelve (12) seats will be available for the public on a first-come first-served basis. If time permits, oral comments by the public of three (3) minutes on each topic within the above agenda will be allowed. To insure proper consideration at the meeting, any comments or suggestions relating to the agenda items should be submitted in writing before January 5, 1982. Further comments and suggestions will be accepted after the meeting on any of the matters discussed.

Copies of the minutes will be available upon request.

Inquiries may be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231. Please mark all correspondence to the attention of Alan B. Davidson, Office of the Assistant Commissioner for Trademarks, Room CP3–11C17. Telephone: 703–557–3916.

Dated: December 2, 1981.

Gerald J. Mossinghoff,

Commissioner of Patents and Trademarks.

Dated: December 3, 1981.

Approved:

Robert B. Ellert,

Acting Assistant Secretary for Productivity, Technology and Innovation.

BILLING CODE 3510–B5–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting Import Restraint Levels for Certain Cotton Textile Products from the People's Republic of China

December 9, 1981.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Granting increases, variously, for swing, carryover and carryforward for cotton textile products in Categories 331, 339, 340, 341 and 347/348, produced or manufactured in the People's Republic of China and exported during the agreement year which began on January 1, 1981.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal**

Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 8542), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 FR 52409).)

SUMMARY: The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 17, 1980, as amended, between the Governments of the United States and the People's Republic of China provides for the carryover of shortfalls from the previous agreement year in certain categories (carryover), for percentage increases in certain specific category ceilings during an agreement year (swing), and for the borrowing of yardage from the following year's level (carryforward) with the amount used deducted from that level in the following year. Pursuant to the terms of the bilateral agreement, as amended, and at the request of the Government of the People's Republic of China, the import restraint levels established for Categories 331, 339, 340, 341 and 347/348 are being increased for the twelve-month period which began on January 1, 1981 and extends through December 31, 1981.

EFFECTIVE DATE: December 9, 1981.

FOR FURTHER INFORMATION CONTACT: Carl Ruths, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

SUPPLEMENTARY INFORMATION: On December 4, 1980, a letter dated November 28, 1980 from the Chairman of the committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the **Federal Register** (45 FR 80324), which established import restraint levels for certain specified categories of cotton, wool and man-made fiber textile products, including Categories 331, 339, 340, 341, and 347/348, produced or manufactured in the People's Republic of China and exported to the United States during the twelve-month period which began on January 1, 1981. In accordance with terms of the bilateral agreement and at the request of the Government of the People's Republic of China, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs in the letter published below to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in the foregoing categories in excess of the adjusted levels of restraint.

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 9, 1981.

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: On November 28, 1980, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry for consumption, or withdrawal from warehouse for consumption, during the twelve-month period beginning on January 1, 1981 and extending through December 31, 1981 of cotton, wool and man-made fiber textile products in certain specified categories, produced or manufactured in the People's Republic of China, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 17, 1980, as amended, between the Governments of the United States and the People's Republic of China; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to amend, effective on December 9, 1981 and for the twelve-month period beginning on January 1, 1981 and extending through December 1981, the levels of restraint established for cotton textile products in Categories 331, 339, 340, 341, and 347/348 of the following:

Category	Amended 12-mo. level of restraint [1]
331	3,740,308 dozen.
339	906,015 dozen.
340	577,079 dozen.
341	332,429 dozen.
347/348	2,042,880 dozen.

[1] The levels of restraint have not been adjusted to reflect any imports after December 31, 1980.

The actions taken with respect to the Governments the People's Republic of China and with respect to imports of cotton textile products from China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 81-35630 Filed 12-11-81; 8:45 am]

BILLING CODE 3510-25-M

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 17, 1980, as amended, between the Governments of the United States and the People's Republic of China, which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; (3) admisistrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Announcing Import Restraint Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products From Macau, Effective on January 1, 1982

December 9, 1981.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton, wool and man-made fiber textile products imported from Macau, effective on January 1, 1982.

SUMMARY: The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, between the Governments of the United States and Portugal establishes specific ceilings for cotton, wool and man-made fiber textile products from Macau in Categories 333/334/335 (Suit-Type and Other Cotton Coats), 338 (Men's and Boys' Knit Shirts), 339 (Women's, Girls' and Infants' Knit Shirts and Blouses), 340 (Men's and Boys' Woven Cotton Shirts), 341 (Women's, Girls' and Infants' Woven Cotton Blouses), 347/348 (Cotton Trousers), 445/446 (Wool Sweaters), 633/634/635 (Suit-Type and Other Man-Made Fiber Coats), and 641 (Blouses), during the agreement year which begins on January 1, 1982 and extends through December 31, 1982. The agreement also provides consultation levels for certain categories, such as Categories 331 (Cotton Gloves), and 351 (Cotton Nightwear), which are not subject to specific ceilings and which may be increased upon agreement between the two governments. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textile products in the foregoing categories, produced or manufactured in Macau and exported during the twelve-month period which begins on January 1, 1982 and extends through December 31, 1982, in excess of the designated levels of restraint. The level of restraint for Categories 333/334/335 has been reduced by 13,750 dozen

for 1982 as a result of a negotiated settlement.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 FR 52409).)

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: January 1, 1982.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 9, 1981

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, between the Governments of the United States and Portugal; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1982 and for the twelve-month period extending through December 31, 1982, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Macau, in excess of the indicated levels of restraint:

Category	12-mo. level of restraint
331	200,000 dozen pairs.
333/334/335	84,992 dozen of which not more than 50,801 dozen shall be in Cat. 333/335
338	129,548 dozen.
339	551,193 dozen.
340	124,180 dozen.
341	80,094 dozen.
347/348	295,773 dozen.
351	13,462 dozen.
445/446	69,279 dozen.
633/634/635	207,107 dozen.
641	74,449 dozen.

In carrying out this directive entries of textile products in the foregoing categories, except Categories 331, 351 and 641, which have been exported to the United States on and after January 1, 1981, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period beginning on January 1, 1981 and extending through December 31, 1981. In the event that the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter. Textile products in Categories 331, 351 and 641 which have been exported before January 1, 1982 shall not be subject to this directive.

Textile products in Categories 331, 351 and 641 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The levels of a restraint set forth above are subject to adjustment in the future pursuant to the provisions of the bilateral agreement of November 29, and December 18, 1979, which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 F.R. 25121), October 5, 1981 (46 FR 48963) and October 27, 1981 (46 F.R. 52409).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Portugal and with respect to imports of cotton, wool and man-made fiber textile products from Macau have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Application of High Technology to Ground Forces; Notice of Advisory Committee Meeting

The Defense Science Board Task Force on Application of High Technology to Ground Forces will meet in closed session on January 5, 1982 and February 19, 1982 in the Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on overall research and engineering policy and to provide long-range guidance to the Department of Defense in these areas.

At the meetings on January 5, and February 19, 1982 the Task Force will review current missions of light forces and make recommendations concerning the application of high technology to enhance battlefield capabilities.

In accordance with 5 U.S.C. App. 1, 10(d)(1976), it has been determined that this Defense Science Board Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1)(1976), and that accordingly this meeting will be closed to the public.

Dated: December 9, 1981.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

[FR Doc. 81-35657 Filed 12-11-81; 8:45 am]

BILLING CODE 3810-01-M

Defense Science Board Task Force on University Responsiveness to National Security Requirements; Meeting

The Defense Science Board Task Force on University Responsiveness to National Security Requirements will meet in closed session on January 6, 1982 at the Pentagon, Room IE801, Washington, D.C. The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on overall research and engineering policy and to provide long-range guidance to the Department of Defense in these areas.

At the meeting on January 6, 1982, the Task Force will review, using the guidelines established in its Terms of Reference, industry and university relationships to DoD programs. Additionally, the Task Force's ongoing review of the impact of DoD export control guidelines on university research

and teaching activities will be addressed.

In accordance with 5 U.S.C. App. 1 10(d)(1976), it has been determined that this Defense Science Board Task Force meeting concerns matters listed in U.S.C. 552b(c)(1)(1976), and that accordingly this meeting will be closed to the public.

December 8, 1981.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

DEPARTMENT OF ENERGY

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272), notice is hereby provided of the following meeting:

A meeting of the Industry Working Party to the International Energy Agency will be held on January 19–20, 1982, at the offices of OEMV, 5, Otto Wagner—Platz A–1091, Vienna, Austria, beginning at 9:30 a.m. on January 19.

The agenda for the meeting is as follows:

- Status of Standing Committee on the Oil Market and Industry Working Party activities and arrangements for future meetings.
- Consideration of questions connected with the crude cost information system.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public.

Issued in Washington, D.C., December 7, 1981.

Craig S. Bamberger,

Assistant General Counsel, International Trade and Emergency Preparedness.

AGENCY: Department of Energy.

ACTION: Three proposed remedial orders to Marathon Oil Company and Opportunity for Objection.

I. Introduction

Pursuant to 10 CFR 205.192, the Office of Special Counsel of the Economic Regulatory Administration (ERA), Department of Energy (DOE) hereby gives Notice of three Proposed Remedial Orders issued to Marathon Oil Company, Findlay, Ohio. In accordance with that section, a copy of one or more of the Proposed Remedial Orders with confidential information, if any, deleted, may be obtained from the DOE.

Marathon is a refiner engaged in the production of crude oil, refining, and the marketing of petroleum products. Marathon was therefore subject to the Mandatory Petroleum Price and Allocation Regulations which were in effect unil January 28, 1981.

II. The Proposed Remedial Orders

1. Proposed Remedial Order No. RMNM00101

The Office of Special Counsel (OSC) of DOE has audited Marathon's reported cost recoveries and class of purchaser determinations from August 19, 1973 through December 31, 1976, and conducted further examinations of certain issues previously raised in Notice of Probable Violation issued to Marathon. OSC's audit also included a review of Marathon's compliance with special regulatory provisions governing the treatment of benezene and toluene during the period 1973–1976. OCS's findings are set forth in this Proposed Remedial Order.

OSC determined that Marathon did not consistently compute its cost recoveries in accordance with the equal application rule, and failed to properly compute cost recoveries at company operated retail service stations during the period 1973–1979, as required by the regulations. OSC also found that from April 1, 1974 through December 31, 1974, Marathon did not report cost recoveries for benzene and toluene because it incorrectly considered these products to be decontrolled. OSC further found that Marathon failed to make special adjustments to its reported incurred costs from April through December 1974 as a result of its treatment of benzene and toluence as decontrolled products.

In addition, OSC found that from August 19, 1973 through December 31, 1979, Marathon improperly treated F.S. Services, Inc., as a member of Marathon's wholesale reseller classes of purchaser instead of placing F.S. Services in its own single member class of purchaser. As a result of this error, Marathon improperly determined the May 15, 1973 weighted average prices for the firm which, in turn, led to the computation of erroneous maximum allowable prices for F.S. Services.

As a remedy for these violations, OSC proposed that Marathon refund $7,799,157 plus interest to F.S. Services to compensate for the effects of Marathon's failure to place F.S. Services in an appropriate class of purchaser from August 19, 1973 through December 31, 1979. OSC also proposed that Marathon refund $49,120,261 plus interest to its gasoline customers, $13,660,548 plus interest to its No. 2 oil customers, and $14,530,702 plus interest to its general refinery products customers to compensate for the effects of Marathon's overstatement of available costs from August 19, 1973 through December 31, 1976, as described in this Proposed Remedial Order and Proposed Remedial Order No. RMNM01701 (which was issued concurrently with this document). Marathon must also refund to its covered product customers those additional overcharges which resulted from the cost overstatements identified in the Proposed Remedial Order for the period January 1, 1977 through December 31, 1979.

2. Proposed Remedial Order No. RMNM01701

The Mandatory Petroleum Price Regulations generally permitted refiners to increase the prices of covered products by the amounts necessary to recoup increased costs on a dollar-for-dollar basis. OSC found in its audit of the increased product costs which Marathon reported for the period August 19, 1973 through December 31, 1979 that Marathon overstated these costs by $36,271,975. OCS's findings are set forth in this Proposed Remedial Order.

OSC determined that the largest portion of the overstatement was caused by Marathon's failure to use consistent methods of accounting to measure its crude oil costs for May 1973 and each month of measurement. Marathon utilized a weighted average method to calculate its domestic crude oil costs for May 1973, but used the "last in, first out" (LIFO) method to calculate each month of measurement.

Marathon also overstated its costs by including unrecouped June and July 1973 costs in its banks for September 1973 through January 1974. (The first month of measurement under the Phase IV regulations was not until August 1973). As a result, those costs from June and July which were not passed on in its increased prices, due to the Freeze Price Rule then in effect, could not be banked for use in later months.

In addition, from January 1977 through December 1979, Marathon reported imputed interest costs as available for pass-through for two of its equity status vessels which were obtained through lease/purchase arrangements. As the inputed interest on the purchase of these

vessels represented a cost of capital, it was not a permissable cost under the regulations.

In compensation for the violations identified in this Proposed Remedial Order and Proposed Remedial Order No. RMNM00101, for the period August 1, 1973 through December 1, 1976, OSC proposed that Marathon refund $49,120,261 plus interest to its gasoline customers, and $13,660,548 plus interest to its No. 2 oil customers, and $14,530,702 plus interest to its general refinery products customers. Marathon must also refund to its covered product customers those additional overcharges which resulted from the violations identified for the period January 1, 1977 through December 31, 1979.

3. *Proposd Remedial Order No. RMNL00001*

OSC's audit included a review of Marathon's reported crude oil and non-product cost increases for the period January 1, 1977 through December 31, 1979. OSC's audit also included a review of Marathon's reported cost banks for the years 1977, 1978 and 1979, and of Marathon's compliance during this period with the regulations which limited bank use. OSC's findings are set forth in this Proposed Remedial Order.

OSC's review disclosed that during the 1977–1979 audit period, Marathon included, as part of its marine transportation cost for imported crude oil, expenses for vessels which carried no Marathon crude oil to the United States. OSC also found that Marathon improperly included imputed interest for two equity status vessels in its marine transportation cost calculations. Marathon also improperly claimed marine transportation costs in 1978 which exceeded those actually incurred by Marathon during that year.

In addition, OSC's review disclosed that during the 1977–1979 audit period, marathon failed to allocate base period and month of measurement marketing costs to individual covered product categories before calculating its marketing cost increases, failed to calculate its marketing cost increases on a firm-wide basis, and failed to apply the cents per gallon limitations on its marketing cost increases in computing maximum allowable prices. OSC's audit also found that Marathon double counted certain additive cost increases, and failed to report net decreases in individual non-product cost categories.

OSC's review also disclosed that throughout the audit period, and during the months of February through December 1976, Marathon neither segregated its unrecouped costs into crude oil, purchased product, and non-product cost banks, nor distinguished these banks according to the period in which the costs were originally incurred, as required by the regulations. More importantly, Marathon also disregarded the regulatory limitations on the amount of unrecouped costs which could be included on its maximum allowable price calculations, and created negative banks to justify excessive selling prices for covered products in certain months.

In addition, OSC's review revealed that Marathon refiled its Refiners' Monthly Cost Allocation Reports for the months of measurement of April 1979 through December 1979, claiming cost bank totals which included increased crude oil costs attributable to exempt products. As a result, Marathon overstated its gasoline and general refinery products cost banks for these months by a cumulative total of $23,728,296,000.

As a remedy for these violations, OSC proposed that Marathon refund $165,407,000 plus interest, to its gasoline customers to compensate for the effects of the regulatory violations committed during the period 1977 through 1979 which are described in this Proposed Remedial Order and in Proposed Remedial Order Case Nos. RMNM01701 and RMNM00101.

III. Notice of Objection

In accordance with 10 CFR 205.193, any aggrieved person may file a Notice of Objection to any of the above described Proposed Remedial Orders with the Office of Hearings and Appeals on or before December 29, 1981. A person who fails to file a Notice of Objection shall be deemed to have admitted the findings of fact and conclusions of law as stated in the Proposed Remedial Order. If a notice of objection is not filed as provided by § 205.193, the respective Proposed Remedial Order may be issued as a final order.

All Notices, Statements, Motions, Responses, and other documents required to be filed with the National Office of Hearings and Appeals should be sent to: Department of Energy, Office of Hearings and Appeals, 2000 M Street, N.W., Washington, D.C.20461.

No confidential information shall be included in a Notice of Objection.

Requests for copies of one or more of the Proposed Remedial Orders with confidential information deleted should be directed to: Freedom of Information Reading Room, Forrestal Building, 1000 Independence Avenue, S.W., Room 1E–190, Washington, D.C. 20585.

Issued in Washington, D.C., November 24th, 1981.

Bethel Larey,

Acting Special Counsel.

BILLING CODE 6450-01-M

Ineligibility of Inactive Uranium Mill Tailings Site for Remedial Action

AGENCY: Department of Energy (DOE).

ACTION: To notify the public that the Baggs, Wyoming, inactive uranium mill tailings (processing) site is no longer eligible for remedial action by DOE under the provisions of Pub. L. 95–604, "Uranium Mill Tailings Radiation Control Act of 1978," enacted November 8, 1978.

SUMMARY: As mandated by Pub. L. 95–604, entitled "Uranium Mill Tailings Radiation Control Act of 1978," enacted November 8, 1978, the Secretary of Energy on November 8, 1979, designated 25 inactive uranium mill tailings (processing) sites for remedial action. That designation included the inactive uranium mill tailings site located in Baggs, Wyoming. (44 FR 74891, December 16, 1979). Recent information from the State of Wyoming and the Department of the Interior pertaining to the eligibility of the site under the provisions of section 101(6)(A) of the Act, has resulted in a determination by the Department of Energy that the Baggs site is on public lands under the jurisdiction of the Bureau of Land Management, U.S. Department of the Interior, and is, therefore, not eligible for remedial action by DOE. Accordingly, the Secretary's prior designation of the Baggs site for remedial action is hereby rescinded.

ADDRESS FOR COMMENTS AND FURTHER INFORMATION:

Dr. William E. Mott, Office of Operational Safety, Office of the Assistant Secretary for Environmental Protection, Safety, and Emergency Preparedness, U.S. Department of Energy, Washington, D.C. 20545, telephone: (301) 353–3016.

Issued in Washington, D.C. this 7th day of December 1981.

William A. Vaughan,

Assistant Secretary, Environmental Protection, Safety, and Emergency Preparedness.

Economic Regulatory Administration

January Entitlements Notice

Correction

In FR Doc. 81-35380, published on page 60231, on Wednesday, December 9, 1981, make the following corrections:

(1) In the third column, in the heading, "Entitlement" should be corrected to read "Entitlements".

(2) In the first paragraph, in the fifth line "entitlement" should be corrected to read "entitlements".

(3) In the tenth line, "remain" should be corrected to read "remains".

(4) In the last line of the document "the time" should be corrected to read "this time."

BILLING CODE 1505-01-M

Federal Energy Regulatory Commission

[Docket No. CP82-77-000]

Cities Service Gas Co.; Application

December 9, 1981

Take notice that on November 13, 1981, Cities Service Gas Company (Applicant), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP82-77-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline taps, measuring, regulating and appurtenant facilities to enable Applicant to render natural gas service to 9 rural right-of-way grantors, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate the following facilities:

1. Tap on Applicant's Wichita-Ottawa 20-inch transmission pipeline in Butler County, Kansas, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Page W. Benson.

2. Tap on Applicant's Pleasant Hill 8-inch transmission pipeline in Cass County, Missouri, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Robert Brinkoetter.

3. Tap on Applicant's Ottawa-Sedalia 12-inch transmission pipeline in Miami County, Kansas, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Jerry Cosner.

4. Tap on Applicant's Circleville 2-inch transmission pipeline in Jackson County, Kansas, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Frank Gilliland.

(5) Tap on Applicant's Petrolia-Fort Scott 8-inch transmission pipeline in Allen County, Kansas, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Anne C. Jordan.

6. Tap on Applicant's Ottawa-Sedalia 12-inch transmission pipeline in Pettis County, Missouri, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Rob Longan.

7. Tap on Applicant's Plattsburg 6-inch transmission pipeline in Buchanan County, Missouri, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Lloyd Manville.

8. Tap on Applicant's Ponca City 6-inch transmission pipeline in Kay County, Oklahoma, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Leroy F. Nicholson.

9. Tap on Applicant's Edmond-Drumright 12-inch transmission pipeline in Oklahoma County, Oklahoma, and construct measuring, regulating and appurtenant facilities for delivery of natural gas to Roland Walters.

Applicant estimates that the total cost of the facilities proposed to serve the right-of-way grantors would be $7,872 which cost would be financed from treasury funds on hand. Applicant estimates that the gas required annually be each domestic customer would be approximately 250 Mcf. It is stated that the sales to these nine customers would be made to The Gas Service Company for resale to these customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own-review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35668 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-81-000]

Columbia Gas Transmission Corp.; Application

December 9, 1981.

Take notice that on November 17, 1981, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP82-81-000 an application pursuant to section 7 of the Natural Gas Act for authorization to construct and operate certain natural gas facilities and for permission and approval to abandon certain other natural gas facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct 19 individual pipeline replacement projects located in the states of Ohio, Pennsylvania and West Virginia. Applicant also proposes to abandon approximately 7.1 miles of pipeline ranging in diameter from 2 to 10 inches and certain points of delivery and appurtenant measuring facilities.

Specifically, Applicant proposes the following:

(1) The construction and operation of approximately 2.2 miles of 6-inch transmission pipeline replacing a like amount of 12-inch pipeline in Barbour County, West Virginia;

(2) The construction and operation of approximately 0.5 mile of 4-inch transmission pipeline replacing a like amount of 6-inch pipeline in Jefferson County, Pennsylvania;

(3) The construction and operation of approximately 0.9 mile of 3-inch

transmission pipeline replacing a like amount of 12-inch pipeline located in Washington County, Pennsylvania;

(4) The construction and operation of approximately 0.6 mile of 4-inch transmission pipeline replacing a like amount of 6-inch pipeline in Washington County, Pennsylvania;

(5) The construction and operation of approximately 2.8 miles of 3-inch transmission pipeline replacing a like amount of 8-inch pipeline in Washington County, Pennsylvania;

(6) The construction and operation of approximately 0.4 mile of 4-inch transmission pipeline replacing a like amount of 10-inch pipeline located in Washington County, Pennsylvania;

(7) The construction and operation of approximately 0.9 mile of 3-inch transmission pipeline replacing a like amount of 6-inch pipeline in Columbiana County, Ohio.

(8) The construction and operation of approximately 0.4 mile of 8-inch transmission pipeline replacing a like amount of 12-inch pipeline in Medina County, Ohio;

(9) The construction and operation of approximately 0.5 mile of 4-inch transmission pipeline replacing a like amount of 8-inch pipeline in Lorain, County, Ohio;

(10) The construction and operation of approximately 0.6 mile of 4-inch transmission pipeline replacing a like amount of 6- and 8-inch pipeline in Ashland County, Ohio;

(11) The construction and operation of approximately 1.2 miles of 6-inch transmission pipeline replacing a like amount of 12-inch pipeline in Ashland County, Ohio;

(12) The construction and operation of approximately 2.5 miles of 6-inch transmission pipeline replacing a like amount of 4-inch pipeline in Tuscarawas County, Ohio;

(13) The construction and operation of approximately 3.6 miles of 8-inch transmission pipeline replacing a like amount of 10-inch pipeline in Harrison and Carroll Counties, Ohio;

(14) The construction and operation of approximately 2.3 miles of 16-inch transmission pipeline replacing a like amount of 12-inch pipeline in Muskingum County, Ohio;

(15) The construction and operation of approximately 0.3 mile of 3-inch transmission pipeline replacing a like amount of 8-inch pipeline in Belmont County, Ohio;

(16) The construction and operation of approximately 0.4 mile of 6-inch transmission pipeline replacing a like amount of 4-inch pipeline in Noble County, Ohio;

(17) The construction and operation of approximately 4.7 miles of 8-inch transmission pipeline and the abandonment of a like amount of 6- and 8-inch transmission pipeline in Noble County, Ohio;

(18) The construction and operation of approximately 1.7 miles of 4-inch transmission pipeline and appurtenant regulating facilities and the abandonment of approximately 4.7 miles of 6- and 8-inch transmission pipeline in Franklin County, Pennsylvania;

(19) The construction and operation of approximately 0.5 mile of 2-inch transmission pipeline and the abandonment of approximately 1.5 miles of 2-, 3- and 4-inch transmission pipeline in Ashland County, Ohio.

Applicant further requests permission to abandon the following natural gas facilities which are no longer used or useful in Applicant's operations. It is asserted that the proposed abandonments would not result in any loss of gas supply nor the termination of service to any customer.

(1) The abandonment of approximately 0.4 mile of 2- and 4-inch storage pipeline located in Greene County, Pennsylvania;

(2) The abandonment of approximately 3.2 miles of 10-inch transmission pipeline located in Washington County, Pennsylvania;

(3) The abandonment of approximately 1.4 miles of 10-inch transmission pipeline located in Jefferson County, Pennsylvania;

(4) The abandonment of approximately 0.7 mile of 6-inch transmission pipeline located in Cameron County, Pennsylvania;

(5) The abandonment of 0.5 mile of 6-inch transmission pipeline located in Coshocton County, Ohio;

(6) The abandonment of a point of delivery to Columbia Gas of Ohio, Inc. and appurtenant measuring facilities located in Lorain County, Ohio;

(7) The abandonment of a point of delivery to Columbia Gas of Ohio, Inc. and related measuring facilities by sale to Columbia Gas of Ohio, Inc. located in Belmont County, Ohio.

Applicant asserts that the proposed construction projects are primarily designed to maintain safe and reliable service to its existing wholesale customers at levels presently authorized by the Commission. It is further stated that the abandonment projects are necessary in order to retire or abandon facilities no longer used or useful in Applicant's transmission operations.

Applicant estimates the total cost of the proposed construction program at $2,794,700 to be financed from internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35669 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP80-527-002]

El Paso Natural Gas Co.; Amendment to Application

December 9, 1981.

Take notice that on November 3, 1981, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP80-527-002 an amendment to its application filed in the instant docket on October 6, 1980, pursuant to section 7(c) of the Natural Gas Act so as to reflect the addition of the Hendrick well, Live Oak County, Texas, and the increase in the

daily transportation and delivery quantity from 4,000 Mcf to 7,500 Mcf of gas on a best-efforts basis for the account of Phelps Dodge Corporation (Phelps Dodge) at certain existing points of delivery on Applicant's interstate pipeline transmission system in New Mexico and Arizona, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

It is submitted that under a temporary certificate issued in the instant docket, Applicant transports up to 4,000 Mcf of natural gas per day for the account of Phelps Dodge necessary to displace fuel oil. It is stated that such gas is purchased by Phelps Dodge from Ike Lovelady, Inc., *et al.*, at the No. 1A Garza well located in Live Oak County, Texas, and that Seagull Pipeline Corporation (Seagull) accepts the gas at the wellhead of the No. 1A Garza well and transports such gas to Valero Transmission Company (Valero) for transportation and delivery to Applicant which subsequently delivers the natural gas to Phelps Dodge at existing delivery points in its interstate pipeline system.

Applicant asserts that since the filing of the application in this docket it has been advised that Phelps Dodge has acquired additional quantities of natural gas from a second well in Live Oak County, Texas, the Hendrick #1 well, and that it desires to utilize such gas to displace fuel oil during the fuel shortage emergency period.

It is stated that on August 5, 1981, Applicant and Phelps Dodge amended their transportation agreement to provide that the volumes of natural gas to be transported by Applicant would be produced in Live Oak County, Texas, from the No. 1A Garza well and the Hendrick #1 well along with any offset wells related thereto. Applicant further states that on August 1, 1981, it amended its gas transmission agreement with Valero, pursuant to which Valero would receive from Seagull 7,500 Mcf of natural gas per day for the account of Applicant and transport and deliver such volumes to Applicant for ultimate delivery to Phelps Dodge. Due to the variable best-efforts nature of the arrangement, Applicant asserts that it is unable to estimate the total quantity of natural gas which would be tendered to it for transportation on a monthly and annual basis during the term of the arrangements.

In order to implement the transportation and delivery of the additional volumes for the account of Phelps Dodge, Applicant amends its application filed October 6, 1980, in the instant docket so as to reflect the addition of the Hendrick #1 well and to increase the daily transportation quantity from 4,000 Mcf of gas per day to 7,500 Mcf of gas per day.

It is further asserted that except for those revenues which Applicant is expressly entitled to retain the revenues received by Applicant for the transportation service rendered for the account of Phelps Dodge would be credited to Applicant's Unrecovered Purchased Gas Costs Account (Account 191).

Any person desiring to be heard or to make any protest with reference to said amendment should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35670 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP77-408-008]

El Paso Natural Gas Co.; Amendment

December 9, 1981.

Take notice that on November 6, 1981, El Paso Natural Gas Company (Petitioner), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP77-408-008 an amendment to its pending petition to amend further the order issued August 29, 1977, in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to delete all references reflecting the proposed establishment of the Ignacio delivery point under Petitioner's existing special Rate Schedule T-8 transportation and delivery arrangement with Southwest Gas Corporation (Southwest), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Petitioner states that by order issued August 29, 1977, it was authorized to transport natural gas for Southwest in accordance with their transportation agreement dated July 3, 1977. It is submitted that the transportation agreement is on file with the Commission as Petitioner's Rate Schedule T-8.

Petitioner further states that on April 28, 1981, it filed a petition to amend the order issued August 29, 1977, so as to authorize the removal of the end-use restrictions that prevent Southwest from having natural gas transported by Petitioner and delivered to Southwest's lower priority resale customers, the deletion of ARTICLE V, *Transportation Gas to be Used for Ultimate Service Classified in Priorities 1, 2 or 3* and the substitution therefore of a new ARTICLE V entitled *Incremental Facilities,* which provides for additional facilities for the benefit of Southwest and others necessary to provide adequate transportation capacity on Petitioner's system if Southwest so elects that such incremental facilities would be constructed, the delivery of natural gas when appropriate by Petitioner to a third party for the account of Southwest, the addition of the Ignacio delivery point to the transportation agreement, and certain miscellaneous changes to the transportation agreement.

It is asserted that Petitioner and Southwest have determined that the addition of the Ignacio delivery point would not be needed at this time. Therefore, Petitioner amends its petition to amend by deleting all references to the establishment of the Ignacio delivery point and the rate provisions applicable thereto.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35671 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-78-000]

Honeoye Storage Corp.; Application

December 9, 1981.

Take notice that November 13, 1981, Honeoye Storage Corporation (Applicant), P.O. Box 376, Honeoye, New York, 14471, filed in Docket No. CP82-78-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the retention and operation of existing facilities as an emergency interconnection between Applicant's existing underground gas storage system and New York State Electric and Gas Corporation's (NYSE&G) existing distribution system in Canandaigua, New York, all as more fully set forth in the application which is on file with the commission and open to public inspection.

Applicant proposes to retain and operate metering, regulating, and apurtenant facilities as an emergency interconnection between Applicant's system and NYSE&G's system. It is stated that such facilities are located between Applicant's existing 8-inch main transmission line and an existing NYSE&G distribution pipeline in the town of Canandaigua, New York, approximately 8½ miles northeast of the Honeoye gas field. Applicant explains that both NYSE&G and Applicant's New York distribution company storage customers may use the tie-in for gas transportation service to one another during periods of emergency. It is asserted that Applicant would be responsible for the maintenance and operation of the meter and regulating station and the emergency interconnection. Applicant submits that it would render emergency transportation service for its New York distribution company customers and NYSE&G pursuant to a transportation agreement dated April 2, 1980.

Applicant maintains that the maximum quantity of gas to be transported through the emergency tie-in would be equivalent to 500 Mcf per hour. It is explained that all emergency deliveries by Applicant would be conditioned upon Applicant's ability to comply with all provisions of its existing gas storage agreements with its customers.

Applicant submits that the cost of the measuring and regulating station is $14,065.

It is contended that approval of the instant application would improve the natural gas reliability in the areas immediately surrounding the Honeoye field.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's rules and practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be presented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-68-000]

Lone Star Gathering Co.; Application

December 9, 1981.

Take notice that on November 12, 1981, Lone Star Gathering Company (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP82-68-000 an application pursuant to section 7(c) or the Natural Gas Act as implemented by § 157.7(c) of the regulations thereunder (18 CFR 157.7(c)) for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1982, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in transportation and sales service presently rendered by Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $100,000. Applicant proposes to finance the proposed facilities from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. CP82-84-000]

Panhandle Eastern Pipe Line Co.; Application

December 9, 1981.

Take notice that on November 18, 1981, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP82-84-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain compressor and related facilities in Morton County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has entered into a gas purchase and sales agreement with Anadarko Production Company dated October 30, 1978, pursuant to which Applicant would attach 38 new nonassociated gas wells resulting in the attachment of some 19,600,000 Mcf of initial recoverable reserves to be produced from the Red Cave Reservior. In order to connect these new supplies of natural gas Applicant proposes the construction and operation of an additional 3,312 horsepower compressor at its Elkhart Compressor Station located in Morton County, Kansas. The Elkhart Compressor Station is currently equipped with 12,800 compressor horsepower.

Applicant estimates the cost of the proposed facilities to be $6,648,000 which would be financed from funds available to the company.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35674 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-83-000]

Panhandle Eastern Pipe Line Co.; Application

December 9, 1981.

Take notice that on November 18, 1981, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP82-83-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convience and necessity authorizing the construction and operation of certain pipeline, compressor, and related facilities in Baca County, Colorado, which would enable Applicant to connect new supplies of natural gas to its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to a gas purchase and sales agreement with The Nueces Company (Nueces) dated August 20, 1979, as amended, it would purchase from Nueces approximately 8,000 Mcf of natural gas per day produced in Baca County, Colorado. Applicant asserts that its facilities in the Baca County gathering system are not designed to transport the total volumes of gas under the agreement. Therefore, Applicant proposes to construct and operate six miles of 10-inch pipeline and to add 305 horsepower compressor unit to its existing Midway Booster Station. Applicant asserts that the proposed facilities would increase its daily design volume capability of 5,200 Mcf per day through the existing Midway Booster Station to 8,200 Mcf per day.

Applicant states that the total cost of the proposed facilities is estimated to be $1,000,000. Such costs, it is asserted, would be financed from internally generated funds and short term bank borrowing.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commissioin's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35675 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP70-185-010]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; Petition To Amend

December 9, 1981.

Take notice that on November 5, 1981, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP70-185-010 a petition to amend further the order

issued June 22, 1970,[1] as amended, in the instant docket so as to authorize the construction and operation of an additional delivery point to Lowell Gas Company (Lowell) as well as the revision of natural gas service to Lowell, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is submitted that pursuant to the order issued June 22, 1970, in the instant docket Petitioner was authorized to provide natural gas service to Lowell under Petitioner's Rate Schedule CD–6 and a March 1, 1981, associated gas sales contract between Petitioner and Lowell which provides for the sale and delivery by Petitioner of a contracted demand volume of 34,680 Mcf of natural gas per day. Petitioner states that it presently delivers up to 34,680 Mcf of natural gas per day to Lowell at the Tewksbury delivery point and up to 12,000 Mcf of natural gas per day at the Wilmington delivery point.

Petitioner states that Lowell has requested that Petitioner construct and operate an additional delivery point on Petitioner's system in order to meet the requirements of Lowell's customers in the Dracut, Massachusetts, area and Petitioner specifically proposes to deliver up to 12,000 Mcf of gas per day to Lowell at the proposed Dracut delivery point. Petitioner asserts that Lowell recognizes that Lowell's total daily receipts from Petitioner at the three delivery points may not exceed its total daily CD–6 contracted demand volume of 34,680 Mcf of gas per day and that Lowell must stay within its annual volumetric limitation.

Petitioner further asserts that Lowell would assume responsibility for all capital costs in connection with the construction of the additional delivery point which would be owned by Lowell and operated by Petitioner for the measurement and delivery of gas to Lowell.

Petitioner, therefore, requests that the Commission further amend its order of June 22, 1970, in the instant docket as amended so as to authorize the construction and operation of the proposed additional delivery point on Petitioner's system in the Dracut, Massachusetts, area as well as the delivery of up to 12,000 Mcf of natural gas per day at such delivery point.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–35676 Filed 12–11–81; 8:45 am]

BILLING CODE 6717–01–M

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

[Docket No. CP82–89–000]

Western Gas Interstate Co.; Application

December 9, 1981

Take notice that on November 19, 1981, Western Gas Interstate Company (Applicant), 1800 First International Building, Dallas, Texas 75270, filed in Docket No. CP82–89–000 an application pursuant to section 7(c) of the Natural Gas Act and § 157.7(c) of the Regulations thereunder (18 CFR 157.7(c)) for a certificate of public convenience and necessity authorizing the construction during the 12-month period commencing January 1, 1982, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in transportation and sales service presently rendered by Applicant.

Applicant states that the total cost of the proposed construction under § 157.7(c) would not exceed $100,000. Such cost, it is asserted, would be financed from funds on hand and with short-term borrowings from Applicant's parent, Southern Union Company.

Applicant further states that its existing budget authorization pursuant to § 157.7(c) expires on March 3, calendar-year basis, Applicant requests that the subject authorization commence January 1, 1982, instead of March 3, 1982. Applicant requests in the alternative an effective date of March 3, 1982.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise adivsed, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–35677 Filed 12–11–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER82–120–000]

Alabama Power Co.; Filing

December 9, 1981.

The filing Company submits the following:

Take notice that Alabama Power Company (Alabama) on November 30, 1981, tendered for filing two Transmission Service Delivery Point Agreements specifying additional delivery points to be covered by the Agreement between Alabama and Alabama Electric Cooperative, Inc., (AEC) for Transmission Service to

Distribution Cooperative Members of AEC which was dated August 28, 1980 (Agreement). This Agreement has been designated Rate Schedule FERC No. 147 by the FERC. The purpose of these agreements is to provide for the commencing of transmission service at these locations under the Agreement. These delivery points were not included under the Agreement when it was initially filed with the Federal Energy Regulatory Commission on August 28, 1980, because the initial term of the service agreement for these delivery points had not been fulfilled under the terms of the wholesale tariff at that time. Service will commence under the Agreement for Pioneer Electric Cooperative's Georgiana Delivery Point on November 30, 1981. Likewise, service will commence for Baldwin County Electric Membership Corporation's Baldwin Tie Delivery Point on December 30, 1981. No additional facilities are to be installed by Alabama to effectuate the provision of service under this Agreement to these two delivery points.

Copies of the filing were served upon AEC.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35679 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4807-000]

American Hydroelectric Development Corp.; Application for Short-Form License (Minor)

December 10, 1981.

Take notice that American Hydroelectric Development Corporation (Applicant) filed on June 3, 1981, an application for license (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for construction and operation of a water power project to be known as the Sly Park Project No. 4807. The project would be located on Sly Park Creek at the Bureau of Reclamation's Sly Park Dam in El Dorado County, California. Correspondence with the Applicant should be directed to: Mr. William A. Jennings, Director, American Hydroelectric Development Corporation, 100 Park Center Plaza, Suite 520, San Jose, California 95113.

Project Description—The proposed project would consist of: (1) A 36-inch diameter, 20-foot long steel penstock connected to the existing outlet pipe through Sly Park Dam; (2) a powerhouse containing a single generating unit rated at 650 kW; (3) a 36-inch diameter, 35-foot long steel tailrace conduit; and (4) associated electrical and transmission equipment.

Purpose of Project—The project would have an average annual generation of approximately 1,850 MWh and estimated construction costs of $1,068,000. Project power would be sold to the Pacific Gas and Electric Company.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 9, 1982, either the competing application itself (see 18 CFR 4.33 (a) and (d)) or a notice of intent (see 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in §§ 4.33(c) or 4.101 et seq. (1981).

Comments, Protests, or Petition To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 9, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35694 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5255-000]

Anvil Power, Inc.; Application for Preliminary Permit

December 7, 1981.

Take notice that Anvil Power, Inc. (Applicant) filed on August 19, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5255 to be known as the Clearwater Creek Hydropower Project located on Clearwater Creek near Deming in Whatcom County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. G. A. Jones, Anvil Power, Inc., 1675 W. Bakerview Road, Bellingham, Washington 98226.

Project Description—The project would consist of: (1) A 6-foot high, 100-foot long diversion structure; (2) a 3-mile long, 60-inch diameter pipeline; (3) a surgetank; (4) a 2,000-foot long, 36-inch diameter penstock; (5) a powerhouse with total installed capacity of 5,000 kW

and (6) a 5-mile long, 12-kV transmission line from the powerhouse to an existing Puget Power Company transmission line. The Applicant estimates that the average annual energy production would be 25 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months during which time it would conduct technical, environmental and economic analysis, and prepare an FERC license application. No new roads would be required for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $150,000.

Competing Applications—This application was filed as a competing application to Puget Sound Power & Light Company's application for Project No. 5150 filed on July 30, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35644 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP72-9-004]

Arkansas Louisiana Gas Co.; Petition To Amend

December 9, 1981.

Take notice that on November 5, 1981, Arkansas Louisiana Gas Company (Applicant), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP72-9-004 [1] a petition pursuant to section 7 of the Natural Gas Act to amend the order issued March 26, 1976, in the instant docket so as to authorize the deletion of an exchange point under an agreement with Cities Service Gas Company (Cities) and to permit and approve the abandonment of certain facilities installed and operated by Applicant in connection with its receipt of gas at this point, all as more fully set forth in the application which is on file with Commission and open to public inspection.

Applicant states that by order dated November 1, 1971, as amended March 26, 1976, in the instant docket it was authorized to exchange gas with Cities at a number of exchange points including the McClain exchange point in McClain County, Oklahoma. Applicant further states that it installed and operated facilities to enable it to receive gas from Cities at the McClain exchange point under its budget certificate authorization in Docket CP76-29.

Applicant states that the return of gas by Cities to Applicant has worked out more efficiently for both parties at Jane, Missouri, than at the McClain exchange point. It is asserted that no gas has been delivered by Cities to Applicant at the McClain exchange point since November 1979. Applicant therefore proposes deletion of the McClain exchange point from its exchange agreement with Cities and requests permission and approval to abandon the facilities installed and operated by Applicant in connection with its receipt of gas at this point.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35678 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER81-121-000]

Boston Edison Co.; Filing

December 9, 1981.

The filing Company submits the following:

Take notice that Boston Edison Company (Boston) on December 1, 1981, tendered for filing a proposed initial rate schedule consisting of contracts for the sale of unit capacity on a short term basis to the Reading (Massachusetts) Municipal Light Department. The proposed effective dates of the contracts are August 14, 1981 and September 2, 1981. Boston therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served on the Reading Municipal Light Department and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington,

---

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-122-000]

Central Power & Light Co.; Filing

December 9, 1981.

The filing Company submits the following:

Take notice that on December 1, 1981, Central Power and Light Company (CP&L) tendered for filing an application for a rate change for service supplied under an Emergency Service Contract to the City of Robstown, Texas. In its filing, CP&L stated that the proposed rates are identical to those agreed to between CP&L and its other non-generating wholesale customers in a settlement reached in FERC Docket No. ER81-387-000.

CP&L requests an effective date of October 31, 1981, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or a protest with the Federal Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-80-000]

Colorado Interstate Gas Co.; Application

December 9, 1981.

Take notice that on November 16, 1981, Colorado Interstate Gas Company (Applicant), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP82-80-000 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon certain sales to Peoples Natural Gas Company (Peoples) under Applicant's Rate Schedules G-1 and PS-1 for service to the towns of Florence, Penrose and Portland, Colorado, and for a certificate of public convenience and necessity authorizing the initiation of sales to Greeley Gas Company (Greeley) for the continuation of service to said towns under the aforementioned tariffs, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes administrative changes as necessary to transfer certain sales from Peoples to Greeley pursuant to an exchange agreement between Peoples and Greeley dated April 21, 1981. Applicant explains that under the agreement the distribution properties for service to Cortez, Dolores, Florence, Gunnison, Mancos, Penrose and Portland, Colorado, are to be transferred from Peoples to Greeley and the distribution properties for service to Worthington, Windom, Lakefield, and Mountain Lake, Minnesota, are to be transferred from Greeley to Peoples. Applicant's proposal involves only the transfer of properties serving Florence, Penrose and Portland, Colorado.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonement are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-82-000]

Columbia Gas Transmission Corp.; Application

December 10, 1981.

Take notice that on November 18, 1981, Columbia Gas Transmission Corporation (Applicant), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP82-82-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of 38 interconnecting tap facilities to provide additional points of delivery to existing wholesale customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the following new points of delivery for the following wholesale customers:

1. Columbia Gas of Kentucky, Inc., 1 tap for commercial service.	Estimated annual usage of 550 Mcf
2. Columbia Gas of Ohio, Inc., 24 taps for residential service.	Estimated annual usage of 3,600 Mcf.
3. Columbia Gas of Pennsylvania, Inc., 2 taps for residential service.	Estimated annual usage of 300 Mcf.
4. Columbia Gas of West Virginia, Inc., 10 taps for residential service.	Estimated annual usage of 1,500 Mcf.
5. Union Light, Heat & Power Co., 1 tap for residential service.	Estimated annual usage of 150 Mcf

It is estimated that the total cost of the interconnections proposed herein is $11,475 to be financed through internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-127-000]

Duke Power Co.; Filing

December 10, 1981.

The filing Company submits the following:

Take notice that Duke Power Company (Duke Power) tendered for filing on December 3, 1981 a supplement to the Company's Electric Power Contract with Laurens Electric Cooperative, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 144.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following increase in designated demand: Delivery Point No. 4 from 3,800 KW to 4,200 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of February 17, 1982.

According to Duke Power copies of this filing were mailed to Laurens Electric Cooperative, Inc., and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35698 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP68-179-001]

Florida Gas Transmission Co.; Petition To Amend

December 10, 1981.

Take notice that on November 12, 1981, Florida Gas Transmission Company (Petitioner), P.O. Box 44, Winter Park, Florida 32790, filed in Docket No. CP68-179-001 a petition to amend the order issued July 25, 1973,[1] in the instant docket pursuant to section 7(c) of the Natural Gas Act so as to authorize a limited restructuring and modification of Petitioner's currently-effective tariff to facilitate and encourage high-priority growth on Petitioner's system, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

Petitioner proposes to lift those restrictions in its FERC Gas Tariff, Original Volume No. 1 which limit growth in Priorities 1 through 4 of its curtailment plan. Furthermore Petitioner explains that volumetric entitlements attributable to uses classified in Priorities 5 through 9 of the curtailment plan would be set and would be frozen at their current requirements as reflected in the end use data for the twelve-month period ending June 30, 1980, pursuant to FERC Opinion Nos. 98 and 98-A in Priorities 1 through 4 from that customer's total volumetric entitlement. Petitioner states that resale and direct sale customers would be treated identically.

It is stated that the existing volumetric entitlements structure on Petitioner's system was authorized by Commission order issued July 25, 1973. Petitioner submits that the restrictions set forth in the July 25, 1973, order are outdated. Petitioner asserts that unless the limitations imposed in the order are restructured or modified many of Petitioner's customers would no longer be able to serve their markets. Petitioner explains that the pressure on many of its customers to attach high-priority loads has been substantial.

Petitioner states that revision of its volumetric entitlements is also necessary because of price deregulation for most classifications of natural gas that would occur in 1985 under the Natural Gas Policy Act of 1978 and the termination of Petitioner's and Amoco Production Company's warranty contract shortly thereafter. Petitioner avers that because of Florida's climate and the large percentage of Petitioner's market which consists of sales to power companies in direct competition with other fuels it faces unique marketing problems. Petitioner asserts that this competition has caused Petitioner to structure its rates in a way that did not fully compensate Petitioner for its actual cost-of-service. Petitioner submits that beginning in 1985 even if it can theoretically acquire sufficient volumes to serve all of the requirements on its system those acquisitions would be at prices far above Petitoner's current cost of gas. It is explained that based on current pruchase gas cost estimates it is probable that after 1985 Petitioner would no longer be able to compete effectively for those markets that can use No. 6 fuel oil as alternate to natural gas.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 7, 1982, file with the Federal Energy Regulatory Commission,

Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirments of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35699 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-85-000]

Great Lakes Gas Transmission Co.; Application

December 9, 1981.

Take notice that on November 18, 1981, Great Lakes Gas Transmission Company (Applicant), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket No. CP82-85-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of 30.8 miles of 36-inch pipeline loop, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate in Minnesota and Wisconsin 30.8 miles of 36-inch pipeline loop which would be added parallel to Applicant's existing pipeline system. Applicant asserts that the pipeline loop would be constructed in two segments. One segment would consist of 12.7 miles and would be constructed between Applicant's existing compressor station Nos. 4 and 5 at Deer River and Cloquet, Minnesota, respectively. Applicant submits that the other segment would be 18.1 miles long and would extend between Applicant's existing compressor station Nos. 6 and 7 at Iron River, Wisconsin, and Wakefield, Michigan, respectively.

Applicant avers that the total cost of the proposed loops is estimated to be $25,926,000 which would be financed with internally generated funds and borrowings from banks.

It is maintained that both of the proposed loops would complete valve sections which would provide added security and additional capability on Applicant's pipeline system. Furthermore, Applicant submits that approval of the instant application would result in substantial fuel savings which would accrue to the benefit of Applicant's customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA82-5-000]

Houston Pipe Line Co.; Application for Adjustment

December 10, 1981.

On November 24, 1981, Houston Pipe Line Company (Houston) filed with the Federal Energy Regulatory Commission an Application for Adjustment under section 502(c) of the Natural Gas Policy Act, wherein Houston sought relief from the Commission's Regulations governing transportation by intrastate pipelines as set forth in 18 CFR 284.123(b)(1)(ii). Houston seeks such adjustment to permit Houston to elect, pursuant to § 284.123(b)(1)(ii) of the Commission's regulations, to use an existing rate for intrastate storage service, other than a city-gate rate, for storage service rendered to El Paso Natural Gas Company under section 311(a)(2) of the NGPA. Houston's application is on file with the Commission and is available for public inspection.

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 of the Commission's rules of practice and procedure, Order No. 24 issued March 22, 1979, as amended by Order 24-B issued March 24, 1980.

Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance with the provisions of § 1.41. All petitions to intervene must be filed on or before December 29, 1981.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35700 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 3401-002]

Hydro-Nelson Ltd.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 9, 1981.

Take notice that on June 11, 1981, Hydro-Nelson Ltd. (Applicant) filed an application, under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 3401) would be located on the Rockfish River, near Schuyler, in Nelson County, Virginia. Correspondence with the Applicant should be directed to: Mr. John K. Pollock, General Manager, Box 413, Afton, Virginia 22920.

Project Description—The proposed project would consist of: (1) An existing concrete gravity dam approximately 150 feet long and 35 feet high; (2) an existing reservoir having a surface area of 18 acres at an elevation of 390 feet m.s.l. and a storage capacity of approximately 64 acre-feet; (3) a proposed powerhouse containing two generators with a total capacity of 750 kW; (4) existing 2.5-kV transmission lines adjacent to the dam; and (5) appurtenant facilities. The project is not located on Federal lands.

The proposed project would be operated on a run-of-river basis.

Purpose of Project—All energy generated would be used by the Applicant for sale to the Appalachian Power Company. The average annual energy generation is estimated to be 3.3 GWh.

Agency Comments—The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the State of Virginia, Commission of Game & Inland Fisheries, P.O. Box 11104, 4010 W. Broad Street, Richmond, Virginia 23230, are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 25, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 25, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Rgulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35648 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5388-000]

Jackson Valley Irrigation District; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 10, 1981.

Take notice that on September 18, 1981, Jackson Valley Irrigation District (Applicant) filed an application, under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705, and 2708 as amended), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project, Project No. 5388 would be located on Jackson Creek in Amador County near Ione, California. Correspondence with the Applicant should be directed to: Mr. Henry Willy, Secretary-Manager, Jackson Valley Irrigation District, 5751 Ione-Buena Vista Road, Ione, California 95640.

Project Description—The proposed project would consist of: (1) A 30-inch diameter pipe connecting an existing outlet of the existing 168-foot high and 1,000-foot long Jackson Creek Dam and Lake Amador owned by the Applicant; (2) a powerhouse with a total installed capacity of 500 kW; and (3) a 230-foot long, 12-kV transmission line interconnecting with an existing 12-kV transmission line of Pacific Gas and Electric Company. The Applicant estimates that the average annual energy production would be 1.75 million kWh.

Purpose of Project—The power generated by the proposed project would be sold to Pacific Gas and Electric Company.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the California Department of Fish and Game are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 22, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license appliaction no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comment, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before January 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

BILLING CODE 6717-01-M

[Docket No. ER82-125-000]

Kansas Power & Light Co.; Filing

December 10, 1981.

The filing Company submits the following:

Take notice that the Kansas Power and Light Company (KP&L) on December 2, 1981, tendered for filing proposed changes in its Federal Energy Regulatory Commission Electric Service Tariff No. 12

Addendum No. 1 to Participation Power Service Schedule provides for a change in the method of scheduling future power needs which no longer limit but continue to move forward as the requirements for additional energy move forward.

KP&L requests an effective date of October 14, 1981.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-126-000]

Kansas Power & Light Co.; Filing

December 10, 1981.

The filing Company submits the following:

Take notice that the Kansas Power and Light Company (KP&L) tendered for filing on December 2, 1981, proposed changes in its Federal Energy Regulatory Commission Electric Service Tariff No. 83.

The filing of Supplement 1, Electric Interchange Agreement provides for the installation by the KP&L of 345 Kv substation facilities which will provide a connection to Kansas City Power and Light Company's 345 KV Transmission Line extending between its Iatan generating plant and its Craig Substation. The installation of the substation is to be completed on or before June 1, 1983.

KP&L requests an effective date of October 14, 1981.

Copies of the filing were served upon Kansas Corporation Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 4608-001]

Richard Kaster; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 9, 1981.

Take notice that on October 13, 1981, Richard Kaster (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (FERC Project No. 4608) would be located on the Applicant's fish hatchery site on Box Canyon Springs, in Twin Falls County near Buhl, Idaho. Correspondence with the Applicant should be directed to: Vernon Ravenscroft/Helen Chenoweth, Consulting Associates, Inc., P.O. Box 893, Boise, Idaho 83701.

Project Description—The project would consist of: (1) An existing diversion structure on Box Canyon Springs; (2) an existing flume; (3) an existing pipeline (directing water to Box Canyon Fish Hatchery); (4) two 25 to 30-foot long penstocks to be located at each end of the fish hatchery; and (5) two powerhouses with a total installed capacity of 316 kW.

Purpose of Project—The power generated by the project would be sold to Idaho Power Company.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Idaho Department of Fish and Game are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and

conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 25, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or anotice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 25, 1982.

Filing and Service of Responsive Documents—Any filings, must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, 825 North Capitol Street, N.E., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 4052-002]

John H. Koyle; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 10, 1981.

Take notice that on October 22, 1981, John H. Koyle (Applicant) filed an application, under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 as amended), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project, Project No. 4052 would be located on the Big Wood River, near the town of Gooding, in Gooding County, Idaho. Correspondence with the Applicant should be directed to: John H. Koyle, Route #2, Gooding, Idaho 83330.

Project Description—The proposed project would consist of: (1) An 8-foot high rock-rubble diversion structure; (2) a canal, (3) headworks; (4) six 265-foot long, 30 inch diameter penstocks; (5) a powerhouse containing six generating units, each rated at 150 kW; and (6) a 1-mile long transmission line. The average annual energy generation is estimated to be 6.7 million kWh.

Purpose of Project—The power output from the project would be sold to the Idaho Power Company.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Idaho Department of Fish and Game are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 25, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 25, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's

regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35704 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-69-000]

Lone Star Gas Co., Division of Enserch Corp.; Application

December 9, 1981.

Take notice that on November 12, 1981, Lone Star Gas Company, a Division of Enserch Corporation (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP82-69-000 an application pursuant to section 7(c) of the Natural Gas Act as implemented by section 157.7(c) of the regulations thereunder (18 CFR 157.7(c)) for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1982, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in transportation sales service presently rendered by Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $300,000 which costs would be financed from cash on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35685 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-71-000]

Lone Star Gas Co., Division of Enserch Corp.; Application

December 9, 1981.

Take notice that on November 12, 1981, Lone Star Gas Company, a Division of Enserch Corporation (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP82-71-000 an application pursuant to section 7 of the Natural Gas Act and § 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission and approval to abandon during the calendar year 1982 and for operation of various field compression and related metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to enable Applicant to act with reasonable dispatch in constructing and abandoning facilities which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment under § 157.7(g) would not exceed $1,300,000 and the cost for any single project would not exceed $325,000. Such costs, it is asserted, would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-55-000]

Michigan Wisconsin Pipe Line Co.; Application

December 9, 1981.

Take notice that on November 4, 1981, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP82-55-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of measuring stations and appurtenant facilities in order to establish new delivery points to Fountaintown Gas Company, Inc. (Fountaintown) at Sulphur Springs and Marietta, Indiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant asserts that its customer, Fountaintown, has acquired franchise rights to provide natural gas service to the towns of Sulphur Springs and Marietta, Indiana. Applicant states that Fountaintown has requested that Applicant establish new delivery points pursuant to a service agreement dated January 26, 1981, at Sulphur Springs and Marietta. Therefore, Applicant proposes to construct and operate measuring stations and appurtentant facilities in order to establish new delivery points at Sulphur Springs and Marietta. Applicant states that the proposed service would be within Fountaintown's currently effective peak day and annual entitlements pursuant to Applicant's Rate Schedule SGS-1.

Applicant states that the total cost of the proposed facilities would not exceed $94,290. Such costs, it is asserted, would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35688 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-60-000]

Michigan Wisconsin Pipe Line Co.; Application

December 9, 1981.

Take notice that on November 5, 1981, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP82-60-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Natural Gas Pipeline Company of America (Natural) and the construction and operation of facilities necessary therefor, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that approximately 50,000,000 Mcf of proven and potential gas reserves have been developed in Vermilion Area Block 380, offshore Louisiana, which have been committed to Natural pursuant to a gas purchase agreement between Natural and Texaco, Inc.

Applicant proposes pursuant to a transportation agreement dated July 30, 1981, to take receipt of up to 40,000 Mcf of natural gas per day at the southwestern terminus of Applicant's existing offshore transmission system in Vermilion Area Block 397 and to transport and redeliver equivalent volumes at an interconnection which Applicant proposes to construct in Beaver County, Oklahoma.

It is stated that the proposed transportation service is for a term of 15 years commencing with the date of initial deliveries. Applicant asserts it would assess Natural a monthly charge of $10.35 per Mcf of contract demand and would retain 1.5 percent of the volumes received for compressor fuel use.

The new interconnection proposed herein would cost an estimated $630,090 which would be financed with funds on hand. It is explained that in order to effectuate receipt of the Block 380 reserves Natural would construct and operate approximately 2.6 miles of 12¾-inch O.D. pipeline connecting the production platform in Block 380 to the southwesterly terminus of Applicant's existing offshore transmission system in Vermilion Area Block 397.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35687 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-90-000]

Michigan Wisconsin Pipe Line Co. and Panhandle Eastern Pipe Line Co.; Application

December 10, 1981.

Take notice that on November 28, 1981, Michigan Wisconsin Pipe Line Company (Mich Wis), One Woodward Avenue, Detroit, Michigan 48226, and Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP82-90-000 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is asserted that Mich Wis and Panhandle each owns and operates pipeline and related facilities in central Wyoming which are utilized to transport gas supplies from various production sources to the transmission system of Colorado Interstate Gas Company (CIG). Applicants propose pursuant to a gas exchange agreement dated June 24, 1981, to exchange natural gas from various sources within an area of interest defined as the counties of Fremont, Natrona and Sweetwater, Wyoming.

It is submitted that initially Mich Wis would gather, deliver and exchange gas for Panhandle from the Monsanto No. 1-28 Well, the Lysite No. 1-11 Well, the Long Butte No. 3 Well, the Long Butte No. 4 Well and the Lysite No. 1-12 Well all in Fremont County, Wyoming, and deliver the subject gas for the account of Panhandle to an existing point of interconnection with CIG located in Fremont County, Wyoming.

Applicants further propose to add wells in the area of interest and to add balancing points from time to time to provide for other mutually agreeable points of exchange. It is asserted that the balancing points which may be added are existing points of interconnection between the pipeline systems of Panhandle and CIG located in Adams County, Colorado, and Sweetwater County, Wyoming. Applicants state they would file with the Commission on or before January 31 of each year appropriate revisions to the gas exchange agreement to show the addition of new wells or the deletion of wells and the addition or deletion of balancing points.

It is explained that the arrangement described above would avoid the duplication of facilities and would result in a reduced cost of bringing gas supplies to market.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35705 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5629-000]

Modesto Irrigation District; Application for Preliminary Permit

December 7, 1981.

Take notice that Modesto Irrigation District (Applicant) filed on November 9, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)) for Project No. 5629 to be known as the Rock Creek Power Project located on Rock Creek within the Sierra National Forest in Madera County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. A. Lee DeLano, Modesto Irrigation District, 1231 11th Street, P.O. Box 4060, Modesto, California 95352.

Project Description—The proposed project would consist of: (1) A 4-foot high, 60-foot long diversion structure; (2) a 30-inch diameter, 1,486-foot long conduit; (3) a 30-inch diameter, 1,323-foot long penstock; (4) a powerhouse containing one or more generating units with a total rated capacity of 1,390 kW; and (5) a 1.1-mile long transmission line connecting the powerhouse to the existing Southern California Edison Company lines. Applicant estimates that the average annual energy production would be 3.5 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 24-month permit to prepare a definitive project report, including preliminary designs, results of geological, environmental and economic feasibility studies. The cost of the above activities, along with preparation of an environmental impact report, obtaining agreements with the Forest Service and other Federal, State and local agencies, preparing a license application, conducting final field surveys, and preparing designs is estimated by the Applicant to be $45,000.

Competing Applications—This application was filed as a competing application to Messrs. T. Owens, F. Castagna and R. Bean's application for Project No. 5534 filed on October 20, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or § 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit

comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rule of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[Project No. 5446-000]

Modesto Irrigation District; Application for Preliminary Permit

December 10, 1981.

Take notice that Modesto Irrigation District (Applicant) filed on October 2, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5446 to be known as the Kaiser Creek Project located on Kaiser and Westfall Creeks in Fresno County, California. The project would lie within Stanislaus National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. A. Lee DeLano, Modesto Irrigation District, 1231 11th Street, P.O. Box 4060, Modesto, California 95352.

Project Description—The proposed project would consist of: (1) A 115-foot high rock fill dam with concrete face and 2,700 acre-foot capacity reservoir; (2) a concrete diversion dam 10 feet high with negligible capacity; (3) pipeline 14,500 and 2,300 feet long; (4) a powerhouse containing two 4.3 MW capacity turbine generators with annual output of 31.6 GWh; (5) transmission line 11.4 miles long; and (6) appurtenant facilities. Generated power will be used by the Applicant to meet present and anticipated loads within its system and any surplus sold or exchanged.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 36 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of permit activities is $200,000.

Competing Applications—This application was filed as a competing application to Hydroelectric Power Engineers' application for Project No. 3539 filed on September 14, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5426-000]

State of Montana Department of Natural Resources and Conservation; Application for Preliminary Permit

December 9, 1981.

Take notice that the State of Montana Department of Natural Resources and Conservation (Applicant) filed on September 29, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5426 to be known as the Tongue River Hydroelectric Project located on the Tongue River in Big Horn County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Gary Fritz, Administrator Water Resources Division, Montana Department of Natural Resources, 32 South Ewing, Helena, Montana.

Project Description—The proposed Project No. 5426 would consist of: (1) The existing Tongue River Dam and Reservoir; (2) a proposed hydroelectric generating facility with an estimated installed capacity of up to 2.6 MW and an estimated average annual generation of up to 10.2 GWh; (3) a proposed transmission line to the nearest existing

major transmission line; and (4) appurtenant facilities. The sale of the power from the proposed project would be negotiated with public and private utilities and Federal power marketing agencies.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issurance of a preliminary permit for 36 months, during which time detailed studies, investigations, tests, surveys and power sales negotiations would be conducted to determine the feasibility of the project. The Applicant estimates the cost of project studies to be $100,000.

Competing Applications—This Application was filed as a competing application to the Tongue River Dam Water Project No. 4543 filed on April 17, 1981, by the City of Kalispell, under 18 CFR 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent has passed. Therefore, no further competing applications or notices of intent to file competing applications will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5420-000]

State of Montana Department of Natural Resources and Conservation; Application for Preliminary Permit

December 10, 1981.

Take notice that the State of Montana Department of Natural Resources and Conservation (Applicant) filed on September 28, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)) for Project No. 5420 to be known as the Ruby River Hydroelectric Project located on the Ruby River in Madison County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Gary Fritz, Administrator, Water Resources Division, Montana Department of Natural Resources and Conservation, 32 South Ewing, Helena, Montana 59601.

Project Description—The proposed Project No. 5420 would consist of: (1) The existing Ruby Dam and Reservoir; (2) the existing Ruby Dam outlet conduit which would be modified to serve as a penstock; (3) a proposed hydroelectric power generating facility with an estimated installed capacity of 3.7 MW and an estimated average annual generation of 13.6 GWh; (4) a proposed transmission line to connect with the nearest existing major transmission line; and (5) appurtenant facilities. The sale of the power from the proposed project would be negotiated with public and private utilities and Federal power marketing agencies.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for 36 months, during which time detailed studies, investigations, tests, surveys and power sales negotiations would be conducted to determine the feasibility of the project. The Applicant estimates the cost of the project studies to be $100,000.

Competing Applications—This application was filed as a competing application to the City of Kalispell's application for Project No. 4487 filed on April 6, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the

Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35697 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-79-000]

Mountain Fuel Supply Co.; Application

December 9, 1981.

Take notice that on November 13, 1981, Mountain Fuel Supply Company (Applicant), 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket No CP82-79-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the operation of one existing four-inch tap and appurtenant facilities as a main line distribution sales tap, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to utilize one existing four-inch tap and appurtenances including regulation and metering facilities located on Applicant's Main Line No. 36 in Unita County, Wyoming, as a distribution sales tap initially for the purpose of selling natural gas to Amoco Production Company (USA) (Amoco) for use as space heating and as start-up fuel at its Whitney Canyon Gas Sweeting Plant. Applicant states that such natural gas distribution service would be provided to Amoco on a best-efforts temporary basis under Applicant's Rate Schedule T-1. It is stated that the volumes to be supplied to Amoco by Applicant do not constitute an expansion of service.

Applicant estimates that Amoco's total plant heating and start-up usage would be 200,000 Mcf for a period of approximately seventeen months (December 1981 through April 1983). Applicant further states that its maximum daily delivery requirements for heating during completion of the Whitney Canyon Plant for the winters of 1981-1982 and 1982-1983 would be 500 Mcf and that the maximum daily delivery requirements for plant start-up commencing in approximately August 1982 and extending through approximately April 1983 would be 7,000 Mcf.

It is asserted that Amoco originally planned to use Thaynes Formation gas from a well located near the plant site for heating fuel this winter but that well began producing sour gas thus preventing its use. No well in the vicinity of the plant site is capable of supplying sweet gas for Amoco's use. It is further asserted that a significant delay in securing a reliable source of heating fuel could result in a shutdown of construction at the plant until next spring.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35688 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-62-000]

Northern States Power Co. (Minnesota) and Northern States Power Co. (Wisconsin); Application

December 10, 1981.

Take notice that on November 6, 1981, Northern States Power Company, a Minnesota corporation (NSP-Minn), 414 Nicollet Mall Minneapolis, Minnesota 55401, and Northern States Power Company, a Wisconsin corporation (NSP-Wis), 100 North Barstow Street, Eau Claire, Wisconsin 54701, filed in Docket No. CP82-62-000 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for reslae of natural gas to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and pursuant to section 502(c) of the Natural Gas Policy Act of 1978 (NGPA) and § 1.41 of the Commission's rules of practice and procedure (18 CFR 1.41) for a permanent exemption from the filing requirements of § 281.204 of the Commission's regulations and for an adjustment exempting the purchased gas costs associated with the volumes of gas which Applicants propose to sell to Tennessee from the applicability of the incremental pricing regulations, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants propose to sell up to 15,000 Mcf of natural gas per day to Tennessee pursuant to a gas sales agreement between the parties dated October 27, 1981. It is submitted that the proposed sale would commence on the date which is agreeable to Applicants, Tennessee, and Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), the interstate pipeline company which would transport the gas to Tennessee. The initial term of the proposed sale would extend to October 31, 1989, or any date thereafter selected by Applicants or Tennessee in a written notice given at least 12 months in advance of such date by either Applicants or Tennessee to the other, it is explained. Applicants, it is stated, may sell in excess of 15,000 Mcf of natural gas per day to Tennessee if Applicants in their sole judgment determine that they could make additional volumes available. Applicants assert that Tennessee is obligated to purchase on each day the lesser of 11,250 Mcf or the volume which equals the volume of gas required to satisfy the requirements of Applicants' retail customers in the areas served by Applicants from Midwestern Gas Transmission Company's (Midwestern) northern system. It is submitted that on an annual basis Tennessee is obligated to purchase a minimum of 4,106,250 Mcf of natural gas from Applicants.

Tennessee, it is explained, would pay Applicants for the natural gas purchased the sum of

(a) The sum of the monthly charges excluding the demand charged which Applicants pay Midwestern pursuant to section 3.2 of Midwestern's Rate Schedule CRL-2 for the volumes

purchased by Applicants for resale to Tennessee; plus

(b) 1.0 cent for each Mcf sold to Tennessee; plus

(c) Any incremental pricing surcharge required to be imposed.

Applicants state that Midwestern would deliver the gas volumes to Northern at the interconnections of Midwestern's and Northern's facilities near North Branch and/or Cambridge, Minnesota. Northern would then deliver the volumes to Tennessee by an exchange of gas pursuant to an exchange agreement between the parties, it is asserted.

Applicants maintain that if either Midwestern or Northern is unable to satisfy its contract obligations to Applicants, Applicants may curtail sales to Tennessee by an equivalent volume prior to curtailing sales to their retail customers. It is explained that this procedure would give highest priority to Applicant's retail customers.

Applicants state that the proposed sale to Tennessee is part of an overall effort by Applicants to reduce the cost of purchased gas for their retail customers. It is asserted that this reduction would be accomplished by substituting lower-cost volumes purchased from Northern for the higher-cost volumes purchased from Midwestern. Applicants submit that to implement this program of substitution, it is necessary that Midwestern assist Applicants by transporting and delivering the volumes to be purchased from Northern. Applicants aver that Midwestern is willing to provide the transportation service only under certain conditions one of which is the Applicants sell off on a daily basis a volume of gas purchased from Midwestern equal to the daily volumes of gas purchased from Northern and transported by Midwestern for resale to Applicants' Midwestern-supplied customers. Applicants maintain that the proposed sald of natural gas to Tennessee would satify this condition.

Applicants also request a permanent exemption from the filing requirements of § 281.204 of the Commission's regulations. It is stated that § 281.204 requires each interstate pipeline listed in § 281.202 to file tariff sheets which provide that if the interstate pipeline is in curtailment natural gas would be delivered in accordance with the provisions of the permanent curtailment rule adopted by the Commission to implement section 401 of the NGPA. Applicants explain that although they are not interstate pipelines listed in § 281.202 they are concerned that if the Commission approves the proposed sale to Tennessee it may find Applicants to be interstate pipelines subject to the filing requirements of § 281.204. Applicants submit that they are primarily natural gas distribution companies engaged in the business of selling gas at retail. Applicants assert thay they have proposed the jurisdictional act of selling gas to Tennessee only for the purpose of satisfying one of the conditions imposed by Midwestern in order to obtain the transportation service which Midwestern must provide to enable Applicants to carry out their proposal to reduce the purchased gas cost for their customers. Therefore, Applicants submit that they are not interstate pipelines as a result of the sale to Tennessee.

If the Commission concludes that Applicants should be treated as interstate pipelines, they request that an exemption from the requirements of § 281.204 be granted. Applicants explain that under the gas sales agreement between Applicants and Tennessee should either Midwestern or Northern be unable to satisfy its volumetric contract obligation to Applicants Applicants would curtail or interrupt deliveries to Tennessee prior to curtailing deliveries to their retail customers. It is averred that each of the Applicants has filed a curtailment plan with the state commission which has jurisdiction over its retail gas business. Applicants state that if the volumes available from their suppliers are curtailed to the point that all of the curtailment cannot be implemented by reducing sales to Tennessee Applicants would simply curtail sales in accordance with their currently effective state curtailment plans. Applicants contend that since there would be only one jurisdictional customer whose purchases are subject to curtailment there would be no need to establish a plan to allocate a supply shortage among numerous jurisdictional customers.

Furthermore, Applicants request an adjustment permanently to exempt the purchased gas costs associated with the volumes of gas which Applicants propose to sell to Tennessee from the applicability of the Commission's incremental pricing regulations in 18 CFR Part 282. It is explained that by order issued March 24, 1980, in Docket No. SA80–11 Midwestern's northern system was exempt from incremental pricing under Title II of the NGPA for purposes of service to general system customers. Applicants submit that this determination also applies to them with respect to their proposed sale to Tennessee as the volumes which Applicants propose to sell to Tennessee are imported volumes purchased from Midwestern which are not subject to incremental pricing. Applicants assert that the incremental pricing regulations require the establishment of an incremental gas cost adjustments account and two other accounts for unrecovered gas costs and surcharges. Under the circumstances of Applicants' sale to Tennessee, it is stated that Applicants would incur no gas acquisition costs subject to incremental pricing. Applicants maintain that the monthly entries to these various accounts would be zero. Applicants contend therefore that maintenance of the accounts by Applicants in connection with their sales to Tennessee would be a meaningless exercise.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Enrergy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–35707 Filed 12–11–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP82-73-000]

Northwest Pipeline Corp.; Application

December 7, 1981.

Take notice that on November 12, 1981, Northwest Pipeline Corporation (Applicant), 315 East 200 South, Salt Lake City, Utah 84111, filed in Docket No. CP82-73-000 an application pursuant to section 3 of the Natural Gas Act for authorization to continue the importation of natural gas from Canada at the Kingsgate, British Columbia, import point through October 31, 1987, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that the importation of natural gas is accomplished through the delivery of natural gas at Kingsgate, British Columbia, by Alberta Natural Gas Company for the account of Westcoast Transmission Company Limited (Westcoast) directly into the facilities of Pacific Gas Transmission Company (PGT) for the account of Applicant pursuant to the September 23, 1960, agreement between Applicant and Westcoast. Applicant explains that the gas so delivered to PGT is thereafter transported and delivered to Applicant at a delivery point in the vicinity of Spokane, Washington, with subsidiary delivery points located along PGT's transmission system in the states of Idaho, Washington, and Oregon. Applicant asserts that the September 23, 1960, agreement terminates December 31, 1981, and that the export license, GL-4, issued by the National Energy Board of Canada (NEB) also terminates on December 31, 1981.

It is stated that Applicant and Westcoast by an agreement dated July 6, 1979, amended the September 23, 1960, agreement to extend the term thereof through October 31, 1989, and thereafter subject to Westcoast's having an available supply of natural gas and the necessary authorization to sell and export such gas at the Kingsgate import point.

Applicant states that upon application by Westcoast to the NEB for authority to extend Export License GL-4 the NEB extended the license but limited such authorization as follows:

(a) For the period December 10, 1981, through October 31, 1982, 152,000 Mcf per day and 46,000,000 Mcf annually;

(b) For the period November 1, 1982, through October 31, 1984, 152,000 Mcf per day and 51,000,000 Mcf annually;

(c) For the period November 1, 1984, through October 31, 1985, 116,000 Mcf per day and 38,000,000 Mcf annually;

(d) For the period November 1, 1985, through October 31, 1986, 76,000 Mcf per day and 26,000,000 Mcf annually;

(e) For the period November 1, 1986, through October 31, 1987, 38,000 Mcf per day and 13,000,000 Mcf annually;

(f) A total export volume of 1.24 billion Mcf over the term of the export license.

Applicant requests authority to extend its importation of natural gas at the Kingsgate import point in a manner consistent with the GL-4 export license extension already authorized by Canada.

Applicant submits that unless it is authorized to continue the importation requested herein it would be unable to continue to serve the requirements of its northern system customers at the same level as those requirements are being served today.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 18, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35651 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5530-000]

Commonwealth of Pennsylvania; Application for Preliminary Permit

December 7, 1981.

Take notice that The Commonwealth of Pennsylvania (Applicant) filed on October 16, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)) for Project No. 5530 to be known as the George B. Stevenson Dam Project located on The First Fork Sinnemahoning Creek in Potter and Cameron Counties, Pennsylvania. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Peter S. Duncan, Deputy Secretary for Resources Management, P.O. Box 1467, 3rd and Reilly Sts., Harrisburg, Pennsylvania 17120.

Project Description—The project would consist of: (1) The existing George B. Stevenson Dam owned by the Applicant, a rolled earthfill embankment with a maximum height of 166 feet above streambed elevation and an embankment length of 1,665 feet. (2) The existing reservoir having a storage capacity of 2,000 acre-feet at a normal water surface elevation of 920 feet m.s.l. (3) A proposed powerhouse to be constructed at the downstream terminus of a modified existing outlet tunnel with appurtenant facilities and having an installed generating capacity of approximately 0.5 MW. The Applicant estimates annual energy production to be 4,600 MW-hours. Project energy would be used by facilities within Sinnemahoning State Park, or sold to a public institution, industrial users or a public utility.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of three years, during which the Applicant would perform a study to determine the feasibility of the project. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under the permit would be $50,000.

Competing Applications—This application was filed as a competing application to the George B. Stevenson Dam Project No. 4618 filed on May 4, 1981, by United American Hydropower Group, under 18 CFR 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent has passed. Therefore, no further competing applications or notices of intent to file competing applications will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to

take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petition to intervene must be received on or before January 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35646 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5553-000]

Commonwealth of Pennsylvania; Application for Preliminary Permit

December 7, 1981.

Take notice that the Commonwealth of Pennsylvania (Applicant) filed on October 21, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5553 to be known as the Pymatuning Dam Hydropower Project located on the Shenango River in West Shanango Township, Crawford County, Pennsylvania. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Timothy Weston, Associate Deputy Secretary for Resources Management, P.O. Box 1467, 3rd & Riley Sts., Harrisburg, Pennsylvania 17120.

Project Description—The proposed project would consist of: (1) The existing Pymatuning Dam, an earth-filled embankment with a height of 50 feet and a length of 1,500 feet; (2) a reservoir having a surface area of approximately 14,528 acres and a storage capacity of 188,000 acre-feet at normal pool elevation of 1,008 feet m.s.l.; (3) the outlet structure would be modified in such a manner that the existing outlet conduit could be used as a power conduit; (4) a proposed powerhouse having as installed generating capacity of approximately 350 kW to be constructed at the downstream terminus of the modified outlet tunnel; and (5) appurtenant facilities. The Applicant estimates the annual energy production to be 3,000,000 kW-hrs. The Dam is owned and operated by the Commonwealth of Pennsylvania. The project energy would be used by facilities within Pymatuning State Park, or for sale to public institutions, electric cooperatives, or a public utility.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of three years, during which time the Applicant would perform studies to determine the feasibility of the project. Depending upon the outcome of the studies the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates cost of the studies under the permit would be $50,000.

Competing Applications—This application was filed as a competing application to the Pymatuning Dam Project No. 4672 filed on May 15, 1981, by United American Hydropower Group, under 18 CFR 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent has passed. Therefore, no further competing applications or notices of intent to file competing applicatons will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rule of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35647 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5315-000]

Phoenix Hydro Corp.; Application for Preliminary Permit

December 7, 1981.

Take notice that Phoenix Hydro Corporation (Applicant) filed on September 2, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5315 to be known as the Phoenix Project located on the Oswego River in Oswego and Onondaga Counties, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Gary R. Schoonmaker, President, The Phoenix Hydro Corporation, 2701 Howlett Hill Road, Marcellus, New York 13108.

Project Description—The proposed project would consist of: (1) The existing 771-foot long Oswego River Lock and Dam No. 1; (2) the existing reservoir with an approximate surface area of 75 acres at a normal pool elevation of 363.0 feet (USGS datum); (3) the existing control gates; (4) the existing power canal; (5) a proposed powerhouse with new generating facilities having an installed capacity of 6,400 kW; and (6) appurtenant works. The Oswego River Lock and Dam No. 1 are owned by the New York State Department of Transportation. The Applicant estimates that the average annual energy output would be 25,283,000. Project energy generated would be sold to a local public utility.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of studies under the permit would be $65,000.

Competing Applications—This application was filed as a competing application to the Long Lake Energy Corporation's application for Project No. 4113 filed on February 5, 1981, under 18 CFR 4.33 (1980), and therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest or petition to intervene must be received on or before January 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35982 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4440-000]

Rockfish Corp.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 9, 1981.

Take notice that on March 30, 1981, Rockfish Corporation (Applicant) filed an application under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (FERC Project No. 4440) would be located on the Rockfish River, near Schuyler, in Nelson County, Virginia. Correspondence with the Applicant should be directed to: Carol C. Pollock, President. Box 413, Afton, Virginia 22920.

Project Description—The proposed project would consist of: (1) An existing downstream step dam, of rock masonry construction, approximately 250 feet long and 18 feet high; (2) a canal at an elevation 93.32 feet m.s.l. with a tailrace and headgates; (3) an existing powerhouse containing two generators with a total capacity of 400 kW; (4) existing transmission lines; and (5) appurtenant facilities. The project is not located on Federal lands. The proposed project would be operated on a run-of-river basis.

Purpose of Project—All energy generated would be used by the Applicant for sale to the Appalachian Power Company. The average annual energy generation is estimated to be 1.75 GWh.

Agency Comments—The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the State of Virginia Commission of Game & Inland Fisheries, P.O. Box 11104, 4010 W. Broad Street, Richmond, Virginia 23230 are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 25, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of it rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 25, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's

regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, 825 North Capitol Street, NE., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35653 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 3193-001]

City of Santa Clara, California; Application for Major License

December 10, 1981.

Take notice than on October 30, 1981, the City of Santa Clara, California (Applicant) filed an application for license with the Federal Emergy Regulatory Commission (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for construction, operation and maintenance of the Stony Gorge Hydroelectric Project, FERC No. 3193, to be located at the existing outlet of the United States Bureau of Reclamation's Stony Gorge Dam on Stony Creek in Glenn County, California. Correspondence concerning the application should be sent to: Mr. Barry R. Flynn, Director of Electric Utility, City of Santa Clara, 1500 Warburton Avenue, Santa Clara, California 95050.

Project Description—The proposed project would involve modification of the existing Stony Gorge Dam Outlet works by removing and reinstalling the existing needle valves at the end of two new 50-inch diameter Y-branched penstock extensions. The new penstock extensions would each be 48 feet long and the penstock branches leading to a proposed powerhouse would each be approximately 100 feet long. In summary the proposed project would consist of: (1) Two 50-inch diameter Y-branched penstocks; (2) a powerhouse containing two generating units with a combined rated capacity of 3,900 kW; and (3) appurtenant facilities.

Applicant estimates the total cost of the project at $11.1 million. Project power would be used in the Applicant's municipal utility system to reduce energy purchases.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 16, 1982, either the competing application itself (See 18 CFR 4.33 (a) and (d)) or a notice of intent (See 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or 4.101 et seq. (1981).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35695 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2144-001]

City of Seattle, Washington, City Light Department; Application for Amendment of License

December 9, 1981.

Take notice that on October 19, 1981, the City of Seattle, Washington, City Light Department (Licensee/Applicant) filed an application for amendment of its license for the existing Boundary Project No. 2144, located on the Pend Oreille River, near the town of Metaline Falls in Pend Oreille County, Washington. Correspondence with the Applicant should be directed to: Mr. Joseph P. Recchi, Superintendent, City Light Department, City of Seattle, 1015 Third Avenue, Seattle, Washington 98104.

Licensee seeks authorization to construct, operate and maintain: (1) Two generating units, with a rated capacity of 196 MW each, at the existing penstock stubouts within the project's existing underground powerhouse; (2) two 3,000-foot long, 230-kV transmission lines connecting the new generating units with the existing Bonneville Power Administration's switching station southwest of the powerhouse; and (3) appurtenant facilities.

The estimated annual generated energy of 510 million kWh by the proposed units would be used by the Licensee to serve its customers. The Licensee estimates the cost of the proposed action at $384 million (1981 Dollars).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's rules of practice and procedure, 18 CFR 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's rules. Any comments, protest, or petition to intervene must be filed on or before January 25, 1982. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35645 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5612-000]

The Town of Skykomish, Wash; Application for Preliminary Permit

December 10, 1981.

Take notice that the Town of Skykomish (Applicant) filed on November 5, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5612 to be known as West Cady Creek Hydropower Project located on West Cady Creek tributary of North Fork of Skykomish River in Snohomish County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: The Mayor, Town of Skykomish, P.O. Box 308, Skykomish, Washington 98288.

Project Description—The proposed project would consist of: (1) A 60-foot long, 5-foot high diversion structure on West Cady Creek; (2) a 3.3-mile long diversion conduit; (3) a 4,000-foot long, 54-inch diameter penstock; (4) a powerhouse with a total installed capacity of 9,800 kW and (5) a 1-mile long, 69-kV transmission line from the powerhouse to an existing transmission line. The Applicant estimates that the average annual energy production would be 60 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months, during which it would conduct the technical, environmental, and economic studies, and also prepare and FERC license application. The Applicant estimates that the cost of undertaking these studies would be $160,000.

Competing Applications—This application was filed as a competing application to Western Power Incorporated's application for Project No. 5338 filed on September 8, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before January 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35710 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2780-003]

Solano Irrigation District; Application for Amendment of License

December 7, 1981.

Take notice that on October 15, 1981, Solano Irrigation District (SID) filed an application to amend its license for the Monticello Power Plant Project No. 2780, located on Putah Creek in Solano County, California. Correspondence with SID should be directed to: Mr. W. Morris Dally, President, Solano Irrigation District, 508 Elmira Road, Vacaville, California 95688. SID requests authorization to increase the installed capacity of the project to 11.5 MW by installing a 1.5-MW generating unit in the project powerhouse. The addition of the third unit is requested so that the project would be able to generate energy by using the peak discharge from Monticello Dam which is now beyond the capabilities of the two 5-MW licensed units. The third unit would also generate energy during winter months when the discharge from Monticello Dam is below the capability of the two licensed units. SID also requests that its license be amended to delete the 1.4-mile long, 115-kV transmission line from the project works, which was originally proposed to be part of the project. SID states that Pacific Gas and Electric Company is in the process of preparing an FERC license application for construction, operation, and maintenance of the transmission line.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to their responsibilities and applicable statutes. No other formal request for comments will be made. Comments should be confined to substantive issues relevant to the issuance of an order amending project license. A copy of the application may be obtained directly from the applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1981). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 22, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTESTS", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E Springer, Chief, Applications Branch,

Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35654 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5585-000]

Southern Pacific Land Co.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 9, 1981.

Take notice that on October 29, 1981, Southern Pacific Land Company (Applicant) filed an application under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 5585) would be located on Swift Creek near the town of Trinity Center in Trinity County, California. The project would occupy lands of the United States within the Shasta National Forest. Correspondence with the Applicant should be directed to: Mr. Erik A. Stenstedt, Southern Pacific Land Company, One Market Plaza, San Francisco, California 94105.

Project Description—The proposed project would consist of: (1) An 8-foot high diversion structure across Swift Creek; (2) a 48-inch diameter, 1,800-foot long conduit; (3) a 42-inch diameter, 6,000-foot long penstock; (4) a powerhouse containing a single generating unit with a rated capacity of 4,600 KW; and (5) appurtenant facilities.

Purpose of Project—Project energy would be sold to a local utility.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the California Department of Fish and Game are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal request for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 25, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 25, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5647-000]

Swift River Co.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 10, 1981

Take notice that on November 13, 1981, Swift River Company (Applicant) filed an application under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 as amended), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 5647) would be located on the Sebec River in the town of Milo, Piscataquis County, Maine. Correspondence with the Applicant should be directed to: Christian A. Herter, III, Vice-President, Swift River Company, 44 Exchange Street, Portland, Maine 04101.

Project Description—The proposed project would consist of: (1) An existing 9-foot high, 250-foot long timber crib dam; (2) a 50 acre reservoir with a net storage capacity of 50 acre-feet at elevation 280.54 feet M.S.L.; (3) a new powerhouse containing two turbine-generators with a total rated capacity of 600 kW which would discharge into the easterly river channel; (4) a new 750-foot long, 70-foot wide tailrace channel excavated out of the easterly river channel; (5) a 50-foot long, 7.6-kV transmission line and (6) appurtenant facilities. The project would generate up to 2,500,000 kWh annually.

Purpose of Project—Energy produced at the project would be sold to Bangor Hydro-Electric Company.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Maine Department of Inland Fisheries and Wildlife are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General

comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 25, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 25, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-76-000]

Texas Eastern Transmission Corp.; Application

December 10, 1981.

Take notice that on November 13, 1981, Texas Eastern Transmission Corporation (Applicant), P.O. Box 2521, Houston, Texas 77001, filed in Docket No. CP82-76-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain tap facilities necessary for Applicant to take into its system synthetic gas to be purchased from Conoco, Inc. (Conoco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to a gas purchase contract dated October 1, 1981, it has agreed to purchase from Conoco up to 60,000 Mcf of synthetic gas per day.

Applicant proposes the construction and operation of a pipeline tap to enable it to receive into its system the quantities of synthetic gas which it intends to purchase from Conoco's Chocolate Bayou Petrochemical Complex located in Brazoria County, Texas. Applicant states that the proposed facilities are estimated to cost $27,200 which cost would be financed initially with funds on hand or through short-term financing.

Applicant further proposes to include in its rates in the operation of its purchased gas adjustment (PGA) on a rolled in basis the cost of synthetic gas purchased from Conoco. Applicant states that it would construct nonjurisdictional pipeline facilities in order to transport the synthetic gas from Conoco's complex to Applicant's transmission system. It is estimated that the cost of said facilities would be $2,450,000. Applicant proposes to include the cost of such facilities in its rate base and submits that recovery of the cost of the synthetic gas through the operation of its PGA would enable it to acquire an important, secure and long-term supply of gas at a price that is reasonable and consistent with prices of other supplies of gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35709 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-66-000]

Transcontinental Gas Pipe Line Corp.; Application

December 9, 1981.

Take notice that on November 10, 1981, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP82-66-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Elizabethtown Gas Company (Elizabethtown), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to the terms of a gas transportation agreement dated October 28, 1981, it would transport on an interruptible basis up to 40,000 dekatherms (dt) equivalent of natural gas per day which Elizabethtown has arranged to purchase from Consolidated Gas Supply Corporation (Consolidated). Applicant further states that Consolidated would make available to Texas Eastern Transmission Corporation (Texas Eastern) quantities of gas which Texas Eastern would transport and deliver by displacement to Applicant at the existing Texas Eastern-Applicant Skippack interconnection in Montgomery County, Pennsylvania. Applicant would redeliver equivalent quantities to Elizabethtown at Applicant's existing delivery points to Elizabethtown in New Jersey.

Applicant proposes to charge Elizabethtown a volume charge of 7.0 cents per dt equivalent delivered by Applicant less quantities retained by Applicant for compressor fuel and line loss make-up. Applicant asserts it would retain 0.7 percent of the quantities received for compressor fuel and line loss make-up.

Applicant states that the proposed transportation service is to be for a term beginning on the date of initial deliveries and ending on September 30, 1982.

The proposal would allow Elizabethtown to take delivery of the subject gas without having to construct additional facilities, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35689 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-87-000]

United Gas Pipe Line Co.; Application

December 9, 1981.

Take notice that on November 18, 1981, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP82-87-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Amoco Production Company (Amoco) and the construction and operation of facilities necessary therefor, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that on September 21, 1981, Applicant and Amoco entered into a gas transportation agreement whereby Applicant would transport natural gas for the account of Amoco from Baldwin County, Alabama, to St. Landry Parish, Louisiana. Applicant explains that it would receive the gas at a proposed point of interconnection on its 12-inch line and/or its 16-inch line in Baldwin County, Alabama, and it would then transport and redeliver an equivalent quantity of gas for Amoco's account at an existing point of interconnection where Florida Gas Transmission Company's 22-inch line crosses Applicant's 30-inch North-South line in St. Landry Parish, near Arnaudville, Louisiana.

Applicant maintains that to compensate it for fuel and company-used gas, Amoco would provide a volume of gas equal to 2.3 percent of the volume Applicant would transport under the proposed transportation service. It is explained that such fuel and company-used gas would be made available to Applicant contemporaneously with gas Applicant would purchase from Amoco in the Westdale Field, Red River Parish, Louisiana.

Applicant states that in order to deliver the subject gas it would construct and operate measuring facilities and taps on its 12-inch and 16-inch pipelines. It is estimated that the cost for these facilities would be $132,139 which would be reimbursed by Amoco.

Amoco would pay Applicant for the proposed transportation an amount equal to one-half of Applicant's transportation rate in effect from time to time in Applicant's Northern Rate Zone less any amount included in such transportation rate which is attributable to gas consumed in the operation of Applicant's pipeline system. It is stated that the current rate for the proposed transportation is 16.19 cents per Mcf.

Applicant submits that it would transport up to 24,000 Mcf of natural gas per day for a term beginning on the date deliveries commence and ending upon termination of Amoco's contract with Florida Power and Light Company on June 9, 1988.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in

any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RA82-7-000]

Warrior Asphalt Co. of Alabama, Inc.; Filing of Petition for Review

December 9, 1981.

Take notice that Warrior Asphalt Company of Alabama, Inc. on December 3, 1981, filed a Petition for Review under 42 U.S.C. 7194(b) (1977) (Supp.) from an order of the Secretary of Energy (Secretary).

Copies of the petition for review have been served on the Secretary and all participants in prior proceedings before the Secretary.

Any person who pafticipated in the prior proceedings before the Secretary may be a participant in the proceeding before the Commission without filing a petition to intervene. However, any such person wishing to be a participant is requested to file a notice of participation on or before December 24, 1981, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Any other person who was denied the opportunity to participate in the prior proceedings before the Secretary or who is aggrieved or adversely affected by the contested order, and who wishes to be a participant in the Commission proceeding, must file a petition to intervene on or before December 24, 1981, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 and 1.40(e)(3)).

A notice of participation or petition to intervene filed with the Commission must also be served on the parties of record in this proceeding and on the Secretary of Energy through John McKenna, Office of General Counsel, Department of Energy, Room 6H-025, 1000 Independence Avenue, S.W. Washington, D.C. 20585.

Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol St., N.E., Washington, D.C. 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-88-000]

Western Gas Interstate Co.; Application

December 9, 1981.

Take notice that on November 19, 1981, Western Gas Interstate Company (Applicant), 1800 First International Building, Dallas, Texas 75270, filed in Docket No. CP82-88-000 an application pursuant to section 7 of the Natural Gas Act and § 157.7(g) of the regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission and approval to abandon for the 12-month period commencing January 1, 1982, and operation of various field compression and related metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to enable Applicant to act with reasonable dispatch in constructing and abandoning facilities which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment under § 157.7(g) would not exceed $500,000 with the cost of any single project limited to 25 percent of the total budget amount. Such cost, it is asserted, would be financed from funds on hand and with short-term borrowings from Applicant's parent, Southern Union Company.

Applicant further states that its existing budget authorization pursuant to § 157.7(g) expires on March 3, 1982. In order that Applicant may maintain its records on a calendar-year basis, Applicant requests that the subject authorization commence January 1, 1982, instead of March 3, 1982. Applicant requests in the alternative an effective date of March 3, 1982.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-114-000]

Cliffs Electric Service Co.; Notice of Filing

December 10, 1981.

The filing Company submits the following:

Take notice that on November 27, 1981, Cliffs Electric Service Company

(CESCO) filed a letter agreement providing for the sale of short term power to Upper Peninsula Power Company for the period November 16, through December 31, 1981. The rate is 0.77/kw and 110% of out-of-pocket costs.

CESCO requests waiver of the Commission's notice requirements to allow for an effective date of November 16, 1981.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-129-000]

Idaho Power Co.; Notice of Filing

December 10, 1981.

The filing Company submits the following:

Take notice that on December 4, 1981, the Idaho Power Company (Idaho) tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during October, 1981, along with cost justification for the rate changed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-123-000]

Kansas City Power & Light Co.; Notice of Filing

December 10, 1981.

The filing Company submits the following:

Take notice that on December 2, 1981, Kansas City Power & Light Company (KCPL) filed with the Commission revised Schedules of Rates and Charges for Firm Power Service to supersede and replace Schedules of Rates and Charges for Firm Power Service in contracts and agreements with the following wholesale customers:

1. Missouri Power & Light Company (MPL), FPC No. 73
2. City of Marshall, Missouri (Marshall), FPC No. 83
3. Missouri Public Service company (MPS), FPC No. 74
4. City of Baldwin City, Kansas (Baldwin), FERC No. 85
5. City of Carrollton, Missouri (Carrollton), FERC No. 86
6. City of Gardner, Kansas (Gardner), FPC No. 79
7. City of Garnett, Kansas (Garnett), FPC No. 78
8. City of Higginsville, Missouri (Higginsville), FERC No. 91
9. City of Osawatomie, Kansas (Osawatomie), FPC No. 77
10. City of Ottawa, Kansas (Ottawa), FERC No. 70
11. City of Pomona, Kansas (Pomona), FPC No. 82
12. City of Prescott, Kansas (Prescott), FPC No. 76
13. City of Salisbury, Missouri (Salisbury), FERC No. 87
14. City of Slater, Missouri (Slater), FPC No. 81
15. Coffey County rural Electric Cooperative Association, Inc. (Coffey County), FPC No. 69
16. United Electric Cooperative, Inc. (United), FPC No. 84

KCPL states that the proposed effective date for each revised Schedule of Rates and Charges is one day after the revised Schedules are filed with the Commission. KCPL further states that the estimated annual fuel adjustment revenue attributable to reclamation costs under the revised Schedules of Rates and Charges would be approximately $22,000 during the 12-month test period ended May 31, 1981. Additionally, KCPL states that the changes embodied in the revised Schedules of Rates and Charges include only provision for the inclusion of estimated reclamation costs in the fuel adjustment calculation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 29, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Little America Refining Co.; Notice of Filing of Petition for Review

December 10, 1981.

Take notice that Little America Refining Company on December 4, 1981, filed a Petition for Review under 42 U.S.C. 7194(b) (1977) Supp. from an order of the Secretary of Energy (Secretary.).

Copies of the petition for review have been served on the Secretary and all participants in prior proceedings before the Secretary.

Any person who participated in the prior proceedings before the Secretary may be a participant in the proceeding before the Commission without filing a petition to intervene. However, any such person wishing to be a participant is requested to file a notice of participation on or before December 28, 1981, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Any other person who was denied the opportunity to participate in the prior proceedings before the Secretary or who is aggrieved or adversely affected by the contested order, and who wishes to be a participant in the Commission proceeding, must file a petition to intervene on or before December 28, 1981, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 and 1.40(e)(3)).

A notice of participation or petition to intervene filed with the Commission must also be served on the parties of record in this proceeding and on the Secretary of Energy through John McKenna, Office of General Counsel, Department of Energy, Room 6H–025, 1000 Independence Avenue, S.W. Washington, D.C. 20585.

Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol St., N.E., Washington, D.C. 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER82–128–000]

Mississippi Power & Light Co.; Proposed Tariff Change

December 10, 1981.

The filing Company submits the following:

Take notice that Mississippi Power & Light Company (MP&L) on December 4, 1981, tendered for filing proposed changes in its Federal Energy Regulatory Commission (FERC) Electric Service Tariff to municipal electric utilities, FERC Rate Schedules No. 87, 88, 93, 236 and 238, and to transmission delivery service schedules included in Interconnection Agreements, FERC Rate Schedule Nos. 239, 243, 251, and 254. The proposed changes would increase revenues from jurisdictional sales and service by $4,762,782 based on the 12 month period ending December 31, 1982.

The Company earned a rate of return of only 7.3% on its rates for resale to the municipal electric utilities and 5.49% on its sales for transmission delivery service in the calendar year 1980. The projected rate of return under the present electric service tariff for the 12 months ending December 31, 1982 for the sales for resale to the municipal electric utilities is 0.18% and for transmission delivery service is only 6.06%. The tariff changes made the filing are necessary to reflect the cost of service for the projected period.

MP&L states that the notice of the proposed effective date and copies of the rate schedule changes were served upon the customers receiving services under the above listed FERC Rate Schedules.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–35717 Filed 12–11–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP82-13-000]

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

December 9, 1981.

Take notice that National Fuel Gas Supply Corporation ("National Fuel"), on November 30, 1981, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1. The proposed changes would increase revenues from jurisdictional sales and service by approximately $25,700,000 based on the 12 month period ended August 31, 1981, as adjusted.

National Fuel states that the increased rates are required to recoup increased costs incurred in operating and maintaining its system, including, but not limited to, increased cost of capital, increased depreciation, increased wages and increased taxes.

The rates proposed reflect an overall rate of return of 13.65 percent which is required, National Fuel states, by its increased cost of capital, increased business risk and the need to attract capital. National Fuel alos proposes to design its rates with demand, commodity and winter requirement components.

National Fuel states that copies of this filing were served upon the company's jurisdictional customers and the regulatory commissions of the States of New York, Ohio, Pennsylvania, Delaware and New Jersey.

Any person desiring to be heard or to protest said filing should file a petition to Intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determing the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35718 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5533-000 and 5625-000]

T. Owen, F. Castagna, R. Bean and Modesto Irrigation District; Notice of Application for Preliminary Permit

December 10, 1981.

Take notice that T. Owen, F. Castagna, R. Bean and Modesto Irrigation District (Applicants) filed on October 20, 1981, and November 9, 1981, applications for preliminary permits [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Projects Nos. 5533 (initial application) and 5629 (competing application) to be known as the Sand and Brown's Power Project located on Sand Creek and Brown's Creek in Madera County, California. The projects lie within the Sierra National Forest. The applications are on file with the Commission and are available for public inspection. Correspondence with either Applicant should be directed to: Teddy Owen, Fred Castagna, Richard Bean, 1646 East Street, Redding, California 96001, and/or Mr. A. Lee DeLano, Modesto Irrigation District, 1231—11th Street, P.O. Box 4060, Modesto, California 95352.

Project Description—The proposed Project No. 5533 would consist of: (1) two 5-foot high diversion structures with negligible storage; (2) diversion conduits or channels 5,610 and 1,080 feet long; (3) penstocks 5,740 and 3,290 feet long; (4) a powerhouse containing one or a combination of turbine generators with 3,651 kW capacity and 9.14 GWh annual energy production; (5) transmission line; and (6) appurtenant facilities. The proposed Project No. 5625 would consist of: (1) two 5-foot high, 185-foot long diversion structures; (2) diversion conduits, 48-inch diameter, 5,610-foot long, 24-inch diameter, 1,080-foot long; (3) penstocks 48 and 24 inch diameter, 3,290 feet long; (4) a powerhouse containing one or more generating units with a capacity of 3,660 kW and 9.14 million kWh annual energy production; and (5) a transmission line. Generated energy will be distributed through an intertie with Pacific Gas and Electric System.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicants seek issuance of a preliminary permit for a period of 36 and 24 months, respectively, during which time the firms plan engineering, economic and environmental studies, to ascertain project feasibility and to support their application for a license to construct and operate the project. The estimated cost of these actions is $102,000 for Project No. 5533 and $75,000 for Project No. 5625.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 12, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981)].

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 12, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 13, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 12, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO

INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. ER81-679-001]

Pacific Gas and Electric Co.; Notice of Compliance Filing

December 10, 1981.

The filing Company submits the following:

Take notice that on November 24, 1981, Pacific Gas and Electric Company (PG&E) filed revised Volume Nos. 2,3,6 and 7 of its original August 12, 1981 filing. Such filing was made pursuant to the Commission's October 23, 1981 order. PG&E's revised filing reflects the elimination of its incremental depreciation adjustment.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before December 31, 1981. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER82-124-000]

Pennsylvania-New Jersey-Maryland Interconnection; Notice of Filing

December 10, 1981.

The filing Company submits the following:

Take notice that on November 25, 1981, the Pennsylvania-New Jersey-Maryland Interconnection (PJM) tendered for filing Interim Modifications to Schedules 6.03, 7.01 and Interim Schedule 10.01 of the PJM Interconnection Agreement (the Interim Schedules) which became effective for service on and after October 1, 1980, as set forth hereinafter:

Company	Rate schedule (FERC No.)
Public Service Electric and Gas Company	23
Philadelphia Electric Company	21
Pennsylvania Power & Light Company	21
Baltimore Gas and Electric Company	9
Jersey Central Power & Light Company	7
Metropolitan Edison Company	7
Pennsylvania Electric Company	24
Potomac Electric Power Company	19
Atlantic City Electric Company	20
Delmarva Power & Light Company	50

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER78-338]

Public Service Co. of New Mexico; Notice of Compliance Filing

December 10, 1981.

The filing Company submits the following:

Take notice that on December 2, 1981, Public Service Company of New Mexico filed a compliance report in accordance with the Commission's Opinion No. 133, issued November 9, 1981. The compliance report consists of a revised cost of service study and a revised rate schedule for service to the City of Gallup, New Mexico.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before December 31, 1981. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA 82-1-8-000]

South Georgia Natural Gas Co.; Notice of Revision to Tariff

December 9, 1981.

Take notice that on Nov. 30, 1981, South Georgia Natural Gas Company (South Georgia) tendered for filing Sixteenth Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1. This tariff sheet and supporting information is being filed 30 days before the effective date of January 1, 1982, pursuant to the Purchased Gas Adjustment Provisions set out in Section 14 of South Georgia's tariff.

South Georgia states that its Sixteenth Revised Sheet No. 4 reflects increases in the rates of its pipeline supplier, Southern Natural Gas Company as filed to be effective January 1, 1982. This rate change will increase the cost of purchased gas to South Georgia's jurisdictional customers $4,224,345. Also reflected in Sixteenth Revised Sheet No. 4 is a Surcharge Adjustment as provided for by Section 14.3 of the General Terms and Conditions of South Georgia's FPC Gas Tariff. The debit balance in tthe Unrecovered Purchased Gas Cost Account of $4,522 will be amortized over the estimated sales for the six-month period commencing January 1, 1982 by a surcharge adjustment rate of 0.05¢ per MMBtu.

Additionally, South Georgia is filing its First Revised Sheet No. 32B. This is a modification to the language covering the Incremental Pricing Surcharges section of the Tariff. This modification was suggested by the FERC Staff as a result of its audit of South Georgia's PGA accounts.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before Dec. 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a part must file a petition to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-N

[Project No. 5504-000]

Stewart Ranches, Inc.; Notice of Application for Preliminary Permit

December 10, 1981.

Take notice that Stewart Ranches, Inc. (Applicant) filed on October 13, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)] for Project No. 5504 to be known as the Kekawaka Creek I Water Power Project located on Kekawaka Creek in Trinity County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Oscar Larson and Associates, P.O. Box 3806, Eureka, California 95501.

Project Description—the proposed project would consist of: (1) a 6-foot high and 35-foot long diversion structure with a 48-inch diameter conduit; (2) a 48-inch diameter, 7,400-foot long penstock; (3) a powerhouse containing two generating units with a total rated capacity of 3,200 kW; and (4) a 5,600-foot long transmission line. Applicant estimates that the average annual energy output would be 11,900,000 kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 36-month permit to prepare a definitive project report, including preliminary designs, and including geological, environmental and economic feasibility studies. The cost of the above activities, along with preparation of an environmental impact report, obtaining agreements with Federal, State and local agencies, preparing a license application, conducting final field surveys, and preparing designs is estimated by the Applicant to be $60,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 16, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981)].

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 16, 1981, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 15, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5503-000]

Stewart Ranches, Inc.; Notice of Application for Preliminary Permit

December 10, 1981.

Take notice that Stewart Ranches, Inc. (Applicant) filed on October 13, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)–825(r)] for Project No. 5503 to be known as the Kekawaka Creek II Water Power Project located on Kekawaka Creek in Trinity County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Oscar Larson and Associates, P.O. Box 3806, Eureka, California 95501.

Project Description—The proposed project would consist of: (1) a 6-foot high and 25-foot long diversion dam diverting water into a 42-inch diameter conduit; (2) a 42-inch diameter, 6,800-foot long penstock; (3) a powerhouse containing two generating units with a total rated capacity of 1,700 kW; and (4) a 9,000-foot long transmission line. Applicant estimates that the average annual energy output would be 6,300,000 kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 36-month permit to prepare a definitive project report, including results of geological, environmental and economic feasibility studies. The cost of the above activities, along with preparation of an environmental impact report, obtaining agreements with Federal, State and local agencies, preparing a license application, conducting final field surveys, and preparing designs is estimated by the Applicant to be $60,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 16, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981)].

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption

must be submitted to the Commission on or before February 16, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than April 15, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition To intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 16, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

BILLING CODE 6717-01-M

[Docket Nos. G-10629-000, et al.]

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

December 7, 1981.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before December 21, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 ro 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

[1] Leases have expired by their own terms or were assigned to another party.
[2] Edwin L. Cox, et al., do hereby grant, bargain, sell, convey and re-assign to Exxon Corporation (successor to the Humble Oil and Refining Company) all of the interests assigned under Reassignment dated December 15, 1978
[3] Applicant agrees to accept a Permanent Certificate of Public Convenience and Necessity covering the subject sale conditioned in accordance with the Natural Gas Policy Act of 1978 and the Commission's Regulations under said Act.
[4] Applicant is filing to reflect the substitution of the Healee Gas Processing Plant to the Headlee Devonian Unit Plant.
[5] Applicant is filing under Residue Gas Purchase Agreement dated June 1, 1954, amended by Amendatory agreement dated August 24, 1981.
[6] Applicant is filing under Gas Purchase Contract dated September 22, 1978, amended by Amendment dated October 1, 1981.
[7] Applicant is filing under Gas Purchase and Sales Agreement dated May 30, 1979, amended by Amendment dated October 23, 1981.
[8] The primary term under Gas Purchase Contract dated September 1, 1957, was for twenty years from September 1, 1957 and year to year thereafter. Since Cities Service Company does not hold an oil and gas lease on the remaining acreage committed to that contract, under which no deliveries have been made since sometime in 1977, Buyer and Seller have mutually agreed to cancel the Gas Purchase contract, dated September 1, 1957, effective August 28, 1981
[9] Contract expired June 26, 1979. There are no remaining reserves as production ceased in 1971. ARCO plans no further development.
[10] Applicant is filing under Gas Purchase Contract dated July 2, 1981
[11] Applicant is filing under Gas Purchase and Sales Agreement dated April 25, 1978, amended by Amendment dated June 15, 1981
[12] J. E. Barnes Lease, Well No. 5, was plugged and abandoned. ARCO has no plans for workover or recompletion of the well. Contract expires 1-1-82.
[13] Applicant is filing under Gas Purchase Contract dated November 6, 1979, amended by amendment dated August 3, 1981.
[14] Applicant is filing under Gas Purchase Contract dated June 1, 1981
[15] to sell remaining gas to Natural Gas Operations Company for resale to Lone Star
[16] Conoco Inc. has sold and assigned and/or released to the original landowner all of its leasehold interests in the leases covered by RS 292.
[17] Partial sale of acreage dedicated under subject contract.
[18] Applicant is filing under Gas Purchase and Sales Agreement dated November 21, 1979.
[19] Some wells plugged and acreage sold.
[20] Applicant is filing to amend the certificate to provide for an additional delivery point.
[21] Applicant is filing under Gas Purchase Contract dated March 3, 1977, amended by Amendatory Agreement dated July 21, 1980.

BILLING CODE 6717-01-M

[Project No. 5618-000]

James O. Boyd; Application for Preliminary Permit

December 8, 1981.

Take notice that James O. Boyd (Applicant) filed on November 6, 1981, an application for preliminary permit (pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)) for Project No. 5618 to be known as the Lassen Power Project located on Parsnip Creek in Lassen County, California. The project would lie within the Modoc National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Ronald F. Ott, Ott.Water Engineers, Inc., 2334 Washington Avenue, Redding, California 96001.

Project Description—The proposed project would consist of: (1) Large natural boulders placed in the creek that will divert flow into a concrete intake structure while creating negligible storage; (2) a 10,000-foot diversion conduit; (3) a 16,400-foot long penstock; (4) a powerhouse containing one or a combination of turbine generators with a combined capacity of 2.1 MW and annual production of 8.3 GWh; (5) transmission line; and (6) appurtenant facilities. Power will be supplied to the Surprise Valley Electrification Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a term of 36 months, during which time engineering, economic and environmental studies will be conducted to ascertain project feasibility and to support application for a license to construct and operate the project. The estimated cost of these activities is $80,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 12, 1982, the competing application itself, or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981).

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 12, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or section 4.101 et seq. (1981), as appropriate).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than February 12, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the

Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 12, 1982.

Filing and Service of Responsive Documents—Any filing must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35564 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER81-649-000]

Central Vermont Public Service Corp.; Order Accepting for Filing and Suspending Revised Rates, Acknowledging Intervention, and Establishing Procedures

December 7, 1981.

On July 31, 1981, as completed on October 9, 1981,[1] Central Vermont Public Service Corporation (Central Vermont) tendered for filing a proposed formula rate [2] for calculating charges for firm power service to its wholly-owned subsidiary, Connecticut Valley Electric Company. The proposed formula rate would result in increased revenues of approximately $104,700 (1.34%) for the twelve-month period ending September 30, 1982. Central Vermont requests waiver of the sixty day notice requirement to permit an effective date of October 1, 1981.

The proposed formula incorporates a methodology for developing a demand charge, a delivery point charge, and an transformation charge for power delivered at voltage levels below 34kV. The formula rate also provides for an energy charge to collect the actual monthly per kWh fuel cost incurred by Central Vermont. In addition, the formula incorporates a minimum billing demand ratchet provision.

Under the formula, costs and charges would be developed on a service year basis. The service year is defined as the twelve-month period beginning on April 1 of each year except that the initial (partial) service year is to begin on the effective date established by the Commission for the instant submittal. Most of the cost components reflected in the formula are based on per-book expenses during the calendar year preceding the service year. However, the rate of return and income tax components would reflect capital data as of the first of the month preceding the service year. Costs for Purchased Power (Account No. 555) and Transmission by Others (Account No. 565) would be estimated for the service year, subject to adjustment at the close of the service year to reflect actual costs incurred.

Central Vermont's proposed rate schedule provides for an informational filing with the Commission on or before May 31 of each year, reporting the charges developed and billed under the formula rate and the adjustments required to reflect actual costs for Purchased Power and Transmission by Others. The rate schedule further provides for a refund mechanism under which the charges for the service year would be subject to refund pending analysis of the cost data by the Commission. If a hearing is ordered, the charges would be adjusted to reflect the rates found to be just and reasonable by the Commission.

Notice of Central Vermont's submittal was issued on August 7, 1981, with responses due on or before August 28, 1981. On August 28, 1981, the Vermont Department of Public Service filed a petition to intervene. The Department of Public Service has not raised any specific issues with respect to the proposed formula rate, but notes that the instant submittal provides for an increase to Central Vermont's affiliated customer of less than 2%, while Central Vermont, in Docket No. ER81-660-000, Proposed a 37.6% increase in rates for service to its non-affiliated customers.[3]

On November 24, 1981, Central Vermont filed a unilateral offer of settlement in this docket. The settlement proposal reflects modifications to the formula methodology as well as the use of a more recent test period. Central Vermont suggests that in advance of the period for comments on the settlement proposal, the Commission consider conditionally accepting the settlement rate offer to become effective in lieu of the originally filed rates.

Discussion

The timely-filed pleading is sufficient to initiate participation in this proceeding by the Vermont Department of Public Service.

Our analysis indicates that Central Vermont's originally proposed formula rate has not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. The Commission has had insufficient time (one day) to adequately analyze the company's offer of settlement and we are not prepared at this time to determine an appropriate suspension period, if any, for the settlement rates. This is particularly true in view of the unilateral nature of the settlement proposal and the absence of comments by interested parties. Accordingly, we shall accept the originally proposed formula rate for filing and suspend its operation as ordered below. Such action, however, shall be without prejudice to possible substitution of the settlement rate upon due consideration of Central Vermont's offer of settlement.

In a number of suspension orders,[4] we have addressed the considerations underlying the Commission's policy regarding rate suspensions. For the reasons given there, we have concluded that rate filings should generally be suspended for the maximum period permitted by statute where preliminary study leads the Commission to believe that the filing may be unjust and unreasonable or that it might run afoul of other statutory standards. We have acknowledged, however, that shorter suspensions may be warranted in circumstances where suspension for the maximum period may lead to harsh and inequitable results. No such circumstances have been presented here. In addition, good cause has not been shown to waive the sixty day notice requirement. Accordingly, we

---

[1] By letter dated September 30, 1981, the company was advised that its original submittal was deficient.

[2] Designated as: Central Vermont Public Service Corporation, Rate Schedule FERC No. 105 (Supersedes Service Agreement under FPC Electric Tariff First Revised Volume No. 1).

[3] Central Vermont provides firm power service to six nonaffiliated customers under a separate tariff rate. The rates for service to those customers, as filed in Docket No. ER81-660-000, are not based on a formulary approach. By letter dated September 28, 1981, the Commission accepted a settlement filed in Docket No. ER81-660-000.

[4] *E.g., Boston Edison Co.*, Docket No. ER80-506 (August 22, 1980) (five month suspension); *Alabama Power Co.*, Docket Nos. ER80-506, *et al.* (August 29, 1980) (one day suspension); *Cleveland Electric Illuminating Co.*, Docket No. ER80-488 (August 22, 1980) (one day suspension).

shall suspend Central Vermont's originally filed rates for a period of five months from sixty days after completion of the filing to become effective, subject to refund, on May 9, 1982.

The Commission orders:

(A) Central Vermont's request for waiver of the notice requirements is hereby denied.

(B) Central Vermont's October 9, 1981 submittal is hereby accepted for filing and suspended for five months from sixty days after filing, to become effective, subject to refund, on May 9, 1982.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning and justness and reasonableness of Central Vermont's formula rate.

(D) The timely filed notice of intervention in this proceeding by the Vermont Department of Public Service is hereby acknowledged in accordance with the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act; *Provided, however,* that participation by such intervenor shall be limited to the matters set forth in its petition to intervene; and *provided, further,* that the admission of such intervenor shall not be construed as recognition that it might be aggrieved by any order of the Commission in this proceeding.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days of the issuance of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Such conference shall be held for purposes of establishing procedural dates, including the submittal of testimony and exhibits by Central Vermont, and pursuing other appropriate matters. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to consolidate or sever and motions to dismiss) as provided in the Commission's rules of practice and procedure.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-36536 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP81-83-004]

Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 8, 1981.

Take notice that Columbia Gas Transmission Corporation (Columbia) on December 1, 1981, tendered for filing the following revised tariff sheets to its FERC Gas Tariff:

Original Volume No. 1

Seventy-Eighth Revised Sheet No. 16
Twenty-Sixth Revised Sheet No. 16A
Seventh Revised Sheet No. 16B
Eighth Revise Sheet No. 19
Sixth Revised Sheet No. 28

Original Volume No. 2

Fourth Revised Sheet No. 693

Columbia states that tariff sheet Nos. 16, 16A and 16B to Original Volume No. 1 are necessary in order to place into effect on January 1, 1982, which is the end of the suspension period, rates which comply with the conditions set forth in ordering paragraph (E) of the Commission's suspension order herein of July 31, 1981.

Columbia states that Eighth Revised Sheet No. 19 and Sixth Revised Sheet No. 28 are being submitted for the purpose of inserting into Columbia's tariff, effective January 1, 1982, a provision, included in Seventh Revised Sheet No. 19 and Fifth Revised Sheet No. 28, the effectiveness of which was suspended until January 1, 1982 by the Commission's suspension order herein.

Columbia further states that substitute Fourth Revised Sheet No. 693 to its Original Volume No. 2 has been revised to reflect the impact on the Capacity Charge included in Rate Schedule X-70 of the elimination from Columbia's cost of service of those of its facilities included in its July 1, 1981 filing which are not expected to be in service on or before December 31, 1981.

Further, Columbia states that the revised rates are based upon the *United* method of cost classification and rate design. The rates reflected in Columbia's July 1, 1981 filing herein were based upon the *Seaboard* formula. Columbia also states that the issue of cost classifcation and rate design on its system is a matter which should be set for hearing, with the results thereof to be made effective prospectively.

Copies of this filing were served upon the Company's jurisdicational customers, interested state commissions and to each of the parties set forth on the official service list in this proceeding.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in detemining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of Columbia's filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35548 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP81-82-001]

Columbia Gulf Transmission Co.; Proposed Changes in FERC Gas Tariff

December 8, 1981.

Take notice that Columbia Gulf Transmission Company (Columbia Gulf) on December 1, 1981 tendered for filing the following revised tariff sheets to its FERC Gas Tariff to become effective January 1, 1982:

Original Volume No. 1

Substitute Twenty-seventh Revised Sheet No. 7

Original Volume No. 2

Substitute Eighth Revised Sheet No. 72
Substitute Eighth Revised Sheet No. 73
Substitute Fifth Revised Sheet No. 92
Substitute Fifth Revised Sheet No. 93
Substitute Fifth Revised Sheet No. 126
Substitute Sixth Revised Sheet No. 145
Substitute Sixth Revised Sheet No. 146
Substitute Fifth Revised Sheet No. 263
Substitute Fourth Revised Sheet No. 320
Substitute Fourth Revised Sheet No. 337
Substitute Fourth Revised Sheet No. 386
Substitute Fourth Revised Sheet No. 387
Substitute Third Revised Sheet No. 416
Substitute Third Revised Sheet No. 417
Substitute Fourth Revised Sheet No. 440
Substitute Fourth Revised Sheet No. 484
Substitute Fourth Revised Sheet No. 493
Substitute Fourth Revised Sheet No. 567
Substitute Fourth Revised Sheet No. 596
Substitute Third Revised Sheet No. 628
Substitute Second Revised Sheet No. 663

Substitute Second Revised Sheet No. 677
Substitute Second Revised Sheet No. 702
Substitute Third Revised Sheet No. 750
Substitute Third Revised Sheet No. 820
Substitute Third Revised Sheet No. 821
Substitute Third Revised Sheet No. 848
Substitute Third Revised Sheet No. 849
Substitute Second Revised Sheet No. 937
Substitute Second Revised Sheet No. 1052
Substitute Second Revised Sheet No. 1097
Substitute Second Revised Sheet No. 1149
Substitute Second Revised Sheet No. 1150
Substitute First Revised Sheet No. 1194
Substitute First Revised Sheet No. 1195
Substitute First Revised Sheet No. 1223

Columbia Gulf states that such tariff sheets are necessary to place its rates suspended by Commission Order issued July 31, 1981 in this proceeding into effect at the end of the prescribed suspension period and to consolidate proceedings herein with proceedings in Docket No. RP81–83. The rates contained in the subject tariff sheets to give effect to (1) the elimination of all costs associated with facilities which will not be in service by December 31, 1981; and (2) to give effect to change in its Account 282—Accumulated Deferred Income Taxes resulting from Internal Revenue Service Refund pursuant to Article VI B of the Approved Stipulation and Agreement at Docket No. RP76–94 et al.

Copies of this filing were served upon all of Columbia Gulf's jurisdictional customers.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35548 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4435-001]

Damnation Peak Power Co.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 4, 1981.

Take notice that on October 28, 1981, Damnation Peak Power Company (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (FERC Project No. 4435) would be located on Damnation Creek, near the town of Newhalem, in Skagit and Whatcom Counties, Washington. Correspondence with the Applicant should be directed to: Ms. Sherri M. Lee, 2100 Electric Avenue, #326, Bellingham, Washington 98226.

Project Description—The proposed project would consist of: (1) a 4-foot high and 50-foot long diversion weir; (2) an 8,500-foot long, 30-inch diameter steel penstock; (3) a concrete powerhouse containing one generating unit rated at 4 MW; (4) a switchyard; and (5) a 0.75-mile long access road. The average annual energy is estimated to be 26 million kWh.

Purpose of Project—The power output of the project would be sold to a local utility company.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Washington Departments of Fisheries and Game are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representative.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the commission, on or before January 20, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in the project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than January 20, 1982. Application for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (b) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 20, 1982.

Filing and Service of Responsive Documents—Any filing must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, 825 North Capitol Street, N.E., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative

of the Applicant specified in the first paragraph of of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5627-000]

Energenics Systems, Inc.; Application for Preliminary Permit

December 4, 1981.

Take notice that Energenics Systems, Inc. (Applicant) filed on November 10, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5627 to be known as the Orwell Dam Project to be located at the U.S. Army Corps of Engineers' Orwell Dam and Reservoir, a flood control project, on the Otter Tail River near Fergus Falls, in Otter Tail County, Minnesota. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, Jr., President, Energenics Systems, Inc., 1727 Q Street NW., Washington, D.C. 20009.

Project Description—The proposed project would utilize an existing U.S. Army Corps of Engineers' dam and reservoir. Project No. 5627 would consist of: (1) A proposed penstock extending from the outlet works; (2) a proposed powerhouse located on the northwestern bank of the river; (3) transmission lines; and (4) appurtenant facilities. Applicant estimates the capacity of the proposed project to be approximately 2 MW, and the annual energy output to be 7 GWh.

Purpose of Project—Energy produced at the proposed project would be sold to Otter Tail Power Company.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time studies would be made to determine the engineering, environmental, and economic feasibility of the project. In addition, historic and recreational aspects of the project would be determined, along with consultation with Federal, State, and local agencies for information, comments and recommendations relevant to the project. The Applicant estimates that the cost of the studies would be $35,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 10, 1982, the competing application itself [see 18 CFR 4.30 et. seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 10, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations [see 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 10, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35551 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5464-000]

Energenics Systems, Inc.; Application for Preliminary Permit

December 8, 1981.

Take notice that Energenics Systems, Inc. (Applicant) filed on October 9, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5464 to be known as the Southside Canal Project located on the Southside Canal in Mesa County, Colorado. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, Jr., President, Energenics Systems, Inc., 1727 Q Street, N.W., Washington, D.C. 20009.

Project Description—The proposed project would utilize the Bureau of Reclamation's Southside Canal (station 195+95), and would be developed in one of two alternative modes:

(a) A power development to consist of: (1) An intake structure with trash racks; (2) a check structure; (3) a 4-foot diameter penstock, 3,400 feet long; (4) a powerhouse with an installed capacity of 3,000 kW; (5) a tailrace; (6) a transmission line about 3 miles long; and (7) other appurtenances. The estimated annual generation would average about 8,000,000 kWh. If this alternative is developed Applicant will not develop the proposed Project No. 3816 which would consist of a similar power plant at station 171+90 with a 1,000-foot long penstock, a powerhouse with an installed capacity of 2,400 kW, and an annual generation of about 6,800,000 kWh. A preliminary permit for those facilities was issued to the Applicant on August 7, 1981.

(b) A power development to consist of: (1) An intake structure with trash racks; (2) a check structure; (3) a 4-foot diameter penstock 1,000 feet long; (4) a powerhouse with an installed capacity of 700 kW; (5) a tailrace; (6) a transmission line about 3 miles long; and (7) other appurtenances. The estimated annual generation would average about 1,600,000 kWh. Project energy would be sold to Colorado-Ute Electric Association.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction.

Applicant seeks issuance of a preliminary permit for a period of 3 years during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under the permit would be $25,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 12, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et. seq. (1981)].

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 12, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or § 4.101 et. seq. (1981), as appropriate.

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than February 12, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 12, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35565 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5628-000]

Energenics Systems, Inc.; Application for Preliminary Permit

December 8, 1981.

Take notice that Energenics Systems, Inc. (Applicant) filed on November 10, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5628 to be known as the Belle Fourche Dam located on the Belle Fourche River in Butte County, South Dakota. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, Jr., President, Energenics Systems, Inc., 1727 Q Street, NW., Washington, D.C. 20009.

Project Description—The proposed project would utilize a U.S. Bureau of Reclamation dam and reservoir. Project No. 5628 would consist of: (1) A proposed powerhouse located at each outlet conduit with an estimated installed capacity of 700 kW; (2) existing 69 kV transmission lines located within 5 miles of the site; and (3) appurtenant facilities. The Applicant estimates that the average annual energy output would be 3 GWh.

Purpose of Project—Energy at the proposed project would be sold to the Black Hills Power & Light Co., WAPA, or nearby public institutions and industrial users. The project would provide a contribution to the energy needs of the Fruitdale area.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time studies would be made to determine the engineering, environmental, and economic feasibility of the project. In addition historic and recreation aspects of the project would be determined, along with consultation with Federal, State, and local agencies for information, comments and recommendations relevant to the project. The Applicant estimates that the cost of the studies would be $30,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 12, 1982, the competing application itself [see: 18 CFR 4.30 et seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 12, 1982, and should specify the type of application forthcoming. Applications for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or section 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petition To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to

intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 12, 1982.

Filing and Service of Responsive Documents—Any filing must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER81-278-000]

Florida Public Utilities Co.; Refund

December 9, 1981.

The filing Company submits the following:

Take notice that on November 30, 1981, Florida Public Utilities Company submitted for filing a refund report in accordance with the letter orders issued on May 4, 1981 and November 18, 1981.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before December 28, 1981. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35552 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 3760-001]

Franklin Industrial Complex, Inc.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

December 4, 1981.

Take notice that on April 20, 1981, the Franklin Industrial Complex, Inc., (Applicant) filed an application under section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 3760) would be located on the Winnipesaukee River in Merrimack County, New Hampshire. Corrspondence with the Applicant should be directed to: Mr. Arthur H. Steckler, President, Franklin Industrial Complex, Inc., Smith and Canal Streets, Franklin, New Hampshire 03235.

Project Description—The proposed project would consist of: (1) An existing 22-foot-high concrete gravity dam known as the Stevens Dam and designated as No. 87.07 by the New Hampshire Water Resources Board; (2) a proposed 1,100-foot-long penstock beginning at the Stevens Dam and running along the south bank between the Franklin Mills buildings. At the northeast corner of the south building the penstock would turn left and continue undergound through the Franklin Mills parking lot, then lead south under Memorial Street, then west through the municipal parking lot, and finally to (3) a proposed powerhouse with an installed capacity of 2,450 kW to be located just downstream of Dam No. 87.08; and (4) appurtenant works. The Applicant estimates that the average annual energy output would be 11,200,000 kWh.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the New Hampshire Fish and Game Department are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—This application was filed as a competing application to the Franklin Falls Project No. 3093 filed on March 20, 1980, and the Stevens Mill Dam Project No. 3454, filed on September 10, 1980, by the Franklin Electric and Power Company under 18 CFR § 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent has passed. Therefore, no further competing applications or notices of intent to file competing applications will be accepted for filing.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before January 20, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's

regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35553 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 3268-001]

Griswold Textile Print, Inc.; Application for Short-Form License (Minor)

December 4, 1981.

Take notice that Griswold Textile Print, Inc. (Applicant) filed on October 27, 1981, an application for license pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r) for construction and operation of a water power project to be known as the Griswold Textile Hydroelectric Project No. 3268. The project would be located on the Pawcatuck River in Washington County, Rhode Island and New London County, Connecticut. Correspondence with the Applicant should be directed to: Mr. James Blair, Griswold Textile Print, Inc., P.O. Box 354, Westerly, Rhode Island 02891 and Mr. Todd Cormier, Halliwell Associates, Inc., 865 Waterman Avenue, East Providence, Rhode Island 02914.

Project Description—The proposed run-of-the-river project would consist of: (1) An existing 114-foot long and 8-foot high concrete dam with new overflow gate structure at the left (east) abutment and provisions for 3-foot flashboards; (2) an existing 2,000-foot long headrace; (3) new fish ladder; (4) new intake structure with trashracks and headgates; (5) a new powerhouse containing three turbines with a total installed capacity of 495 kW; (6) electrical facilities; (7) new tailrace; and (8) other appuntenances. Applicant estimates annual generation would average 2,323,065 kWh.

Purpose of Project— Project energy would be sold to Narrangansett Electric Company.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 11, 1982, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than June 7, 1982. A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c), (*as amended* 44 FR 61328, October 25, 1979). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d), (*as amended,* 44 FR 61328, October 25, 1979).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's rules of practice and procedure, 18 CFR 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before February 11, 1982. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35554 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP75-104-024, et al.]

High Island Offshore System; Petition To Amend

December 8, 1981.

Take notice that on October 29, 1981, High Island Offshore System (Petitioner), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP75-104-024, *et al.* a petition to amend the order issued December 22, 1978, in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize the deletion of certain certificate conditions, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that by order issued December 22, 1978, Petitioner and U-T Offshore System were authorized to render interruptible overrun service conditioned on the requirement that Petitioner record supplemental charges for depreciation and concurrent credits to the accumulated provisions for depreciation for revenues related to interruptible overrun service. Petitioner states that in Docket No. RP81-18 it proposed, *inter alia,* to change its method of computing depreciation from a straight-line method to a unit-of-production method which the Commission opposed. It is asserted that the Stipulation filed concurrently herewith resolves the differences and provides for increased straight-line depreciation rates, a transportation refund obligation for revenues related to interruptible overrun service, and the deletion from the order issued December 22, 1978, of the conditions requiring crediting of revenues related to overrun service.

Petitioner requests that such deletion be effective as of the effective date of the Stipulation in Docket No. RP81-18. If the Stipulation is not approved, Petitioner requests that this petition be deemed withdrawn. Petitioner asserts that the continuation of the certificate requirement requiring crediting of revenues to the depreciation reserve is no longer appropriate once the Stipulation requiring refunding of the revenues is approved.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with

the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35567 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5633-000]

Hydro Development Group Inc.; Application for Preliminary Permit

December 8, 1981.

Take notice that Hydro Development Group Inc. (Applicant) filed on November 10, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5633 to be known at the #3 Mill Project located on the Oswegatchie River in St. Lawrence County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Mark E. Quallen, Hydro Development Group Inc., P.O. Box 58, Dexter, New York 13634.

Project Description—The proposed project would utilize existing facilities consisting of: (1) A 15-foot high and 40-foot long concrete overflow-type dam; (2) a reservoir with a surface area of about 2.5 acres and a negligible storage capacity at normal surface elevation 410 feet msl; (3) a flume; and (4) appurtenant facilities.

Applicant proposes to: (1) Repair the flume; (2) construct a powerhouse containing two generating units each rated at 500 kW and operated under an 18-foot head and at a flow of 360 cfs; and (3) construct a 0.25-mile long 2.3-kV transmission line. Applicant estimates that the average annual energy output would be 5 million kWh. Project energy would be sold to Niagara Mohawk Power Corporation.

Proposed Scope of Studies Under Permit.—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time it would perform a detailed engineering assessment and an economic analysis, examine the project's environmental impact, and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $44,500.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 12, 1982, the competing application itself [see: 18 CFR 4.30 et seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 12, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or section 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 12, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-119-000]

Idaho Power Co.; Filing

December 8, 1981.

The filing Company submits the following:

Take notice that on November 30, 1981, Idaho Power Company (Idaho), tendered for filing a Residential Purchase and Sale Agreement (Agreement) between Idaho and The Bonneville Power Administration (BPA).

The Agreement was entered into pursuant to the Pacific Northwest Electric Power Planning and Conservation Act, Pub. L. 96-501. The Agreement provides for the exchange of electric power between Idaho and BPA for the benefit of Idaho's residential and farm customers.

Idaho requests an effective date of December 2, 1981, and therefore requests waiver of the Commission's notice requirements.

A copy of the filing was served upon BPA.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. QF82-20-000]

Imotek, Inc.; Application for Commission Certification of Qualifying Status of Cogeneration Facility

December 7, 1981.

On November 18, 1981, Imotek, Inc. of San Francisco, California filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying facility pursuant to § 292.207 of the Commission's rules.

The facility will be a topping-cycle cogeneration facility located at the intersection of 20th and C Streets in Sacramento, California, adjacent to the almond processing plant of the California Almond Growers Exchange. The primary fuel will be almond shells and natural gas will be used as a standby fuel. Electric capacity of the facility will be 8.5 megawatts and between 7,500 and 22,000 lbs per hour of 110–125 psig process steam will be sold. Installation of the facility began in December, 1980.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure. All such petitions or protests must be filed on or before January 13, 1982. and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-117-000]

Iowa-Illinois Gas & Electric Co.; Filing

December 8, 1981.

The filing Company submits the following:

Take notice that Iowa-Illinois Gas and Electric Company (Applicant), 206 East Second Street, P.O. Box 4350, Davenport, Iowa, 52808, on November 27, 1981 tendered for filing pursuant to § 35.13 of the Regulations under the Federal Power Act, a proposed change in its Rate Schedule WES (applicable only to Sherrard Power System, Orion, Illinois), FERC Wholesale Electric Tariff, Original Volume No. 1. The change, proposed to be effective February 1, 1982, would increase revenues from jurisdictional sales and service by $1,747,006 based on the Period I 1980 test period.

Applicant alleges that the reason for the proposed increased revenues is because its operating income has declined to a level which provides an inadequate return. It further alleges that it is essential in the interest of preserving its financial integrity that its revenues and operating income be restored to a level to adequately meet the operating expenses necessary to provide good electric service and to attract the additional capital required.

Copies of the filing were served upon Sherrard Power System and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35537 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-118-000]

Kansas Gas & Electric Co.; Filing

December 8, 1981.

The filing Company submits the following:

Take notice that Kansas Gas and Electric Company on November 30, 1981 tendered for filing proposed changes in its FERC Electric Service Tariff No. 32.

Kansas Gas and Electric Company states that the filing is Full Requirements Service which provides electric power and accompanying energy to be supplied to The Kansas Power and Light Company in the form of firm power service.

This filing is necessary because the present contract between the Company and The Kansas Power and Light Company terminates on January 31, 1982 and both parties desire to continue essentially the same relationship in the future. This filing constitutes a vehicle whereby continuity of service can be maintained.

Copies of the filing were served upon The Kansas Power and Light Company and the Utilities Division of the Kansas Corporation Commission.

Any person desiring to be heard or to protest said Application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with Paragraph 1.8 and 1.10 of the Commission's rules and practice of procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 28, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this Application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35538 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER82-15-000 and ER81-578-000]

Maine Yankee Atomic Power Co.; Order Accepting for Filing and Suspending Proposed Decommissioning Charges, Granting Intervention and Waiver of Notice Requirements, Terminating Docket No. ER81-578-000, Requiring Amendment of Rate Schedule, and Establishing Procedures

December 7, 1981.

On October 9, 1981, Maine Yankee Atomic Power Company (Maine Yankee) submitted for filing a letter dated October 9, 1981, together with an appropriate cost study relative to the decommissioning of its 830 Megawatt nuclear station. In its filing, Maine Yankee states that, under the formulary rate contained in the current Power Contract, the company is proposing to change the new salvage value of the Maine Yankee station to reflect the estimated $57.6 million cost (in 1980 dollars) of immediate dismantlement of the station. Accordingly, the proposed charges for decommissioning costs would result in a revenue increase of approximately $1.8 million (2.0%) annually to recover the

decommissioning costs over the period remaining before expiration of the power contract in December 2002.[1] In its October 9 letter, Maine Yankee states that it intends to segregate the decomissioning funds received in a separate account to ensure availability at the time of dismantlement. Maine Yankee also requests waiver of the prior notice requirement and an effective date of November 1, 1981.

On November 2, 1981, the Maine Public Utilities Commission (MPUC) filed a notice of intervention which states that the MPUC generally supports Maine Yankee's proposed filing in the instant docket, does not seek to delay proceedings or request a hearing, but requests that Maine Yankee be directed to resubmit its October 9, 1981 letter in the form of a rate schedule supplement which details the company's proposed billing for decommissioning costs and specifically provides for segregation of decommissioning funds in a separate account. On November 2, 1981, petitions to intervene were filed by the Public Advocate of the State of Maine and by the Massachusetts Municipal Group (the Municipals).[2] The Maine Public Advocate does not dispute Maine Yankee's decommissioning cost estimates or the method used to determine such costs, but reiterates the concerns and requests of the MPUC. On November 6, 1981, a petition to intervene out of time was filed by the City of Holyoke, Massachusetts.

The Municipals contend that Maine Yankee has failed to demonstrate that its proposed increase is reasonable and adequately supported and, therefore, urge that the Commission deny the company's request for waiver and an effective date of November 1, 1981. The Municipals state that the circumstances of the filing together with the inadequacy of supporting material require a five month suspension. The Municipals argue that Maine Yankee's filing does not demonstrate that the immediate dismantlement method of decommissioning is appropriate or that the associated cost estimates are reasonable. Additionally, the Municipals note that the company has not amended its rate schedule to specifically provide for segregation of decommissioning funds, periodic review and adjustment of decommissioning costs, and a requirement that Maine Yankee make a filing under Part 35 of the regulations prior to billing any revised decommissioning estimates.

Maine Yankee filed a response to these petitions to intervene. It states that it is willing to stipulate to setting up a trust fund or other appropriate segregated account. Maine Yankee argues that Part 35 of our regulations does not require amendment of the Power Contract; it also argues that these parties' underlying concerns that subsequent, unilateral revisions by Maine Yankee to its Power Contract might escape secrutiny can be satisfied because the Commission under section 206 of the Federal Power Act may investigate rates on its own motion or at the request of another party. Maine Yankee also states that it will use its best efforts to secure the most favorable tax treatment with respect to the decommissioning funds. Finally, Maine Yankee disagrees with the Municipals' suggested rate schedule revisions and asks that the Commission deny their request for a five month suspension and accept the proposed charges effective as of November 1, 1981, without suspensión.

Discussion

The Commission finds that participation in this proceeding by the Municipals and the Maine Public Advocate is in the public interest. The Commission also finds that participation in this proceeding by the City of Holyoke, Massachusetts is in the public interest and that good cause exists to permit that customer to intervene out of time. Therefore, the petitions to intervene will be granted. The timely filed notice of intervention is sufficient to initiate the MPUC's participation in this proceeding.

In view of the matters raised by the intervenors, our analysis indicates that the company's proposed decommissioning charges may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the proposed decommissioning charges for filing and suspend them as ordered below.

In a number of suspension orders,[3] we have addressed the considerations underlying the Commission's policy regarding rate suspensions. For the reasons stated there we have concluded that rate filings should generally be suspended for the maximum period permitted by statute where preliminary study leads the Commission to believe that the filing may by unjust and unreasonable or that it might run afoul of other statutory standards. We have acknowledged, however, that shorter suspensions may be warranted in circumstances where suspension for the maximum period may lead to harsh and inequitable results.

Such circumstances have been presented here. While the matters raised by intervenors warrant further inquiry at hearing, our preliminary review suggests that the proposed decommissioning charges may not produce excessive revenues. Under these circumstances, we believe that a nominal suspension and a refund obligation will adequately protect the affected customers pending a hearing. With respect to the Municipals' request for denial of waiver to permit Maine Yankee's requested November 1, 1981 effective date, we note that, by letter dated June 5, 1981, Maine Yankee notified the Commission as well as the Maine Yankee participants of its intent to begin billing for decommissioning costs at an annual level of $1.8 million. Additionally, prior to Maine Yankee's tender of the instant filing, a meeting was held on September 22, 1981, between members of the Commission's staff and representatives of Maine Yankee concerning billing for decommissioning charges. Public notice of that meeting was issued on August 31, 1981 (60 days prior to Maine Yankee's proposed November 1, 1981 effective date) and all interested persons were invited to attend. In view of the foregoing, we believe that the intervenors have been given adequate notice of Maine Yankee's proposed rate change. Therefore, we find good cause for waiver of notice. Accordingly, we shall suspend the decommissioning charges to become effective subject to refund on November 1, 1981.

We shall, however, require Maine Yankee to submit a rate schedule amendment which specifically provides for the segregation of decommissioning funds and incorporates Maine Yankee's proposed $1.8 million annual charges. We also note that revisions in decommissioning charges will require timely filing pursuant to Part 35 of the Commission's regulations.

As noted, in Docket No. ER81-578-000, Maine Yankee notified the Commission of its intent to begin billing its sponsors for decommissioning costs. By letter dated July 18, 1981, the Commission advised Maine Yankee that the initiation of billing for decommissioning costs under the Power Contract would constitute a rate

[1] The $1.8 million invested each year for the station's remaining life of 22 years at a 3% annual compounded growth rate, estimated to be the interest realized after inflation, will yield approximately the $57.6 million anticipated to be needed for decomissioning.

[2] The Massachusetts Municipal systems take approximately 4.5% of the Maine Yankee output.

[3] *E.g., Boston Edison Co.,* Docket No. ER80-508 (August 29, 1980) (five month suspension); *Alabama Power Co.,* Docket Nos. ER80-506, *et al.* (August 29, 1980) (one day suspension); *Cleveland Electric Illuminating Company,* Docket No. ER80-488 (August 22, 1980) (one day suspension).

schedule change requiring an appropriate filing under Part 35 of the Commission's regulations. Maine Yankee filed an application for rehearing contending that it was not required to make such a filing. The fact that Maine Yankee has now made a filing under Part 35 of our regulations obviates the need to address the application for rehearing. Therefore, we shall terminate Docket No. ER81–578–000.

The Commission Orders

(A) Maine Yankee's request for waiver of the notice requirements is hereby granted for good cause shown.

(B) Maine Yankee's proposed decommissioning charges are hereby accepted for filing and are suspended to become effective on November 1, 1981, subject to refund.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I], a public hearing shall be held concerning the justness and reasonableness of Maine Yankee's proposed decommissioning charges.

(D) The petitions to intervene in this proceeding are hereby granted subject to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act: *provided, however,* that participation by such intervenors shall be limited to the matters set forth in their petitions to intervene and; *provided, further,* that the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order of the Commission in this proceeding.

(E) Maine Yankee shall submit within thirty (30) days of the issuance of this order a rate schedule amendment which specifically provides for the segregation of decommissioning funds and incorporates Maine Yankee's proposed $1.8 million annual charge.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days of the issuance of this order in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to consolidate or sever and motions to dismiss) as provided in the Commission's rules of practice and procedure.

(G) Docket No. ER81–578–000 is hereby terminated.

(H) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–35539 Filed 12–11–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP82–51–000]

Michigan Wisconsin Pipe Line Co.; Application

December 8, 1981.

Take notice that on November 2, 1981, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP82–51–000 an application pursuant to section 3 of the Natural Gas Act for authorization to import natural gas from Canada to the United States, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to import up to 100,000 Mcf of natural gas per day as well as excess gas, when desired, on a best-efforts basis for a period of ten years beginning November 1, 1982, or as soon thereafter as feasible. It is stated that Applicant has contracted to purchase such gas from TransCanada PipeLines Limited of Toronto, Ontario, Canada, (TransCanada) and that TransCanada has requested authorization from the National Energy Board of Canada to export such gas from Canada. Applicant asserts that the gas is to be delivered to TransCanada for the account of Applicant at the existing interconnection of facilities of TransCanada and Great Lakes Gas Transmission Company (Great Lakes) near Emerson, Manitoba. It is further stated that Great Lakes presently delivers gas to Applicant at existing points of interconnection between the facilities of the two companies. Applicant states that the gas would be purchased at the U.S.A.-Canada border export price.

It is asserted that the proposed importation of gas would permit prompt receipt of gas from prolific reserves at the border price which now applies to large volumes of other gas imported from Canada. Applicant states that the gas involved would be sold by Applicant under its existing service agreements and tariff.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rule.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81–35569 Filed 12–11–81; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP82–74–000]

Midwestern Gas Transmission Co.; Application

December 8, 1981.

Take notice that on November 12, 1981, Midwestern Gas Transmission Company (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP82–74–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on its Northern System and the establishment of two additional sales points related thereto for Northern States Power Company of Minnesota and Northern States Power Company of Wisconsin (Northern States), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 15,000 Mcf of natural gas per day made available at North Branch and Cambridge meter stations in Chisago County and Isanti County, Minnesota, respectively, by Northern Natural Gas Company, Division of InterNorth, Inc. (Northern) for the account of Northern States to the nine separate service areas now being served off Applicant's Northern system by Northern States. Applicant proposes to add North Branch and Cambridge as additional sales delivery points to the gas service agreement with Northern States dated November 1, 1970, and to waive the provisions of paragraph (b) of Article I in its Rate Schedule CRL–2 under which

Applicant provides natural gas service to Northern States so as to permit the continuation of service to Northern States' existing nine service area after Northern States begins receiving gas purchased from Northern in its service areas supplied by Applicant.

It is stated that in order to reduce the cost of purchased gas for Northern States' customers served off of Applicant's Northern System Northern States has made the following arrangements:

(1) Northern would transfer up to 15,000 Mcf per day of Northern States' firm entitlements under its Rate Schedule CD–1 assigned to St. Paul, Minnesota, to North Branch, and Cambridge, Minnesota, for sale to Northern States under Northern's Rate Schedule PL–1; (2) Applicant would transport and deliver the volumes transferred by Northern Natural to North Branch and Cambridge from such points to Applicant's nine existing sales delivery points to Northern States; and (3) Northern States would resell to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) volumes of gas it would purchase from Applicant which would be at least as great as the reduction in the volumes of gas Northern States would purchase from Applicant for resale to customers served by Northern States off of Applicant's system which reduction would result from the availability of gas transferred by Northern from St. Paul.

It is asserted that Northern States would pay a monthly charge for the proposed transportation service which is the product of a transportation rate of 6.04 cents per Mcf times the total of the daily transportation volumes during the month.

It is further stated that Tennessee and Northern have entered into a gas exchange agreement which provides that Northern States would purchase gas from Applicant and make said gas available to Northern at North Branch and Cambridge for Tennessee's account. Applicant adds that equivalent daily volumes would be made available to Tennessee's pipeline system by Northern in the Gulf Coast area of Southern Louisiana.

Applicant asserts that the proposed service utilizing existing facilities would enable Northern States to reduce its cost of purchased gas. Further, it is stated that the proposed service would have no adverse impact on Applicant or any of its Northern System customers and would not result in any increase in the daily volumes of gas which Northern States is entitled to purchase from Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10 and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER82–116–000]

Missouri Power & Light Co.; Filing

December 8, 1981.

Take notice that Missouri Power & Light Company (MPL) on November 23, 1981, tendered for filing a proposed Electric Service Agreement between MPL and the City of Marceline, Missouri (Marceline).

MPL states that the Agreement, approved by Bill No. 35.595, Ordinance No. 35.595 of the City of Marceline, Missouri, supersedes the Electric Service Agreement between MPL and Marceline entered into on July 24, 1973. MPL proposes that the new Agreement become effective on March 1, 1982. The new Agreement increases capacity from 7500 kilovolt amperes under the hold Agreement to 8400 kilovolt amperes. The new Agreement requires Marceline to give MPL six (6) months' advance written notice of any proposed new municipal use or resale which will result in a 1000 KW addition or more and to consult with MPL prior to such use or resale to determine that such user or resale is consistent with safe and reliable system operation. The new Agreement terminates on July 24, 1983, but is automatically renewed for successive one (1) year periods unless terminated by ninety (90) days written notice by either party to the chief executive officer of the other party. The Agreement is not terminable by either party during the first year of the term. Rates to be charged under the new Agreement will remain the same as rates presently charged under the old Agreement and do not differ from rates charged to other customers in the same class.

Copies of the filing were served upon MPL's jurisdictional customers and the Secretary of the Missouri Public Service Commission.

Any person desiring to be heard to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 24, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are open for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP82-14-000]

Mountain Fuel Resources, Inc.; Proposed Changes in FERC Gas Tariff

December 7, 1981.

Take notice that Mountain Fuel Resources, Inc. (Resources), on December 1, 1981 tendered for filing and acceptance First Revised Sheet Nos. 2 and 3, Fourth Revised Sheet No. 4 and Sixteenth Revised Sheet No. 7 of its FERC Gas Tariff, Original Volume No. 1. The changes are proposed to become effective January 1, 1982, and would increase annual jurisdictional revenues by $3,943,485, inclusive of transportation services, based on the twelve-month period ended August 31, 1981, as adjusted. Of the total amount of the increase requested, transportation revenues are proposed to be increased by $244,465 annually with the balance applicable to sales for resale.

Resources states that the principal reasons for the increased rates are as follows:

(1) Increases in operating and maintenance expenses; (2) increases in rate base and related expenses; and (3) increase in rate of return to 14.76 percent in order to compensate for higher cost of capital.

Resources states that copies of this filing were served on the Company's jurisdictional customers and affected state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 5515-000]

New England Energy Development Systems, Inc.; Application for Preliminary Permit

December 4, 1981.

Take notice that New England Energy Development Systems, Inc. (Applicant) filed on October 15, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 5515 to be known as the Mill River Project located on the Mill River in the town of Northampton, Hampshire County, Massachusetts. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Michael Pill, Staff Planner and Attorney, New England Energy Development Systems, Inc., 109 Main Street, Amherst, Massachusetts 01002.

Project Description— The proposed project would consist of five developments described as follows:

(A) The Mill One development would consist of: (1) An existing 15-foot high, 120-foot long concrete and masonry dam; (2) a 15 acre pond at elevation 135 feet m.s.l. with unknown storage capacity; (3) a new 30-foot long penstock of undetermined diameter; (4) a new powerhouse with a single 59 kW turbine-generator; and (5) appurtenant facilities. Mill One would generate up to 240,900 kWh annually.

(B) The Mill Two development would consist of: (1) An existing 15-foot high, 120-foot long concrete and masonry dam; (2) a 500-foot long reservior at elevation 235 feet m.s.l. with unknown storage capacity; (3) a new 50-foot long penstock of undetermined diameter; (4) a new powerhouse with a single 55 kW turbine-generator; and (5) appurtenant facilities. Mill Two would generate up to 240,900 kWh annually.

(C) The Mill Three development would consist of: (1) An existing dam, in two sections, joined by a rock outcrop and constructed of masonry, 80 feet long and 20 feet high on the north section and 30 feet long and 6 to 8 feet high on the south section; (2) a reservoir with unknown storage capacity at elevation 300 feet m.s.l.; (3) a new 75-foot long penstock of undetermined diameter; (4) a new powerhouse containing a single 72 kW turbine-generator; and (5) appurtenant facilities. Mill Three would generate up to 315,360 Kwh annually.

(D) The Mill Four development would consist of: (1) An existing dam, in two sections, constructed of masonry, both 80 feet long and 10 feet high, separated by an island; (2) a reservoir with unknown storage capacity at elevation 312 feet m.s.l.; (3) a new 100-foot long penstock of undetermined diameter; (4) a new powerhouse containing a single 35 kW turbine-generator; and (5) appurtenant facilities. Mill Four would generate up to 153,300 kWh annually.

(E) The Mill Five development would consist of: (1) An existing 150-foot long, 28-foot high masonry dam; (2) a reservior of unknown storage capacity at elevation 355 feet m.s.l.; (3) a new powerhouse containing a single 110 kW turbine-generator; and (4) appurtenant facilities. Mill Five would generate up to 481,800, kWh annually.

The project property is owned by Smith College, Chartpak Company, Massachusetts Electric Company, The Pro Corporation, Meadow Trust Company, Stephen B. Monsein, Gerold B. Jackson and George and Margaret Tobin.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorized construction. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be up to $25,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before February 11, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981)].

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before February 11, 1982, and should specify the type of application

forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than February 11, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before February 11, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35541 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5466-000]

City of New York; Application for Preliminary Permit

December 8, 1981.

Take notice that the City of New York (Applicant) filed on October 13, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5466 to be known as the Croton Water Supply System Water Power Project located on East Branch Croton River, Middle Branch Croton River, Cross River, Croton River, Muscoot River, and Titicus River in Cortland, North Salem, Somers and Bedford Townships, Westchester County, and Southeast and Carmel Townships, Putnam County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Francis X. McArdle, Department of Environmental Protection, City of New York, 2358 Municipal Building, New York, New York 10007.

Project Description—The proposed project would redevelop the existing Applicant-owned facilities and would consist of eight separate but hydraulically related developments:

A. The Project A Development comprising: (1) The 2,163-foot long and 297-foot high masonry gravity-type New Croton Dam having an ungated side-discharge spillway; (2) the New Croton Reservoir having a surface area of 2,259 acres at spillway crest elevation 195.5 feet msl; (3) the intake structure, Gatehouse #2, and related conduits through the dam; (4) a new powerhouse containing a new generating unit having a rated capacity of 3,100-kW; (5) the release conduit to the Croton River; (6) a new 0.5-mile long transmission line; and (7) appurtenant facilities. Applicant estimates that the average annual energy output would be 13,000 MWh.

B. The Project B Development comprising: (1) The 1,519-foot long earth-fill and masonry Titicus Dam having a 200-foot long spillway; (2) the Titicus Reservoir having a surface area of 669.4 acres at spillway crest elevation 324.5 feet msl; (3) the intake structure, two 48-inch conduits through the dam, and the gate house; (4) a new powerhouse containing a new generating unit having a rated capacity of 250-kW; (5) the release channel to the Titicus River; (6) a new 1-mile long transmission line; and (7) appurtenant facilities. Applicant estimates that the average annual energy output would be 850 MWh.

C. The Project C Development comprising: (1) The 1,270-foot long and 82-foot high earth-fill Amawalk Dam having a 50-foot long spillway; (2) the Amawalk Reservoir having a surface area of 606 acres at spillway crest elevation 399.5 feet msl; (3) the intake structure, related conduits through the dam, and the gate house; (4) a new 300-foot long penstock; (5) a new powerhouse containing a new generating unit having a rated capacity of 220-kW; (6) a new tailrace to the spillway channel to the Muscoot River; (7) a new 100-foot long transmission line; and (8) appurtenant facilities. Applicant estimates that the average annual energy output would be 730 MWh.

D. The Project D Development comprising: (1) The 1,130-foot long and 58-foot high masonry Muscoot Dam having a 950-foot long spillway; (2) the Muscoot Reservoir having a surface area of 1,166 acres at spillway crest elevation 199.5 feet msl; (3) a modified gate chamber containing a new generating unit having a rated capacity of 600-Kw; (4) a new two-mile long transmission line; and (5) appurtenant facilities. Applicant estimates that the average annual energy output would be 1,800 MWh.

E. The Project E Development comprising: (1) The 2,190-foot long and 51-foot high earth-fill Diverting Dam having a 1,000-foot long side-discharge spillway; (2) the Diverting Reservoir having a surface area of 154-acres at spillway crest elevation 309.5 feet msl; (3) a modified release chamber containing a new generating unit having a rated capacity of 100-kW; (4) the release conduit and waste channel to the East Branch Croton River; (5) a new 1-mile long transmission line; and (6) appurtenant facilities. Applicant estimates that the average annual energy output would be 670 MWh.

F. The Project F Development comprising: (1) The 1,090-foot long and 170-foot high masonry Cross River Dam having a 240-foot long side-discharge spillway; (2) the Cross River Reservoir having a surface area of 769-acres at spillway crest elevation 329.5 feet msl; (3) the gate house, related conduits through the dam, valve chamber, and the penstock; (4) a modified pumping station containing a modified turbine connected to a new generator having a rated capacity of 325-kW; (5) the tailrace to the outlet channel to the Cross River; (6) a new 1-mile long transmission line; and (7) appurtenant facilities. Applicant estimates that the average annual energy output would be 665 MWh.

G. The Project G Development comprising: (1) The 1500-foot long and 113-foot high masonry Croton Falls Dam having a 700-foot long side-discharge

spillway; (2) the Croton Falls Reservoir having a surface area of 1,062 acres at spillway crest elevation 309.4 feet msl; (3) the intake chamber, related conduits through the dam, and the penstock; (4) a modified pumping station containing a modified turbine connected to a new generator having a rated capacity of 1,650-kW; (5) the tailrace to the waste channel to the Middle Branch Croton River; (6) a new 200-foot long transmission line; and (7) appurtenant facilities. Applicant estimates that the average annual energy output would be 4,200 MWh.

H. The Project H Development comprising: (1) The 1,340-foot long and 60-foot high earth-fill Bog Brook No. 1 Dam; (2) the 1,956-foot long and 35-foot high earth-fill Bog Brook No. 2 Dam; (3) the Bog Brook Reservoir having a surface area of 399 acres at spillway crest elevation 416.5 feet msl; (4) the conduit between the Bog Brook Reservoir and the East Branch Reservoir; (5) the 1,100-foot long and 98-foot high masonry and earth-fill Sodam Dam and separate 500-foot long spillway; (6) the East Branch Reservoir having a surface area of 577-acres at spillway crest elevation 416.5 feet msl; (7) the gate house and release conduit through Sodam Dam; (8) a new powerhouse containing a new generating unit having a total rated capacity of 680-kW; (9) a new tailrace to the East Branch Croton River; (10) a new 1.5-mile long transmission line; and (11) appurtenant facilities. Applicant estimates that the average annual energy output would be 3,350 MWh.

The total installed capacity of the proposed project would be 6,925-kW. The system would continue to be operated essentially to provide water supply to the City of New York. Project energy would be used by Applicant for municipal purposes or would be sold.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would complete feasibility, engineering, and hydrologic studies, conduct field surveys, prepare environmental reports and detailed plans, consult with Federal, State, and local agencies, and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $250,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before January 12, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before January 12, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION ", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-75-000]

Northern Utilities, Inc.; Application

December 8, 1981.

Take notice that on November 9, 1981, Northern Utilities, Inc. (Applicant), P.O. Box 2800, Casper, Wyoming 82602, filed in Docket No. CP82-75-000 an application pursuant to section 311 of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's regulations authorizing Applicant to transport natural gas for Montana-Dakota Utilities Co., Inc. (MDU), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to the terms of a gas transportation agreement dated June 12, 1978, as amended on April 11, 1980, it would transport up to 25 trillion Btu of natural gas or 6 billion Btu of natural gas per day purchased by MDU which gas is produced in the area of the Powell II Unit in Converse County, Wyoming, and transported by MDU from the area of production to a point near Midwest, Natrona County, Wyoming, where it is delivered to Applicant. It is further stated that Applicant would transport the gas from a point near Midwest, Wyoming, to a point near Billy Creek, Johnson County, Wyoming, and certain intermediate points. Applicant states that the proposed transportation service would be for a primary term ending January 7, 1996, and from year to year thereafter.

Applicant proposes to charge MDU 22.0 cents per Mcf for transporting the gas. Applicant asserts that this rate is fair and equitable within the meaning of § 284.123(b)(1)(ii) of the Commission's regulations.

The proposal would allow Applicant to take delivery of the subject gas without having to construct additional facilities, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA82-4-000]

Owens-Corning Fiberglas Corp.; Application for Adjustment and Request for Interim Relief

December 7, 1981.

Take notice that on November 18, 1981, Owens-Corning Fiberglas Corporation (Owens-Corning), Fiberglas Tower-Arcade, Toledo, Ohio 43659 filed an application with the Federal Energy Regulatory Commission (Commission) for adjustment under section 502(c) of the Natural Gas Policy Act of 1978 and for interim relief pursuant to § 1.41(m) of the Commission's rules of practice and procedure, in which Owens-Corning seeks relief from § 282.203(b) of the Commission's regulations for its Jacksonville, Florida fiberglas mat facility.

Owens-Corning states that prior to August, 1981 it used natural gas as boiler fuel in connection with its felt mill operation at the Jacksonville facility. In August, 1981, Owens-Corning substituted fiberglas in place of felt which resulted in a permanent reduction of natural gas as boiler fuel to levels below an average of 300 Mcf per day. Owens-Corning states that its seeks an adjustment because its past pattern of gas usage is unrepresentative of its current and future requirements and that with the change in operating conditions its boiler fuel usage of natural gas will not exceed an average of 300 Mcf per day in the future.

The procedures aplicable to the conduct of this adjustment proceeding are found in section 1.41 of the Commission's rules of practice and procedure, Order No. 24 issued March 22, 1979.

Any person desiring to participate in the adjustment proceeding shall file a petition to intervene in accordance with the provisions of § 1.41. All petitions to intervene must be filed by December 29, 1981.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35542 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5536-000]

Pacific Gas and Electric Co.; Application for Transmission Line License

December 8, 1981.

Take notice that on September 24, 1981, Pacific Gas and Electric Company (PG&E) filed an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] to construct, operate, and maintain two transmission lines to be known as Pardee Tap No. 2 and Camanche Tap, FERC No. 5536 which would connect East Bay Municipal Utility District's (EBMUD) Lower Mokelumne River Project (FERC No. 2916) to PG&E's transmission system. The project would be located in Calaveras, Amador, and San Joaquin Counties, California. Correspondence with the Applicant on this matter should be addressed to: Mr. W. M. Gallavan, Vice President, Rates and Valuation, Pacific Gas and Electric Company, 77 Beale Street, Room 1087 A, San Francisco, California 94106, with a copy to Mr. Louis E. Vincent, Attorney, Pacific Gas and Electric Company, Law Department, P.O. Box 7442, San Francisco, California 94106.

Project Description—The proposed project would consist of: (1) An existing 600-foot long, single circuit, 60-kV tap line known as Pardee Tap No. 2, extending from EBMUD's Pardee Powerhouse to PG&E's Pardee switches; and (2) a new 6.74-mile long, single circuit, 115-kV transmission line, to be known as Camanche Tap, extending from EBMUD's Camanche Powerhouse to PG&E's Halsey Junction-Newark 115-kV Tower Line.

Purpose of Project—The transmission lines would transmit power from the proposed Lower Mokelumne River Project No. 2916 to PG&E's system.

Estimated Cost—The cost of the project is estimated, by the Applicant, to be about $587,000.

Agency Comments—Federal, State and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88-29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before February 12, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before February 12, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35572 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-115-000]

Pacific Power & Light Co.; Filing

December 7, 1981.

The filing Company submits the following:

Take Notice that Pacific Power & Light Company (Pacific) on November 24, 1981, tendered for filing, in accordance with Section 35.12 of the Commission's Regulations, individual Letter Agreements between Pacific and the following Purchasers: Pacific Gas and Electric Company, San Diego Gas & Electric Company.

These Letter Agreements provide for the sale of firm electric capacity and energy by Pacific to the Purchasers.

Pacific requests waiver of the Commission's notice requirements to permit this rate schedule to become effective on September 1, 1981.

Copies of the filing were supplied to the Purchasers.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet, N.E., Washington D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 24, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35543 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-65-000]

Panhandle Eastern Pipe Line Co.; Application

December 8, 1981.

Take notice that on November 10, 1981, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP82-65-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the implementation of certain transportation and exchange agreements between Applicant and MIGC, Inc., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it entered into gas transportation and exchange agreements with MIGC on February 27, 1981, which include a gas transportation and exchange agreement for the Powder River Basin, Wyoming (Powder River Basin Agreement), and a gas transportation and exchange agreement for areas other than the Powder River Basin (System-Wide Agreement).

It is stated that the Powder River Basin Agreement provides that if either Applicant or MIGC acquires gas supplies in the Powder River Basin, Wyoming, the other pipeline would upon request connect its facilities to such gas pipeline for the purpose of transport and delivery. It is further stated that the agreement provides for a maximum daily delivery volume of 5,000 Mcf with reimbursement of connection costs and payment of a transportation charge of 5.56 per Mcf. The System-Wide Agreement, it is asserted, provides that Applicant and MIGC would accept and redeliver gas supplies acquired by the other pipeline in other areas as well. It is further stated that the agreement provides for a maximum daily delivery volume of 20,000 Mcf with reimbursement of any gathering costs and payment of a transportation charge based on then-effective jurisdictional transportation rates reflecting system-wide costs excluding costs associated with gathering and storage systems and gas used in transmission.

Applicant requests authorization to add and delete points of receipt and delivery as may be required from time to time.

Applicant asserts that the subject proposal would allow it and MIGC to add new sources of natural gas supply to existing pipeline systems without costly additions or duplication of facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Rescission of Final Well Category Determination by Jurisdictional Agency; State of West Virginia

December 8, 1981.

In the matter of State of West Virginia NGPA section 103 Determination Patrick Petroleum Corporation Jacob Daugherty No. 1 Well JD No. 81-27387 State No. 800417-103-001-0724.

On April 28, 1981, the State of West Virginia Department of Mines, Oil and Gas Division (West Virginia) filed with the Commission a notice of determination pursuant to section 502 of the Natural Gas Policy Act of 1978 (NGPA) that the Patrick Petroleum Corporation's Jacob Daugherty No. 1 Well qualifies as a new onshore production well under section 103(c) of the NGPA. The Commission issued notice of the determination on May 13, 1981 (46 FR 27528, May 20, 1981). The determination became final on June 12, 1981, pursuant to § 275.202(a) of the Commission's regulations.

West Virginia's determination was based on Patrick Petroleum Corporation's application which contained a well completion report indicating that the surface drilling of the subject well was commenced on September 18, 1978. The well completion report also stated that the subject well was completed for production on September 22, 1978 in the Riley Formation from 4,066 to 4,071 feet in depth. In order for a well to qualify as a new onshore production well under section 103 of the NGPA, the surface drilling of the well must have commenced on or after February 19, 1977. See NGPA section 103(c)(1).

On September 18, 1981, the Commission received notification from West Virginia that a review of records indicated that surface drilling of the subject well began on July 20, 1975, and that the well was completed for production on July 30, 1975, in the Gantz Formation, at depths of 1,504 to 1,590 feet. Accordingly, West Virginia held a hearing at which it determined that the subject well does not qualify as a new onshore production well under section

103. West Virginia issued an order rescinding its previous order and rejecting the application.

Notice is hereby given of West Virginia's rescission of its prior affirmative determination for the subject well, and of its rejection of the application covering the subject well.

With respect to the question of refunds arising out of West Virginia's rescission of the subject final well category determination, notice is hereby given that the question of whether refunds, plus interest computed under 18 CFR 154.102(d), will be required is a matter subject to the review and final decision of the Commission.

Any person desiring to be heard or to make any protest to this action should on or before December 28, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determing the appropriate action to be taken but will not serve to make the protestants parties to the proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP77-302]

Sea Robin Pipeline Co.; Vermilion Block 22 System; Filing of Revised Tariff Sheets

December 8, 1981.

Take notice that on November 30, 1981, Sea Robin Pipeline Company (Sea Robin) tendered for filing as a part of its FERC Gas Tariff, Original Volume No. 2, Twelfth Revised Sheet Nos. 127–D and 135–C to become effective January 1, 1982. These revised tariff sheets reflect Sea Robin's cost of gas delivered at Pecan Island, Louisiana, for the six (6) month period beginning January 1, 1982, and are being filed 30 days prior to the effective date pursuant to Section 4 of Sea Robin's Tariff.

Copies of the revised tariff sheets and supporting data are mailed to Sea Robin's jurisdictional customers and interested State Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. TA82-1-6-000]

Sea Robin Pipeline Co.; Filing of Revised Tariff Sheets

December 8, 1981.

Take Notice that on November 30, 1981, Sea Robin Pipeline Company (Sea Robin) tendered for filing Twenty Eighth Revised Sheet No. 4 to its FERC Gas Tariff, Original Volume No. 1. This tariff sheet and supporting information is being filed 30 days prior to the proposed effective date of January 1, 1982 pursuant to the Purchased Gas Cost Adjustment provisions set out in sections 1 and 3 of Sea Robin's tariff. In addition, Sea Robin submits Ninth Revised Sheet No. 4–A to become effective January 1, 1982, in compliance with Federal Energy Regulatory Commission (Commission) orders issued May 11, 1978, and July 12, 1978, at Docket No. RP77–6.

Sea Robin states that these revised tariff sheets and supporting data are being mailed to Sea Robin's jurisdictional customers and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35558 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5609-000]

Town of Skykomish, Wash.; Application for Preliminary Permit

December 4, 1981.

Take notice that the Town of Skykomish, Washington (Applicant) filed on November 5, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 5609 to be known as the Silver Creek Hydropower Project located on Silver Creek, near Skykomish, within the lands of Mt. Baker—Snoqualmie National Forest in Snohomish County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Roy Gale, Mayor, Town of Skykomish, P.O. Box 308, Skykomish, Washington 98288.

Project Description—The project would consist of: (1) A 5-foot high, 100-foot long concrete diversion structure; (2) a 2.7-mile long, 60-inch diameter conduit; (3) a 2,000-foot long, 42-inch diameter penstock; (4) a powerhouse with total installed capacity of 4,100 kW; and (5) a 7-mile long, 69-kV transmission line from the powerhouse to an existing BPA transmission line. The Applicant estimates that the average annual energy production would be 26.0 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months during which time it would conduct technical, environmental, and economic analysis; and prepare an FERC license application. No new roads would be required for conducting these studies. The Applicant estimates that the cost of undertaking the studies would be $100,000.

Competing Applications—This application was filed as a competing application to the Mineral Butte Power Project No. 5341 filed on September 8, 1981, by Western Power Inc., under 18 CFR 4.33 (1980). Public notice of the filing of the initial application has already been given and the due date for filing competing applications or notices of intent is December 16, 1981. Anyone desiring to file a competing application

must submit to the Commission, on or before December 16, 1981, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c).

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 6, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA82-1-7-000 (PGA82-1)]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 7, 1981.

Take notice that Southern Natural Gas Company (Southern), on December 1, 1981, tendered for filing proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 1, to become effective January 1, 1982. Such filing is pursuant to section 17 (Purchased Gas Adjustment) of the General Terms and Conditions of Southern's FERC Gas Tariff, Sixth Revised Volume No. 1. The proposed changes would increase Southern's rates as a result of the following items.

(1) A Current Adjustment pursuant to § 17.3 of the General Terms and Conditions of Southern's Tariff, reflecting an annual increase in cost of purchased gas to jurisdictional customers of $5.1 million or approximately 0.952¢ per Mcf.

(2) A Surcharge Adjustment, pursuant to § 17.4 of the General Terms and Conditions of Southern's Tariff, for Unrecovered Purchased Gas Costs of 7.989¢ per Mcf which is an increase of 13.404¢ from the present negative Surcharge Adjustment. This Surcharge Adjustment will amortize the $22.3 million balance in the Deferred Account over the estimated sales for the six-month period commencing January 1, 1982.

(3) A Surcharge Adjustment for estimated Demand Charge Credits pursuant to Section 9.6(3) of the General Terms and Conditions of Southern's Tariff of (.102¢) per Mcf which is an increase of .325¢ from the present Surcharge Adjustment.

(4) A GRI Surcharge Adjustment of .720¢ per Mcf approved by FERC order dated September 28, 1981, Opinion 131 (Docket No. RP81-72), which is an increase of .160¢ above the present GRI Surcharge Adjustment.

(5) Pursuant to § 282.602(a)(1)(ii) of the Regulations under the Natural Gas Policy Act of 1978, Southern is also filing Fourth Revised Sheet No. 45R with a proposed effective date of January 1, 1982. Such tariff sheet reflects Southern's projected incremental pricing surcharge for each of the six months during the rate collection period aggregating a total for the six month period of $74,334.

Copies of the filing are being served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-86-000]

Southern Natural Gas Co.; Application

December 8, 1981.

Take notice that on November 13, 1981, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP82-86-000 an application pursuant to section 311(a)(1) of the Natural Gas Policy Act of 1978 (NGPA) and § 284.107 of the Commission's regulations for approval of a transportation service to be rendered by Applicant on behalf of Sugar Bowl Gas Corporation (Sugar Bowl), an intrastate pipeline company in the state of Louisiana, for a fixed period in excess of two years, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that on October 16, 1981, it entered into a gas transportation agreement with Sugar Bowl under which Sugar Bowl would deliver or cause to be delivered a maximum daily transportation quantity of 1.8 billion Btu of gas to Applicant at an existing point of interconnection between Trunkline Gas Company's pipeline facilities and Applicant's 24-inch North Main Second Loop line near mile post 30.212 on Applicant's line in West Carroll Parish, Louisiana. Applicant further states that pursuant to such agreement it would transport such gas on an interruptible basis and redeliver a thermally equivalent quantity of gas for Sugar Bowl's account at an existing point of interconnection between Applicant's pipeline facilities near its Toca Compressor Station, St. Bernard Parish, Louisiana, and the facilities of Union Texas Petroleum Corporation (Union Texas) at the inlet side of its Toca Plant. It is asserted that such transportation

agreement is for a primary term of five years from the date of initial deliveries.

It is submitted that Sugar Bowl has entered into a gas sales agreement with Union Texas pursuant to which Sugar Bowl would provide Union Texas with a supply of natural gas to be used as fuel gas to fractionate liquids available at Union Texas' natural gas processing plant and fractionator in St. Bernard Parish, Louisiana. It is further submitted that Sugar Bowl's pipeline system is not connected to Union Texas's Toca Plant and in order to effectuate its sale to Union Texas Sugar Bowl has requested Applicant to transport its sales gas to the Toca Plant.

For such transportation service, Applicant states Sugar Bowl would pay Applicant a transportation rate of 28.0 cents per million Btu of gas transported and delivered for its account.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP82-12-000]

Tennessee Gas Pipeline Co.; Filing of Changes in Rates

December 8, 1981.

Take notice that on November 30, 1981, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), tendered for filing changes in its FERC Gas Tariff to be effective January 1, 1982, consisting of the following revised tariff sheets:

Original Volume No. 1

First Revised Sheet No. 226
Second Revised Sheet No. 225
Substitute Third Revised Sheet No. 21
Substitute Fourth Revised Sheets Nos. 20 and 22
A Sheet Reserving Original Sheet Nos. 227 through 325 for Future Use

Original Volume No. 2

First Revised Sheet Nos. 299QQ4, 299QQ5, and 299RR5, Second Revised Sheet Nos. 267L, 277B, 286E, 297D, 297E, 299V6, 299W5, 299X6, 299Y6, 299EE6, 286E, 299FF5, 299GG7, 299MM5, 299NN4, 299OO5, and 322D; Third Revised Nos. 266J, 267K, 268C, 287E, 288D, 289E, 290E, 291E, 292E, 299L9, 299M6, 299N5, 299Q5, 299R5, 299S9, and 299S10; Fourth Revised Nos. 266I, and 274E; Sixth Revised Sheet No. 141A; Seventh Revised Nos. 249H, and 249I; Eighth Revised Sheet No. 245D; Ninth Revised Sheet Nos. 76, and 215; Tenth Revised Sheet Nos. 53, 54 and 77; Eleventh Revised Sheet No. 141; Thirteenth Revised Sheet Nos. 11 and 12.

The changes would increase revenues from jurisdictional sales and services by $122,284,595 based on a test period consisting of the twelve months ended August 31, 1981, adjusted for known and measurable changes through May 31, 1982.

Tennessee states that the increased rates are required to reflect an increase in rate of return and related income taxes, increased plant and related expenses, and increases in the cost of materials, supplies, wages, taxes, prepayments to producers and the transportation of gas by others.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35560 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-72-000]

Tennessee Gas Pipeline Co., and National Fuel Gas Supply Corp.; Application

December 8, 1981.

Take notice that on November 12, 1981, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, and National Fuel Gas Supply Corporation (Supply), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP82-72-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Natural Fuel Gas Distribution Corporation (Distribution), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants request authorization to transport natural gas for the account of Distribution up to a maximum annual volume of 75,000 Mcf of natural gas at daily volumes of up to 15,000 Mcf pursuant to a precedent agreement dated August 25, 1981. Supply proposes to make volumes available to Tennessee at the existing interconnection between the facilities of Supply and Tennessee at Tennessee's existing East Aurora Sales Meter Station delivery point in New York. Tennessee proposes to receive such volumes from Supply and transport equivalent volumes, less fuel and use volumes, to Honeoye Storage Corporation (Honeoye) for the account of Distribution at the existing interconnection of Tennessee's and Honeoye's pipelines in Ontario County, New York.

Applicants state that Distribution would pay Tennessee a volume charge each month equal to 3.48 cents per Mcf transported with provision for a minimum annual bill. It is further stated that Distribution would also provide to Tennessee volumes of natural gas equal to 1.21 percent of the volumes received for transportation as a supplement to Tennessee's system gas supply for its system fuel and use requirements.

It is asserted that the arrangements between Supply and Distribution relative to this proposed transportation service are set forth in a letter agreement dated August 18, 1981. It is explained that Supply would charge Distribution in accordance with its Rate Schedule T-1 which charge is presently 15.68 cents per Mcf. In addition, it is stated that Supply would keep 2.0 percent of the total volumes delivered for shrinkage.

Applicants maintain that the ability to render presently authorized services to their customers would not be affected by this proposal. Such service, it is submitted, would enable Distribution to deliver gas to Honeoye for storage.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy

Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestant parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-56-000]

Transcontinental Gas Pipe Line Corp.; Application

December 8, 1981.

Take notice that on November 4, 1981, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP82-56-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline and appurtenant facilities in the Brazos Area, offshore Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 0.43 mile of 16-inch pipeline which would connect the existing "A" production platform in Block 578, Brazos Area, offshore Texas, to a subsea connection in that block with a 24-inch pipeline of Applicant and Columbia Gulf Transmission Company. Applicant also proposes to construct metering, regulating and other appurtenant facilities on the production platform. Applicant states that the proposed facilities would have a maximum capability to transport up to 150,000 Mcf of gas per day.

It is stated that such facilities would have a maximum capability of 150,000 Mcf per day and are estimated to cost $3,604,080 which would be financed initially through short-term loans and available cash with permanent financing to be undertaken at a later date.

It is submitted that the facilities proposed herein are required to attach new gas supplies that would be available to Applicant commencing in the spring of 1982 from Brazos 578.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 5, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA82-1-11-000]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

December 8, 1981.

Take notice that on November 30, 1981, United Gas Pipe Line Company (United) tendered for filing Fifty-Fifth Revised Sheet No. 4 and Fourth Revised Sheet Nos. 4-A, 4-B, and 4C to its FERC Gas Tariff, First Revised Volume No. 1. These tariff sheets and supporting information are being filed pursuant to the Purchase Gas Adjustment Provisions set out in Sections 19, 22 and 23 of United's tariff.

United states that the current adjustment reflects rates payable to United's suppliers for the six (6) months commencing January 1, 1982.

Fourth Revised Sheet Nos. 4-A and 4-B are being filed to reflect the estimated incremental pricing surcharges as required by Commission Order No. 49, issued September 28, 1979.

Copies of the proposed tariff sheets will be mailed to United's customers and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 17, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EC82-5-000]

Virginia Electric & Power Co.; Filing

December 9, 1981.

The filing Company submits the following:

Take notice that on November 30, 1981, Virginia Electric and Power Company (VEPCO) submitted an application for authorization to enter into an exchange of ownership with Monongahela Power Company (Monongahela) and Potomac Edison Company (Potomac Edison) of some of the existing transmission facilities between Mount Storm (near Mt. Storm, West Virginia) and Pruntytown (near Fairmont, West Virginia) substations, Mount Storm and Valley (near Harrisonburg, Virginia) substations and Mount Storm and Morrisville (near Warrenton, Virginia) substations and at Mount Storm and Valley substations. No new transmission facilities are proposed to be constructed pursuant to the agreement to exchange facilities. No consideration will be paid. This is an exchange of equal megawatts of capacity in the affected facilities. The exchange will not affect interconnections among VEPCO, Monongahela and Potomac Edison.

The purpose of the exchange transaction is to provide a direct electrical path over facilities owned by Potomac Edison and Monongahela between the Bath County Project and the operating territory of the Allegheny Power System. VEPCO requests approval of its application pursuant to section 203 of the Federal Power Act.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before January 5, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. QF82-22-000]

Richard C. Walker; Application for Commission Certification of Qualifying Status of Small Power Production Facility

December 7, 1981.

On November 17, 1981, Richard C. Walker of Cambridge, Iowa, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility is a wind generating system located in Cambridge, Iowa. The rated capacity of the facility is 10 kilowatts. No electric utility, electric utility holding company or any combination therof has an ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-53-000]

Wisconsin Natural Gas Co.; Application

December 8, 1981.

Take notice that on November 3, 1981, Wisconsin Natural Gas Company (Applicant), 233 Lake Avenue, Racine, Wisconsin 53403, filed in Docket No. CP82-53-000 an application pursuant to section 7(c) of the Natural Gas Act and § 284.222 of the Commission Regulations for a certificate of public convenience and necessity for blanket authorization to sell, transport or assign natural gas which is surplus to its present needs, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has contract demand volumes and available gas volumes temporarily in excess of its system requirements due to the depressed economic situation involving the principal industries it serves and the availability of surplus gas from its pipeline supplier, Michigan Wisconsin Pipe Line Company. Therefore, Applicant requests blanket authority to permit it to sell up to 2,400,000 dekatherms (dt) equivalent of gas per year for the next two years. Applicant asserts this would reduce the cost burdens on its customers associated with the reduced demand for gas sales which otherwise might be borne by its customers.

Applicant proposes a sales rate of $3.919 per dt equivalent subject to upward adjustment based upon changes in Applicant's system cost of gas. It is stated that this rate is based upon the current rate as approved by the Public Service Commission of Wisconsin for Applicant's sales to interruptible industrial customers on its system. Applicant requests authority to modify its rate from time to time to reflect rate changes approved by the Public Service Comission of Wisconsin and, further, requests that its rate as computed from time to time by its proposed methodology be deemed to constitute the maximum price so that Applicant may change such price in any individual transaction under the requested blanket certificate without further Commission action. Additionally, Applicant requests that the Commission disclaim jurisdiction over any activities of Applicant except for the sales made pursuant to the requested authorization.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10 and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by

Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2426-007]

State California Department of Water Resources; Application for Amendment of License

December 4, 1981.

Take notice that on July 24, 1981, the State of California Department of Water Resources (Licensee) filed an application for amendment of its existing license for the California Aqueduct Project No. 2426, to add Mojave Siphon powerplant in San Bernardino County, California. Correspondence with the Licensee should be directed to: Mr. Ronald B. Robie, Director, Department of Water Resources, P.O. Box 388, Sacramento, California 95802.

Licensee seeks authorization to construct, operate, and maintain: (1) a 650-foot long, 11-foot diameter penstock connecting the existing Mojave Siphon inlet structure with; (2) a powerhouse with a total installed capacity of 7.2 MW; (3) an 11-foot diameter pipeline and a 17-foot diameter tunnel carrying the powerplant tailrace to Silverwood Lake; and (4) a 33-kV, 0.5 mile long transmission line connecting adjacent to the powerhouse to an existing Southern California Edison Company's transmission line.

The estimated annual energy of 47 million kWh generated by the proposed powerplant would be added to the energy generated at the other powerplants of the Licensee. The Licensee estimates the cost of the proposed action to be $30,374,780.

Comment, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 21, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", OR "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-35584 Filed 12-11-81; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4412-001]

Thornton Lake Resource Co.; Application For Exemption For Small Hydroelectric Power Project Under 5 MW Capacity

December 4, 1981.

Take notice that on October 21, 1981, Thornton Lake Resource Company (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (FERC Project No. 4412) would be located on Thornton Creek, near the town of Newhalem, in Whatcom County, Washington. Correspondence with the Applicant should be directed to: Ms. Sherri M. Lee, 2100 Electric Avenue, #326, Bellingham, Washington 98226.

Project Description—The proposed project would consist of: 1) a 4-foot high and 50-foot long diversion weir; 2) a 9,000-foot long, 30-inch diameter steel penstock; 3) a concrete powerhouse containing one generating unit rated at 4 MW; 4) a tailrace; 5) a switchyard; and 6) a 2-mile long access road.

Purpose of Project—The average annual energy generation of 26 million kWh would be sold to a local utility.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Washington Departments of Fisheries and Game are requested, for the purposes set forth in section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before January 20, 1982, either the competing license application that proposed to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than January 20, 1982. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the

requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before January 20, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, 825 North Capitol Street, N.E., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

OTHER PURCHASERS

8205563 FITCHBURG GAS & ELECTRIC CO

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 29, 1981.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New resrevoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 29, 1981.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
- 102–2: New well (2.5 mile rule)
- 102–3: New well (1000 ft rule)
- 102–4: New onshore reservoir
- 102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
- 107–GB: Geopressured brine
- 107–CS: Coal seams
- 107–DV: Devonian shale
- 107–PE: Production enchancement
- 107–TF: New tight formation
- 107–RT: Recompletion tight formation

Section 108: Stripper well
- 108–SA: Seasonally affected
- 108–ER: Enhanced recovery
- 108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275. 203 and 275.204, file a protest with the Commission on or before December 29, 1981.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS Lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 29, 1981.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservior
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

[Volume 554]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: December 7, 1981.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission on or before December 29, 1981.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–51365; TSH FRL 2005–3]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of five PMNs and provides a summary of each.

DATES: Written comments by: PMN 81–617, 81–618, 81–619 and 81–620—February 1, 1982. PMN 81–621—February 2, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS–51365]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M St., SW., Washington, D.C. 20460 (202–755–5687).

FOR FURTHER INFORMATION CONTACT: David Dull, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M St., SW., Washington, D.C. 20460 (202–426–2601).

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on the PMNs received by EPA:

PMN 81–617

Close of Review Period. March 3, 1982.

Manufacturer's Identity. Claimed confidential business information.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Substituted benzene sulfonic acid derivative.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a site-limited intermediate.

PRODUCTION ESTIMATES

	Kilograms per year (maximum)
1st year	3,000
2d year	4,000
3d year	5,000

Physical/Chemical Properties

Melting point—36–37° C.
Solubility: water—0.1–1.0%.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that during manufacture and use up to 10 workers may experience dermal exposure up to 1 hr/day, up to 2 days/yr during manual transfer operations.

Environmental Release/Disposal. The manufacturer states that release to the environment will be negligible. Disposal is by incineration and biological treatment system.

PMN 81–618

Close of Review Period. March 3, 1982.

Manufacturer's Identity. Claimed confidential business information.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Trisubstitutedcellulose.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a site-limited intermediate.

PRODUCTION ESTIMATES

	Kilograms per year (maximum)
1st year	200
2d year	200
3d year	200

Physical/Chemical Properties

Solubility: water—<0.1%; octanol—<0.1%.

Decomposition temperature—Above 200° C.

Intrinsic viscosity—0.98.

Toxicity Data

Acute oral toxicity LD_{50} (rat)—>3,000 mg/kg.

Acute dermal toxicity LD_{50} (rat)—>1,000 mg/kg.

Skin irritation (rabbit)—Slight.

Eye irritation (rabbit)—Slight.

Exposure. The manufacturer states that during manufacture and use up to 10 workers may experience dermal and inhalation exposure up to 0.5 hr/day, up to 10 days/yr during manual transfer operations.

Environmental Release/Disposal. The manufacturer states that release to the environment will be negligible. Disposal is by incineration and biological treatment system.

PMN 81–619

Close of Review Period. March 3, 1982.

Manufacturer's Identity. Claimed confidential business information.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Trisubstitutedcellulose salt.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a minor constituent of an article for commercial use.

BILLING CODE 6717–01–C

PRODUCTION ESTIMATES

	Kilograms per year (maximum)
1st year	250
2d year	250
3d year	250

Physical/Chemical Properties. No data were submitted.

Toxicity Data

Acute oral toxicity LD_{50} (rat)—>3,000 mg/kg.

Acute dermal toxicity LD_{50} (rat)—>20 ml/kg.

Skin irritation (rabbit)—Slight.

Eye irritation (rabbit)—Not an irritant.

Exposure. The manufacturer states that during manufacture and use up to 10 workers may experience dermal exposure up to 0.5 hr/day, up to 5 days/yr during manual transfer operations.

Environmental Release/Disposal. The manufacturer states that release to the environment will be negligible. Disposal is by incineration and biological treatment system.

PMN 81-620

Close of Review Period. March 3, 1982.

Manufacturer's Identity. Dow Corning Corporation, P.O. Box 1592, S. Saginaw Road, Midland, MI 48640.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Silicon substituted organic amine.

Use. Claimed confidential business information. Generic use information provided: The manufacturer states that the PMN substance will be used as a chemical intermediate.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties

Appearance—Liquid.

Specific gravity—0.97.

Flash point, closed cup—260° F.

Viscosity—11 cs.

Color—Water white to amber.

Toxicity Data

Acute oral toxicity LD_{50} (rat)—653 mg/kg.

Acute dermal toxicity LD_{50} (rabbit)—>2,000 mg/kg.

Acute skin irritation (rabbit)—Severely irritating.

Eye irritation (rabbit)—Very slightly irritating.

Ames salmonella—Non-mutagenic.

Exposure. The manufacturer states that during manufacture and processing a maximum of 1 worker may experience exposure during the drumming off process.

Environmental Release/Disposal. The manufacturer states that there will be no release to the environment.

PMN 81-621

Close of Review Period. March 4, 1982.

Manufacturer's Identity. Claimed confidential business information. Organization information provided:

Annual sales—Between $100 million and $499,999,999.

Manufacturing site—Northeastern region.

Standard Industrial Classification Code—285.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Polyester of propanediol, adipic acid, phthalic anhydride, aromatic aliphatic ester.

Use. The manufacturer states that the PMN substance will be used as an industrial resin for industrial paints.

PRODUCTION ESTIMATES

	Kilograms per year	
	Minimum	Maximum
1st year	6,000	150,000
2nd year	25,000	300,000
3rd year	25,000	300,000

Physical/Chemical Properties

Viscosity—80,000-300,000 cps

Solubility: water (24 hr. extraction)—1.97%.

Acid value—5-15.

% solvent—Zero.

Vapor pressure @ 169° F—55.4 mm Hg.

184° F—63.4 mm Hg.

204° F—73.4 mm Hg.

249° F—103.4 mm Hg.

287° F—137.4 mm Hg.

322° F—169.4 mm Hg.

Weight/gallon—10.2 lbs.

Toxicity Data. No data were submitted.

Exposure. The manufacturer states that during manufacture and processing a total of 23 workers may experience dermal exposure up to 8 hrs/day, up to 200 days/yr during sample removal, filling, and cleaning.

Environmental Release/Disposal. The manufacturer states that less than 10 kg/yr will be released to air and water and 100-10,000 kg/yr to land. Disposal is to a publicly owned treatment works (POTW), an approved landfill and incineration.

Dated: December 17, 1981.

Woodson W. Bercaw,

Acting Director, Management Support Division.

[Docket No. 81-73]

Arthur J. Fritz & Co., Inc. v. U.S. Atlantic & Gulf/Ecuador Freight Conference and U.S. Florida/Ecuador Steamship Conference, et al.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Arthur J. Fritz & Co., Inc. against U.S. Atlantic & Gulf/Ecuador Freight Conference and U.S. Florida/Ecuador Steamship Conference, et al. was served December 3, 1981. Complainant alleges that respondents have established tariff rule freight payment and credit provisions which are violative of sections 15, 16 First and 17 of the Shipping Act, 1916.

This proceeding has been assigned to Administrative Law Judge John E. Cograve. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

[FR Doc. 81-35625 Filed 12-11-81; 8:45 am]

BILLING CODE 6730-01-M

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., Room 10327; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before January 4, 1982. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. T–2206.

Filing party: Winston F. Tyler, Chairman, Law and Legislation Committee, Port of Los Angeles, P.O. Box 151, San Pedro, California 90733.

Summary: Agreement No. T–2206, between the members of the California Association of Port Authorities (FMC Agreement No. 7345) and the members of the Northwest Marine Terminal Association (FMC Agreement No. 9335), provides for the formation of an organization known as the Joint Pacific Coast Port Committee, whereby members discuss and make recommendations concerning rates, charges, practices, and other tariff matters and matters of concern to the marine terminal industry. Actions taken pursuant to the agreement are not binding upon the members. The agreement was originally approved by the Commission by order issued January 15, 1969 for a three-year term and subsequently extended for two successive five-year terms by Commission orders of January 13, 1972 and January 18, 1977. The parties to the agreement have now requested Commission approval of an extension of the agreement to January 18, 1987

Agreement No. T–3425–1.

Filing party: Mr. H. H. Wittren, Associate Director of Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Summary: Agreement No. T–3425–1 modifies the basic agreement between the Port of Seattle (Port) and Puget Sound Tug & Barge Co. (Puget Sound) which provides for the Port's term lease to Puget sound of certain premises at Pier 16, Seattle, Washington. The purpose of the modification is to reinstate a certain portion of the premises, which had previously been deleted, as part of the leased area and to adjust the rental accordingly.

Agreement No. T–3740–1.

Filing party: Mr. Robert W. Goether, Assistant Executive Director, Georgia Ports Authority, P.O. Box 2406, Savannah, Georgia 31402.

Summary: Agreement No. T–3740–1, between the Georgia Ports Authority (Port) and United States Lines, Inc. (USL), modifies the basic agreement between the parties which provides for the Port's 5-year lease to USL (with renewal options) of a portion of container berth No. 60 storage area, Garden City Terminal, Chatham County, Georgia, to be used for the storage and handling of containers, including trailers and chassis used to transport containers. The purpose of the modification is to provide for the assignment of additional container slots, as future needs warrant, at an annual rental of $190 per slot.

Agreement No. 9474–7.

Filing party: Charles F. Warren, Esquire, Warren & Associates, P.C., 1100 Connecticut Avenue N.W., Washington, D.C. 20036.

Summary: Agreement No. 9474–7 would amend the Thailand/Pacific Freight Conference Agreement for the purpose of decreasing from 60 to 20 days, the waiting period necessary for a member line to exercise independent action after its independent action proposal is rejected by the conference at a regular or special meeting thereof.

Agreement No. 9615–35.

Filing party: Jeffrey F. Lawrence, Esquire, Billig, Sher & Jones, P.C., 2033 K Street NW., Suite 300, Washington, D.C. 20006.

Summary: Agreement No. 9615–35 amends the basic agreement of the Iberian/U.S. North Atlantic Freight Conference by changing the current "substituted service" provision to "alternate port service" and providing for the maintenance of Conference voting records.

Agreement No. 10433.

Filing party: Richard H. Saltsman, Esquire, Bowman, Conner, Touhey & Thornton P.C., 2828 Pennsylvania Ave., NW., Washington, D.C. 20007.

Summary: Agreement No. 10433 sets forth terms and conditions for the

charter by Societé Ivoirienne de Transport Maritime of space on vessels of Delta Steamship Lines moving in the westbound trade from the Ivory Coast to the U.S. Gulf.

By Order of the Federal Maritime Commission.

Dated: December 9, 1981.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Privacy Act of 1974; Amendments to Systems of Records

AGENCY: The Board of Governors of the Federal Reserve System.

ACTION: Proposed amendments to systems of records.

SUMMARY: The Board of Governors of the Federal Reserve System hereby gives notice of amendments to its systems of records as required under the Privacy Act of 1974 (5 U.S.C. 552a).

DATE: This action shall be effective as proposed without further notice on February 1, 1982, unless comments are received on or before that date which would result in a contrary determination.

ADDRESS: Address comments to the Secretary of the Board, the Board of Governors of the Federal Reserve System, 20th and Constitution Avenue, N.W., Washington, D.C. 20551.

FOR FURTHER INFORMATION CONTACT: MaryEllen A. Brown, Assistant to the General Counsel of Veryl V. Miles, Attorney, Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, at (202) 452-3608 or (202) 452-3611.

SUPPLEMENTARY INFORMATION: An annual notice of the Board's systems of records was published on January 2, 1981, 46 FR 159, and a complete compilation of all systems of records maintained by the Board of Governors of the Federal Reserve System was published on December 31, 1979 (44 FR 77460).

I. This notice proposes three substantive amendments to the Board's systems of records: first, to delete existing system BGFRS-18, FRB—Change in Bank Control Records; second, to add new systems BGFRS-18, FRB—Consumer Complaint Information System; and third, to add new system BGFRS-19, FRB—Financial Disclosure Reports and Outside Business Interest Applications. The changes in Board systems of records required to implement these substantive amendments are discussed below.

1. BGFRS-18, FRB—Changes in Bank Control Records should be deleted from the Board's systems of records. The purpose of this system was to enable the Board to evaluate each proposed change in control of bank holding companies or State member banks in accordance with the standards prescribed under the Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)). The information to be contained in this system would have included any biographical data of individuals involved in changes in control regarding the business competence, experience and integrity of such individuals.

The Board's Division of Banking Supervision and Regulation, the initiating unit of this system, has not developed any records for this system and has indicated that no such records will be developed. Consequently, it is appropriate to remove this system from the Board's designated systems of records.

2. Proposed new System of Records BGFRS-18, FRB—Consumer Complaint Information System, will be a consumer complaint information system and will be used to record all consumer complaints received by the Board concerning member banks.

Complaints will be logged in on pre-numbered control forms (form FR-1182). These forms will contain pertinent information relating to each complaint and will be stored in computer readable format. The consumer complaint information system will enable Board staff to handle complaints more efficiently. Processing time and other information relating to complaint status can be monitored with this system, and the system will also enable staff to reply promptly to congressional inquiries regarding complaints.

This new system of records will be maintained by the Board's Division of Consumer and Community Affairs, pursuant to section 11 of the Federal Reserve Act (12 U.S.C. 248), which authorizes the Board to make rules and regulations necessary to perform its duties effectively. Maintenance of the systems of records is expected to have a minimal impact on individual privacy, other rights, or the constitution principles of federalism and separation of powers. The records will be stored in computer readable format computer printouts, and on control forms and microfiche in locked files at the Board. Access to these records will be restricted to authorized personnel only.

3. Proposed new system of records BGFRS-19, FRB—Financial Disclosure Reports and Outside Business Interest Applications will be maintained by the Board's Ethics Official. This system will include records covering financial disclosure statements of Board members, officials and key employees, and outside business interest applications submitted by Board employees. Related records were formerly maintained by the Director of Personnel. Recently, however, pursuant to the Ethics in Government Act, Pub. L. 95-51, the Board appointed an Ethics Official to advise Board employees on matters concerning ethics and conflicts of interest, including financial disclosure reports and outside business interests. As a result of this appointment, all Board records concerning these matters are now in the custody of the Ethics Official.

This system will be maintained by the Board as required under the Ethics in Government Act, Pub. L. 95-521, and as authorized by sections 10 and 11 of the Federal Reserve Act, 12 U.S.C. 241 and 248. Maintenance of the system of records is expected to have a minimal impact on individual privacy, other rights, or the constitutional principle of federalism and separation of powers. The records will be stored in locked files in a secured room at the Board. Access to those records will be restricted to authorized personnel only.

II. This notice also proposes additional amendments which provide for *de minimis* technical changes to Board systems of records and describe more accurately the records maintained by the Board. The following changes are proposed to implement these technical amendments.

1. BGFRS-3, FRB—Medical Records, should be amended to designate the Board's Physician as the individual with authority to release records under this system. Currently, the records maintained under FRB—Medical Records are released at the discretion of the Board's Personnel Director. It would be more appropriate to designate the Board Physician as the sole authority to determine whether disclosure is appropriate and to provide greater safeguards for sensitive medical information maintained about Board employees. This notice proposes to accomplish this purpose by designating the Board Physician as the System Manager. All other record data elements will remain the same.

2. BGFRS-4, FRB—General Personnel Records, should be amended to reflect the addition of medical disability designators to the categories of records maintained in the system. The Board's EEO Council has recently initiated a new program to identify various types of

physical disabilities among Board staff to assist the Board in determining the representation of handicapped individuals at the Board so that any existing physical barriers at the Board can be removed, and to develop a Board recruitment and awareness program. Relevant information will be obtained from staff on a voluntary basis. This change will be achieved by adding the term "medical disability designators" to the record data element entitled "Categories of records in the system." All other data element will remain the same.

3. BGFRS–6, FRB—Adverse Information and Action, Disciplinary, Outside Business Activity and Financial Responsibility Records, should be amended by deleting references to financial responsibility statements and outside business activity applications in the system name and in record data elements entitled "Categories of individuals covered by the system" and "Categories of records in the system"; and by deleting paragraphs "i" and "j" from the record data element entitled "Routine uses of records maintained in the system, including categories of users and the purposes of such uses." Maintenance of these records or related records was formerly in the custody of the Director of Personnel. Recently, however, the Board appointed an Ethics Official to handle all matters covering ethics and conflicts of interest. Consequently, all Board employee financial disclosure statements and outside business activity applications are now in the custody of the Ethics Official.

(This notice also proposes a new system of records, BGFRS–19, FRB–Financial Disclosure Records and Outside Business Interest Applications, to reflect the Ethics Official's maintenance of these records.)

4. BGFRS–9, FRB—Consultant File, should be amended to reflect a recent employee classification change implemented by the Board's Director of Personnel that separates persons previously classified as consultants into two categories; "consultants" and "staff associates." The Personnel Division has decided to retain custody of the records of "staff associates" and to transfer records pertaining to "consultants" to the Board's Office of the Controller. Accordingly, BGFRS–9 will be amended by: changing the system name to "FRB–Consultant and Staff Associate File;" amending the categories of individuals covered by the system to reflect the separate classifications; and amending the entry under "System manager(s) and address" to include the Controller. All on the other record data elements will remain the same.

5. BGFRS–11, FRB—Official General Files, should be amended to include participants in the Board's Fine Arts Program as a category of individuals covered by the system. All of the other record data elements under this system will remain the same.

6. Board systems of records BGFRS–1, BGFRS–2, BGFRS–3, BGFRS–4, BGFRS–5, BGFRS–6, BGFRS–12, BGFRS–16, and BGFRS–17 are proposed to be amended by adding to the record data element describing routine uses for records the following phrase: "To respond to a court order." This addition reflects statutory language under section 552a(b)(11) of the Privacy Act (5 U.S.C. 552a(b)(11)) requiring disclosure of records pursuant to a court order.

7. Technical amendments are also proposed for systems of records designated BGFRS–2, BGFRS–7, and BGFRS–9, to reflect reassignments of functional responsibilities and to correct typographical errors in the prior publication.

8. All references to the "Civil Service Commission" in Board systems fo records have been changed to the "Office of Personnel Management."

The proposed revised complete compilation of all systems fo records maintained by the Board of Governors of the Federal Reserve System, as amended to incorporate the above-described changes, follows.

Table of Contents

BGFRS–1, FRB—Recruiting and Placement Records
BGFRS–2, FRB—Personnel Background Investigation Reports
BGFRS–3, FRB—Medical Records
BGFRS–4, FRB—General Personnel Records

BGFRS—1

SYSTEM NAME:

FRB—Recruiting and Placement Records

SYSTEM LOCATION:

Board of Governors
Federal Reserve System
20th and Constitution, N.W.
Washington, D.C. 20551

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have applied for employment with or are employed by the Federal Reserve Board.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records may contain information relating to the education, training, employment history and earnings, appraisal of past performance, convictions for offenses against the law; results of tests, appraisal of potential, honors, awards of fellowships; military service; veteran status, school transcripts, work samples; birth date; social security number; sipping authorizations; travel vouchers, offer letters and correspondence, reference checks, and home address of persons who have applied for Board employment or are employed by the Federal Reserve Board.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 10 and 11 of the Federal Reserve Act (12 U.S.C. 244, 248(1) and 248(1)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records may be used:

a. To refer applicants for purposes of consideration for placement in positions for which an applicant has applied and is qualified. This includes various government organizations.

b. To refer current Board employees for consideration for reassignment and promotion within the Board.

c. As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical

information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research of other personnel management functions.

d. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, to the appropriate agency, whether federal, state or local, charged with the responsibility of investigating or prosecuting such violation or with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

e. To request information from a Federal, state or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if necessary to obtain relevant information to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

f. To provide information or disclose to a Federal Agency, or any other employer or prospective employer in response to its request, in connection with the hiring or retention of an employee, the letting of a contract, or issuance of a license, grant or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision on that matter.

g. To respond to a court order.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on magnetic tapes, punched cards, microfilm, cards, lists, forms, and in folders.

RETRIEVABILITY:

Records are indexed by name, combination of birth date, social security account number, and applicable identification number.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access.

RETENTION AND DISPOSAL:

a. Files of eligibles. Retained for a minimum of one year after date of determination that no suitable position exists currently.

b. Index cards. Destroyed when no longer needed.

c. Cancelled and ineligible applications. Same as "a" above.

d. Inquires and replies regarding availability for appointment.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel
Board of Governors
Federal Reserve System
20th and Constitution, N.W.
Washington, D.C. 20551

NOTIFICATION PROCEDURE:

Individuals should provide name, date of birth, Social Security Number, identification number (if known), approximate date of record, and type of position with which concerned to the System Manager, address above.

RECORD ACCESS PROCEDURES:

Individuals should provide name, date of birth, Social Security Number, identification number (if known), approximate date of record, and type of position with which concerned to the System Manager, address above.

RECORD SOURCE CATEGORIES:

Information in this system of records either comes from the individual to whom it applies or is derived from information he or she supplies, except reports from medical personnel on physical qualifications; and statements supplied by references.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsections (k)(2) and (k)(5) of the Privacy Act and the Board's regulation relating thereto (12 CFR 261a), certain portions of this system of records may be exempted from certain provisions of the Act where: (1) such portions represent investigatory material compiled for law enforcement purposes, or (2) such portions represent investigatiory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Board employment of the extent that disclosure of such portions would reveal the identity of a source who furnished information under a promise of confidentiality.

BGFRS—2

SYSTEM NAME:

FRB Personnel Background Investigation Reports

SYSTEM LOCATION:

Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former applicants for employment by the Board of Governors; Federal Reserve System employees considered for access to classified information or restricted areas; and/or security determinations as contractors, employees of contractors, experts, instructors, and consultants to the Board. Individuals who are neither applicants nor employees of the Board but are or were involved in Board programs under a cooperative assignment or similar agreement; individuals who are neither applicants nor employees of the Board but are or were involved in matters related to the operation of the Board

CATEGORIES OF RECORDS IN THE SYSTEM:

These records may contain investigative information regarding an individual's character, financial responsibility, conduct, behavior; arrests and convictions for any violations against the law; reports of interviews with former supervisors, co-workers, associates, educators, etc.; reports about the qualifications of an individual for a specific position; reports of inquiries with law enforcement agencies; former employers; education institutions attended; and other information developed from the above.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 11 of the Federal Reserve Act (12 U.S.C. §§ 248(i) and 248(1)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The contents of these records may be disclosed to and used as follows:

a. To assist in determining the suitability for access to classified information.

b. To designated officers and employees of other agencies and departments of the Federal Government, and the District of Columbia Government, having an interest in the individual for employment purposes, in connection with performance of a service to the Federal Government, under a contract or other agreement, including a security clearance or access determination, and a need to evaluate qualifications, suitability, and loyalty to the United States Government.

c. To the intelligence agencies of the Department of Defense, National Security Agency, Central Intelligence Agency, and the Federal Bureau of Investigation for use in intelligence activities.

d. To any source from which information is requested by the Board in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation

and to identify the type of information requested.

e. In the event of an indication of any violation or potential violation of the law, whether civil, criminal, or regulatory in nature, and whether arising by statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto; such referral shall also include, and be deemed to authorize any and all appropriate and necessary uses of such records in a court of law and before an administrative board or hearing.

f. As a data source for management information for production of descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions.

g. To respond to a court order.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Files are maintained in folders and index cards in steel file cabinets with manipulation proof combination lock.

RETRIEVABILITY:

Records are indexed by name in alphabetical order.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require access and who have appropriate security clearance.

RETENTION AND DISPOSAL:

The indexing cards are retained indefinitely, while the reports of investigation are returned to the originating agency after separation of employment.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Director, Division of Support Services Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether or not the system contains a record pertaining to him or to her by addressing a written request to:

Director of Personnel, Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

The request should include the full name and date and place of birth of the individual, and any available information regarding the type of record involved, and the category of individual under which the inquirer feels he or she fits.

RECORD ACCESS PROCEDURE:

In response to a written request by an individual to determine whether or not the system contains a record pertaining to him or to her, the Director will set forth the procedure for gaining access to the record. If the individual desires to contest the contents of a record, he or she may do so by writing to the:

Director of Personnel, Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

RECORD SOURCE CATEGORIES:

Information contained in the system is obtained from the following:

1. Applications and other personnel and security forms furnished by the individual.

2. Investigative material furnished by other Federal agencies. Notices of personnel actions furnished by other Federal agencies.

3. By personal investigation or written inquiry from sources such as:

Employers
Schools
References
Neighbors
Associates
Police Departments
Courts
Credit Bureau
Medical Records
Probation Officials
Prison Officials

4. Newspapers, magazines, periodicals, and other publications.

5. Published hearings of Congressional Committees.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsections (k)(2) and (k)(5) of the Privacy Act and the Board's regulation relating thereto (12 CFR 261a), certain portions of this system of records may be exempted from certain provisions of the Act where: (1) such portions represent investigatory material compiled for law enforcement purposes, or (2) such portions represent investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Board employment to the extent that disclosure of such portions would reveal the identity of a source who furnished information under a promise of confidentiality.

BGFRS—3

SYSTEM NAME:

FRB—Medical Records

SYSTEM LOCATION:

Board Physician, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Applicants who have been medically examined for Board employment.

2. Applicants for disability retirement under the Civil Service Retirement Law or Federal Reserve System Retirement Plan.

3. Current and former Federal Reserve Board employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. Information relating to an individual's medical qualifications to hold a position with the Board.

2. Medical information relating to an individual's capability (physical and mental) to satisfactorily perform the duties of the position he or she holds or held.

3. Information relating to an employee's participation in an occupational health services program.

4. Information relating to pre-employment or periodic medical examinations to assure that the incumbent is qualified (physically and mentally) to satisfactorily perform the duties of the position.

5. Information attesting to an annuitant's state of health as required for "insurable interest" survivor annuity elections.

6. Information relating to handicaps.

7. Information relating to employee participation in the Federal Civilian Employee Alcoholism and Drug Abuse Programs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 11 of the Federal Reserve Act (12 U.S.C. 248(i) and 248(l)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Information in these records is used to:

a. determine veteran disability status

b. support applications for Disability Retirement

c. support "insurable interest" survivor annuity elections

d. determine suitability for employment or continued employment

e. assist in medical counseling

2. Information in these records may be provided to officials of other Federal agencies responsible for Federal benefit programs administered by:

a. Office of Workmen Compensation Programs

b. Retired Military Pay Centers

c. Veterans Administration

d. Social Security Administration

e. Specific private contractors engaged in providing benefits under Federal contracts.

f. Office of Personnel Management

3. Information in these records is used:

a. to refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, to the appropriate agency, whether Federal, state, or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulation or order issued pursuant thereto.

b. to request information from a Federal, state or local agency maintaining civil, criminal or other relevant enforcement or other pertinent information, such as a license, if necessary to obtain relevant information to the Board's decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract or the issuance of a grant or other benefit.

c. to provide information or disclose to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the letting of a contract or issuance of a license, grant or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

d. as a data source for management information for production of descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuls for personnel research or other personnel management functions.

e. To respond to a court order.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are in folders.

RETRIEVABILITY:

Records are indexed by name, social security number, identification number, date of birth and/or claim number.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access. Records are stored in lockable metal containers.

RETENTION AND DISPOSAL.

a. Medical certificates and other medical records of examination used to determine an employee's fitness for a job 6 years after separation.

b. Miscellaneous medical records, correspondence dispensary records and similar papers, 6 months after separation.

c. Applicant's medical records, 6 years after separation.

d. Disability retirement medical files, 6 years after separation.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

NOTIFICATION PROCEDURE:

Individuals requesting information about this system of records should provide their full name, date of birth, social security number, name of office or division in which currently or formerly employed, and annuity account number, if any has been assigned, to the System Manager, address above.

RECORD ACCESS PROCEDURES:

Individuals requesting information about this system of records should provide their full name, date of birth, social security number, name of office or division in which currently or formerly employed, and annuity account number, if any has been assigned, to the System Manager, address above.

RECORD SOURCE CATEGORIES:

1. The individual to whom the record pertains.

2. Personal physicians.

3. Medical institutions.

4. Official records of other Federal agencies.

5. Federal Reserve Board Official Personnel Records.

6. Federal Reserve System Personnel Management Records Systems.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None; however, see special procedures provided at 12 CFR 261a.6.

BGFRS—4

SYSTEM NAME:

FRB—General Personnel Records

SYSTEM LOCATION:

Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former employees of and consultants to the Federal Reserve Board and the surviving spouses, and children of former Board employees, if any.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records consist of a variety of documents relating to personnel actions of the Board and its determinations made about an individual for, and during the course of his employment by the Board. These records may contain information about employees and former employees relating to employment, placement, personnel actions, performance considerations and evaluations; training and development activities and plans, background investigations; reference checks; salary history and other personnel matters. It also includes minority group and medical disability designators; records relating to benefits and designation of beneficiary; emergency contact, documentation supporting personnel actions or decisions made about an individual; awards; employee parking and other information relating to the status of the individual either while considered for employment or while employed by the Board.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 10 and 11 of the Federal Reserve Act (12 U.S.C. 221 et seq.)

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records is used:

a. For purposes of review in connection with appointments, transfers, promotions, reassignments, training and development needs, adverse actions, disciplinary actions,

and determination of qualifications of an individual, and in assisting the individual in locating other employment.

b. For purposes of making a decision when a Board employee or former Board employee is questioning the validity of a specific document in the individual's record.

c. To respond to a court order.

d. To provide information to a prospective employer of a current or former Board employee.

e. To provide data for the automated Personnel records.

f. To provide information to a Federal agency, or any other employer or prospective employer, in response to its request in connection with the hiring or retention of an employee, the letting of a contract, or issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

g. To request information from a Federal, state or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if necessary to obtain relevant information or other pertinent information to a Board decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of contract, or the issuance of a grant or other benefit.

h. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, to the appropriate agency, whether Federal, state, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

i. As a data source of management information for production of statistical and analytical studies and reports in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions.

j. Determine eligibility for coverage, benefits due, and payment of benefits under the various benefits programs available to the Board and its staff.

k. Transfer information necessary to support a claim for benefits under the various benefit programs in operation at the Federal Reserve Board.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, magnetic tape, disc, punched cards, index cards and microfilm.

RETRIEVABILITY:

Records are indexed by any combination of name, date of birth, Social Security Number, or identification number.

SAFEGUARDS:

Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms with access limited to those whose official duties require it.

RETENTION AND DISPOSAL:

The General Personnel Record is retained until five years after death or an individual achieves age 75 where he or she does not separate employment by retirement.

SYSTEM MANAGER(S) AND ADDRESS:

For current and former Federal Reserve Board employees:

Director of Personnel, Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

NOTIFICATION PROCEDURE:

Inquiries, including name, date of birth, and Social Security Number should be addressed to the System Manager, address above.

RECORD ACCESS PROCEDURES:

Current and former Federal Reserve Board employees who wish to gain access to or contest their records should contact the System Manager, address above. Former Board employees should direct such a request in writing, including their name, date of birth, and Social Security Number.

RECORD SOURCE CATEGORIES:

Information in this system of records comes from the individual to whom it applies or is derived from the information the individual supplied, except information provided by Board officials. Information is also obtained from the following sources for administration of the benefits portion of the system:

1. OPM Personnel Management Records System
2. Personnel records of other Government agencies
3. Personnel Records of Federal Reserve Banks

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsections (k)(2) and (k)(5) of the Privacy Act and the Board's regulation relating thereto (12 CFR 261a), certain portions of this system of records may be exempted from certain provisions of the Act where: (1) such portions represent investigatory material compiled for law enforcement purposes, or (2) such portions represent investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Board employment to the extent that disclosure of such portions would reveal the identity of a source who furnished information under a promise of confidentiality.

BGFRB—3

SYSTEM NAME:

FRS—EEO Discrimination Complaint File

SYSTEM LOCATION:

Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for Board employment, current and former Board employees, and annuitants who file a complaint of discrimination or appeal a determination made by an offical of the Board relating to equal employment opportunities.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records contains information or documents relating to a complaint, the decision or determination made by the Board affecting an individual under the Board's EEO regulations and procedures. The records consist of the initial complaint or appeal letters or notices to the individual, record of hearings when conducted materials placed into the record to support the decision or determination, affidavits or statements, testimonies of witnesses, investigative reports, instructions to the Board and/or individual about action to be taken to comply with decisions, and related correspondence, opinions and recommendations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 11 of the Federal Reserve Act (12 U.S.C. 248(i) and 248(1)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information in the records may be used:

a. To respond to a request from a Member of Congress regarding the status of an appeal, complaint or grievance.

b. To provide information to the public on the decision of an appeal, complaint, or grievance required by the Freedom of Information Act.

c. To respond to a court order.

d. To adjudicate an appeal, complaint, or grievance.

e. As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions.

f. To refer, where there is an indication of a violation or potential violation of law, whether civil, or regulatory in nature, to the appropriate agency, whether Federal, state, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

g. To provide information or disclose to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the letting of a contract, or issuance of a license, grant, or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision on that matter.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders, binders, and index cards.

RETRIEVABILITY:

These records are indexed by the names of the individuals on whom they are maintained.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

RETENTION AND DISPOSAL:

The records are maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

NOTIFICATION PROCEDURE:

Individuals who have filed appeals or grievances are aware of that fact and have been provided a copy of the records. They may, however, contact the System Manager, address above. Individuals should provide their name, date of birth, and the approximate date of employment or application, and the kind of action taken by the Board when making inquiries about records.

Record access procedures: Individuals who have appealed or filed a grievance about a decision or determination made by the Board or about conditions existing in the Board already have been provided a copy of the records. However, to gain access or contest the records in this system, individuals should contact the System Manager, address above. Individuals should provide their name, date of birth, approximate date of employment or application and the kind of action taken by the Board when requesting access to, or contest of records.

RECORD SOURCE CATEGORIES:

a. Individual to whom the record pertains

b. Board employees

c. Affidavits or statements from employee

d. Testimonies of witnesses

e. Official documents relating to the appeal, grievance, or complaints

f. Correspondence from specific organizations or persons.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsection (k)(2) of the Privacy Act and the Board's regulation relating thereto (12 CFR 261a), certain portions of this system of records may be exempted from certain provisions of the Act where such portions represent investigatory material complied for law enforcement purposes.

DGFRS—6

SYSTEM NAME:

FRB—Adverse Information and Action Records: Disciplinary Records.

SYSTEM LOCATION:

Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Board employees, (including special employees) and annuitants who are involved in an Adverse Action; employees who suffer a withholding of a Progress Step Increase; and those employees who have creditors contacting the Board relative to credit problems.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records may contain information or documents relating to a determination made by the Board affecting an individual. The records consist of the letters or notices to the individual, record of hearings when conducted, materials placed into the record to support the decision or determination, affidavits or statements, testimonies of witnesses, investigative reports, and related correspondence, opinions and recommendations. Letters from creditors are also contained in this system.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 11 of the Federal Reserve Act (12 U.S.C. 248(i) and 248(1)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information in the records may be used:

a. To respond to a request from a Member of Congress regarding the status of an appeal, complaint or grievance.

b. To provide information to the public on the decision of an appeal, complaint, or grievance required by the Freedom of Information Act.

c. To respond to a court order.

d. To adjudicate an appeal, complaint, or grievance.

e. As a data source for management information for production of descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel management functions.

f. To refer, where there is an indication of a violation or potential

violation of law, whether civil, criminal or regulatory in nature, to the appropriate agency, whether Federal, state, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

g. To request information from a Federal, state or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if necessary to obtain relevant information to a Board decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a grant or other benefit.

h. To provide information or disclose to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the letting of a contract, or issuance of a license, grant or other benefit by the requesting agency to the extent that the information is relevant and necessary to the requesting agency's decision on that matter.

i. To administer various aspects of established personnel management programs.

STORAGE:

These records are maintained in file folders, binders, index cards, magnetic tape and disk.

RETRIEVABILITY:

These records are indexed by the names of the individuals on whom they are maintained.

SAFEGUARDS:

Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

RETENTION AND DISPOSAL:

The records are maintained indefinitely after cessation of employment unless deemed unnecessary, and thus destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, Board of Governors, Federal Reserve System, 20th and Constitution, N.W., Washington, D.C. 20551.

NOTIFICATION PROCEDURE:

Individuals should provide name, date of birth, Social Security Number, identification number (if known), approximate date of record, and type of situation with which concerned to the System Manager, address above.

RECORD ACCESS PROCEDURES:

Individuals should provide name, date of birth, Social Security Number, identification number (if known), approximate date of record, and type of situation with which concerned to the System manager, address above.

RECORD SOURCE CATEGORIES:

a. Individual to whom the record pertains

b. Board officials

c. Affidavits or statements from employees

d. Testimonies of witnesses

e. Official documents relating to an action, appeal, grievance, or complaints

f. Correspondence from specific organizations or persons.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BGFRS—7

SYSTEM NAME:

BGFRS—12

SYSTEM NAME:

FRB—Biographical File of Federal Personnel

SYSTEM LOCATION:

Board of Governors
Federal Reserve System
20th and Consitution, N.W.

Washington, D.C. 20551

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Federal Reserve System officers, and their staff.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of a variety of records relating to personnel actions and determinations made about an individual while employed in the Federal Reserve System. These records contain information about an individual relating to birth date; education; veteran status; tenure; handicap; past and present salaries, grades, and position titles; personnel actions, including but not limited to appointment, reassignment, demotion, detail, promotion, transfer, and separation; photograph, awards; and other information relating to the status of the individual.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 4, 11 and 22 of the Federal Reserve Act (12 U.S.C. 221 et seq.).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES: INFORMATION IN THERE RECORDS MAY BE USED:

a. By Federal Reserve System officials for purposes of review in connection with appointments, transfers, promotion, reassignments, adverse actions, disciplinary actions, and determination of qualifications of an individual.

b. By the Board of Governors for purposes of making a decision when a listed employee or former listed employee is questioning the validity of a specific document in the individual's record.

c. To respond to a court order.

d. To publish name and title data for the Directory of officers of Federal Reserve Banks.

e. To provide reports to Congress, agencies, and the public on characteristics of the System work force.

f. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal, or regulatory in nature, to the appropriate agency, whether Federal, state, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

g. As a data source for management information for production of summary descriptive statistic and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to repond to general requests for information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Records are maintained in file folders, magnetic tape, punched cards and disk.

RETRIEVABILITY:

Records are indexed by combination of name or identification number.

SAFEGUARDS:

Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Retained indefinitely.

STORAGE:

Paper forms and files.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Retained in locked metal file cabinets. Access to Board staff on restricted basis

RETENTION AND DISPOSAL:

Indefinite.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Banking Supervision and Regulation
Board of Governors
Federal Reserve System
Washington, D.C. 20551

NOTIFICATION PROCEDURE:

Secretary of the Board
Board of Governors
Federal Reserve System
20th and Constitution, N.W.
Washington, D.C. 20551

RECORD ACCESS PROCEDURES:

System Manager, as indicated above.

RECORD SOURCE CATEGORIES:

Reports and forms filed by individuals to whom records pertain.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsections (k)(2) of the Privacy Act and the Board's regulation relating thereto (12 CFR 261a), certain portions of this systems of records may be exempted from certain provisions of the Act where such portions represent investigatory material compiled for law enforcement purposes.

BGFRS—17

SYSTEM NAME:

FRB—Municipal Securities Principal and Municipal Securities Representative Records.

SYSTEM LOCATION:

Board of Governors of the Federal Reserve System, 20th and Constitution Avenue NW., Washington, D.C. 20551. Records stored in computerized files are maintained off Board premises at the National Association of Securities Dealers, 1735 K Street NW., Washington, D.C. 20036.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who are or seek to be municipal securities principals or municipal securities representatives associated with a municipal securities dealer which is a State member bank of the Federal Reserve System or a subsidiary or a department or division thereof.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records may contain identifying information as well as eductional, employment, and disciplinary information, and, where applicable, information regarding termination of employment of individuals covered by the system. Identifying information includes names, address, date and place of birth, and may include social security account number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 15B, 17, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. Secs. 78o–4(c)(5), 78q, and 78w) and section 11 of the Federal Reserve Act (12 U.S.C. 248).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in these records may be used:

a. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal, or regulatory in nature, to the appropriate governmental authority, whether Federal, State, local, or foreign, or self-regulatory organization, as defined in section 3(a)(26) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(a)(26)).

b. To refer, in the event of litigation, whether civil, criminal, or regulatory in nature, to the appropriate court, magistrate, or administrative law judge.

c. To assist in any proceeding in which the Federal securities or banking laws are in issue or in which the Federal Reserve Board or a past or present member of its staff is a party or otherwise involved in an official capacity.

d. To disclose to a Federal, State, local, or foreign governmental authority or a self-regulatory organization if necessary in order to obtain information relevant to a Federal Reserve Board inquiry concerning a person who is or seeks to be associated with a municipal securities dealer described in "Categories of individuals covered by the system" as a municipal securities principal or municipal securities representative.

e. To respond to a request from a Federal, State, local, or foreign governmental authority or a self-regulatory organization for information in connection with the issuance of a license or other benefit to the extent that such information is relevant and necessary.

f. To disclose to a Congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

g. To respond to a court order.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Records are maintained in file folders and on computer discs.

RETRIEVABILITY:

Records are indexed by name.

SAFEGUARDS:

File folders are stored in lockable metal cabinets and computer discs are accessed only by authorized personnel.

RETENTION AND DISPOSAL:

Records may be maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Secretary of the Board, Board of Governors:
Federal Reserve System,
20th and Constitution, NW.,
Washington, D.C. 20551.

NOTIFICATION PROCEDURE:

Inquiries, including name and date and place of birth, should be addressed to the System Manager, address above. Inquiries may be required to include a notarized statement attesting to identity.

RECORD ACCESS PROCEDURES:

Same as Notification above.

CONTESTING RECORD PROCEDURES:

Same as Notification above.

RECORD SOURCE CATEGORIES:

Individuals on whom the records are maintained as well as municipal securities dealers described in "Catagories of individuals covered by the system" and Federal, State, local, and foreign governmental authorities, and self-regulatory organizations, which regulate the securities industry.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BGFRS—18

SYSTEM NAME:

FRB—Consumer Complaint Information System.

SYSTEM LOCATION:

Board of Governors of the Federal Reserve System, 20th & Constitution Avenue, N.W., Washington, D.C. 20551

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have filed complaints with the Federal Reserve Board or the Federal Reserve Banks.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records may contain complaints regarding state-chartered member banks, as well as other financial institutions, individuals or organizations that are subject to federal banking regulations. Information included in these records are the complainant's name, a code symbol indicating the subject matter of the complaint, and information regarding the investigation and action taken on the complaint. Supporting records may include documents supplied by the complainant, intra-agency memoranda, as well as correspondence between the Federal Reserve System and the financial institution or other individual or organization in question.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 11 of the Federal Reserve Act (12 U.S.C. 248(i)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information in these records may be used:

a. By Board staff in its consumer affairs program for the investigation and resolution of consumer complaints.

b. To provide the appropriate Reserve Bank with information when a complaint or inquiry is received by the Board involving a state-chartered member bank in that Reserve Bank's jurisdiction.

c. In the investigation and resolution of complaints by the Reserve Bank which may require the disclosure of information contained in the records pertaining to the subject individual or institution.

d. For the maintenance of all follow-up correspondence (i.e., information submitted by complainant and information gathered in the investigation process concerning the complainant's bank records and pertinent bank policies.

e. To respond to Congressional inquiries and referral of complaints made on behalf of constituents. Congressional inquiries are generally made for the purpose of assessing the implementation of Congressional legislation. Information identifying the complainant and the institution or individual subject to the complaint is generally deleted in these requests, unless the complainant consents to disclosure. Information provided in response to complaint referrals will be in the form of follow-up correspondence on the complaints.

f. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, to the appropriate agency, whether federal, state or local, charged with the responsibility of investigating or prosecuting such violations or with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

g. To respond to a court order.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are stored in computer readable format, computer printouts, control forms, in file folders, and on microfiche.

RETRIEVABILITY:

File folders and microfiche are retrievable by subject code; control forms by control form number; computer printouts by state member bank name, consumer name, and control form number.

SAFEGUARDS:

Access to and use of these records is restricted to authorized personnel only.

RETENTION AND DISPOSAL:

a. File folders of complaints will be retained for two years.

b. Complaints on microfiche will be retained indefinitely.

c. Records stored in computer readable format will be retained indefinitely, with the following exceptions: records on control forms will be retained for a maximum of one year, with the exception of Reserve Bank referrals which, will be retained indefinitely; records on computer printouts of monthly and year-end reports will be retained for one year, then put on microfiche and retained indefinitely.

SYSTEM MANAGER AND ADDRESS:

Director
Division of Consumer and Community Affairs
Board of Governors
Federal Reserve System
20th and Constitution Ave., N.W.
Washington, D.C. 20051

NOTIFICATION PROCEDURE:

Inquiries should be directed to the System Manager at the address above. Inquirers may be required to file notarized statements attesting to their identity.

RECORD ACCESS PROCEDURES:

Inquiries should be directed to the System Manager at the address above. Inquirers may be required to file notarized statements attesting to their identity.

RECORD SOURCE CATEGORIES:

Person(s) who initiate complaints (or his or her representative, which may include a member of Congress or an attorney); appropriate federal, state or local regulatory and enforcement agencies; institutions or individuals that are the subject of a complaint.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to subsection (k)(2) and (k)(5) of the Privacy Act and the Board's

regulations relating thereto (12 CFR Part 261a), certain portions of this system of records may be exempted from certain provisions of the act where: (1) Such portions represent investigatory material compiled for law enforcement purposes, or (2) such portions represent investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Board employment to the extent that disclosure of such portions would reveal the identity of a source who furnished information under a promise of confidentiality.

BGFRS—19

SYSTEM NAME:

FRB—Financial Disclosure Reports and Outside Business Interest Applications.

SYSTEM LOCATION:

Board of Governors of the Federal Reserve System, 20th and Constitution Avenue, N.W., Washington, D.C. 20551.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Board members, officials, and key Board employees who are required to file annual financial disclosure reports pursuant to Title II of the Ethics in Government Act, as amended, Pub. L. 95–521 (1978) and Pub. L. 96–19, and 96–28 (1979), or pursuant to Board regulation, 12 CFR Part 264; and Outside Business Interest Application forms, filed pursuant to 12 CFR Part 264.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain:

a. the annual Financial Disclosure reports filed on forms prescribed by the Office of Government Ethics, for those Board members and officials who are required by statute to file these reprots;

b. Confidential annual Financial Disclosure Reports filed annually by remaining Board officials and designated key Board employees who are required by Board regulations to file these reports; and

c. Outside Business Interest Application forms filed by employees pursuant to Board regulation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title II of Pub. L. 95–521 (1978) and sections 10 and 11 of the Federal Reserve Act (12 U.S.C. 221 et seq.).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information in these records may be used:

a. To identify or determine conflict of interest situations or potential conflicts of interest.

b. To advise an employee of potential problems.

c. To provide information to the Office of Government Ethics.

d. To provide copies of those financial disclosure reports filed pursuant to the Ethics in Government Act to the public, upon request.

e. To respond to a request from a Member of Congress.

f. To respond to a request from the General Accounting Office made in the exercise of their official responsibilities.

g. To respond to a court order.

h. To respond to requests for nonidentified statistical information under the Freedom of Information Act.

i. To refer where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, to the appropriate agency, whether federal, state, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders, in locked steel file cabinets, in a secured room.

RETRIEVABILITY:

These records are indexed by the names of the individuals to whom they pertain.

SAFEGUARDS:

Access to and use of these records is restricted to those persons whose official duties require such access.

RETENTION AND DISPOSAL:

a. Financial Disclosure Reports filed pursuant to the Ethics in Government Act are retained for the statutorily required six-year period, after which they are destroyed, unless needed in an ongoing investigation.

b. Confidential Financial Disclosure Reports filed pursuant to Board regulation are maintained indefinitely.

c. Outside Business Interest Applications are maintained indefinitely.

SYSTEM MANAGER AND ADDRESS:

Board Ethics Official
Board of Governors
Federal Reserve System
20th and Constitution, N.W.
Washington, D.C. 20551

NOTIFICATION PROCEDURE:

a. Requests for access to Financial Disclosure Reports filed pursuant to the Ethics in Government Act are to be submitted on the form provided by the Office of Government Ethics.

b. Individuals wishing to have access to their own Confidential Financial Disclosure reports or Outside Business Interest Applications should contact the System Manager above.

RECORD ACCESS PROCEDURES:

Individuals wishing to gain access to or to correct information maintained about them in this system of records should contact the System Manager above. Former Board employees should direct such a request in writing, including their name, date of birth and social security number.

RECORD SOURCE CATEGORIES:

Individual to whom the record pertains.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Board of Governors of the Federal Reserve System, December 8, 1981.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Early Termination of the Waiting Period of the Premerger Notification Rules; the Securities Group

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the waiting period of the premerger notification rules.

SUMMARY: The Securities Group is granted early termination of the waiting period provided by law and the premerger notification rules with respect to the proposed acquisition of certain assets and voting securities of Jartran, Inc. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by both parties. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: November 19, 1981.

FOR FURTHER INFORMATION CONTACT: Roberta Baruch, Senior Attorney, Premerger Notification Office, Bureau of

Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580; (202) 523–3894.

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

By direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Mine Health Research Advisory Committee Respirator Research Subcommittee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control announces the following National Institute for Occupational Safety and Health (NIOSH) Committee meeting:

Name: Respirator Research Subcommittee of the Mine Health Research Advisory Committee
Date: January 4–5, 1982
Time: 8:30 a.m. to 4:30 p.m.
Place: Conference Room M, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857
Type of Meeting: Open
Contact Person: Jon R. May, Ph.D., Special Assistant to the Director (for Testing and Certification), National Institute for Occupational Safety and Health, Centers for Diesase Control, 5600 Fishers Lane, Room 8A–53, Rockville, MD 20857, Telephone: (301) 443–3680
Purpose: To discuss and obtain comments relevant to the advantages and disadvantages of in-house versus external testing of respirators.

The Mine Health Research Advisory Committee (MHRAC) was established by the Federal Mine Safety and Health Act of 1977. This legislation also provides the basis for the NIOSH/MSHA Respirator Certification Regulations under 30 CFR 11. The subcommittee, composed of members of the MHRAC, will provide a report to the full Committee that may contain a recommendation on NIOSH's role in testing and certification of respirators. Resource personnel from among the users of respirators will be invited to assist the subcommittee.

Viewpoints and suggestions from manufacturers and users of respirators, industry, organized labor, academia, other government agencies, and any other interested parties are invited. Interested parties wishing to participate in the meeting are requested to contact Dr. Jon May at the address above in order to be assured appropriate time for presentation. Four copies of the text of the presentation should be provided to the subcommittee chairperson, John B. Moran, Post Office Box 42, Boyds, MD 20841, prior to or at the subcommittee meeting.

The subcommittee will present its report on this subject to the MHRAC at their next meeting currently scheduled for February 1–2, 1982. The final subcommittee report, as approved by the MHRAC, will be available subsequent to the February meeting.

Dated: December 7, 1981.

William C. Watson, Jr.,

Acting Director, Centers for Disease Control.

BILLING CODE 4160–19–M

Health Care Financing Administration

Medicare and Medicaid Programs; Omnibus Budget Reconciliation Act of 1981: Information Notice on Medicare and Medicaid Amendments

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice describes briefly some of the provisions of Title XXI of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35, August 13, 1981) that affect eligibility, benefits, reimbursement, and administration of the Medicare and Medicaid programs.

We wish to bring to the attention of the public several provisions that are, in large part, self-explanatory and that are now or will soon become effective. Some of these provisions repeal or amend provisions contained in the Omnibus Reconciliation Act of 1980 (Pub. L. 96–499, December 5, 1980).

By this publication, we wish to serve notice that these provisions will be implemented, on the dates indicated, even though specific regulations have not been promulgated. We will incorporate these provisions in regulations, manual instructions, and other materials as appropriate.

DATE: The effective date of each statutory provision is given in the "Supplementary Information" section of this document.

Since this notice merely contains a brief description of statutory changes and does not contain policy interpretations, we are not providing a specified period for receipt of comments. However, we welcome comments on any of these provisions.

ADDRESSES: Address comments to: Administrator, Health Care Financing Administration, Department of Health

and Human Services, P.O. Box 17073, Baltimore, Maryland 21235. In commenting, please refer to BPP–177–GN. We will consider all comments received in future review of the need for departmental legislative initiatives, regulations, or administrative actions.

FOR FURTHER INFORMATION CONTACT:
Sharon Harris (301) 594–9774.

SUPPLEMENTARY INFORMATION:

Background

On December 5, 1980, the Omnibus Reconciliation Act of 1980 (Pub. L. 96–499) was enacted. This Act made numerous substantive and technical changes in the administration of the Medicare and Medicaid programs. Many of the provisions of Pub. L. 96–499 have already gone into effect. We have issued instructions and other materials to State agencies, contractors, providers, and others affected by the provisions.

On August 13, 1981, the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) was enacted. Title XXI of this Act (the Medicare and Medicaid Amendments of 1981) repealed or amended some of the provisions contained in the Omnibus Reconciliation Act of 1980, added a variety of new provisions that expand efforts to control Federal expenditures in the Medicare and Medicaid programs, and increased State flexibility in administering State programs.

This notice describes briefly some of the provisions of the new legislation relating to the Medicare and Medicaid programs that are sufficiently complete and clear that we believe they can take effect without issuance of regulations. We believe it is advantageous to provide a brief summary of these provisions and give notice to program administrators, providers of services, beneficiaries, and the general public that they are being implemented. In each case, we will also incorporate these provisions in appropriate regulations or manual issuances, as appropriate, at a later date.

We have already published in the **Federal Register** regulations and notices on a number of other provisions of the 1981 Reconciliation Act. A listing of the subjects and the publication dates is included at the end of this notice for informational purposes. We will be issuing implementing materials (regulations, manual issuances, administrative instructions, etc.) on the remaining sections of the Act soon.

Summary of Specific Provisions

(The section numbers cited before each item refer to the provisions of the Omnibus Budget Reconciliation Act of 1981.)

1. Section 2106—Technical Corrections

This amendment restores a provision that was erroneously deleted by the Omnibus Reconciliation Act of 1980. As corrected, section 1833(a)(2) limits reimbursement for Medicare Part B services to the lower of the provider's customary charge or the reasonable cost of the covered services. Section 2106 also deletes a reference to section 1837(b) of the Social Security Act, which was repealed by the Omnibus Reconciliation Act of 1980, and corrects two other technical errors. (Section 1837(b) had prescribed a two-enrollment limitation for SMI beneficiaries.)

Amends: Sections 1833(a)(2), 1835(a)(2), 1838(b), and 1903(n) of the Social Security Act.

Effective: The restoration of section 1833(a)(2) and the technical corrections are effective retroactively to December 5, 1980, the date of enactment of the Omnibus Reconciliation Act of 1980. The deletion of the reference to section 1837(b) is effective April 1, 1981, the date that section was repealed.

2. Section 2121—Coverage of Alcohol Detoxification Facility Services

This amendment repeals the provision, added by the Omnibus Reconciliation Act of 1980, under which Medicare payment could be made for inpatient alcohol detoxification services furnished in free-standing facilities. It also deletes the requirement that we conduct a study of Medicare coverage of certain additional detoxification-related services.

Amends: Sections 1812(a), 1814(a)(2), 1861(u) and (bb), 1154(b), 1155, 1158, and section 931 of Pub. L. 96–499.

Effective: The statutory effective date of this provision is August 23, 1981. However, since no regulations or instructions were issued to implement the prior provision, no payments have been initiated or authorized.

3. Section 2122—Elimination of Occupational Therapy as a Basis for Initial Entitlement to Home Health Services

This amendment eliminates occupational therapy as a qualifying criterion for initial entitlement to home health services benefits. (The Omnibus Reconciliation Act of 1980 had added occupational therapy to the previously existing list of qualifying conditions—skilled nursing care and physical and speech therapy.) However, an individual who has otherwise qualified for home health benefits on the basis of his need for skilled nursing care, speech therapy, or physical therapy may have payment extended solely because of a continuing need for occupational therapy.

Amends: Sections 1814(a)(2)(D) and 1835(a)(2)(A) of the Social Security Act.

Effective: The amendment is effective with plans of treatment implemented for the first time on or after December 1, 1981. A benficiary receiving home health care under a continuous plan of care implemented before December 1 remains eligible for home health benefits after that date, subject to other applicable requirements, even if occupational therapy was the only qualifying condition for such plan of care.

4. Sections 2131 and 2132—Medicare Part A Deductible and Coinsurance

• Medicare Part A inpatient hospital coinsurance (the amount charged to a beneficiary for each day after the first 60 days of inpatient hospital care during a spell of illness) is, by statute, based on a fraction of the inpatient hospital deductible. The deductible itself is increased each calendar year. Prior to passage of the Omnibus Budget Reconciliation Act of 1981, the formula for coinsurance used the deductible that was in effect at the time the beneficiary's spell of illness began. Section 2131 changes this to base the coinsurance on the deductible in effect on the date inpatient hospital services or posthospital extended care services are furnished.

Amends: Section 1813(b)(2) of the Social Security Act.

Effective: The amendment is effective for Part A inpatient hospital services or posthospital extended care services furnished on or after January 1, 1982.

• Section 1813(b)(2) of the Social Security Act requires us to adjust the Medicare Part A inpatient hospital deductible each year to reflect changes in the average cost of hospital care. The amount of the adjustment is determined by multiplying a base figure of $40 by the ratio of the current average per diem rate for inpatient hospital services for the preceding calendar year to the average per diem rate for the inpatient hospital services for 1966. This results in the inpatient hospital deductible being increased each year by about the same percentage as the increase in the average Medicare daily hospital costs. Section 2132 of the new law increases the base figure of $40 to $45. The formula is otherwise unchanged. Under the amendment, the inpatient hospital deductible for 1982 will be $260.

Amends: Section 1813(b)(2) of the Social Security Act.

Effective: This amendment applies to inpatient hospital services furnished on or after January 1, 1982.

5. Section 2133—Carryover of Incurred Expenses in Meeting Medicare Part B Deductible

This amendment repeals the provision of current law that permits beneficiaries to count expenses incurred in the forth quarter of a calendar year in meeting the Medicare Part B deductible for the following year.

Amends: Section 1833(b) of the Social Security Act.

Effective: This amendment applies to the deductible for the calendar year 1982 with respect to expenses incurred on or after October 1, 1981.

6. Section 2134—Increase in Medicare Part B Deductible

This amendment increases the Medicare Part B annual deductible from $60 to $75.

Amends: Section 1833(b) of the Social Security Act.

Effective: January 1, 1982.

7. Section 2151—Elimination of Unlimited Open Enrollment

This amendment repeals the provision under the Omnibus Reconcilation Act of 1980 that provided for continuous open enrollment under Medicare Part B. It also reinstitutes the prior provision for an annual general enrollment period of January through March of each calendar year.

Amends: Section 1837(e) and (g)(3), 1838(a)(2)(E), and 1839(d) of the Social Security Act.

Effective: October 1, 1981.

8. Section 2152—Utilization Guidelines for Home Health Services

This amendment provides for the establishment of utilization guidelines for determining whether or not payment may be made for home health services under Medicare Parts A and B. (There is authority under existing HCFA regulations to implement this provision. We will issue manual instructions to the Medicare intermediaries for a program of post-payment coverage review of submitted claims on a sample basis.)

Amends: Section 1862 of the Social Security Act by adding a new paragraph (f).

Effective: October 1, 1981.

9. Section 2153—Repeal of Statutory Time Limitation on Provider Agreement With Skilled Nursing Facilities

This amendment eliminates the requirement that an agreement between the Secretary and a skilled nursing facility cannot exceed 12 months. In addition, by implication, this eliminates the need to conduct annual surveys of these facilities for recertification.

Amends: Section 1866(a)(1) of the Social Security Act.

Effective: The statutory effective date is August 13, 1981. Current agreements are not affected. When a facility's current agreement expires, we will decide whether to extend the agreement on an indefinite basis or on a time-limited basis.

10. Section 2155—Elimination of Periodic Interim Payment Delay

This amendment repeals the provision of the Omnibus Reconciliation Act of 1980 that provided for a temporary delay in periodic interim payments (PIP) to providers.

Amends: Section 959 of the Omnibus Reconciliation Act of 1880.

Effective: August 13, 1981.

Provisions For Which Regulations or Notices Have Already Been Published

We have already issued interim final regulations, propose rules, and notices in the **Federal Register** on the following provisions of the 1981 Reconciliation Act:

Federal Register, September 30, 1981, Vol. 46, No. 189 (All are interim final rules except where indicated.)

- Section 2143, Medicare: Schedule of Limits on Hospital Per Diem Inpatient General Routine Operating Costs (General Notice).
- Section 2144, Medicare: Schedule of Limits on Home Health Agency Costs Per Visit, Effective 10/1/81 (General Notice).
- Section 2161, Medicaid—Reduction in Federal Matching Payments to States for FY 1982–1984; and Offset Based on Third Party Liability Recoveries Against Reduction in Medicaid Payments (Notice of Proposed Rulemaking) (2 documents).
- Sections 2171 and 2172, Medicaid Eligibility and Coverage Criteria.
- Section 2173, Payment for Long-Term Care Facility Services and Inpatient Hospital Services.

Federal Register, October 1, 1981, Vol. 46, No. 190, Book 2 (All are interim final regulations.)

- Sections 2103 and 2164, Medicare and Medicaid—Less than Effective Drugs and Inpatient Hospital Tests.
- Sections 2111, 2112, and 2113, Professional Standards Review; Professional Standards Review Organizations.
- Section 2141, Medicare—Inpatient Routine Nursing Salary Cost Differential.
- Sections 2162, 2174, 2182, and 2183. Miscellanous Medicaid Provisions—Increased State Flexibility (Reimbusement for Services of Practitioners and for Noninstitutional Services, Collection of Third Party Payments, Recertifications by Physicians Assistants and Nurse Practitioners, and Addition of Northern Mariana Islands to the States and Territories Participating in Medicaid).

BILLING CODE 4120-03-M

Health Resources Administration

National Advisory Council on Health Professions Education; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of January 1982:

Name: National Advisory Council on Health Professions Education

Date and Time: January 18, 1982, 1:30 p.m.–5:00 p.m.; January 19–20, 1982, 8:30–5:00 p.m.

Place: Conference Room 10, Building 31, C Wing, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

Open for entire meeting.

Purpose: The Council advises the Secretary with respect to the administration of programs of financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance. This also involves advice in the preparation of regulations with respect to policy matters.

Agenda: The meeting will cover: welcome and opening remarks; report of the Acting Administrator; budget update; legislative update; criteria for selection of ad hoc

reviewers; use of national board scores; institutional commitment to funding of projects; basic educational opportunity grants; and future agenda items.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write to or contact Mr. Robert L. Belsley, Executive Secretary, National Advisory Council on Health Professions Education, Bureau of Health Professions, Health Resources Administration, Room 4–27, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, Telephone (301) 436–6560.

Agenda items are subject to change as priorities dictate.

Dated: December 8, 1981.

Jackie E. Nylen,

Advisory Committee Management Officer, Health Resources Administration.

BILLING CODE 4160-15-M

Public Health Service

Health Maintenance Organizations; Continued Regulation; Reestablishment of Compliance

AGENCY: Public Health Service, HHS.

ACTION: Notice. Continued regulation of Health Maintenance Organizations: Reestablishment of Compliance.

SUMMARY: On November 13, 1981, the Office of Health Maintenance Organizations (OHMO) notified Community Health Care Center Plan, Inc., (CHCP), 150 Sargent Drive, New Haven, Connecticut 06511, a federally qualified health maintenance organization (HMO), that as of that date CHCP had successfully reestablished compliance with its assurance to the Secretary that it would maintain a fiscally sound operation.

FOR FURTHER INFORMATION CONTACT: Frank H. Seubold, Ph.D., Director, Office of Health Maintenance Organizations, Park Building, 3rd Floor, 12420 Parklawn Drive, Rockville, Maryland 20857, 301/443–4106.

SUPPLEMENTARY INFORMATION: Under section 1312(b)(1) of the Public Health Service Act (42 U.S.C. 300e–11(b)(1)), if the Secretary makes a determination under section 1312(a) that a qualified HMO is not organized or operated in the manner prescribed by section 1301(c), then the HMO shall be (1) notified in writing of the determination, and (2) directed to initiate corrective action to bring it into compliance with the assurances it provided to the Secretary under section 1310(d)(1). Section 1312(b)(1) also provides that the Secretary shall publish in the **Federal Register** notices of determinations made under that section.

On February 6, 1980, CHCP was officially notified that it was not in compliance with the assurance it had given the Secretary that it would maintain a fiscally sound operation as required by section 1301(c)(1)(A) of the Act. This determination, a notice of which was published at 45 FR 76798–9 on November 20, 1980, did not affect CHCP's status as a federally qualified HMO. Subsequently, CHCP implemented successfully corrective action to bring it into compliance with its assurances. On November 13, 1981, CHCP was notified by OHMO that, as of that date, it had reestablished compliance with its assurance to the Secretary that it would maintain a fiscally sound operation.

Dated: December 3, 1981.

Frank H. Seubold,

Director, Office of Health Maintenance Organizations.

[FR Doc. 81-35634 Filed 12-11-81; 8:45 am]

BILLING CODE 4160-09-M

Health Maintenance Organizations; Continued Regulation; Determination of Noncompliance and Revocation of Federal Qualification

AGENCY: Public Health Service, HHS.

ACTION: Notice. Continued regulation of Health Maintenance Organizations: Determination of Noncompliance and revocation of federal qualification.

SUMMARY: On August 6, 1980, the Office of Health Maintenance Organizations (OHMO) determined that Health Maintenance of Oregon, Inc., (HMO, Inc.), P.O. Box 8471, Portland, Oregon 97207, a federally qualified health maintenance organization (HMO), was not in compliance with the assurances it had provided to the Secretary that it would (1) maintain a fiscally sound operation, (2) maintain satisfactory administrative and managerial arrangements, (3) provide basic and supplemental health services in a manner which assures continuity of health care, (4) provide meaningful procedures for hearing and resolving grievances, and (5) establish an ongoing quality assurance program for its health services. On October 30, 1981, the Acting Director of OHMO notified HMO, Inc. that he was revoking their Federal qualification and this revocation became effective on November 17, 1981. Accordingly, HMO, Inc. is no longer a federally qualified HMO.

FOR FURTHER INFORMATION CONTACT: Frank H. Seubold, Ph.D., Director, Office of Health Maintenance Organizations, Park Building, 3rd Floor, 12420 Parklawn Drive, Rockville, Maryland 20857, 301/443–4106.

SUPPLEMENTARY INFORMATION: Under section 1312(b)(1) of the Public Health Service Act (the Act) (42 U.S.C. 300e-11(b)(1)), if the Secretary makes a determination under section 1312(a) that a qualified HMO is not organized or operated in the manner prescribed by section 1301(c), then the HMO shall be (1) notified in writing of the determination and (2) directed to initiate corrective action to bring it into compliance with the assurances it provided to the Secretary under section 1310(d)(1). The notice of August 6, 1980, gave HMO, Inc. an opportunity to initiate corrective action to bring it into compliance with the assurances that it would (1) maintain a fiscally sound operation, (2) maintain satisfactory administrative and managerial arrangements, (3) provide basic and supplemental health services in a manner which assures continuity of health care, (4) provide meaningful procedures for hearing and resolving grievances, and (5) establish an ongoing quality assurance program for its health services. The basis for the revocation of Federal qualification was OHMO's determination that HMO, Inc. had not carried out and would not carry out the corrective action necessary to return to compliance.

The effect of the revocation of the Federal qualification of HMO, Inc. is as follows: (1) HMO, Inc. may not seek inclusion in employees' health benefits plans under section 1310 of the Act; (2) with respect to employers including HMO, Inc. in the health benefits plan offered their employees, HMO, Inc. is not a qualified HMO for purposes of section 1310 of the Act; (3) the inclusion of HMO, Inc. in an employees' health benefits plan will be disregarded for purposes of determining whether, and to what extent, the employer is subject to 42 CFR Part 110, Subpart H, and will not constitute compliance with the requirements of that subpart; and (4) HMO, Inc. is not a qualified HMO for purposes of the financial assistance programs under 42 CFR Part 110.

Section 1312(b)(1) of the Act requires that a notice of the determination of noncompliance and of the revocation of Federal qualification of an HMO be published in the **Federal Register**

Dated: December 3, 1981.

Frank H. Seubold,

Director, Office of Health Maintenance Organizations.

BILLING CODE 4160-09-M

Health Maintenance Organizations; Continued Regulation; Determination of Noncompliance and Revocation of Federal Qualification

AGENCY: Public Health Service, HHS.

ACTION: Notice. Continued regulation of Health Maintenance Organizations: Determination of noncompliance and revocation of federal qualification.

SUMMARY: On July 1, 1981, the Office of Health Maintenance Organizations (OHMO) determined that Southern Connecticut Community Health Plan, (SCCHP), 1010 Summer Street, Stamford, Connecticut 06905, a federally qualified health maintenance organization (HMO), was not incompliance with the assurances it had provided to the Secretary that it would maintain a fiscally sound operation. On November 9, 1981, the Acting Director of OHMO notified SCCHP that he was revoking SCCHP's Federal qualification and this revocation became effective on November 17, 1981. Accordingly, SCCHP is no longer a federally qualified HMO.

FOR FURTHER INFORMATION CONTACT: Frank H. Seubold, Ph.D., Director, Office of Health Maintenance Organizations, Park Building, 3rd Floor, 12420 Parklawn Drive, Rockville, Maryland 20857, 301/443-4106.

SUPPLEMENTARY INFORMATION: Under section 1312(b)(1) of the Public Health Service Act (the Act) (42 U.S.C. 300e-11(b)(1)), if the Secretary makes a determination under section 1312(a) that a qualified HMO is not organized or operated in the manner prescribed by section 1301(c), then the HMO shall be (1) notified in writing of the determination and (2) directed to initiate corrective action to bring it into compliance with the assurances it provided to the Secretary under section 1310(d)(1). The notice of July 1, 1981, gave SCCHP an opportunity to initiate corrective action to bring it into compliance with the assurances that it would maintain a fiscally sound operation. The basis for the revocation of Federal qualification was OHMO's determination that SCCHP had not carried out and would not carry out the corrective action necessary to return to compliance.

The effect of the revocation of SCCHP's Federal qualification is as follows: (1) SCCHP may not seek inclusion in employees' health benefits plans under section 1310 of the Act; (2) with respect to employers including SCCHP in the health benefits plan offered their employees, SCCHP is not a qualified HMO for purposes of section 1310 of the Act; (3) the inclusion of SCCHP in an employees' health benefits plan will be disregarded for purposes of determining whether, and to what extent, the employer is subject to 42 CFR Part 110, Subpart H, and will not constitute compliance with the requirements of that subpart; and (4) SCCHP is not a qualified HMO for purposes of the financial assistance programs under 42 CFR Part 110.

Section 1312(b)(1) of the Act requires that a notice of the determination of noncompliance and of the revocation of Federal qualification of an HMO be published in the **Federal Register.**

Dated: December 3, 1981.

Frank H. Seubold,

Director, Office of Health Maintenance Organizations.

BILLING CODE 4160-09-M

Health Maintenance Organizations; Continued Regulation of Health Maintenance Organizations; Determination of Noncompliance and Revocation of Federal Qualification

AGENCY: Public Health Service, HHS.

ACTION: Notice. Continued regulation of Health Maintenance Organizations: Determination of noncompliance and revocation of Federal qualification.

SUMMARY: On September 23, 1981, the Office of Health Maintenance Organizations (OHMO) determined that Portland Metro Health, Inc., (PMHI), 8840 S.W. Canyon Road, Portland, Oregon 97225, a federally qualified health maintenance organization (HMO), was not in compliance with the assurances it had provided to the Secretary that it would (1) maintain a fiscally sound operation and (2) maintain satisfactory administrative and managerial arrangements. On November 13, 1981, the Acting Director of OHMO notified PMHI that he was revoking PMHI's Federal qualification and this revocation became effective on November 20, 1981. Accordingly, PMHI is no longer a federally qualified HMO.

FOR FURTHER INFORMATION CONTACT: Frank H. Seubold, Ph.D., Director, Office of Health Maintenance Organizations, Park Building, 3rd Floor, 12420 Parklawn Drive, Rockville, Maryland 20857, 301/443-4106.

SUPPLEMENTARY INFORMATION: Under section 1312(b)(1) of the Public Health Service Act (the Act) (42 U.S.C. 300e-11(b)(1)), if the Secretary makes a determination under section 1312(a) that a qualified HMO is not organized or operated in the manner prescribed by section 1301(c), then the HMO shall be (1) notified in writing of the determination and (2) directed to initiate corrective action to bring it into compliance with the assurances it provided to the Secretary under section 1310(d)(1). The notice of September 23, 1981, gave PMHI an opportunity to initiate corrective action to bring it into compliance with the assurances that it would (1) maintain a fiscally sound operation and (2) maintain satisfactory administrative and managerial arrangements. The basis for the revocation of Federal qualification was OHMO's determination that PMHI had not carried out and would not carry out the corrective action necessary to return to compliance. Portland Metro Health, Inc. is now in liquidation pursuant to Oregon State statute and has not provided health care services, as required by Title XIII of the Public Health Service Act, since November 14, 1981.

The effect of the revocation of PMHI's Federal qualification is as follows: (1) PMHI may not seek inclusion in employees' health benefits plans under section 1310 of the Act; (2) with respect to employers including PMHI in the health benefits plan offered their employees, PMHI is not a qualified HMO for purposes of section 1310 of the Act; (3) the inclusion of PMHI in an employees' health benefits plan will be disregarded for purposes of determining whether, and to what extent, the employer is subject to 42 CFR Part 110, Subpart H, and will not constitute compliance with the requirements of that subpart; and (4) PMHI is not a qualified HMO for purposes of the financial assistance programs under 42 CFR Part 110.

Section 1312(b)(1) of the Act requires that a notice of the determination of noncompliance and of the revocation of Federal qualification of an HMO be published in the **Federal Register.**

Dated: December 3, 1981.

Frank H. Seubold,

Director, Office of Health Maintenance Organizations.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-81-1104]

President's Commission on Housing; Schedule of Meetings

The President's Commission on Housing announces a tentative schedule of meetings of the Commission and its Committees, through February 26, 1982 (Appendix A). A revised schedule will be published monthly but because of the possibility of changes between publications, persons interested in attending the meetings should call the Commission offices to confirm the date, location and time of each meeting. All Commission and Committee meetings are open to the public.

Further information may be obtained by calling Jean M. Freeze, President's Commission on Housing, 730 Jackson Place N.W., Washington, D.C. 20503, (202) 395-5832.

(Sec. 10(a)(2), Federal Advisory Committee Act, as amended (5 U.S.C. App. I))

Issued at Washington, D.C., December 9, 1981.

Samuel R. Pierce, Jr.,

Secretary, Department of Housing and Urban Development.

Appendix A—Tentative Schedule of Meetings Through Feb. 26, 1982

Date	Commission/committee	Place	Time
Monday, December 14 and Tuesday December 15.	Committee on Government Regulation and the Cost of Housing—Hearings.	Conf. Rm., fourth floor, City Hall Annex, 900 Bagby Street, Houston, Texas	9:00 a.m.
Wednesday, December 16	Committee on Housing Programs—Assisted Housing Task Force—Hearings	NEOB, Room 2008, Washington, D.C.	Do.
Thursday, January 7	Full commission meeting	do	Do.
Friday, January 29	do	do	Do.
Tuesday, February 16	do	do	Do.
Friday, February 26	do	do	Do.

DEPARTMENT OF THE INTERIOR

National Park Service

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before December 3, 1981. Waiver of the 15-day public commenting period following this publication is necessary for the Oregon nominations listed below in order for listing of eligible properties to be accomplished before December 31, 1981. Listing in the National Register by this date will enable property owners to take advantage of Oregon's Historic Property Tax Law of 1975 (ORS 358.475), which provides that owners of properties entered into the National Register of Historic Places, including those properties which have been designated as contributing features of historic districts, may apply for special assessment status—a freeze of the assessed valuation for a 15-year period. Waiver of the public commenting period will allow timely listing which is necessary to aid in the preservation of these properties.

Bruce MacDougal,

Acting Keeper of the National Register.

INTERNATIONAL COMMUNICATION AGENCY

Advisory Commission on Public Diplomacy; Meeting

The United States Advisory Commission on Public Diplomacy will meet in Washington, D.C. on Tuesday, December 15, and Wednesday, December 16 in order to attend to urgent matters. The meetings will be closed to the public because they will involve a discussion of sensitive security information (5 U.S.C. 552b(c)(1)). There also will be a discussion and preparation of the commission's pending report to the Congress, the President, the Secretary of State, and the Director of the International Communication Agency. Premature disclosure of this information is likely to significantly frustrate implementation of proposed Agency action (5 U.S.C. 552b(c)(9)(B)) because there will be a discussion of future Agency policy and programs.

Dated: December 9, 1981.

[Volume No. OPY-2-235A]

Motor Carriers; Finance Applications; Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's rules of practice (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 ICC 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absense of legally sufficient protests as to the finance application or to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Decided: December 4, 1981.

By the Commission, Review Board Number 1, Members Parker, Chandler, and Fortier.
Agatha L. Mergenovich,
Secretary.

MC-F-14733, filed November 4, 1981. HAROLD E. ANTONSON AND MICHAEL E. KIBLER (Applicants) (both of 7336 W. 15th Ave., Gary, IN 46406)—continuance in control—Eastern Refrigerated Express, Inc. (Eastern), (same address as above). Representative: Bernard J. Kompare, Suite 1600, 10 S. LaSalle St., Chicago, IL 60603, (312) 263-1600. Applicants seek authority to continue in control of Eastern upon the institution by Eastern of operations, in interstate or foreign commerce, as a motor common carrier. Applicants, each own 45% of Eastern's stock, seek to acquire control of said rights and property through the transaction. Applicants, non-carriers, also control Enterprise Truck Line, Inc., which holds authority issued by the Commission in Docket No. MC-123194 and subs thereto, and Southern Refrigerated Transportation Co., which holds authority under Docket No. MC-119792 and subs thereto, and MC-145454 and subs thereto. Such common control was approved in MC-F-13676.

Note.—Eastern has filed as a directly related application its initial common carrier application, docketed MC-153703, published in this same **Federal Register** issue

[FR Doc. 81-35600 Filed 12-11-81; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Long-and Short-Haul Application for Relief (Formerly Fourth Section Application)

December 9, 1981.

This application for long-and-short-haul relief has been filed with the ICC.

Protests are due at the ICC within 15 days from the date of publication of the notice.

No. 43948, Southwestern Freight Bureau, Agent (No. B-142), reduced rates on iron or steel pipe and related articles from Centaur, MO to stations in Arkansas, Louisiana, Missouri, New Mexico, Oklahoma, and Texas, in Supplement 309 to its tariff ICC SWFB 4853, effective December 28, 1981. Grounds for relief—Origin Rate Relationships.

By the Commission.

BILLING CODE 7035-01-M

[Volume No. OPY-2-235]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special

Rule 252 of the Commission's general rules of practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Decided: December 4, 1981.

By the Commission, Review Board Number 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

MC 153703, filed November 4, 1981. Applicant: EASTERN REFRIGERATED EXPRESS, INC., 7336 W. 15th Ave., Gary, IN 46406. Representative: Bernard J. Kompare, 10 S. LaSalle St., Suite 1600, Chicago, IL 60603, (312) 263–1600. Transporting *such commodities* as are dealt in or used by grocery stores, drugstores, food business houses, and department stores, between points in IL, IN, MI, OH, and WI, on the one hand, and, on the other, points in CT, DE, MA, MD, ME, NH, NJ, NY, OH, PA, RI, VA, VT, WV, and DC.

Note.—This application is directly related to MC–F–14733 published in the same Federal Register issue.

BILLING CODE 7035–01–M

[Volume No. 207]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: December 8, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the Federal Register of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Ewing, and Shaffer.

Agatha L. Mergenovich,

Secretary.

MC 475 (Sub-7)X, filed November 24, 1981. Applicant: WYMORE TRANSFER CO., P.O. Box 448, Oregon City, OR 97045. Representative: Earle V. White, 2400 S.W. Fourth Avenue, Portland, OR 97201. Lead and Subs 1, 4F, and 6F: (1) broaden general commodities (with exceptions) to "general commodities (except classes A and B explosives, and commodities in bulk)", lead; (2) allow service at all intermediate points, lead and Sub 1; and (3) change one-way to radial authority, Subs 4F and 6F.

MC 6380 (Sub-11)X, filed November 20, 1981. Applicant: R. F. TRUESDELL, INC., 6515 Anno Ave., Orlando, FL 32809. Representative: Paul M. Daniell, Suite 1200, 235 Peachtree St., N.E., Atlanta, GA 30303. Subs 4, 6 and 10 permits: Broaden to (1) "such commodities as are used by or dealt in by manufacturers of paper and paper products" from pulpboard, fibreboard boxes, plain or woodcleated; paper and paper products, except printing or fine papers; and/or corrugated and solid fibre boxes or containers, plain or wood reinforced, and returned shipments, all Subs; and (2) "between points in the U.S., (except AK & HI)" under continuing contract(s) with a named shipper.

MC 19227 (Sub-257)X, filed November 25, 1981. Applicant: LEONARD BROS. TRUCKING CO., INC., 2515 N.W. 20th Street, Miami, FL 33152. Representative: Robert F. McCaughey (same as applicant). Lead and Subs 1, 43, 44, 54, 68, 75, 77, 78, 80, 82, 84, 86, 88, 90, 107, 109, 111, 112, 114, 116, 118, 119, 121, 122, 123, 124, 127, 133, 135, 148, 152, 154, 155, 160, 164, 165, 167, 168, 173, 176, 177, 190, 192, 194, 195, 196, 198, 200, 202G, 204, 205, 206, 222, 223, 227, 228, 231, 234, 235, 236, 238, 241F, 242F, 243F, 244F, 246F, 248F, 249F, 250F, 251F, and 252 certificates and E–letters E–1, E–2, E–3, E–4, and E–6 letter notices: (A) broaden the commodity description to: (1) "metal products, machinery, transportation equipment, and lumber and wood products" from structural steel, contractor's equipment, and machinery, concrete and metal culverts, tanks, farm equipment and machinery, pilings and poles, and road building equipment, lead (part 5); (2) "food and related products"

from vegetables and citrus fruits, lead (part 7) and fresh meats, poultry, canned meats, canned animal foods, butter, cheese, eggs, oleomargarine, lard, and vegetable oils or compounds, lead (part 8); (3) "mercer commodities, and those commodities which because of their size or weight require the use of special handling or equipment" from machinery, equipment, materials and supplies used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and

such commodities as require specialized handling or rigging because of size or weight in Sub 75; (4) "machinery, and transportation equipment" from forklift trucks and parts and accessories therefor when moving in connection therewith, Sub 77, and forklift trucks, platform trucks and warehouse trucks and parts and accessories therefor when moving in connection therewith, Sub 78; (5) "machinery and parts, materials, and supplies" from concrete handling equipment, and parts, materials, and supplies used in the construction, maintenance, and servicing, Sub 200; (6) "lumber and wood products" from lumber, Subs 86 and 133, lumber and lumber products, Sub 111 (part 3), and posts, poles, and piling and lumber, Sub 111 (part 4); (7) "those commodities which because of their size or weight require the use of special handling or equipment" from communications and transmission towers, and parts thereof when moving in connection with such towers, Sub 90, refuse disposal equipment, Subs 121, 122, 123, and 124, therapy pools, Subs 194, 195, 196, and 198, power control rooms, and switchgear, when moving in mixed loads with power control rooms, Sub 223, and rock crusher equipment, Sub 231; (8) "building materials, and metal products" from wall partition panels, panel core, and aluminum extrusions used in the construction of wall partitions and parts moving therewith, Sub 109; (9) "building materials" from composition board and composition sheets, Sub 111 (part 1), and gypsum wallboard, gypsum lath, and gypsum wallboard products, Sub 111 (part 2); (10) "metal products" from iron and steel articles, Subs 116 and 222, pipe and pipe fittings, cast iron meter boxes, manhole frames and manhole covers, Sub 155, aluminum pipe and extrusions, Sub 176, iron and steel articles, and iron and steel scrap, Sub 204, aluminum, aluminum products, and supplies, materials, and equipment used in the manufacture of aluminum and aluminum products, and zinc and zinc alloys, Sub 227, iron and steel articles, Sub 238, metal roofing, metal siding, and fabricated metal products, materials, equipment, and supplies used in the manufacture and distribution of the commodities named, Subs 242F and 245F, and aluminum and aluminum products, and materials, equipment, and supplies used in the manufacture of the commodities named, Sub 243F; (11) "machinery, and those commodities which because of their size or weight require the use of special handling or equipment" from portable cement batching plants and related parts and supplies, Sub 148, and bronze propellers and accessories, and machinery, equipment, and parts used in the manufacture, assembly, and servicing of propellers, Sub 190; (12) "machinery" from machinery, equipment, and parts used in the construction, asembly, servicing, and operation of boats, ships, and submarines, and equipment, parts and supplies in Sub 152, material handling equipment and parts for material handling equipment, Sub 160, and air-conditioning machines, Sub 248F; (13) "rubber and plastic products" from plastic pipe, plastic tubing and plastic fittings, Subs 164, 165, and 167, and extruded or injection molded rubber and plastic products and materials, supplies, and equipment used in the manufacture, sale, and distribution of commodities named, Sub 241F; (14) "transportation equipment" from buses, Sub 205, and buses, weighing less than 15,000 pounds, Sub 206; and (15) "self-propelled articles" from self-propelled articles weighing 15,000 pounds or more, and related machinery, tools, parts, and supplies moving in connection therewith, lead (part 6), and Sub 202–G (part D) and E–1, E–2, E–3, E–4, and E–6; (B) remove plantsite restrictions, Subs 80, 82, 84, 111, 114, 118, 121, 122, 123, 124, 133, 134, 152, 160, 164, 167, 173, 177, 190, 194, 195, 196, 198, 200, 204, 222, 223, 227, 231, 235, 236, 238, 241F, 242F, 243F, 244F, 245F, 249F, and 251F; (C) change one-way to radial authority, lead and Subs 54, 77, 78, 80, 82, 84, 86, 90, 111, 112, 116, 121, 122, 123, 124, 133, 148, 154, 155, 160, 164, 165, 167, 168, 176, 177, 192, 194, 195, 196, 198, 200, 202G, 204, 205, 206, 222, 223, 231, 234, 236, 238, 241F, 242F, 244F, 245F, 246F, 248F, 249F, 250F, 251F; (D) replace city-wide with county-wide authority: Miami, FL and points within 10 miles thereof (Dade and Broward Counties), Fort Lauderdale, FL (Broward County), and Palm Beach and West Palm Beach, FL (Palm Beach County), lead; Miami, FL and points within 25 miles thereof (Dade and Broward Counties), Sub 1; Burbank, CA (Los Angeles County), Chula Vista, CA (San Diego County), and Marietta, GA (Cobb County), Sub 54; Patrick Air Force Base, Cape Canaveral, FL (Brevard County), Sub 68; Peoria, IL (Peoria County), and Danville, IL (Vermillian County), Sub 77; Cleveland, OH (Cuyahoga County), Sub 78; Culver City, CA (Los Angeles County), Sub 80; Louisville, KY (Jefferson County), Subs 82 and 84; Martell, CA (Amador County), and Standard, CA (Tuolumne County), Sub 86; Los Angeles, CA (Los Angeles County), Fullerton, CA (Orange County), Paramount, CA (Los Angeles County), and Charlotte, NC (Mecklenburg County), Sub 109; BILLING CODE 7035-01-M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docked and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-172

The following applications were filed in Region I: Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81–35603 Filed 12–11–81; 8:45 am]

BILLING CODE 7035–01–M

[Ex Parte No. 387 (Sub-No. 69)]

Rail Carriers; the Alaska Railroad; Exemption for Contract Tariff

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provision exemption.

SUMMARY: Petitioner is granted a provisional exemption under 49 U.S.C. 10505 from the notice requirement of 49 U.S.C. 10713(e). This contract tariff may become effective on one day's notice. This exemption may be revoked if protests are filed within 15 days of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Jane F. Mackall (202) 275–765.

SUPPLEMENTARY INFORMATION: The Alaska Railroad filed a petition on November 27, 1981, seeking an exemption under 49 U.S.C. 10505 from the statutory notice provisions of 49 U.S.C. 10713(e), to advance the effective date of its contemporaneously filed contract tariff ICC–ARR–C–0003, now December 19, 1981. The contract covers the movement of building materials to Alaska from points in the continental United States.

Under 49 U.S.C. 10713(e), contracts must be filed on not less than 30 nor more than 60 days' notice. There is no provision for waiving this requirement. Cf. former section 10762(d)(1). However, the Commission has granted relief under our section 10505 exemption authority in exceptional situations.

The petition is granted. The shipper's need for immediately movement of supplies to Alaska to accommodate winter construction requirements and provide seasonal inventory create circumstances under which authorization of a provisional exemption is warranted. Alaska Railroad's contract tariff ICC–ARR–C–0003 may become effective on one day's notice. [1]

We will apply the following conditions which have been imposed in similar exemption proceedings:

> If the Commission permits the contract to become effective one day's notice, this fact neither shall be construed to mean that this is a Commission approved contract for purposes of 49 U.S.C. 10713(g) nor shall it serve to deprive the Commission of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to disapprove it.

Subject to compliance with these conditions, under 49 U.S.C. 10505(a) we find that the 30 day notice requirement in these instances is not necessary to carry out the transportation policy of 49 U.S.C. 10101a and is not needed to protect shippers from abuse of market power. Further, we will consider revoking these exemptions under 49 U.S.C. 10505(c) if protests are filed within 15 days of publication in the **Federal Register.**

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

(49 U.S.C. 10505)

Dated: December 7, 1981.

By the Commission, Division 1, Commissioners Clapp, Gresham, and Taylor. Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–43 (Sub-No. 77F]

Rail Carriers; Illinois Central Gulf Railroad Co.—Abandonment—Near Ackerman to Woodland, MS; Findings

The Commission has issued a certificate authorizing Illinois Central Gulf Railroad Company to abandon its New Albany District that extends from railroad milepost 239.5 near Ackerman, MS (excluding Ackerman) to milepost 274.0 at Woodland, MS (excluding Woodland, though the station designated as Woodland will only be used after abandonment to handle billing to and from a nearby Westvaco plant), a distance of 34.50 miles in Chickasaw, Choctaw, and Webster Counties, MS, subject to certain conditions. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this notice. Any offer previously made must be remade within this 10 day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1121.38.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81–35595 Filed 12–11–81; 8:45 am]

BILLING CODE 7035–01–M

[Directed Service Order no. 1398]

Rail Carriers; Kansas City Terminal Railway Co. Directed to Operate Over—Chicago, Rock Island & Pacific Railroad Co., Debtor (William M. Gibbons, Trustee); Termination of Claim Settlement Operations

AGENCY: Interstate Commerce Commission.

ACTION: directed rail carrier ordered to terminate claim settlement operations.

SUMMARY: Kansas City Terminal Railway Company, as directed rail carrier (KCT–DRC), performed operations over the lines of the Chicago, Rock Island & Pacific Railroad Company, Debtor (William M. Gibbons, Trustee) (Rock Island or RI) from October 1979 through March 1980. KCT–DRC continues to maintain a staff at RI headquarters in Chicago settling claims arising from directed operations. We direct KCT–DRC to terminate claim settlement operations on March 31, 1983, contingent upon approval of a supplemental appropriation by Congress to fund such operations.

DATE: This decision is effective on December 9, 1981.

[1] Insufficient time was available to grant petitioner's request for a December 1 effective date.

ADDRESS: For copies of the full decision write to: Interstate Commerce Commission, Room 2227, Washington, D.C. 20423 or call Toll Free 800–424–5403.

FOR FURTHER INFORMATION CONTACT: Joel Burns (202) 275–6887.

SUPPLEMENTARY INFORMATION: For further information, see the Commission's decision in directed Service Order No. 1398—Termination of Claim Settlement Operations.

Dated: December 2, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam. Commissioner Gresham dissented with a separate expression.

Agatha L. Mergenovich,

Secretary.

Commissioner Gresham, dissenting.

I am not confident that supplemental appropriations will be provided to the Commission to fund the majority's plan. In that case, any possibility of an orderly termination will have been lost. Moreover, I do not believe that it is responsible for the Commission to spend in excess of $5 million in administrative costs alone to settle claims for 179 days of rail operations. Indeed, the Commission has an obligation to minimize the costs associated with directed service. I do not believe that we have adequately addressed other alternatives which might reduce costs.

[Finance Docket No. 29774]

Rail Carriers; Louisville & Nashville Railroad Co.—Exemption—Abandonment in Jefferson County, AL

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the requirements of prior approval under 49 U.S.C. 10903 the abandonment by Louisville and Nashville Railroad Company of its 9,421 feet line segment between Bessemer and Readers, AL.

DATES: This exemption is effective 30 days after this publication. Petitions for reconsideration must be filed within 20 days.

ADDRESSES: Send petitions to:

(1) Interstate Commerce Commission, Section of Finance, Rm 5417, Washington, D.C. 20423
and
(2) R. Lyle Key, Jr., Asst. General Solicitor, Louisville and Nashville Railroad Company, 500 Water Street, Jacksonville, FL 32202.

For copies of the full decision write to: Interstate Commerce Commission, Room 2227, Washington, D.C. 20423 or call Toll Free (800) 424–5403.

Correspondence should refer to Finance Docket No. 29774.

FOR FURTHER INFORMATION CONTACT: Ellen D. Hanson, (202) 275–7245
or
Ernest B. Abbott, (202) 275–3002.

SUPPLEMENTARY INFORMATION: For further information, see the Commission's decision in Finance Docket No. 29774.

Decided: December 4, 1981.

By the Commission, Chairman Taylor, Vice-Chairman Clapp, Commissioners Gresham and Gilliam.

BILLING CODE 7035–01–M

LEGAL SERVICES CORPORATION

Private Attorney Involvement by Recipients of Funding

AGENCY: Legal Services Corporation.

ACTION: Instruction.

SUMMARY: The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93–355a 88 Stat. 378, 42 U.S.C. 2996–2996*l*, as amended, Pub. L. 95–222 (December 28, 1977). Section 1008(e) of the Legal Services Corporation Act provides:

The Corporation shall * * * publish in the Federal Register at least 30 days prior to their effective date all its rules, regulations, guidelines and instructions.

The Legal Services Corporation hereby publishes its instruction on private attorney involvement by recipients of Legal Services Corporation funding.

EFFECTIVE DATE: This instruction is effective January 14, 1982.

FOR FURTHER INFORMATION CONTACT: Theron P. O'Connor, Office of Field Services, Legal Services Corporation, 733 15th Street, NW., Washington, D.C. 20005, (202) 272–4080.

Dan J. Bradley,

President, Legal Services Corporation.

December 9, 1981.

Instruction

I. Purpose

The purpose of this Instruction is to provide direction to recipients of Legal Services Corporation funding in meeting the terms of the Special Condition on private attorney involvement placed upon 1982 grant awards. It is designated to ensure that recipients, through policies and plans adopted by their governing bodies, will provide such opportunities in the most effective and economical manner and consistent with the purposes and requirements of the Legal Services Corporation Act.

The Special Condition provides:

Consistent with an Instruction to be issued by the Corporation, the recipient shall allocate a substantial amount of its annualized Basic Field grant award to provide the opportunity for the involvement of private attorneys in the delivery of legal

assistance to eligible clients. As a guideline, a substantial amount shall be defined as ten percent of the recipient's annualized Basic Field grant award.

Consistent with an Instruction to be issued by the Corporation, recipients of annualized Native American, Migrant and State Support grant awards shall analyze the feasibility of involving private attorneys in the activities undertaken pursuant to such grants.

II. General Policy

The Special Condition implements a policy and statement of Principles on Private Attorney Involvement that was adopted by the Board of Directors of the Corporation on October 2, 1981. That policy requires that a substantial amount of funds be made available to provide the opportunity for the involvement of private attorneys in the delivery of legal assistance to eligible clients.

The policy builds on local program experience, as well as formal research and experimentation undertaken by the Corporation, that has provided comprehensive information about the delivery of legal services to the poor. This information and experience demonstrate several things: the staff attorney system is an effective and economical structure to deliver publicly supported legal assistance to the poor; there are many private attorneys willing and able to provide high quality legal assistance to the poor; and, there are a variety of mechanisms for involving private attorneys, on either a voluntary or a partially-compensated basis, that can be adapted for effective local use.

The Corporation's policy is designed to enhance the participation of private attorneys, through established local programs, in localities where this has not yet occurred, in ways that make sense for those particular communities.

As a guideline, the term "substantial amount" has been defined as ten percent (10%) of the annualized Basic Field grants awarded to existing recipients. To achieve that goal the Corporation will direct that each recipient develop and implement a plan to allocate a substantial amount of its annualized Basic Field grant to activities consistent with this Instruction. In the case of joint efforts involving two or more recipients, the ten percent guideline shall be applied to the aggregate of annualized Basic Field funds involved. Each recipient in any such effort shall be a bona fide participant in the activities undertaken by the joint venture.

Recipients of annualized Native American, Migrant and State Support grant awards, while not subject to the ten percent guideline, shall analyze the feasibility of involving private attorneys in the activities undertaken pursuant to such grants.

Private attorney involvement must be seen as an integral part of a total local program, undertaken within the established priorities of that program in a manner that furthers the fundamental values of high quality, economical and effective client-centered legal assistance to the poor. Decisions about how to meet the substantial involvement requirement rest with the recipient through its governing body. The Corporation expects, however, that the recipient will develop and implement its plan in consultation with its clients and staff, and with the organized bar, including minority and women's bar groups, and private attorneys in its service area. Experience has indicated that effective private attorney involvement occurs in those communities where the legal services program and relevant bar organizations have been able to work together in the design and implementation of a plan to achieve that involvement.

To ensure that activities undertaken pursuant to the Special Condition will result in the continued provision of the highest quality services in the most effective and economical manner, the Corporation will make available to recipients a program of support and technical assistance designed to aid them in meeting this requirement.

III. Range of Activities

(a) Private attorneys can be effectively involved in the delivery of legal assistance to eligible clients in a variety of ways and in response to a variety of priority legal needs of clients. At a minimum the following considerations will apply in defining the range of activities permitted in meeting the requirements of this Instruction:

(1) The primary consideration in undertaking any such activities shall be the provision of the highest quality services to eligible clients in the most effective and economical manner; and

(2) Activities undertaken by the recipient to meet the requirements of this Instruction might include, but not necessarily be limited to:

(A) Direct delivery of legal assistance to eligible clients through organized pro bono or reduced fee plans utilizing volunteer attorneys, judicare panels, private attorney contracts, and/or organized referral systems;

(B) Support provided by private attorneys to the recipient in its delivery of legal assistance to eligible clients on either a reduced fee or pro bono basis through the provision of community legal education; training; technical assistance; research; advice and counsel; co-counseling arrangements; and, the use of private law firm facilities, libraries, computer assisted legal research systems and other resources; and,

(C) Support provided by the recipient in furtherance of activities undertaken pursuant to (A) above including the provision of training; technical assistance; research; advice and counsel; and, the use of recipient facilities, libraries, computer assisted legal research systems and other resources.

(b) The specific activities to be undertaken by a recipient to involve private attorneys in the provision of legal assistance to eligible clients will be determined by the recipient taking into account the following factors:

(1) The priority legal needs of eligible clients in the service area;

(2) The most effective and economical delivery of legal assistance to eligible clients;

(3) Linguistic and cultural barriers to effective advocacy;

(4) Actual or potential conflicts of interest between participating attorneys and eligible clients;

(5) The substantive and practice expertise of participating attorneys; and,

(6) The knowledge and information available from the Delivery Systems Study and other literature and experience related to the involvement of private attorneys in the delivery of legal assistance to eligible clients.

(c) Systems designed to provide direct services to clients by private attorneys, on either a pro bono or reduced fee basis, shall include at a minimum the following components:

(1) Intake and case acceptance procedures which are consistent with the recipient's established priorities in meeting the legal needs of eligible clients;

(2) Case assignment procedures which ensure the referral of cases according to the nature of the legal problem or problems involved and the skills, experience and substantive expertise of the participating attorneys;

(3) Case oversight and follow-up procedures which ensure the timely disposition of cases in a manner and in a forum calculated to achieve, insofar as possible, the result desired by the client and the most efficient utilization of recipient resources; and,

(4) Support and technical assistance procedures which, where appropriate and to the extent feasible, will provide access for participating attorneys to materials, training opportunities and back-up on substantive poverty law and practice considerations.

(d) The recipient shall utilize financial systems and procedures to account for costs allowable in meeting this instruction which will:

(1) Meet the requirements of the Corporation's Audit and Accounting Guide for Recipients and Auditors; and,

(2) Accurately identify and account for: (A) The recipient's administrative, overhead, staff, and support costs related to carrying out private attorney involvement activities; (B) payments to private attorneys for supportive or direct client services rendered; (C) contractual payments to individuals or organizations which will undertake administrative, supportive, and/or direct services to eligible clients on behalf of the recipient consistent with the provisions of this Instruction; and, (D) such other actual costs as may be incurred by the recipient in this regard.

IV. Procedure

(a) Each recipient shall develop a plan to meet the requirements of this Instruction. The plan shall:

(1) Take into consideration the legal needs of eligible clients in the geographic area served by the recipient and the relative importance of those needs consistent with the priorities established pursuant to section 1007(a)(2)(C) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)(2) and Part 1620 of the Regulations (45 CFR 1620) adopted pursuant thereto; and

(2) Take into consideration the delivery mechanisms potentially available to provide the opportunity for the participation of private attorneys in meeting the established priority legal needs of clients in the most effective and economical manner.

(b) The recipient shall provide the opportunity for consultations with significant segments of the client community, the recipient's employees, and private attorneys and bar associations in the recipient's service area in the development of its plan to provide the opportunity for the involvement of private attorneys in the provision of legal assistance to eligible clients.

(c) On or before March 31, 1982, the recipient shall prepare and submit to the appropriate Regional Office of the Corporation a brief report describing how the recipient will provide the opportunity for private attorneys to participate in the provision of legal assistance to eligible clients. In the case of joint efforts the preparation and submission of the required report shall be the joint responsibility of all participating recipients and shall demonstrate the bona fide participation of each such recipient in the activities to be undertaken. The report shall include:

(1) A brief summary of the priority legal needs of eligible clients;

(2) A brief summary of any delivery mechanisms potentially available to the recipient in meeting those needs in the most effective and economical manner through the involvement of private attorneys;

(3) A brief summary of the consultations with eligible clients, recipient employees, and private attorney groups in developing its plan to provide the opportunity for the involvement of private attorneys in the delivery of legal assistance to eligible clients;

(4) A brief description of the activities which the recipient will undertake to meet the requirements of this Instruction including, where required, its procedures for meeting the provisions of paragraph (c) of section III; and

(5) A tentative budget showing the annualized allocation of a substantial amount of the recipient's Basic Field grant to the activities undertaken to meet the requirements of the Special Condition.

(d) A recipient which currently allocates a substantial amount of its annualized Basic Field grant award to provide the opportunity for the involvement of private attorneys in the delivery of legal assistance to eligible clients, or which has already developed a plan to that end which is consistent with the requirements of this Instruction, need not comply with paragraphs (a) and (b) above. Such recipient shall, however, prepare and submit the report required by paragraph (c) above.

(e) Implementation by the recipient of the plan adopted pursuant to paragraph (a) above shall begin on or before June 30, 1982 and shall be fully operational on or before September 30, 1982.

(f) On or before September 30, 1982, the recipient shall certify to the Corporation that it is expending, consistent with the ten percent guideline, a substantial amount of its annualized Basic Field grant in furtherance of the activities described in the report required in paragraph (c) above.

(g) For recipients of annualized Native American, Migrant and State Support grant awards, the following procedures will apply:

(1) Each such recipient shall analyze the feasibility of involving private attorneys in the activities undertaken pursuant to such grants. The analysis shall:

(A) Take into consideration the legal needs of eligible clients in the geographic area served by the recipient and the relative importance of those needs consistent with the priorities established pursuant to section 1007(a)(2)(C) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)(2)) and Part 1620 of the Regulations (45 CFR 1620) adopted pursuant thereto; and

(B) Take into consideration the methods potentially available to provide the opportunity for the participation of private attorneys in the activities undertaken pursuant to the such grants.

(2) Each such recipient shall provide the opportunity for consultations with significant segments of the client community, the recipient's employees, and private attorneys and bar associations in the recipient's service area in the feasibility analysis.

(3) On or before September 30, 1982, each such recipient shall prepare and submit to the appropriate Regional Office of the Corporation a brief report describing the feasibility of private attorney participation in the activities undertaken pursuant to such grants. The report shall include:

(A) A brief summary of the priority legal needs of eligible clients and the relative priority of other activities undertaken pursuant to such grants;

(B) A brief summary of the methods of involving private attorneys in meeting those needs or in other activities undertaken pursuant to the recipient's grant in the most effective and economical manner;

(C) A brief summary of the consultations with eligible clients, recipient employees and private bar groups in developing the feasibility analysis; and,

(D) A brief description of any private attorney involvement in the activities undertaken pursuant to such grants.

(4) Each such recipient which has already analyzed the feasibility of involving private attorneys in the activities undertaken pursuant to such grants need not comply with paragraphs (1) and (2) above. Such recipient shall, however, prepare and submit the report required by paragraph (3) above.

Issued: December 9, 1981.

Dan J. Bradley,

President, Legal Services Corporation.

BILLING CODE 6820-35-M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrence; Calculated Radiation Exposures Exceeding 10 CFR Part 20 Limits

Section 208 of the Energy Reorganization Act of 1974, as amended, requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events which the Commission determines are significant from the standpoint of public health and safety). The following incident was determined to be an abnormal occurrence using the criteria published in the **Federal Register** on February 24, 1977 (42 FR 10950). Example I.A.2 ("For All Licensees") of the Policy Statement notes that an exposure to an individual in an unrestricted area such that the whole body dose received exceeds 0.5 rems in one calendar year (10 CFR 20.105(a)) can be considered an abnormal occurrence. The following description of the event also contains the remedial action taken.

Date and Place—On May 5, 1981, the Eveleth Expansion Company of Eveleth, Minnesota reported that between April 3 and 7, 1981, personnel working inside an iron ore pellet cooler had been exposed to radiation from a 10 curie, cesium-137 sealed source contained in a level control gauge.

Nature and Probable Consequences—The Pellet Plant cooler had been shut down for repairs on March 30, 1981. On that day, the shutter mechanism of the level control gauge containing a nominal 10 curie cesium-137 sealed source was locked in the closed position. Radiation surveys performed at that time appeared to indicate that the source was properly shielded. After a cooldown period, workmen entered the cooler on April 3, 1981, to replace refractory material on the cooler walls. On April 7, licensee personnel discovered that there were radiation levels in excess of 100 mr/hr within the cooler (later determined to be up to 2.2 rems/hr where the radiation beam entered the cooler). It was determined that several individuals had been exposed to a radiation beam from the source during the working days between April 3 and 7, 1981.

The gauge source holder was removed from its mounting and licensee personnel found that the lead shielding in the shutter had melted and drained from the shield location. This rendered the shielding integrity of the shutter useless.

Investigation showed that 17 licensee personnel and 14 contractor personnel had entered the cooler between April 3 and 7, 1981. Radiation levels in the work area were in excess of 100 mr/hr. The calculated radiation exposures received ranged from 0.14 rem to 3 rem. During the repairs, the pellet cooler area was considered an unrestricted area; of the 31 personnel, it is calculated that 14 had received whole body exposures in excess of 0.5 rems. No health effects were observed nor would be expected from these exposures. *Cause or Causes*—The gauge head was mounted external to the cooler on an upper level so that the source beam would traverse the cooler diagonally to activate the detector on the other side of the cooler, which controlled the speed of the circular cooler.

A hole had been cut in the side of the cooler to reduce shielding and allow more effective operation of the cesium-137 source in the gauge. During recent efforts to increase production, the pressure of the air forced into the cooler had been increased as a means of accelerating the cooling of the pellets. As a result, hot gases may have been forced out the aperture in the cooler wall at the location of the source holder. The temperature of the pellets entering the cooler is about 2400°F, considerably above the melting point of lead. The heat reaching the gauge was sufficient to melt the aluminum alloy dust cover over the gauge shutter mechanism, and to melt the lead in the shutter, thereby allowing a radiation beam to escape the gauge.

The plant was shut down for periodic maintenance and overhaul of the cooler. At the time of the shutdown, the level gauge was secured and the shutter placed in the "lock out" position. The licensee performed a survey, but because of the relative inaccessibility of the gauge location, likely did not detect the unshielded beam. A reading of about 10 mr/hr was reportedly obtained from this measurement. This indicated to the licensee that the gauge was shut off with the shutter in the closed position. (There is also some evidence that the survey meter was not functioning properly at the time and this may be another reason why the radiation beam was not discovered during the survey—neither NRC regulations nor the license conditions required the licensee to perform a survey when the source holder shutter is locked in a closed position).

Actions Taken To Prevent Recurrence

Licensee—The source holder was adequately shielded, placed in properly posted storage, and subsequently shipped to the supplier for repair or disposal.

In the meantime, a gauge manufactured by a different supplier, containing a cobalt-60 sealed source, was installed in place of the inoperable gauge. A new lockout procedure has been established and is being followed by the licensee. Individual workers have been notified in writing of their calculated exposures.

The removed source holder shutter assembly is to be repaired by the supplier so that the lead shielding would be contained in a sealed steel enclosure to prevent the lead from leaking out in the event of exposure to high temperatures. The shutter compartment cover is to be changed to stainless steel to prevent its deterioration.

NRC—The incident was investigated by the NRC on May 19–21, and 26, 1981. Two items of noncompliance were identified: 10 CFR 20.101—individuals received exposures in excess of regulatory limits; and 10 CFR 20.105—radiation levels were created in an unrestricted area in excess of regulatory limits. The licensee was not cited for these items in accordance with the section of the Interim Enforcement Policy which states, in part, that licensees will not ordinarily be cited for violations resulting from matters not within their control that could not have been reasonably foreseen.

The event is being considered for possible generic implications.

Dated at Washington, D.C. this 8th day of December 1981.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 81-35861 Filed 12-11-81, 8:45 am]

BILLING CODE 7590-01-M

Abnormal Occurrence; Failure of High Pressure Safety Injection System

Section 208 of the Energy Reorganization Act of 1974, as amended, requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events which the Commission determines are significant from the standpoint of Public health and safety). The following incident was determined to be an abnormal occurrence using the criteria published in the **Federal Register** on February 24, 1977 (42 FR 10950). One of the general criteria of the Policy Statement notes that major degradation of essential safety-related equipment can be considered an abnormal occurrence. The following description of the event also contains the remedial action taken.

Date and Place—On September 3, 1981, the NRC was notified by Southern California Edison Company (the

licensee) of a condition involving failure of two safety injection valves to open upon receipt of a safety injection signal at the San Onofre Nuclear Generating Station Unit 1. The San Onofre Unit 1 plant utilizes a pressurized water reactor and is located in San diego County, California.

Nature and Probable Consequences—At about 3:30 AM on September 3, with the reactor at 88% power, one of the regulated power supplies serving one of the two redundant paths of the Reactor Protection System and a portion of the Control and Indication System failed. As a result, feedwater and steam flow and steam generator water level indications were lost for the steam generator served by this power supply and oscillations were observed in similar flow and level indications of the other two steam generators. The operators placed the steam generator water level controls under manual control and then manually tripped the reactor. During this period, high steam generator water levels resulted in increased cooling of the Reactor Coolant System (RCS), thereby reducing the system pressure. At 1735 psig, a Safety Injection Actuation Signal (SIAS) was automatically initiated, in accordance with system design. Subsequently, RCS pressure increased, SIAS was reset at 4:00 AM, and safety injection terminated.

At San Onofre Unit 1, the two steam generator feedwater pumps are also part of the safety injection system (see Figure 1).

BILLING CODE 7590-01-M

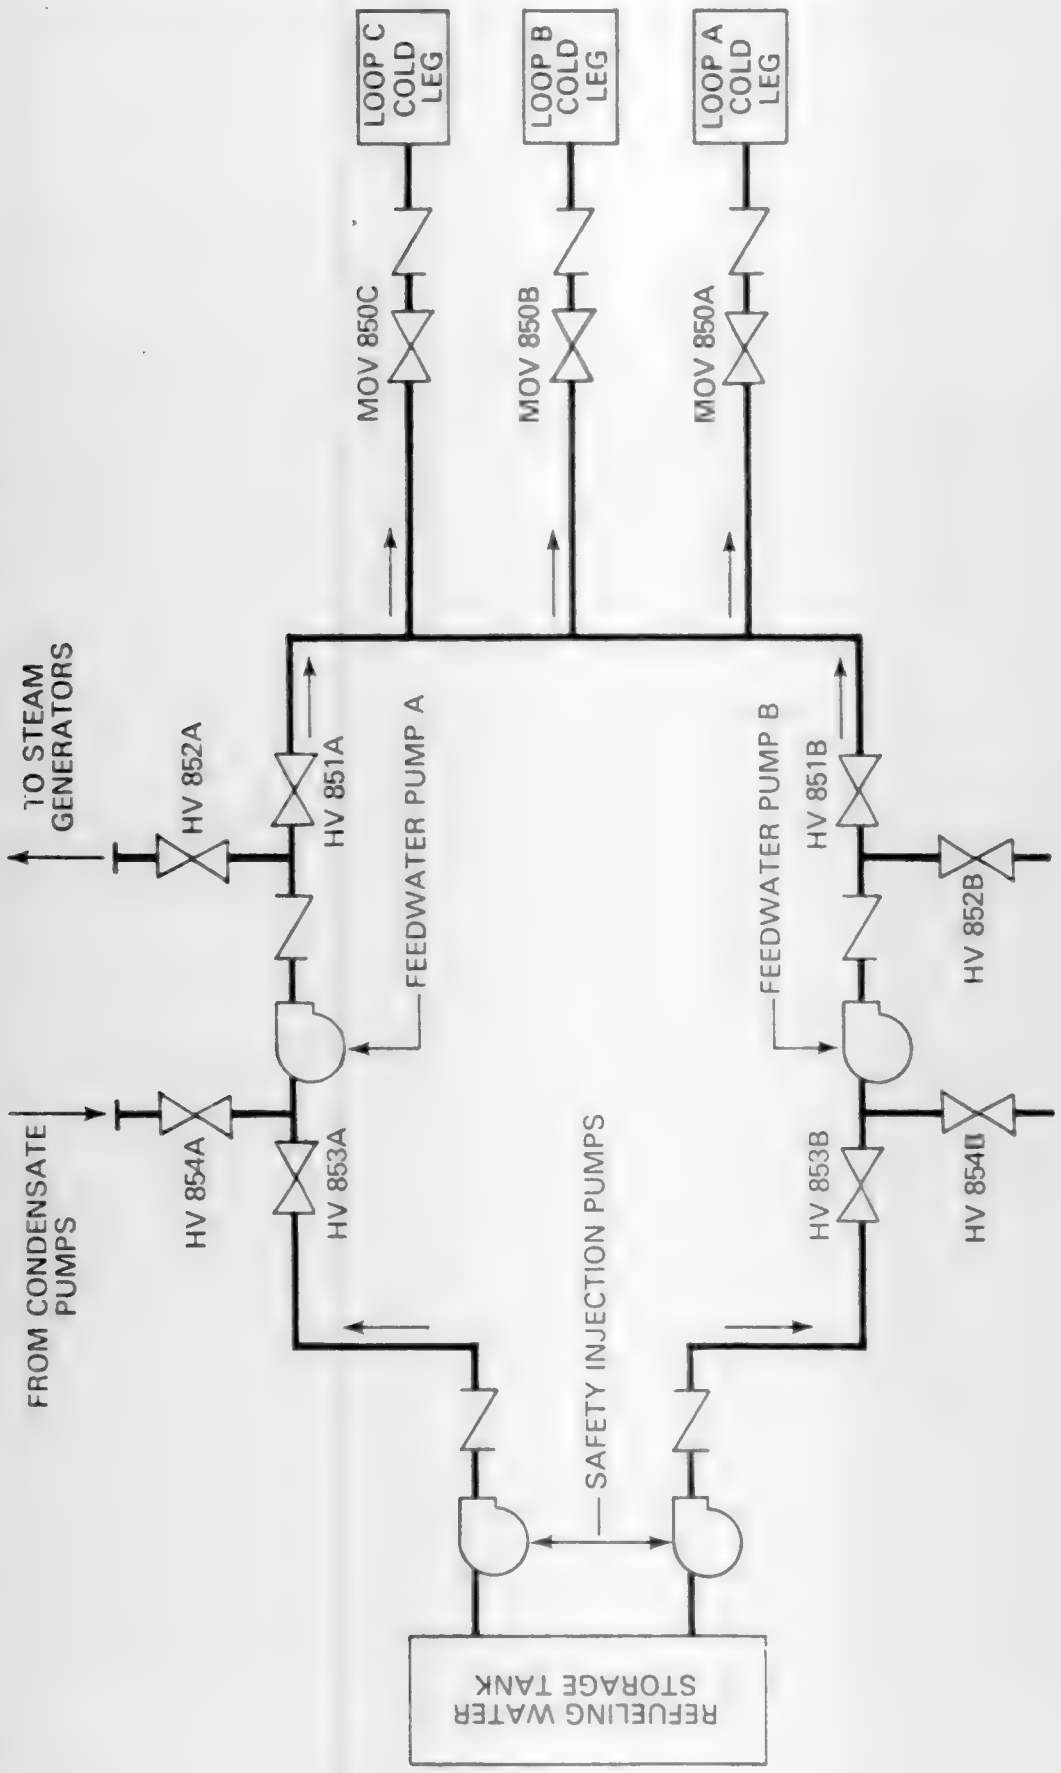

Figure 1. Simplified Schematic of Safety Injection System (San Onofre Unit 1)

BILLING CODE 7590-01-C

During Normal operation, water from the condensate pumps flows through valves HV854 A and B, the feedwater pumps, and valves HV852 A and B to the secondary side of the steam generators. Another line, which connects to each feedwater pump discharge line is normally isolated by safety injection valves HV851 A or B; these lines join to a common header which then connects to the three cold leg return lines from the three steam generators to the reactor vessel. Upon receipt of a SIAS, the feedwater pumps are automatically valved out of the steam generator feedwater system, by closing valves HV854 A and B and HV852 A and B (steam generator feedwater is then supplied by the Auxiliary Feedwater System), and become part of the safety injection system by opening the HV851 A and B and HV853 A and B valves. The safety injection valves, HV851 A and B, downstream of the feedwater pumps, are designed to automatically open upon receipt of the SIAS. Then, if RCS system pressure decreases sufficiently (such as in the case of a loss of coolant accident), borated water (normally from the Refueling Water Storage Tank) would be pumped by the safety injection pumps, through the feedwater pumps and safety injection valves, into the RCS. During the September 3, 1981 event, RCS pressure only decreased to about 1700 psi. Therefore, since the feedwater pump discharge shutoff head pressure is about 1200 psi by design, no safety injection flow would have occurred even if the safety injection valves had opened. In addition, none was actually required since system pressure and inventory were adequate throughout the event.

However, while SIAS was present, plant operators in the Auxiliary Building noted that neither valve HV851 A nor HV851 B had opened. Later, after the event was terminated, the valves did open when the feedwater pumps were tripped. Since operability of the valves could not be demonstrated by subsequent tests, the licensee placed the plant in a cold shutdown condition and agreed not to restart the plant without NRC concurrence.

For this event, the failure of both these valves to open did not result in plant damage, radiological releases, or health effects. The injection of borated water into the RCS was not required by the plant conditions present. However, had a loss of coolant or steamline break accident occurred, one of the key safety systems designed to provide mitigation may not have performed as intended.

Cause of Causes—To date, the following valve design deficiencies have been identified: (1) the contact stress between the valve seat and disc exceeded the threshold of galling (transfer of metal at contact surfaces resulting from local material being overstressed). (2) the coefficient of friction assumed for sizing the hydraulic valve activators was too small, and (3) the lack of any valve bonnet leak-off potentially allowed for an excessive differential pressure across both discs if the feedwater pumps were tripped.

As noted above, the valves did not open until the feedwater pumps were tripped and the differential pressure across the valve gates had significantly decayed. Testing indicated that valve packing tightness was not a factor. The valves were disassembled and the seating surfaces inspected. Maintenance was performed on the valve seats to remove galling which was observed on the valve discs and additional tests were performed. Although valve operation was noted in some instances while the feedwater pumps were running, reliable operation within the acceptance criterion could not be demonstrated.

The valves had been regularly tested at each refueling outage, but the tests were performed with no significant pressure differential across the valves. In 1976, the valve operators were changed from a motor operator to a hydraulic operator to decrease valve stroke time. As indicated above, the hydraulic operators were selected based on a coefficient of friction that was too low. Proper valve operations were demonstrated during the acceptance tests conducted with a design pressure difference of up to 1,350 psi across the valves. Between restart in 1977 and September 3, 1981, no safety injection system challenges occurred—the only operation of the valves was during tests with little or no pressure differential. No major valve maintenance was performed during this period.

Actions Taken To Prevent Recurrence

Licensee—Meetings were held on September 15, 1981, September 30, 1981, and October 22, 1981, with the NRC to discuss possible resolution of the problem. The licensee is continuing to evaluate the problem and possible corrective actions. For the interim period, the licensee has altered the sequence for safety injection, installed valve bonnet leak-off lines, and has completed an extensive preoperational valve and system test program. In addition, the licensee has agreed to institute a surveillance program which is more extensive, in terms of the frequency of testing and the detail of measurement, than required for any other plant. The licensee has also committed to replace the valves in question and their actuators. The plans and schedule for the valve and actuator replacement are to be submitted to the NRC by December 1, 1981. In addition, the licensee has committed to perform a long-term study of the advisability of completely redesigning the safety injection system.

NRC—The NRC's resident inspector followed the licensee's inspection and corrective actions onsite. The NRC's Offices of Inspection and Enforcement and Nuclear Reactor Regulation have reviewed and evaluated the licensee's proposed action and the licensing submittal addressing the causes of the event and the proposed corrective actions including Emergency Core Cooling System modifications and testing. The licensee has submitted a request to the NRC to amend the license to incorporate surveillance tests of the valves, and the submittal has been reviewed and approved.

The NRC is also evaluating the generic implications of the event, i.e., testing the valves under operating pressure differentials. The problem remains under active review within the NRC. Inspection and Enforcement Information Notice No. 81–31 was issued to licensees on October 7, 1981 to inform them of this event. The NRC agreed that the licensee's interim corrective actions were satisfactory and on November 1, 1981 concurred with the licensee that the plant could be restarted. The licensee initiated startup of the plant late on November 3, 1981.

Dated at Washington, D.C. this 8th day of December 1981.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

Advisory Panel for the Decontamination of Three Mile Island, Unit 2; Meeting

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel for the Decontamination of Three Mile Island, Unit 2 will be meeting on January 13, 1982, and January 28, 1982, from 7:00 p.m. to 10:00 p.m. at the Holiday Inn, 23 South Second Street, Harrisburg, Pennsylvania 17101. The meetings will be open for public observation.

At these meetings, the Panel will discuss alternative strategies for

assuring financial resources to complete the TMI–2 cleanup.

Further information on the meetings may be obtained from Dr. William Travers, Three Mile Island Program Office, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone 301/492–7466.

Dated: December 9, 1981.

Advisory Committee on Reactor Safeguards, Subcommittee on Class-9 Accidents; Exemption Change

The ACRS Subcommittee on Class-9 Accidents scheduled to be held on December 16 (1:00 p.m.) and 17 (8:00 a.m.), 1981, at the Rodeway Inn, 4590 Quebec at I-70, Denver, CO, the exemption regarding the close sessions has been changed to the following: Sunshine Act Exemption 9(b)—Disclose information the premature disclosure of which would, in the case of any agency, be likely to significntly frustrate implementation of a proposed agency action.

I have determined, in accordance with subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting. The authority for such closure is Exemption 9(b) to the Sunshine Act, 5 U.S.C. 552b(c)(9)(b).

All other items regarding this meeting remain the same as announced in the **Federal Register** published Tuesday, December 1, 1981 (46 FR 58387).

Further information may be obtained by a prepaid telephone call to the cognizant Designated Federal Employee for this meeting, Dr. Richard Savio (telephone 202/634–3268) between 8:15 a.m. and 5:00 p.m., est.

Dated: December 9, 1981.

BILLING CODE 7590–01–M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft, temporarily identified by its task number, IC 010–5 (which should be mentioned in all correspondence concerning this draft guide), is Proposed Revision 2 to Regulatory Guide 1.105 and is entitled "Instrument Setpoints." The guide is being developed to describe a method acceptable to the NRC staff for complying with the Commission's regulations for ensuring that instrument setpoints in systems important to safety are initially within and remain within the technical specifications. This Proposed Revision 2 is being developoed because the guidance in Revision 1 is being incorporated into a national standard, ISA S67.04, "Setpoints for Nuclear Safety-Related instrumentation Used in Nuclear Power Plants." Proposed Revision 2 will endorse, with appropriate modifications, ISA S67.04.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Docketing and Service Branch by

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street N.W., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 7th day of December 1981.

For the Nuclear Regulatory Commission.

Karl R. Goller,

Director, Division of Facility Operations, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 46 to Facility Operating License No. DPR–72, issued to the Florida Power Corporation, City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach and Utiltities Commission, City of New Smyrna Beach, City of Ocala, Orlando Utilities Commission and City of Orlando, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee (the licensees) which revised the Technical Specifications (TSs) for operation for the Crystal River Unit No. 3 Nuclear Generating Plant (the facility) located in Citrus County, Florida.

The amendment revises the TSs to authorize Cycle 4 operation of the facility following refueling. It also deletes an improper surveillance requirement for the containment spray additive system.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 16, 1981, as supplemented November 20, 1981, (2) Amendment No. 46 to License No. DPR-72, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of December 1981.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 81-35662 Filed 12-11-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-321]

Georgia Power Co., et al. (Edwin I. Hatch Nuclear Plant, Unit No. 1); Exemption

I

The Georgia Power Company (the licensee) and three other co-owners are the holders of Facility Operating License No. DPR-57 which authorizes operation of the Edwin I. Hatch Nuclear Plant, Unit 1 (Hatch 1 or the facility). The license provides, among other things, that Hatch 1 is subject to all rules, regulations and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility is a boiling water reactor located at the licensee's site in Appling County, Georgia.

II

Section 50.48(c)(2) of 10 CFR Part 50 requires that certain features of the Hatch 1 fire protection program, specifically, those that involve installation of modifications, shall be implemented by November 17, 1981. One such feature is the installation of emergency lighting units in all areas needed for operation of safe shutdown equipment.

By letter dated November 12, 1981, the licensee requested an exemption from the 50.48 schedular requirement, delaying the installation of these lighting units from November 17, 1981, to December 4, 1981. The delay is necessitated by a redesign to ensure seismic integrity of the mounting brackets and subsequent material procurement problems. The licensee stated that a significant amount of emergency lighting is currently installed in Hatch 1, providing adequate illumination for operation of safe shutdown equipment, albeit not yet in compliance with seismic design criteria for the mounting brackets. Additionally, hand-held emergency lighting is available to plant personnel.

As the licensee will have the system operational in a relatively short period of time, has a "non-seismic" system currently operable, and has backup hand-held emergency lighting available, we conclude that the licensee's request for an extension of the completion date required by 10 CFR 50.48(c)(2) should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security, is otherwise in the public interest, and is hereby granted.

The Commission has determined that the granting of this exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

This exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 7th day of December 1981.

For the Nuclear Regulatory Commission.

Harold R. Denton,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket Nos. 50-443A and 50-444A]

Public Service Co. of New Hampshire, et al.; Receipt of Additional Antitrust Information: Time for Submission of Views on Antitrust Matters

Public Service Company of New Hampshire, et al.,[1] pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed information requested by the Attorney General for antitrust review as required by 10 CFR Part 50, Appendix L. This information concerns a proposed additional ownership participant, the Canal Electric Company (Canal) in the Seabrook Station, Units 1 and 2. The change involves the transfer of ownership from the Commonwealth Electric Company to Canal.

The information was filed in connection with the application submitted by the construction permit holders for operating licenses for two pressurized water reactors. Construction was authorized on July 7, 1976 at the Seabrook site located in Rockingham County, New Hampshire.

The original application was docketed on July 9, 1973, and the Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matters was published in the **Federal Register** on August 9, 1973 (38 FR 21522). The Notice of Receipt of Application for Facility Operating Licenses; Notice of Availability of Applicants' Environmental Report; and the Notice of Consideration of Issuance of Facility Operating Licenses and Notice of

[1] The current applicants for the operating licenses for Seabrook Station are: Bangor Hydro-Electric Company, Central Maine Power Company, Central Vermont Public Service Corporation, Commonwealth Energy Systems, Connecticut Light & Power Company, Fitchburg Gas & Electric Light Company, Hudson Light & Power Department, Maine Public Service Company, Massachusetts Muncipal Wholesale Electric Company, Montaup Electric Company, New England Power Company, Public Service Company of New Hampshire, Taunton Muncipal Lighting Plant, The United Illuminating Company, and Vermont Electric Cooperative, Inc.

Opportunity for Hearing was published in the **Federal Register** on October 19, 1981 (46 FR 51330).

A copy of the above documents are available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Exeter Public Library, Front Street, Exeter, New Hampshire 03883.

Any person who wishes to have his views on the antitrust matters with respect to the Canal Electric Company presented to the Attorney General for consideration or who desires additional information regarding the matters covered by this notice, should submit such views or requests for additional information to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Antitrust and Economic Analysis Branch, Division of Engineering, Office of Nuclear Reactor Regulation, on or before January 29, 1982.

Dated at Bethesda, Maryland, this 16th day of November 1981.

For the Nuclear Regulatory Commission.

Frank J. Miraglia,

Chief, Licensing Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

Background

December 7, 1981.

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 USC, chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available)
The office of the agency issuing this form
The title of the form
The agency form number, if applicable
How often the form must be filled out
Who will be required or asked to report
The Standard Industrial Classification (SIC) codes, referring to specific respondent groups that are affected
Whether small businesses or organizations are affected
A description of the Federal budget functional category that covers the information collection
An estimate of the number of responses
An estimate of the total number of hours needed to fill out the form
An estimate of the cost to the Federal Government
An estimate of the cost of the public
The number of forms in the request for approval
An indication of whether section 3504(h) of Pub. L. 96-511 applies
The name and telephone number of the person or office responsible for OMB review and
An abstract describing the need for and uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, plesase advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Deputy Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

DEPARTMENT OF AGRICULTURE

Agency Clearance Officer—Richard J. Schrimper—202-447-6201

State of local governments
State educational agencies/local educational agencies
SIC: 941
Elementary, secondary, and vocational education: 51 responses; 2,040 hours; $48,500 Federal cost; 1 form; not applicable under 3504(h)
Federal Education Data Acquisition Council, 202–426–5030

Grants are needed for State education agencies (that may apply individually or cooperatively) to plan and implement special projects designed to improve the interstate and intrastate coordination of migrant activities. Products of these grants will be distributed to all States serving migrant children, the District of Columbia and Puerto Rico.

• Office of Postsecondary Education
Fiscal—Operations Report/Application to Participate in NDSL, SEOG and CWS Programs
ED 646, 646–1
Annually
Businesses or other institutions
Institutions of Higher Education
SIC: 822, 824
Higher education: 4,650 responses; 174,750 hours; $40,000 federal cost; 1 form; $758,415 public cost; not applicable under 3504(h)
Federal Education Data Acquistion Council, 202–426–5030

The application data will be used to compute the amount of funds needed by each institution during the 1983–1984 award period. The fiscal operation's report data will be used to assess program effectiveness and accountability of funds expended during the award 1981–1982.

• Office of Postsecondary Education
Guarantee Agency Quarterly Report
OE 1130, ED 1130
Quarterly
State of local governments
State guarantee agencies
SIC: 821, 822
Higher education: 220 responses; 495 hours; $16,100 federal cost; 1 form; $1,238 public cost; not applicable under 3504(h)
Richard Sheppard, 202–395–6880

(1) To provide summary data on agency finances and operations which are funded primarily with federal dollars, (2) to provide the secretary with the necessary information to perform oversight functions of the agency—program operations, fraud and abuse, report to the Congress, etc., and (3) to collect certain specific data required to be reported under section 432(C)(1)(A) of the Higher Education Act.

Extensions (No Change)

• Office of Elementary and Secondary Education
Application for Disaster Assistance (P.L. 81–874 Sec. 7)
ED 423
Nonrecurring
State or local governments
Local education agencies
SIC: 941
Elementary, secondary, and vocational education: 250 responses; 500 hours;

$3,000 Federal cost; 1 form; $10,000 public cost; not applicable under 3504(h)
Federal Education Data Acquisition Council, 202–426–5030

Data is used to assist in determining eligibility of a local education agency for disaster assistance and amount of grant.

Reinstatements

• Office of Elementary and Secondary Education
Standard Application Federal Assistance (Non-Construction) for Follow-Through Program
OE–4473
Annually
State or local governments/businesses or other institutions
Col. and univ. reg. edu. labs., other nonprof. organ., etc.
SIC: 821, 822, 829, 941
Elementary, secondary, and vocational education: 112 responses; 3,360 hours; $1,000 Federal cost; 1 form; not applicable under 3504(h)
Federal Education Data Acquisition Council, 202–426–5030

This application form is necessary in order to make annual grants to applicants. The information contained in the application is used to determine annual funding levels to grantees. In addition, information is extracted from the application which is used to prepare reports for Congress, OMB, and the GAO.

• Office of Postsecondary Education
Physician's Certification of Borrower's Total and Permanent Disability for Student Loan Program
OE–777, ED 1172
Annually
Individuals or households
Borrower or borrower's representative, certifying physician
Higher Education: 2,500 responses; 1,000 hours; $2,500 Federal costs; 1 form; $75,000 public cost; not applicable under 3504(h)
Federal Education Data Acquisition Council, 202–426–5030

The guaranteed student loan program (GSLP) was established in 1965 under title IV, part B of the Higher Education Act. The GSLP's chief objective is to provide a program of student loan insurance for students attending eligible postsecondary schools. This form is used to request cancellation of loan owed. The law provides that the Federal Government will cancel the loan if the borrower becomes permanently and totally disabled.

DEPARTMENT OF ENERGY

Agency Clearance Officer—John Gross—202–633–9770

Extensions (No Change)

• Federal Energy Regulatory Commission
Application for Annual or Basic Valuation
FERC–42
Annually
Businesses or other institutions
Cil pipeline companies
SIC: 461
Other advancement and regulation of commerce: 90 responses; 45 hours; $300 Federal cost; 1 form: not applicable under 3504(h)
Anita T. Ducca, 202–395–7340

The data collected on this application identify the pipeline company requesting a valuation, and provide for calculation and submission of the required valuation fee in accordance with specified regulations.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency Clearance Officer—Joseph Strnad—202–245–7488

New

• Health Care Financing Administration
Preclearance—Evaluation of Three Demonstrations in Nursing [1]
Homes certification survey and inspections of care
Nonrecurring
Individuals or households/businesses or other institutions
1,100 nursing homes in Wisconsin, Mass, and NY, etc.
SIC: 805
Small businesses or organizations
Health: $860,000 Federal cost; 1 form not applicable under 3504(h)
Richard Eisinger, 202–395–6880

The demonstrations test different streamlined methods of implementing federally-mandated nursing home certification surveys and inspections of patient care. The evaluation will assess the overall success of these streamlined methods hopefully showing less regulatory burden on industry and residents.

• Health Care Financing Administration
Preclearance: AFDC Home Health Aide Demo/Evaluation [2]
HCFA–82–ORDS–01/ET
Nonrecurring
Individuals or households/businesses or other institutions
Low income elderly population at risk of institution,etc.
SIC: 808 919
Small businesses or organizations
Health: $600,000 Federal cost; 1 form; not applicable under 3504(h)
Richard Eisinger 202–395–6880

As Mandated by Congress, the purpose of this Procurement is to establish a demonstration-evaluation design for the AFDC home health aide demonstration. This includes assisting HCFA and the States in developing the demonstration projects, any instrumentation or data collection procedures necessary, and implementing a research design which will insure the evaluability of the projects.

• Food and Drug Administration
Physician Response to Reduced Information Requirements in Prescription Drug Advertising
Nonrecurring
Businesses or other institutions
General Practitioners, internists and cardiologists
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 384 responses; 192 hours; $127,938 Federal cost; 5 forms; $127,938 public cost; not applicable under 3504(h)
Gwendolyn PLA, 202–395–6880

Regulations require prescription drug ads to contain a brief summary of the drug's limitations and have been interpreted as requiring an extensive separate section. The cost and communication effectiveness of this brief summary are controversial. The proposed study will explore the effects of requiring a simplified display of the product's major limitations.

• National Institutes of Health

[1] These reporting forms have been approved for interim use by OMB for one year in order to continue operation of the Medicare Program. However, OMB will continue its reviews of these forms, and will accept comments from health care providers and others based on their experience with these forms through this approval period. Health care providers and recipients, who are respondents to these Medicare contractor forms, are invited to send comments to Joseph Strnad at the above address, and to the OMB reviewer listed.

[2] These reporting forms have been approved for interim use by OMB for one year in order to continue operation of the Medicare Program. However, OMB will continue its reviews of these forms, and will accept comments from health care providers and others based on their experience with these forms through this approval period. Health care providers and recipients, who are respondents to these Medicare contractor forms, are invited to send comments to Joseph Strnad at the above address, and to the OMB reviewer listed.

Principal investigator, project director, awardee
SIC 822, 806
Health research: 18,000 responses; 1,500 hours; $10,362 Federal cost; 1 form; $15,000 public cost, not applicable under 3504(h)
Gwendolyn PLA, 202–395–6880

Used in close out of grants and awards for research to obtain certified statement as to inventions made in the course of the work thus supported.

• Health Resources Administration
Impact of Community Oranization Health Career Opportunity Programs
Nonrecurring
Individuals or households/businesses or other institutions
Former and present student participants in program, etc.
SIC: 822, 862, 864
Small businesses or organizations
Health: 2,230 responses; 1,115 hours; $205,000 Federal costs; 4 forms; $11,150 public costs; not applicable under 3504(h)
Gwendolyn PLA, 202–395–6880

The proposed assessment will provide the first comprehensive analysis of the universe of 52 community organizations funded since 1972. Study results are expected to provide insight on project impact and information useful for management and policymakers. A complete report will be disseminated to HCOP grantees and other interested individuals.

• National Institutes of Health
Case-Control Epidemiologic Study of Leukemia and non-Hodgkin's Lymphoma
Nonrecurring
Individuals or households
Next-of-kin of deceased leukemia and non-Hodgkin's etc.
Health: 300 responses; 300 hours; $50,000 Federal cost; 1 form; $3,000 public cost; not applicable under 3504(h)
Gwendolyn PLA, 202–395–6880

Preliminary studies suggest that certain occupational factors, particularly farm-related, may play a role in the origin of leukemia and non-Hodgkin's lymphoma. This special epidemiologic study will provide the needed data to identify and quantify occupational and other risk factors for these cancers.

• Health Care Financing Adminstration
Contractors' Information Collection—Post Processing of Claims Data [1]
HCFA–9024
On occasion
Individuals or households/businesses or other institutions providers, physicians, suppliers in medicare program
SIC: 801, 804, 806, 808, 881
Health: 2,100,000 responses; 700,000 hours $0 Federal cost; 1 form; $7,000,000 public cost; not applicable under 3504(h)
Richard Eisinger, 202–395–6880

These intermediary and carrier forms gather data on claims which have been processed. Subject areas include review of medical records, PSRO/UR determinations, outstanding checks and deceased beneficiaries.

Revisions

• Food and Drug Administration
Reporting/Recordkeeping Requirements Under P.L. 90–602
On occasion
Businesses or other institutions
Manufacturers of radiation emitting electronic products
SIC: 367
Small businesses or organizations
Consumer and occupational health and safety: 21,043,085 responses; 1,402,724 hours, $3,352,400 Federal cost; 2 forms; $3,352,400 public cost; not applicable under 3504(h)
Gwendolyn PLA, 202–395–6880

The data is collected to determine if manufacturers are in compliance with the standards prescribed under the FD&C Act. It is used to evaluate, approve or disapprove electronic radiation emitting products and exemption requests.

• Health Services Administration
Bureau of Community Health Services Common Reporting Requirements
HSA–350
Semiannually
State or local governments/businesses or other institutions Federally-supported ambulatory health care centers

SIC: 944
Unemployment compensation: 287,000 responses; 384,580 hours; $4,800 Federal cost; 3 forms; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Federal Law (5 U.S.C. 8521 et seq.) provides unemployment insurance protection to former members of the armed forces (Ex-Service Persons) and is referred to in abbreviated form as "UCX." The forms in Chapter V through VIII of the UCX handbook are used in connection with the provision of this benefit assistance.

- Departmental Management

Qualifications Inquiry, DL–166
Pers–6
Nonrecurring
Individuals or households
Applicants
Other labor services: 11, 900 responses; 1,983 hours; $23,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

This form is required under the Department of Labor's negotiated merit staffing plan for positions outside the union bargaining units, National Council of Field Labor Locals, and the National Union of Compliance Officers to solicit information by personnel offices from the applicant's supervisor. The information will be used by raters to evaluate outside applicants against the requirements of the vacancy to be filled.

- Mine Safety and Health Administration

Mine Operator Dust Data Card
MSHA–218
Other—see SF83
Businesses or other institutions
All surface and underground coal mine operators
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 300,000 responses; 4,800 hours; $80,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Coal mine operators are required to collect and submit respirable dust samples to the Secretary of Labor for analysis. Pertinent information associated with identifying and analyzing these samples is submitted with the samples. Authority established by Pub. L. 95–164.

Main Fan Maintenance Records
MSHA–421R
Monthly
Businesses or other institutions
Underground metal/nonmetal mines
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 900 responses; 900 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires regular maintenance of the main life support system to the mine. The required record establishes documentation of maintenance program. This documentation may serve as a warning for possible ventilation problems before they occur.

- Mine Safety and Health Administration

Inspections of Firefighting Equipment
MSHA–419R
On occasion
Businesses or other institutions
Metal/nonmetal mining industry
SIC: Multiple
Small businesses or organizations

Consumer and occupational health and safety: 14,900 responses; 715,200 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Firefighting equipment inspection needs vary with the type of equipment, use, environmental exposure, and manufacturers recommendations. Inspections are necessary to assure protection intended when the need arises. The equipment involved includes firefighting trucks, hoses, hydrants, fittings, extinguishers, sprinklers, etc.

• Mine Safety and Health Administration
Hazardous Conditions Complaints
MSHA–707
Other—see SF83
Businesses or other institutions
Representative of miners, or an individual miner
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 500 responses; 100 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Complaints about hazardous conditions must be made in writing to the secretary or an authorized representative. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Annual Status Report and Certification on Impoundments and Refuse Piles
MSHA–211
Annually
Business or other institutions
Active coal mines
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety; 105 responses; 210 hours; $1,880 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires each operator to submit an annual status report and certification of impoundments and refuse piles. The information is used as an enforcement and administrative tool. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Mine Ventilation System Plan
MSHA–401
Annually
Businesses or other institutions
Underground metal/nonmetal mines
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety; 900 responses; 21,600 hours; $108,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Ventilation plan submission and update assures a continuing understanding of potentially hazardous areas of an underground mine to the District Manager of MSHA. The district personnel will, therefore, be able to recommend alterations to the system in recognition of a hazard, and will be better able to respond to an emergency at the mine.

• Mine Safety and Health Administration
Hearing Conservation Plan
MSHA–210
Nonrecurring
Businesses or other institutions
Nation's active coal mines
SIC: 111, 121

Small businesses or organizations
Consumer and occupational health and safety; 40 responses; 1,600 hours; $12,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Require that slope and shaft plans be submitted for approval. Information used to ensure that specific safety requirements are included in a slope/shaft sinking plan via MSHA personnel. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Operations Under Water
MSHA–207
On Occasion
Businesses or other institutions
Underground coal mines
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety; 30 responses; 480 hours; $7,200 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

The underground coal mine operators are required to submit information and get a permit to mine under bodies of water in order to protect mines from cave-ins and inundations. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Application for Grants
MSHA–100
Quarterly, other—see SF83
State or local governments
State government agencies
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 37 responses 4,144 hours; $62,160 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins 202–395–6880

OMB circular A102 states the reporting requirements for MSHA's Federal assistance programs. The SF424 is the grants application for a new grant or for a modification to an existing grant. Authority established by the Federal Mine Safety and Health Act of 1977, Pub. L. 95–164.

• Mine Safety and Health Administration
Monthly Tests of Mine Rescue Apparatus
MSHA–411R
Monthly
Businesses or other institutions
Underground metal/nonmetal mines
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 7,200 responses; 57,600 hours; $0 Federal cost; 1 form; not applicable under 3504(h)

Laverne V. Collins, 202–395–6880

Mine rescue apparatus is used as a life support system in deadly atmospheres by trained personnel in the act of rescue work. Failure of the apparatus under rescue conditions could jeopardize the life of the individual wearer and the entire team. The testing and recording procedure will minimize the possibilities of a failure.

• Mine Safety and Health Administration
Fire Door Location Plans for Underground Mines at Level Landings
MSHA–410
On occasion
Businesses or other institutions
Underground metal/nonmetal mines
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 300 responses; 24,000 hours; $36,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Fire doors at level landings are needed to prevent the spread of smoke and toxic gases in the event of an underground mine fire. They afford a protection of a safe refuge for the miners while awaiting a shaft conveyance to escape the mine. Ventilation changes which may occur as a mine is developed may necessitate the relocation of some doors.

• Mine Safety and Health Administration
Application for Waiver of Surface Facilities Requirement
MSHA–212
Annually
Businesses or other institutions
Nation's active coal mines
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety; 1,800 responses; 900 hours; $2,700 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

If the operator desires to request a waiver of the Federal regulations requiring surface facilities, the coal mine operator files this application to show the grounds upon which the request is based.
Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Application for Approval for the Use of Non-Permissible Explosives and Shot Firing Units
MSHA–203
On occasion
Businesses or other institutions
Active coal mines
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety: 50 responses; 50 hours; $750 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

MSHA requires the mine operator to set forth the safeguards to be employed to protect the health and safety of miners that would be exposed to the use of non-permissible shot firing units.

• Mine Safety and Health Administration
Ground Control Plan
MSHA–202
Nonrecurring
Businesses or other institutions
New surface coal mines
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety: 760 responses; 30,400 hours; $1,140 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

The ground control plan is used as an enforcement tool to insure that surface coal mine operators' methods of controlling highwalls, pits and spoil banks are consistent with prudent engineering design and will insure safe working conditions. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Annual Functional Test and Weekly Inspection of Fire Sensor and Warning Device Systems
MSHA–231R
Weekly
Businesses or other institutions
Nation's active coal mines
SIC: 111, 121

Consumer and occupational health and safety: 244,800 responses; 24,480 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

Requires that a record be kept of annual functional test and weekly inspections of automatic fire sensor and warning devices. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Record of Examination of Hazardous Conditions
MSHA–233R
Other—see SF83
Businesses or other institutions
Surface coal mines, surface facilities, and independent, etc.
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety: 1,216,380 responses; 608,190 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

Requires reports of daily inspection of hazardous conditions in coal mines. The information is used as an enforcement tool to insure that mine operators are conducting examinations for hazardous conditions. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Hoist and Shaft Inspection Records
MSHA–414R
Quarterly, other—see SF83
Businesses or other institutions
Metal/nonmetal mining industry
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 1,000 responses; 16,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

Systematic inspections of shafts and hoists are required at varying intervals. Records must be maintained for 3 years.

• Mine Safety and Health Administration
Main Fan Inspection Logs—Gassy Mines
MSHA–415R
Other—see SF83
Businesses or other institutions
Gassy mines—metal/nonmetal mining industry
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 18 responses; 3,600 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

Standard applies only to gassy mines. Potentially gassy (explosive) conditions underground are largely controlled by the main fans. Fans must be inspected daily and logs kept.

• Mine Safety and Health Administration
Air Quality Measurements in Gassy Mines
MSHA–416R
Weekly
Businesses or other institutions
Gassy mines, metal/nonmetal mining industry
SIC: 999
Small businesses or organizations
Consumer and occupational health and safety: 18 responses; 7,200 hours; $0 Federal cost; 1 form; not applicable under 3504(h)

Laverne V. Collins, 202–395–6880.

The adequacy of the ventilation system for a gassy mine must be checked weekly to maintain a safe working environment. Quantitative measurements help assure dilution of gasses and preclude and pressure of explosive atmospheres.

• Mine Safety and Health Administration
Daily Inspection of Hoists Record
MSHA–240R
Other—see SF83
Businesses or other institutions
Nation's active coal mines
SIC: multiple
Small businesses or organizations
Consumer and occupational health and safety: 8,800 responses; 4,400 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880.

Requires record of preshift plus coshift inspection of hoist equipment. Information is used as an enforcement tool to ensure that hoists used in shaft/slope sinking operations are inspected daily. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Record of Preshift and Onshift Inspections
MSHA–241R
Other—See SF83
Businesses or other institutions
Shaft/slope sinking independent contractors

Other—See SF83
Businesses or other institutions
Surface and underground coal mines
SIC: 121, 111
Small businesses or organizations
Consumer and occupational health and safety: 159,280 responses; 27,078 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires operator to maintain a record of the daily examination of hoisting equipment. The information is used to insure all man hoists are inspected daily. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Rock Bolt Test Procedures and Rock Bolt Anchorage Capacity Tests
MSHA–418R
On occasion
Businesses or other institutions
Metal/nonmetal mining industry
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 450 responses; 7,200 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Rock bolting is an acceptable method of ground support in a majority of the strata encountered in underground mines. The anchorage method varies with the strata and individual methods may vary within a single mine. Each anchorage method must be tested to assure the ultimate competence of the ground and to prevent ground fails.

• Mine Safety and Health Administration
Report of Emergency Medical Assistance and Transportation of Injured Persons
MSHA–206
Quarterly
Businesses or other institutions
Nation's active underground and surface coal mines, etc.
SIC: 111, 121
Small businesses or organizations
Consumer and occupational health and safety: 1,827 responses; 457 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires each operator to report to MSHA their arrangements for emergency medical assistance and transportation for persons injured at the mine. Authority established by Pub. L. 95–164.

• Mine Safety and Health Administration
Noise Data Report Form
NSHA–214
Semiannually
Businesses or other institutions

Nonrecurring
Businesses or other institutions
Underground metal/nonmetal mines
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 900 responses; 7,200 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

The records implied in this standard simply mean an effective, on-going program of check-in, check-out which will enable mine operators and MSHA officials to determine who is underground in event of an emergency. Rescue efforts are enhanced with this knowledge.

• Mine Safety and Health Administration
Detailed Escape and Evacuation Plan
MSHA–400
Semiannually
Businesses or other institutions
Underground metal/nonmetal mining industry
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 900 responses; 21,600 hours; $27,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Detailed escape and evacuation plans containing the requirements of this standard will help assure an orderly, rapid, and possibly life saving exit from the mine.

• Mine Safety and Health Administration
Medical Examinations for Man Hoist Operators
MSHA–409R
Annually
Businesses or other institutions
Metal/nonmetal mining industry
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 1,000 responses; 8,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

The safety of all miners riding hoist conveyances is at the mercy of the hoist conveyance operator. The standard requires annual medical examinations for hoist operators. Physical certification must be available at the mine.

• Mine Safety and Health Administration
Respirator Program Records
MSHA–404R
Nonrecurring
Businesses or other institutions
Metal/nonmetal mining industry
SIC: Multiple
Small businesses or organizations
Consumer and occupational health and safety: 7,000 responses; 14,000 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires an operator to establish a respirator program consistent with the requirements of ANSI–Z88.2 1969. The program is to consist of written standard operating procedures governing the selection, use, and care of respirators. The standard is intended to provide guidance that will assist respirator users in safeguarding health and life through proper selection and use of respirators.

• Mine Safety and Health Administration
Record of All Certified and Qualified Persons
MSHA–221R
On occasion, quarterly
Businesses or other institutions
Nation's active underground coal mines

Small Businesses or organizations
Consumer and occupational health and safety: 26,272 responses; 3,153 hours; $0 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Requires coal mine operators to maintain records of certified and qualified persons designated to perform mandatory safety duties. Authority established by Pub. L. 95–164.

• Employment and Training Administration

Benefit Rights and Experience
ES–218
Quarterly
State or local governments
State employment security agencies
SIC: 944
Training and employment: 212 responses; 106 hours; $1,800 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Provides information for evaluation of adequacy of State benefit formulas for analysis of effects of proposed changes in State law and for use in solvency study analysis.

• Employment and Training Administration
Contribution Operations
ETA 581Quarterly
State or local governments
State unemployment insurance agencies
SIC: 944
Training and employment: 212 responses; 848 hours; $25,000 Federal cost; 1 form; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

Provides quarterly data on State agencies volume and performance delinquent in filing contribution reports, number and extent of tax delinquency and results of the field audit program.

Revisions

• Labor-Management Services Administration
Revision of annual reporting regulations for plans participating in a master trust
Labor 5500, 5500–C, Treasury 5500–K & R
Annually
Businesses or other institutions
Employee pension and welfare benefit plans
SIC: 637, 632, 602
Other labor services: 625,000 responses; 1,865,000 hours; $6,250,000 Federal cost; 4 forms; not applicable under 3504(h)
Laverne V. Collins, 202–395–6880

These revisions impose on plans participating in master trusts annual reporting requirements which will more accurately reflect their financial condition while reducing their workhour burden.

• Employment and Training Administration
Application card; Applicant/Job Order Transaction

BILLING CODE 3110–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 12086; 812–4844]

Bache Halsey Stuart Shields Inc. et al.; Filing of Application

December 8, 1981.

In the matter of Bache Halsey Stuart Shields Inc.; Chancellor High Yield Fund, Inc.; Chancellor High Yield Municipals, Inc.; Chancellor Tax-Free Money Fund, Inc.; Chancellor Tax-Managed Utility Fund, Inc.; Chancellor New Decade Growth Fund, Inc.; Money Mart Assets, Inc., 100 Gold Street, New York, New York 10038.

Notice is hereby given that Money Mart Assets, Inc. ("Money Mart"), Chancellor Tax-Free Money Fund, Inc. ("Tax-Free"), Chancellor High Yield Fund, Inc. ("High Yield"), Chancellor New Decade Growth Fund, Inc. ("New Decade"), and Chancellor Tax-Managed Utility Fund, Inc. ("Utility") (collectively, the "Funds"), registered open-end diversified management investment companies, and Bache Halsey Stuart Shields Incorporated ("Bache") (collectively, with Funds, "Applicants") filed an application on March 17, 1981, and an amendment thereto on November 2, 1981, for an order pursuant to Section 11(a) of the Investment Company Act of 1940 ("Act") approving certain proposed offers of exchange of shares among the Funds on a basis other than their relative net asset values and pursuant to section 6(c) of the Act exempting Applicants from the provisions of section 22(d) of the Act in connection with such exchanges. All interested persons are referred to the application on file with the Commission for a statement of the representation contained therein, which are summarized below.

Applicants state that Bache, as principal underwriter for each of the Funds, maintains a continuous offering of the shares of Money Mart and Tax Free at their respective net asset values

without a sales load and of Municipals, High Yield, Utility and New Decade at their respective net asset values plus a sales load. At present, the applicable sales load as a percentage of offering price for Municipals, High Yield, Utility and New Decade varies with the quantity purchased as follows:

Size of transaction at offering price	Municipals (percent)	High yield, utility and new decade (percent)
Less than $25,000	4.50	6.75
$25,000 to $49,999	4.00	5.25
$50,000 to $99,999	3.50	4.25
$100,000 to $249,999	3.00	3.25
$250,000 to $499,999	2.50	2.50
$500,000 to $999,999	2.00	2.00
$1,000,000 and over	1.25	1.25

According to tha application, at present (1) shares of Money Mart and Tax Free, including shares acquired through reinvestment of dividends and capital gains distributions ("reinvested shares") and shares acquired as a result of an exchange of shares of High Yeild, New Decade, Utility or Municipals, may be exchanged for shares of one another on the basis of their respective net asset values at the time of the exchange without a sales load; (2) shares of Municipals, including reinvested shares and shares acquired as a result of an exchange of shares of High Yield, Utility or New Decade, may be exchanged for shares of Money Mart and Tax Free on the basis of their respective net asset values at the time of exchange without a sales load and shares of Money Mart or Tax Free so acquired, plus any reinvested shares, may be reexchanged for shares of Muncipals on the same basis; (3) shares of High Yield, Utility and New Decade, including reinvested shares, may be exchanged for shares of Municipals on the basis of their respective net asset values without a sales load and shares of Municipals so acquired, plus any reinvested shares, may be reexchanged for shares of High Yield, Utility or New Decade on the same basis; (4) shares of High Yield, Utility or New Decade, including reinvested shares, may be exchanged for shares of Money Mart and Tax Free on the basis of their respective net asset values without a sales load and shares of Money Mart or Tax Free so acquired, plus any reinvested shares, may be reexchanged for shares of High Yield, Utility or New Decade on the same basis; and (5) shares of High Yield, however acquired, may be exchanged for shares of New Decade or Utility on the basis of their respective net asset values at the time of the exchange without a sales load; (6) shares of New Decade, however acquired, may be exchanged for shares of Utility or High Yield on the basis of their respective net asset values at the time of the exchange without a sales load; and (7) shares of Utility, however acquired, may be exchanged for shares of High Yield or New Decade on the basis of their respective net asset values at the time of the exchange without a sales load. Applicants state that each of the foregoing exchanges and reexchanges are subject to the conditions that the shares to be exchanged have a net asset value equivalent to the minimum initial amount required for investment or the minimum amount required for reinvestment in the shares to be acquired.

Applicants propose to make the following offers of exchange: (1) High Yield, Utility and New Decade propose to offer their shares to shareholders of Municipals in exchange for shares of Municipals at their relative net asset value at the time of the exchange, plus the sales charge applicable to the purchase of shares of High Yield, Utility or New Decade, less the sales charge previously paid on the shares of Municipals; and High Yield, Utility and New Decade propose to offer their shares to shareholders of Money Mart and Tax Free who acquired their shares in exchange for shares of Municipals at their relative net asset value at the time of the exchange, plus the sales charge applicable to the purchase of shares of High Yield, Utility or New Decade, less the sales charge previously paid on the shares of Municipals exchanged for the shares of Money Mart or Tax Free.

Applicants state that a shareholder acquiring shares of High Yield, Utility or New Decade through any combination of exchanges or purchases of shares of Money Mart, Tax Free and Municipals would pay the same overall sales charge as a proportion of net asset value or of the public offering price that he would have paid had he directly purchased shares of High Yield, Utility or New Decade with the same net asset value. Applicants represent that Bache does not intend to solicit exchanges but, rather, will notify dealers of the availability of the proposed exchange privilege. Applicants further represent that Bache does not presently intend to offer dealers advice as to the suitability of High Uield, Utility or New Decade for their customers.

According to the application, should the proposed exchange privilege be terminated, Applicants will provide no notice of the termination to shareholders of the Funds other than in the next subsequent effective prospectus of the Funds. Applicants state that if a shareholder desires to exercise the proposed exchange privilege, those shares which may be exchanged at net asset value without a sales charge will be exchanged first. Applicants further state that the remaining shares to be exchanged will be selected from those shares which are entitled to be exchanged upon payment of lowest additional sales charge. According to the application, if a shareholder of Municipals redeemed his entire holdings and, within the 30-day period for reinstatement of an account without payment of a sales charge did reinstate his account, the shares so reacquired could be exchanged for shares of High Yield, Utility or New Decade on the basis of their relative net asset values plus the differential sales charge applicable without regard to the exercise of the reinstatement privilege. In addition, Applicants state that shares of Municipals acquired through the reinstatement privilege could be exchanged for shares of Money Mart or Tax Free on the basis of their respective net asset values without a sales charge and reexchanged for shares of High Yield, Utility or New Decade on the basis of their relative net asset values plus the differential sales charge applicable without regard to the exercise of the reinstatement privilege.

Section 11(a) of the Act provides, in part, that it shall be unlawful for any registered, open-end investment company or any principal underwriter thereof to make or cause to be made an offer to a security holder of such company or any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged unless the terms of the offer have first been submitted to and approved by the Commission.

Section 22(d) of the Act provides, in part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the company's prospectus.

Applicants state that the proposed exchange offers would enable a shareholder of Municipals and a shareholder of Money Mart or Tax Free, to the extent that such shares of Money Mart or Tax Free had been acquired through an exchange of shares of Municipals, to exchange his shares for shares of High Yield, Utility or New Decade on a basis other than net asset value because such shareholder would be required to pay the difference in

sales charges between that imposed on purchases of Municipals and that on purchases of High Yield, Utility and New Decade and would not be at their net asset values. Thus, the proposed exchange offers would violate section 11(a) of the Act unless an order approving the offers of exchange is issued. In addition, Applicants assert the proposed exchange offers would violate section 22(d) of the Act since an investor would be able to purchase shares of High Yield, Utility or New Decade at a sales charge other than that described in their prospectuses merely by exchanging shares of Municipals for them or by exchanging shares of Municipals for shares of Money Mart or Tax Free and subsequently exchanging those shares for shares of High Yield, Utility or New Decade.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants assert that the proposed offers of exchange are fair and equitable to shareholders of each of the funds while at the same time giving all of them desirable flexibility in their financial planning and that the orders required are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than January 4, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or my mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 12087; 812-5010]

The Equitable Life Assurance Society of the United States; Filing of Application

December 8, 1981.

In the Matter of The Equitable Life Assurance Society of the United States and Separate Account Nos. 301, 302, 303, and 304 of the Equitable Life Assurance Society of the United States, 1295 Avenue of the Americas, New York, NY 10019.

Notice is hereby given that the Equitable Life Assurance Society of the United States ("Equitable") and Separate Account Nos. 301, 302, 303, and 304 of Equitable (respectively "Separate Account 301", "Separate Account 302", "Separate Account 303", and "Separate Account 304", and collectively, the "Separate Account") (Equitable and the Separate Accounts together, "Applicants") filed an application on November 9, 1981, for an order of the Commission pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") granting exemptions, to the extent requested, from sections 15(a), 16(a), 17(f), 27(c)(2), and 32(a)(2) of the Act and rule 17f–2 thereunder. Equitable is a mutual life insurance company organized under the laws of New York. Each of the Separate Accounts is registered under the Act as an open-end, diversified management investment company. Interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

The Separate Accounts were established by Equitable on October 19, 1981, pursuant to the insurance laws of New York. Each is a separate investment account to which assets will be allocated to fund benefits provided by certain group annuity contracts ("Contracts") under certificates ("Certificate") issued to individuals who establish individual retirement annuities ("IRAs") pursuant to section 408(b) of the Internal Revenue Code of 1954, as amended (the "Code"). Applicants assert that the Certificates, as issued to each participant, will constitute an IRA for purposes of section 408(b) of the Code, subject to the terms thereof, and are designed to provide the tax-favored treatment accorded IRAs under the Code.

Participants may allocate their contributions among the four Separate Accounts, each of which has different investment policy. When contributions are received under the IRA Certificates, Equitable will deduct any applicable premium taxes. On the last day of each calendar quarter before a participant's specified retirement date, Equitable will make a participant service charge against the sum of the values in the Separate Accounts under his Certificate. The charge will be allocated among the Separate Accounts in the ratio that the accumulated value in each of these accounts bears to the cash value of the Certificate, and the amount of the charge will depend on several factors. Applicants represent that the annual charge will in no event exceed $40. For providing investment management services to the Separate Accounts, Equitable will make a daily charge at an effective annual rate of .35% of the value of the assets in Separate Account 301 and Separate Account 303 and .50% of the value of the assets in Separate Account 302 and Separate Account 304. In addition, a daily charge at the effective annual rate of .25% of the value of the assets of each Separate Account attributable to the IRA Certificates is made by Equitable. This administrative expense charge is designed to reimburse Equitable for any administrative expenses in excess of the participant service charge. The investment management service charges and administrative expense charges are reflected in computation of unit values for each of the Separate Accounts. Equitable will impose a $5 transaction charge for each withdrawal of any type under an IRA Certificate except for withdrawals pursuant to a periodic distribution option which will be subject to a $1.50 transaction charge.

Exemptions Requested

Section 15(a) of the Act provides that no person is permitted to serve or act as investment adviser of a registered investment company except pursuant to a written contract which, among other

things, has been approved by a vote of a majority of the outstanding voting securities of such registered company. Section 16(a) of the Act provides that no person shall serve as a director of a registered investment company unless elected to that office by the holders of the outstanding voting securities of such company at an annual or a special meeting duly called for that purpose. Section 32(a)(2) of the Act provides that it shall be unlawful for a registered management company to file with the Commission any financial statement signed or certified by an independent public accountant unless the selection of such accountant shall have been submitted for ratification or rejection at the annual meeting next succeeding the selection of such accountant by the board of directors.

Each of the Separate Accounts is under the general supervision of a committee ("Committee") comprised of five members ("Members") initially selected by Equitable. Under the respective rules and regulations of the Separate Accounts the first annual meeting of participants in the respective Separate Accounts would be held on April 22, 1982. Applicants claim that if the first annual meeting is held on April 22, a late February, or earlier, record date for participants entitled to vote would have to be established in order to allow an adequate proxy solicitation period. Applicants assert that under the circumstances the number of participants in the respective Separate Accounts of record on a record date for an April 22, 1982 meeting may be less than desirable for a meaningful vote on the election of Members of the Committees, the approval of an investment management agreement between Equitable and each of the Separate Accounts and the ratification of the selection of the independent public accountants for each of the Separate Accounts. Although Equitable will provde the initial capital for each of the Separate Accounts, it has no voting rights in respect thereof.

Applicants request exemptions from the requirements of sections 15(a), 16(a) and 32(a)(2) of the Act so that each of the Separate Accounts may operate without such election, approval and ratification by persons having voting rights until action with respect to those matters is taken at an initial annual meeting of participants in the respective Separate Accounts held no later than April 28, 1983, the scheduled date for the 1983 annual meeting.

Section 17(f) of the Act provides, among other things, that a registered management investment company shall place and maintain its securities and similar investments in the custody of a bank or banks having the qualifications prescribed in section 26(a)(1) or in the custody of members of national securities exchanges, or in its own custody, but only in accordance with rules and regulations or orders which the Commission may from time to time prescribe for the protection of investors. Each of the Separate Accounts proposes to maintain its securities and similar investments in the custody of banks (the "Banks") having the qualifications prescribed in section 26(a)(1) of the Act, or, through the Banks under rule 17f–4(d), in a system for the central handling of securities as permitted by section 17(f). Under the custodial arrangements, authorized persons of the Separate Accounts will be permitted to withdraw investments of the Separate Accounts held by the Banks and, therefore, under rule 17f–2(a), such investments will be deemed to be in the "custody" of the Separated Accounts, requiring compliance with the provisions of rule 17f–2. Rule 17f–2(d) provides, in pertinent part, that no person shall be authorized or permitted to have access to the securities and similar investments deposited with a bank, except pursuant to a resolution of the board of directors of the registered investment company which designates no more than five persons who must be either officers or responsible employees of such company and provides that access to such investments must be had only by two or more such persons jointly, at least one of whom shall be an officer. Access must also be permitted to properly authorized bank officers and to the independent public accountants retained by the investment company.

Applicants assert that under the insurance laws of New York, all of the assets of the Separate Accounts are owned by Equitable. Furthermore, according to Applicants, Equitable's by-laws require that the Investment Committee of its Board of Directors prescribe rules and requirements governing the custody, safekeeping and control of all securities owned or held by Equitable, with certain exceptions. Applicants assert that, in the curcumstances, the custodial arrangements for the Separate Accounts must provide for the withdrawal, deposit and inspection by Equitable of securities held by the Banks for Equitable and the Separate Accounts. Each of the custodial agreements to be entered into between the Applicants and the Banks will provide that certain persons authorized by Equitable and the Separate Accounts may deposit or withdraw securities, or authorize the deposit or withdrawal of securities, and inspect the securities held by the Banks as custodians. Such persons, who will be officers or responsible employees of Equitable and/or the Separate Accounts will be so authorized pursuant to resolutions of both the particular Separate Accounts Committee and the Board of Directors of Equitable or the Investment Committee of Equitable's Board, and, for each of the Separate Accounts, will not exceed five in number at any one time. Access to the assets of the Separate Accounts held by the Banks shall, in each case, be had either by two or more of the authorized persons, at least one of whom shall be an officer of Equitable or the particular Separate Account or by representatives of the New York Insurance Department. In all cases, the persons so authorized, when depositing securities or withdrawing them from the Banks, or when ordering their withdrawal and delivery from the Banks, shall sign notations in respect of such action showing all of the information required by rule 17f–2(e). Applicants request exemption from section 17(f) and rule 17f–2 to permit access to the securities and similar investments of the Separate Accounts in the custody of the Banks by persons authorized by Equitable and by representatives of the Department.

Section 27(c)(2) requires that the proceeds of payments under periodic payment plan certificates be deposited with a trustee or custodian having the qualifications prescribed in section 26(a)(1) for the trustees of unit investment trusts and that such proceeds be held under an indenture or agreement containing, in substance, the provisions required by sections 26(a)(2) and (3) for the trust indentures of unit investment trusts. Section 26(a)(2), in part, prescribes the types of fees and charges allowed the trustees or custodian and requires that the trustee or custodian have possession of all securities and the other property in which the funds of the investment company are invested. Equitable will deduct applicable premium taxes from participant's contributions, a participant service charge and an administrative expense charge for administrative expenses and certain transaction charges upon any withdrawals as noted above. Additionally, Equitable will deduct a management service charge. Applicants consent (a) that charges under the Contracts and certificates for administrative services shall not exceed such reasonable amount as the Commission may prescribe and that the Commission shall reserve jurisdiction

for such purpose, and (b) that the payment of sums and charges out of the assets of the Separate Accounts shall not be deemed to be exempted from regulation by the Commission by reason of the order herein requested; provided that the Applicants' consent shall not be deemed to be a concession to the Commission of authority to regulate the payment of sums and charges out of the assets in the Separate Accounts other than charges for administrative services, and Applicants reserve the right, in any proceeding before the Commission or in any suit or action in any court, to assert that the Commission has no authority to regulate the payment of such other sums and charges. In summary, section 26(a)(3) requires that the indenture or custody agreement prohibit the trustee or custodian from resigning until the assets of the investment company ahve been distributed or until a successor has been appointed. Applicants state that under New York law, Equitable cannot abandon its obligations under the Contracts to holders of Certificates, or to any annuitant, until they have been fully discharged. In view of the amount of Equitable's total assets, Applicants allege that the possibility of abandonment or default is remote. In the foregoing circumstances, Applicants submit that compliance with the requirements of section 27(c)(2) is not necessary for the protection of investors and, therefore, Applicants request that an exemption from section 27(c)(2) be granted.

Section 6(c)

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than December 31, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule O-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued, as of course, following December 31, 1981 unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 12085; 811-1753]

Financial International Corp.; Filing of Application

December 8, 1981.

Notice is further given that Financial International Corporation, 1701 Pennsylvania Avenue, N.W., Washington, D.C. 20006 ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as a closed-end, non-diversified, management investment company, filed an application on February 16, 1978, and an amendment thereto on November 18, 1981, for an order of the Commission pursuant to Section 8(f) of the Act declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states, among other things, that Applicant was incorporated on April 14, 1966, under the laws of Delaware as a wholly-owned subsidiary of International Bank ("IB"), an Arizona corporation. On November 15, 1966, IB exchanged shares of stock of Financial General Bank Shares, Inc., for shares of Applicant's common stock and Applicant's shares acquired by IB were distributed to the shareholders of IB in December 1966. Applicant registered under the Act on October 30, 1968.

Applicant states that on September 13, 1977, at the annual meeting of Applicant's shareholders a plan of liquidation and dissolution ("Plan") was adopted by a favorable vote of over 99% of the shares voted, with the total number of shares voted being over 310,000 of the 398,899 outstanding. Pursuant to the Plan, certain of Applicant's assets were liquidated, the expenses of Applicant were paid and the remaining assets (except for a cash reserve in the amount of $246,000) were distributed to a liquidating trust the purpose of which was to distribute such assets to Applicant's shareholders. On December 31, 1979, the amount of $215,360.64 remaining in the reserve was distributed to Applicant's transfer agent with instructions to distribute it to shareholders. The trustee of that liquidating trust informed Applicant's shareholders by letter dated January 23, 1978, of the distribution and instructed them to surrender their stock certificates to Applicant's transfer agent. As of November 1, 1981, the transfer agent advised Applicant that of the 389,899 shares of Applicant outstanding at the date of dissolution, 395,917, or 99.3%, had been surrendered and the shares and cash to be exchanged therefor had been transmitted to the shareholders. The remaining 2,982 shares, or .7%, are being held by the transfer agent, First American Bank, Washington, D.C.

The application states that Applicant was dissolved on September 13, 1977, in accordance with Delaware laws upon the acceptance for filing by the Office of the Secretary of the State of Delaware of Applicant's Certificate of Dissolution. Since that date the Applicant has ceased active operations and has existed solely for the purpose of winding up its affairs. Applicant is not a party to any litigation or administrative proceeding, it does not have any outstanding debts, and has no reserve for contingent tax or other liabilities. Applicant, therefore is not currently engaged in business as an investment company.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order the registration of such company under the Act shall cease to be in effect.

Notice is further given that any interested person may, not later than January 5, 1982, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application

accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule O–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 12084; 811–1526]

Fundex, Inc.; Filing of Application

December 8, 1981.

Notice is hereby given that Fundex, Inc. ("Applicant"), 342 Madison Avenue, New York, New York 10173, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on October 20, 1981, pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be a investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

On August 18, 1967, Applicant, a Delaware Corporation, filed a registration statement pursuant to section 8(b) of the Act. Its registration statement filed under the Securities Act of 1933 was declared effective on December 27, 1967 and an initial public offering was commenced immediately thereafter.

Applicant represents that at meetings held on January 19, 1981 and July 28, 1981 its Board of Directors approved the Agreement and Plan of Merger between Applicant and Manhattan Fund, Inc. ("Manhattan"). Applicant states that a majority of its shareholders approved the merger of Applicant into Manhattan, in accordance with the laws of the State of Delaware. Effective as of September 30, 1981, Applicant was merged into Manhattan and, in accordance with the Agreement and Plan of Merger, and pursuant to the filing of the Articles of Merger in the State of Delaware, Applicant ceased to be a separate corporation.

Applicant represents that it has no debts or other outstanding liabilities; it has no securityholders, and it is not a party to any litigation or administrative proceeding. Applicant states that within the last 18 months it has not for any reason transferred any of its assets to a separate trust. Finally, Applicant states that it is not now engaged, and does not propose to engage, in any business activity.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, the registration of such company under the Act shall cease to be in effect.

Notice is further given that any interested person may, not later than January 4, 1982, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his or her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he or she may request that he or she be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule O–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponement thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81–35606 Filed 12–11–81; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 22307; 70–6676]

Middle South Utilities, Inc. et al.; Proposed Guaranty by Holding Company and Subsidiary Companies of Loans of Non-Associate Exposition Company

December 8, 1981.

In the matter of Middle South Utilities, Inc., 225 Baronne Street, New Orleans, Louisiana 70112; Louisiana Power & Light Co., 142 Delaronde Street, New Orleans, Louisiana 70174; New Orleans Public Service Inc., 317 Baronne Street, New Orleans, Louisiana 70112.

Middle South Utilities, Inc. ("MSU"), a registered holding company, and two of its subsidiary companies, Louisiana Power & Light Company ("LP&L") and New Orleans Public Service Inc. ("NOPSI"), have filed a declaration with this Commission pursuant to section 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act").

MSU, LP&L, and NOPSI propose to guarantee certain obligations incurred by Louisiana World Exposition, Inc. ("LWEI"), a Louisiana non-profit corporation, in connection with the planning and preparation by LWEI for the Louisiana 1984 World Exposition to be held in the City of New Orleans ("Exposition"). LWEI has entered into a Credit Agreement with several banks the terms of which permit LWEI to borrow and reborrow funds through June 30, 1984, for the payment of (i) construction and operation of the Exposition and (ii) interest or fees due on loans under the Credit Agreement, and to borrow funds after June 30, 1984, to pay interest due on loans thereunder. Before the banks are obligated to make any loans to LWEI under the Credit Agreement, LWEI must obtain, among other things, a $5,000,000 guaranty ("Government Guaranty") from the State of Louisiana, or any political subdivision, agency, or instrumentality thereof. Also, LWEI must obtain additional acceptable guaranties from private parties in a minimum aggregate amount of $30,000,000 before the banks are obligated to make any loans to LWEI in excess of $5,000,000. The

aggregate principal amount of LWEI's borrowings under the Credit Agreement at any one time outstanding may not, subject to certain exceptions, exceed the aggregate principal amount of all such guaranties, including the Government Guaranty.

To evidence its indebtedness under the Credit Agreement, LWEI will deliver to each bank a master promissory note ("Note" or collectively "Notes"), dated as of October 15, 1981, obliging LWEI to pay such bank, on or before June 30, 1985, the principal amount of that bank's loan commitment under the Credit Agreement or, if less, the aggregate principal balance of loans made by such bank to LWEI under the Credit Agreement. The Notes shall bear interest, payable monthly and at maturity, on the unpaid principal balance thereof at a rate equal to ½ of 1% above the prime rate of Chemical Bank, New York, in effect from time to time. LWEI will have the right to prepay the unpaid principal balance of the Notes, in whole or in part, at any time without premium or penalty. LWEI has agreed to pay the banks a commitment fee at the rate of ⅜ of 1% per annum on the average quarterly unused portion of the banks' loan commitments during the period from October 15, 1981, until June 30, 1984. Additionally, LWEI has agreed to pay the agent banks at the commencement of the Credit Agreement an agent fee equal to ⅛ of 1% of the aggregate amount of the Loan commitments of the banks under the Credit Agreement.

To ensure the LWEI has sufficient borrowing capability under the Credit Agreement, MSU, LP&L, and NOPSI propose to give the banks guaranties of $500,000, $1,000,000, and $1,000,000, respectively, for the payment of all indebtedness incurred by LWEI pursuant to the terms of the Credit Agreement ("Indebtedness"). The guaranties which MSU, LP&L, NOPSI, and other private parties ("Guarantors") propose to provide are absolute and complete. Each guaranty shall remain in full force and effect until December 31, 1985, unless a written demand for payment of the guaranty has been made pursuant to the Credit Agreement and the guaranty on or prior to that date, in which event the guaranty will remain in full force and effect until the obligations of the guarantor are satisfied in full.

The terms of the guaranties provide that the liability of the Guarantors shall extend only to that amount of the Indebtendness exceeding the amount of the Government Guaranty. Since the obligation of each Guarantor is joint, the liability of any one Guarantor is determined on a pro rata basis in the proportion which the amount of its guaranty bears to the total amount of all Guarantors' guaranties; provided that, in the event any Guarantor defaults in the payment of its guaranty amount, the obligation of any one non-defaulting Guarantor shall be determined on a pro rata basis in the proportion that the amount of its guaranty bears to the total amount of all non-defaulting Guarantors' guaranties. In no event, however, will the liability of any Guarantor exceed the specified amount of its guaranty.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by January 4, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarants at the addresses specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 02/02-0413]

Holding Capital Management Co.; Issuance of a License To Operate as a Small Business Investment Company

On March 23, 1981, a Notice was published in the **Federal Register**, (46 FR 18132) stating that Holding Capital Management Company, 711 Fifth Avenue, New York, New York 10022, had filed an application with the Small Business Administration pursuant to § 107.102 of the SBA Rules and Regulations governing small business investment companies (13 CFR 107.102 (1981)), for a license to operate as a small business investment company.

Interested parties were given until the close of business April 7, 1981, to submit their comments. No comments were received.

Notice is hereby given that, having considered the application and all other pertinent information, SBA on November 19, 1981 issued License No. 02/02-0413 to Holding Capital Management Company, pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended.

(Catalog of Federal Domestic Assistance Program No. 59.011. Small Business Investment Companies)

Dated: December 8, 1981.

Edwin T. Holloway,

Acting Associate Administrator for Finance and Investment.

BILLING CODE 8025-01-M

Senior Executive Service Performance Review Board; Substitution of Two Members

AGENCY: Small Business Administration.

ACTION: Listing of Personnel Serving as Members of this Agency's Senior Executive Service Performance Review Board.

SUMMARY: Public Law 95-454 dated October 13, 1978, (Civil Service Reform Act of 1978) requires that Federal Agencies publish notification of the appointment of individuals who serve as members of that agency's Performance Review Board (PRB). The following substitution of members has been made:

1. Marshall J. Parker, Associate Administrator for External Affairs replaces Robert A. Turnbull, Associate Deputy Administrator.

2. James C. Sanders, Associate Administrator for Management Assistance replaces Donald R. Templeman, Deputy Administrator.

Michael Cardenas,

Administrator.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice 782]

Assistance Under the Foreign Assistance Act in Fiscal Year 1982 to Private Sector Organizations Operating Within Nicaragua

Determination under section 620(q) of the Foreign Assistance Act of 1961, as amended (the "Act"), that it is in the National Interest to Furnish Assistance Under the Act in Fiscal Year 1982 to

Private Sector Organizations Operating Within Nicaragua.

By virtue of the authority vested in me by section 620(q) of the Act, Executive Order 12163 and Delegations of Authority issued thereunder, I hereby determine it is in the national interest of the United States to furnish assistance under the Act in Fiscal Year 1982 to private sector organizations operating within Nicaragua, notwithstanding that the Government of Nicaragua is more than six months in default in payment of principal and interest on loans made under the Act.

This determination shall be published in the **Federal Register.**

Dated: November 24, 1981.

Alexander M. Haig, Jr.,

Secretary of State.

BILLING CODE 4710-10-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD-81-096]

Chemical Transportation Advisory Committee

AGENCY: Coast Guard, DOT.

ACTION: Request for applications.

SUMMARY: The U.S. Coast Guard is seeking applicants for appointment to membership on the Chemical Transportation Advisory Committee. This committee advises the Coast Guard Marine Safety Council on requirements promoting the safety in the transportation of hazardous materials on vessels, the transfer of these materials between the vessels and shore, and on the waterfront facilities over which these materials move.

To achieve the balance of membership required by the Federal Advisory committee Act, the Coast Guard is especially interested in applications from minorities, women and public interest representatives. Selection will be based upon expertise in the subjects under consideration.

The committee usually meets at least once a year with subcommittee meetings for specific problems on and as required basis. Members serve at no cost to the Federal Government and receive neither travel nor per diem allowances.

An alternate may be selected for each member appointed to the committee. Application for alternate membership should be included with the prospective member's application request.

DATE: Applications should be received no later than February 20, 1982.

ADDRESS: Persons interested in applying should write to Commandant (G-CMC), U.S. Coast Guard Headquarters, Washington, D.C. 20593.

FOR FURTHER INFORMATION CONTACT: Mary Williams, Hazardous Materials Division (G-MHM), U.S. Coast Guard Headquarters, Washington, D.C. 20593; (202) 426-2306.

Dated: December 8, 1981.

A. D. Utara,

Commander, USCG, Coast Guard Regulations Officer.

[FR Doc. 81-35740 Filed 12-11-81; 8:45 am]

BILLING CODE 4910-14-M

[CGD-81-095]

Environmental Impact Statement, Proposed Bridge Construction Across Garrison Channel at Harbour Island, Tampa, Hillsborough County, Florida

AGENCY: Coast Guard, DOT.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Coast Guard is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared in conjunction with agency actions related to construction of bridges across Garrison Channel between the City of Tampa and the proposed Harbour Island Development, formerly known as Seddon Island, in Hillsborough County, Florida.

ADDRESS: Written comments should reference this notice and be addressed to: Commander, Seventh Coast Guard District, Aids to Navigation Branch, 51 SW First Avenue, Miami, Florida 33130.

FOR FURTHER INFORMATION CONTACT: Mr. M. T. Bennett, Bridge Administration Specialist, Bridge Section, Aids to Navigation Branch at the address shown above or by telephone at (305) 350-4108.

SUPPLEMENTARY INFORMATION: Greiner Engineering Sciences, Inc., on behalf of Habour Island, Inc., have made application for Coast Guard approval of location and plans for a bridge across Garrison Channel at Franklin Street in Tampa, Hillsborough County, Florida. The proposed bridge, and a second bridge to be constructed at a later date on the general alignment of the existing railroad bridge will provide access to a proposed residential/commercial development to be located on Harbour Island.

In accordance with section 102(2)(c) of the National Environmental Policy Act and 40 CFR 1500-1508, the Commander, Seventh Coast Guard District is soliciting comments from all interested parties concerning the environmental impact of several alternatives as shown below. Comments received in response to this notice will be utilized in determining the scope of issues to be addressed and for identifying the significant issues related to the proposed action.

Alternatives under consideration for the bridge structures include but are not limited to the following:

1. No project.
2. Alternate locations.
3. Alternate means of access.

Development alternatives include but are not limited to the following:

1. No Project.
2. Greater or lesser levels of development.
3. Alternative land uses.

The alternatives will be developed in more detail or modified as the Environmental Impact Statement scoping process continues.

A formal scoping meeting is not anticipated at this time. It is expected that a public hearing will be held after the draft Environmental Impact Statement is made available for public and agency review and comment.

To ensure that the full range of impacts related to the proposed action is addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning the proposed action and Environmental Impact Statement should be directed to the Commander, Seventh Coast Guard District at the above address.

Dated: December 8, 1981.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard Chief, Office of Navigation.

[FR Doc. 81-35739 Filed 12-11-81; 8:45 am]

BILLING CODE 4910-14-M

[CGD 81-094]

Port Access Route Study

AGENCY: Coast Guard, DOT.

ACTION: Notice of study results.

SUMMARY: The purpose of this notice is to publish results of the Port Access Route study announced on April 16, 1979, in the **Federal Register** (44 FR 22543) and modified on January 31, 1980 (45 FR 7026). Only the results for study areas 30 to 32 are published in this notice. Generally, these areas include the coast of Alaska. Two routing measures are recommended for these study areas, including a shipping safety fairway system at the approach to Prince William Sound, and a fairway through Unimak Pass. No fairway

designation is proposed at this time for the area of Cook Inlet, Shelikof Strait and Kennedy Entrance.

Background

The Ports and Waterways Safety Act (PWSA) (Pub. L. 95–474; 92 Stat. 1473, 33 U.S.C. 1223) mandated that the Coast Guard "undertake a study of the potential traffic density and the need for safe access routes." The **Federal Register** for April 16, 1979 (44 FR 22543), announced the scope of the study and included a description of each area to be studied. Coast Guard district staff officers were assigned responsibility for executing the study; and it has been conducted under the standards contained in sections 4 and 5 of the PWSA. As a result of the study, appropriate ships' routing measures, such as safety fairways and traffic separation schemes, may be proposed. Where the study indicates that no new routing measures are to be designated in an area, notice of such a conclusion is to be published in the **Federal Register.** However, areas for which results are published may be studied again in the future as changes in conditions warrant re-evaluation.

Results for areas 5, 5a and 6 (New York and Delaware approaches and Long Island Sound) were published in 46 FR 49035; for areas 13 to 20 (coast of South Carolina, Georgia and Florida) in 46 FR 48376; for area 21 (Gulf of Mexico) in 46 FR 49989; and for areas 26 to 29 (coast of Oregon and Washington) in 46 FR 59686. Results for the remaining study areas (1 to 4 in New England, 7 to 12 along the Mid-Atlantic coast, and 22 to 25 along California) will be published in a future **Federal Register.**

The Seventeenth Coast Guard District performed the study for areas 30 to 32, along the Coast of Alaska.

Study Method

In accordance with the Ports and Waterways Safety Act (PWSA), in 1979, the Seventeenth District commenced an evaluation of maritime traffic density throughout Alaskan waters. This study involved maritime agents, operators, exploration activities, local communities, fisheries' organizations, state marine pilots, other state interests, Federal government and DOD activities. Over 90 private organizations were contacted in the initial development of the study proposals.

After evaluating the information received, determinations were made on establishing fairways in certain areas. On December 7, 1979, a proposal was mailed to all previously contacted parties and to the State of Alaska. Comments were solicited.

Again, on May 16, 1980, after review of previous comments received and further discussion with interested parties, a final proposal was sent out for comment. All parties seemed in agreement with this proposal in general except for two comments.

The State of Alaska, Department of Policy Development and Planning suggested certain changes in the Unimak Pass area. These changes were discussed in detail over the phone, and a final agreement was to decrease the width of the fairway from five (5) miles to four (4) miles, but to use the same terminus points for the fairway. The reason for using these terminus points is that they are established traditional maritime traffic routes, published in the Coast Pilot and other nautical publications. To change them at this time would require revision not only in other publications, but in many a mariner's navigation track that has been utilized over the years.

Mobil Oil Corporation recommended the use of a precautionary area at the end of the fairway proposed for Hinchinbrook Entrance to Prince William Sound. However, precautionary areas are generally utilized with traffic separation schemes rather than fairways. In this case, tank vessels will be encouraged to keep to the starboard lane of the designated pair of fairways, operating as they have been over the past three years, and leaving no doubt as to another vessel's intentions when entering the area. The fairway designations allow vessels sufficient maneuvering room and are only intended to assure the mariner that he will find no fixed obstruction to navigation within that area.

The exploration activity on the outer continental shelf (OCS) and the growth of Alaskan Ports will be closely monitored; and should future conditions dictate, more formal traffic routing measures could be proposed in accordance with the provisions of the Ports and Waterways Safety and international guidelines.

Proposals

The study performed on Alaskan ports identified three critical transportation corridors: approaches to Prince William Sound, Cook Inlet/Shelikof Strait, and Unimak Pass. Other areas of Alaska simply do not have the volume or type of traffic that would warrant the establishment of vessel routing measures.

Two vessel traffic fairways are recommended for Alaskan waters. One to provide safe maritime routing to and from Prince William Sound through the outer continental shelf areas of the Northern Gulf of Alaska. The other will be through Unimak Pass which is a major route for vessels rounding the Alaska Peninsula as well as a Great Circle route from western U.S. ports to the Far East.

Prior to the enactment of PWSA, shipping fairways were designated by the Army Corps of Engineers (almost exculsively in the Gulf of Mexico) as areas in which no permits for structures would be issued. The authority for designating fairways was specifically delegated by PWSA (sec. 4(c)(1)) to the Secretary of the Department in which the Coast Guard is operating, after a study has determined the need for a particular routing measure. Fairways can only be established through the rulemaking process with opportunity for public comment.

The shipping safety fairways described below are recommended to be established under authority of the PWSA to control the erection of structures therein, to provide safe approaches to entrances to major Alaskan ports. Structures will not be permitted in areas designated as fairways as they would be considered obstructions to navigation.

Area 30: Includes Prince William Sound. (N.O.S. Reference Charts 16700 and 16013). From the coast to 59° N latitude, from 142° W longitude to 148° W longitude.

Prince William Sound, the approaches thereto, across the Northern Gulf of Alaska, average 5 transits a day by tank vessels. These vessels are up to 268,000 DWT in size and are carrying North Slope crude oil in the Trans-Alaska Pipeline (TAPS) trade between Valdez, and lower U.S. ports and the Virgin Islands.

The Coast Guard Vessel Traffic Service (VTS) in Valdez monitors traffic in the Traffic Separation Scheme (TSS) within Prince William Sound. To provide safe maritime routing, to and from Prince William Sound, through the outer continental shelf areas of the Northern Gulf of Alaska, the following fairways are proposed:

The fairway system proposed for tank vessel traffic consists of three segments. Segment (1) is a two-way traffic fairway extending southeast from Cape Hinchinbrook. Segment (2) is a fairway recommended for inbound traffic approaching the two-way traffic fairway and segment (3) is the fairway recommended for outbound traffic departing the two-way traffic fairway.

Segment (1)—Two-way Traffic: An area encompassed by lines joining points at:

Latitude	*Longitude*
59° 59.0′ N.	145° 27.4′ W.
to 60° 15.7′ N.	146° 44.4′ W.
to 60° 11.4′ N.	146° 47.0′ W.
to 59° 55.0′ N.	145° 42.0′ W. to
59° 59.0′ N.	145° 27.4′ W.

Segment (2)—Recommended for inbound Tank Vessel traffic, a safety fairway, 2 nautical miles wide, centered upon rhumb lines joining points at:

Latitude	*Longitude*
59° 15.0′ N.	144° 03.5′ W.
59° 59.3′ N.	145° 29.0′ W.

Segment (3)—Recommended for outbound Tank Vessel traffic a safety fairway, 2 nautical miles wide, centered upon rhumb lines joining points at:

Latitude	*Longitude*
59° 56.0′ N.	145° 40.0′ W.
59° 15.0′ N.	144° 25.0′ W.

This system of fairways provides ample maneuvering room from Cape Hinchinbrook to the terminus of the two-way traffic area. The "buffer zone" between the Inbound and Outbound fairways is 3.5 nautical miles wide at the northern end and expands to 5.5 nautical miles at the southern terminus. This "buffer" area is not a fairway and will not be subject to a restriction on structures. The traffic directions within the fairway will not be mandatory. Recommended directions may be added to nautical charts of the area. A Traffic Separation Scheme, with its additional restrictions on vessel activity within lanes, does not appear warranted by the volume of traffic at this time.

Area 31: Includes Cook Inlet and the Shelikof Strait. From the coast on the northwest to 56° N latitude on the south and to 150° W longitude on the east.

Consideration was given to establishing fairways in Cook Inlet, Shelikof Strait and the Kennedy Entrance, and the local navigation conditions were discussed with the S.W. Alaskan Pilots. The Coast Guard has decided not to designate fairways in these areas at this time.

Wind, current and ice conditions, during the different seasons of the year, require the use of many varied routes across Cook Inlet.

Exploration, to date, has indicated no significant find. Development in these offshore waters is expected to be minimal. The existing oil wells pose no problem to safe navigation, and to designate meaningful fairways would eliminate the major portion of Cook Inlet from further offshore activity.

Development in this area will be closely monitored and, if necessary at a later date, fairways will be established.

Area 32: Remaining Coast of Alaska (N.O.S. Chart 16520). From the coast seaward to the 1,800 meter curve or the limit of Canadian jurisdiction or Union of Soviet Socialist Republics jurisdiction, from the Canadian/United States border to the Bering Straits, excluding any area to the west of 170° W longitude, excluding the regions lying within areas 30 and 31 above.

Unimak Pass is the major route through the Aleutian Islands chain. Many deep draft vessels presently transit this area while navigating the Great Circle route from the western U.S. ports to the Far East. Future plans for Dutch Harbor will result in a considerable increase in vessel activity through Unimak Pass.

A safety fairway, 4 nautical miles wide, centered upon a rhumb line joining points at:

Latitude	*Longitude*
54° 06.0′ N.	162° 20.0′ W.
54° 24.0′ N.	165° 43.0′ W.

and a safety fairway, 4 nautical miles wide, centered upon a rhumb line joining points at:

Latitude	*Longitude*
54° 20.0′ N.	165° 02.0′ W.
54° 43.0′ N.	165° 13.0′ W.

Should future traffic density dictate, a formal traffic separation scheme could be implemented within the parameters of this fairway.

Alaskan Outer Continental Shelf Areas (General)

The Department of the Interior, Bureau of Land Management, Alaskan Outer Continental Shelf Office, expressed agreement to include in its lease sales information the following paragraph:

"Some of the tracts offered for lease may fall within areas that may later be considered for fairways, precautionary zones, or traffic separation schemes. Bidders are advised that the United States reserves the right to designate necessary fairways through leased tracts pursuant to the Ports and Waterways Safety Act, Section 4(c), 33 U.S.C. 1223(c), and 33 U.S.C. 1224."

This puts all prospective lessees on notice that traffic lanes may later be designated, however, it will only be after consultation with the interested parties, and appropriate notices, as required by law.

Implementation

The above study recommendations will be implemented through the rulemaking process. The proposed shipping safety fairways will be published as a Notice of Proposed Rulemaking to allow an opportunity for public comment. It is expected that this process will be initiated early in 1982.

FOR FURTHER INFORMATION CONTACT:

Mr. Christopher Young, Office of Navigation (G–NSR–3), Room 1418, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593, (202) 426–4958 between 7:30 a.m. and 4:30 p.m., Monday through Thursday, except holidays.

Dated: December 1, 1981.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard, Chief Offioer of Navigation.

BILLING CODE 4910–14–M

Federal Aviation Administration

[Docket No. 81–ASW–3AC]

Gulfstream American Corp. Model 690D; Aircraft Certification and Availability of Documents

The formal type certification process for the Model 690D has been completed. Certification was requested by Gulfstream American Corporation, Bethany, Oklahoma, under the provisions of Subpart "J" of Federal Aviation Regulation (FAR) 21. Federal Aviation Administration (FAA) Southwest Region personnel participated in the certification process by attending Type Certification Board Meetings, reviewing technical documents and witnessing tests.

The Director of the Southwest Region has conducted a review of the issues involved in the Model 690D type certification program and the findings of the Delegation Option Authorization (DOA) and FAA certification teams. He has also reviewed and discussed with his staff a document entitled "Decision Basis for Type Certification of the Gulfstream American Model 690D airplane."

Based on this review, the Director approved the amendment of Aircraft Type Certificate 2A4 to include the Model 690D. This amendment was dated April 30, 1981.

A copy of the "Decision Basis for Type Certification of the Gulfstream American Model 690D Airplane" is on file in the FAA Rules Dockets. The bulk of the "Decision Basis" reviews the purpose, structure, conduct, and significant highlights of the certification program wherein Gulfstream American was required to demonstrate compliance with the applicable Federal Aviation Regulations and Special Conditions. It provides a brief overview of type inspection test results and a compliance checklist showing the means of compliance with each paragraph of the certification basis. Other appendices and attachments pertaining to the Model

690D type certification program are also included in the document.

The "Decision Basis" document is available for examination and copying at the FAA Rules Docket, Room 916, 800 Independence Avenue, S.W., Washington, D.C. Copies of the report and appendices may be obtained from the Office of the Director, Southwest Region, P.O. Box 1689, Fort Worth, Texas 76101, at a cost of $3.05 for the "Decision Basis" Report and $30.45 for the appendices.

Issued in Fort Worth, Texas, on December 2, 1981.

C. R. Melugin, Jr.,

Director, Southwest Region.

BILLING CODE 4910-13-M

Maritime Administration

Revisions to the Voluntary Tanker Agreement and Notice of Meeting

AGENCY: Maritime Administration, DOT.

ACTION: Notice of revisions to Voluntary Tanker Agreement text and public meeting for consultation.

SUMMARY: The Maritime Administrator announces the availability of a draft revision to the Voluntary Tanker Agreement as authorized under section 708 of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2158). A public meeting has been scheduled in Washington, D.C. for consultation and discussion of the revisions to the Voluntary Tanker Agreement. Copies of the draft text of the Agreement to be discussed are available. The meeting will be convened at 10:00 a.m., Wednesday, January 20, 1982, in the Auditorium, U.S. Department of Commerce, Washington, D.C.

SUPPLEMENTARY INFORMATION: The Maritime Administration, since 1952, has administered a program whereby tanker owners and charterers have signed standby agreements to make available tankers and tanker space when needed for the national defense.

The 1978 amendments to the Defense Production Act of 1950 imposed new procedures which must be followed by agencies developing standby agreements for industrial mobilization in times of national emergency.

The 1978 amendments necessitated adoption of regulations prescribing new procedures for standby voluntary agreements. (See 44 CFR Part 332, 46 FR 2349, January 9, 1981, and 49 CFR Subtitle A, 46 FR 2339, January 9, 1981). The authority of the Federal Emergency Management Agency was enhanced, and the Attorney General and the Chairman, Federal Trade Commission were given roles which assured that no undue intrusion into the antitrust area occurred. The Maritime Administration proceeded to revise the text of the standby Voluntary Tanker Agreement which would be substituted for the original agreements in force, and which would be offered to new applicants for participation in the program.

In accordance with the requirements of Section 708 of the Defense Production Act of 1950, as amended, 50 U.S.C. App. 2158, the public is hereby advised that at 10:00 a.m., Wednesday, January 20, 1982, a public meeting will be convened in the Auditorium of the U.S. Department of Commerce, Washington, D.C. The meeting will be public and no portion of it will be closed; stenographic or electronic reproduction of the proceedings will be taken; a transcription of the meeting will be produced and made available subsequent to the meeting; and, representatives of the Federal Emergency Management Agency, the Attorney General, and the Chairman, Federal Trade Commission will attend.

The primary purpose of this meeting is to explain the changes in the law, to examine revisions to the text of the Voluntary Tanker Agreement, to explain the manner in which the Maritime Administration intends to operate the standby voluntary agreement program in the future, and to consult with the interested public. Any interested person may submit written data and views concerning the proposed changes to Mr. Frank B. Case (see address below) before the meeting, and oral comments also may be presented at the meeting.

The agenda of the meeting is as follows:

1. Comments on the recent amendment to the Defense Production Act.
2. Regulations governing standby voluntary agreements: FEMA and Maritime Administration.
3. Statement of Maritime Administration policy regarding standby Voluntary Tanker Agreements.
4. Presentation of and comments regarding the tentative draft text.
5. Open discussion of any aspects of the foregoing items.

Based upon the discussion in the meeting, the Maritime Administration plans to take prompt action to adopt revisions to the standard Voluntary Tanker Agreement and to offer it to all U.S.-owned companies which own, operate, or charter tankers.

The draft text of the Voluntary Tanker Agreement is available to the public upon request. For a copy, contact Frank B. Case, Chief, Division of National Security Plans, Office of Policy and Plans, Room 1098B, Maritime Administration, 14th and Pennsylvania Avenue, N.W., Washington, D.C. 20230, (202) 377-1900. In addition, copies are being sent to U.S. companies which own, operate, or charter tankers. By order of the Maritime Administrator.

Dated: December 8, 1981.

Robert J. Patton, Jr.,

Secretary.

Federal Highway Administration

INTERSTATE COMMERCE COMMISSION

[FHWA Docket No. 80-26; Notice 3]

Interstate Motor Carrier Study: Extension of Comment Period

December 10, 1981.

AGENCIES: Federal Highway Administration (FHWA), DOT; Interstate Commerce Commission (ICC).

ACTION: Extension of comment period.

SUMMARY: This document extends the period for comments on the working paper entitled "Options for Uniform State Regulations, Working Paper I" as well as other aspects of the Interstate Motor Carrier Study being conducted by the Department of Transportation and the Interstate Commerce Commission in accordance with section 19 of the Motor Carrier Act of 1980. By notice published November 16, 1981 (46 FR 56294), comments were to be submitted by December 15, 1981. The comment period is being extended until December 28,

1981, in order to provide interested parties additional time to respond to matters presented in working paper I as well as other working papers covering topics including economic regulation, fuel taxes and vehicle registration drafted during the interstate motor carrier study.

DATE: Comments will be received until December 28, 1981.

ADDRESS: Submit written coments, preferably in triplicate, to FHWA Docket No. 80–26, Notice 3, Room 4205, HCC–10, Federal Highway Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. All comments and the working papers will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. ET, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: FHWA: Mr. James R. Link, Chief, Operations Analysis Branch, 202/426–0570; or Mrs. Kathleen S. Markman, Trial Attorney, Office of the Chief Counsel, 202/426–0346, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are Monday through Friday 7:45 a.m. to 4:15 p.m., ET. ICC: Mr. Roy Wilkins, Transportation Specialist Motor Carrier Policy, 202/275–6860, Interstate Commerce Commission, 12th and Constitution Avenue, NW., Washington, D.C. 20423. Office hours are Monday through Friday, 9:00 a.m. to 5:30 p.m., ET.

Issued on December 10, 1981.

Martin D. Zell,

Department Director, State/Community Affairs, Interstate Commerce Commission.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

CIVIL AERONAUTICS BOARD

[M-339, Amdt. 4]

Addition and Closure of Item to the December 9, 1981 Meeting

TIME AND DATE: 10 a.m., December 9, 1981 (after open meeting).

PLACE: Room 1027 (open), room 1012 (closed), 1825 Connecticut Avenue, N.W., Washington, D.C. 20428.

SUBJECT: 27. Dockets 39896, 39911, 40038, 40111, and 40159; Applications of Aeronaves del Peru, Air France, Japan Air Lines, LAN Chile, and Aer Lingus, respectively, for exemptions to operate intermodal cargo services. (Memo 964, BIA, OGC)

STATUS:

1-13 (Open)
14-27 (Closed)

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary (202) 673-5068.

[S-1867-81 Filed 12-10-81; 4:06 pm]

BILLING CODE 6320-01-M

2

CIVIL AERONAUTICS BOARD

[M-339, Amdt. 3]

Deletion of Item From the December 9, 1981 Meeting

TIME AND DATE: 10 a.m., December 9, 1981.

PLACE: Room 1027 (open), room 1012 (closed), 1825 Connecticut Avenue, N.W., Washington, D.C. 20428.

SUBJECT: 21. Docket 39650—Application of Fast Air Carrier LTDA. For amendment of its foreign air carrier permit to engage in scheduled foreign air transportation between Chile, via intermediate points, and Miami/New York. (BIA, OGC, BAL])

STATUS:

1-13 (Open)
14-26 (Closed)

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary (202) 673-5068.

CIVIL AERONAUTICS BOARD

[M-339 Amdt. 5]

Deletions, Addition and Closure of Items to the December 9, 1981 Board Meeting

TIME AND DATE: 10 a.m., December 9, 1981.

PLACE: Room 1027 (open), room 1012 (closed), 1825 Connecticut Avenue, N.W., Washington, D.C. 20428.

SUBJECT:

Deletion: 7. Docket EAS-352; Review of Essential Air Service Determination for Merced, California. (Memo 133-B, BDA, OGC, OCCR)

Deletion: 11. Dockets 30699, 30790, 34579, 36004, 36962 and 34485: *Oakland Service Case, U.S.-Benelux Low-Fare Proceeding Application of Aeroamerica, Inc., for 408 and 409 Approval, Applications of Aeroamerica, Inc. for Certificate Authority, Application of Aeroamerica, Inc. for an Exemption* (Memo 143-A, OGC)

Deletion: 20. Docket 39692, United States-Chile Show Cause Proceeding. (Memo 481-C, BIA, OGC, BAL])

Addition: 28. Board comment on the House Sunset Bill, new issues of significant concern. (OGC).

STATUS:

1-13 (Open)
14-28 (Closed)

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary, (202) 673-5068.

FEDERAL HOME LOAN BANK BOARD

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: To be announced.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 a.m., Thursday, December 17, 1981.

PLACE: 1700 G Street, NW., board room, sixth floor, Washington, D.C.

STATUS: Open meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Marshall (202-377-6679).

CHANGES IN THE MEETING: The following items have been added to the open portion of the bank board meeting.

Negotiable Certificates of Deposits
Payment of Litigation Expenses of FHLB Officers, Directors and Employees
Savings Accounts Activity Charges and Small Accounts

[No. 574, December 10, 1981]

[S-1864-81 Filed 12-10-81; 2:58 pm]

FEDERAL RESERVE SYSTEM

Board of Governors

TIME AND DATE: 10:45 a.m., Wednesday, December 9, 1981. The business of the Board required that this meeting be held with less than one week's advance notice to the public, and no earlier announcement of the meeting was practicable.

PLACE: 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Federal Reserve Bank and Branch director appointments. (This matter was originally announced for a meeting on Monday, December 7, 1981.)

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board (202) 452-3204.

Dated: December 9, 1981

James McAfee

Assistant Secretary of the Board.

7

NATIONAL CREDIT UNION ADMINISTRATION

TIME AND DATE: 9:30 a.m., Thursday, December 17, 1981.

PLACE: Seventh floor board room, 1776 G Street N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Review of Central Liquidity Facility lending rate.
2. Proposed delegation of authority regarding charter cancellation.
3. Proposed amendment and Final Rule to Part 711 of the NCUA Rules and Regulations regarding management official interlocks.
4. Proposed amendment to Part 720 of the NCUA Rules and Regulations regarding description of office, disclosure of official records, availability of information and promulgation of regulations.
5. Proposed new phase out schedule for share certificate dividend ceilings.
6. Proposed amendment to the exception to the early withdrawal penalty IRA/Keogh accounts.
7. Reconsideratioan of proposed rule to establish a money market share account.
8. Semi-annual reporting of financial and statistical data.
9. Applications for charters, amendments to charters, bylaw amendments, mergers that may be pending at that time.

RECESS: 10:45 a.m.

TIME AND DATE: 11 a.m., Thursday, December 17, 1981.

PLACE: Seventh floor board room, 1776 G Street N.W., Washington, D.C.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Administrative adjudication. Closed pursuant to exemptions (8), (9)(A)(ii) and (10).
2. Proposed charter amendment. Closed pursuant to exemptions (8) and (9)(A)(ii).
3. Requests from federally insured credit unions for special assistance under Section 208 of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
4. Requests for merger with special assistance under Section 208 of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
5. Budget authorization for FY 1982. Closed pursuant to exemptions (2) and (9)(B).

FOR MORE INFORMATION CONTACT: Rosemary Brady, Secretary of the Board, telephone (202) 357-1100.

8

TENNESSEE VALLEY AUTHORITY

[Meeting No. 1280]

TIME AND DATE: 10:15 a.m. (e.s.t.), Thursday, December 17, 1981.

PLACE: Conference Room B-32, West Tower, 400 Commerce Avenue, Knoxville, Tennessee.

STATUS: Open.

ACTION ITEMS:

A—*Project Authorization:*
1. Project Authorization No. 3464.2—Amendment to project authorization for falling curtain process for granulation of urea and other fertilizers.
2. Project Authorization No. 3471.1—Amendment to project authorization to modify boiler startup systems at Paradise Steam Plant, units 1 and 2. (Related to Item B-1.)

B—*Purchase Awards:*
1. Reg. No. 23-192908—Control bypass system for Paradise Fossil Plant, units 1 and 2.
2. Sales Invitation No. 43-4533—Sale by TVA of excess time on the nuclear and fossil simulator located at the Power Operations Training Center near Sequoyah Nuclear Plant.

C—*Power Items:*
1. Cogeneration agreement among Resource Authority in Sumner County, Tennessee, city of Gallatin, Tennessee and TVA, covering the purchase by TVA of up to 550 kW of cognerated power.
2. Agreement covering distributor participation in residential room-unit thermal-storage field test.
3. New power contract for Airco, Inc., Calvert City, Kentucky, plant.
4. Renewal of power contract with Lebanon, Tennessee.

D—*Personnel Items:*
1. Supplement to personal services contract with Institute for Resource Management, Inc., Annapolis, Maryland, for the services of health physics technicians at TVA nuclear plants, requested by the Division of Occupational Health and Safety, Office of Management Services.
2. Supplement to personal services contract with Torrey Pines Technology, San Diego, California, for professional engineering support services required to complete the qualification evaluation of the nuclear steam supply systems for Watts Bar and Bellefonte nuclear plants, requested by the Office of Engineering Design and Construction.
3. New wage schedules for hourly and annual trades and labor employees and other recommendations resulting from negotiations between TVA and Tennessee Valley Trades and Labor Council, 47th Annual Wage Conference.

E—*Real Property Transactions:*
1. Proposed agreement with Clinton Port Authority covering arrangements for future sale for industrial purposes of approximately 77 acres of Melton Hill Reservoir land in Anderson County, Tennessee, located adjacent to the Eagle Bend Industrial Park—Tract No. XMHR-45.
2. Grant of permanent easement for road rights of way to State of Mississippi within the Yellow Creek Port Project Area, affecting approximately 10 acres of Pickwick Reservoir land in Tishomingo County, Mississippi—Tract No. KTYECR-1H.
3. Abandonment of certain easement rights affecting approximately 5.1 acres of Watts Bar Reservoir land owned by the city of Loudon, Tennessee—Tract No. WBR-1638F.
4. Filing of condemnation suit.

CONTRACT PERSON FOR MORE INFORMATION: Craven H. Crowell, Jr., Director of Information, or a member of his staff can respond to request for information about this meeting. Call (615) 632-3247, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 245-0101.

Dated: December 10, 1981.

Part II

Department of Education

Training Program for Special Programs Staff and Leadership Personnel, Talent Search Program, Educational Opportunity Centers Program, Upward Bound Program, and Special Services for Disadvantaged Students Program; Past Performance of Applicants

V 46 D E 1 4 8 1 UMI

DEPARTMENT OF EDUCATION

34 CFR Parts 642, 643, 644, 645, 646

Training Program for Special Programs Staff and Leadership Personnel, Talent Search Program, Educational Opportunity Centers Program, Upward Bound Program, and Special Services for Disadvantaged Students Program; Past Performance of Applicants

AGENCY: Department of Education.

ACTION: Proposed rulemaking.

SUMMARY: The Secretary proposes regulations for the evaluation of past performance of applicants applying for new awards under the Special Programs for Students from Disadvantaged Backgrounds (Upward Bound, Talent Search, Special Services for Disadvantaged Students, Educational Opportunity Centers, and Training) if the applicant previously received a grant under the same program for which it is currently applying. The regulations are necessary to implement a provision added to the Special Programs legislation by the Education Amendments of 1980.

DATE: Comments must be received on or before January 28, 1982. No public meeting will be held on these proposed regulations.

ADDRESS: Comments should be addressed to Mary Kathleen Smith (Room 3514, ROB–3), Department of Education, 400 Maryland Avenue, SW, Washington, D.C. 20202–3314.

FOR FURTHER INFORMATION CONTACT: Mary Kathleen Smith, Telephone (202) 245–2511.

SUPPLEMENTARY INFORMATION: The Education Amendments of 1980 changed the Special Programs for Students from Disadvantaged Backgrounds in many respects. Proposed regulations that reflected most of these changes were published as notices of proposed rulemaking in the **Federal Register** on December 31, 1980 (Upward Bound—45 FR 86914–86920; Talent Search—45 FR 86909–86912; Special Services—45 FR 86900–86905; Educational Opportunity Centers—45 FR 86894–86898; and Training Program—45 FR 86922–86926).

One of the changes requires the Secretary to consider the past performance of an applicant for a grant under the Special Programs if the applicant is applying for a new grant under the same program. For example, if an applicant for a new Upward Bound grant has previously been awarded a grant to carry out an Upward Bound project, the Secretary must take into account, when evaluating the applicant for a new grant, the applicant's performance under the grant.

The Senate in passing the provision requiring the Secretary to consider past performance urged that this criterion be at least 30 percent of the points given in evaluating applications.

In the proposed regulations published in December, the Secretary decided to carry out this requirement by establishing performance standards and measuring an applicant who previously had a grant against those standards. However proposed standards were not developed at that time and the public was invited to suggest performance standards.

Numerous comments were received in response to this request and these comments and suggestions were considered in developing these proposed regulations.

As a result of the comments received, the Secretary has decided not to adopt performance standards in the regulations for each of the Special Programs but, instead, to use weighted criteria only. Thus the sections titled "*Performance standards*" in the proposed regulations will be deleted from the final regulations for each of the Special Programs. The sections titled "*Past performance*" in this notice are proposed as selection criteria to evaluate the experience of applicants in service delivery under the particular program for which they are applying.

The proposed regulations published on December 31, 1980 also included, in the section titled "*How the Secretary evaluates an application,*" a sentence stating that the Secretary may award up to 30 additional points for prior experience. That sentence will be deleted from the final regulations for each of the Special Programs. This notice proposes to permit the Secretary to award up to 20 additional points for positive past performance and to deduct up to 10 points for poor past performance. This approach permits the Secretary to evaluate experience on a 30-point scale. However, by permitting the Secretary to deduct points from those applicants with poor performance, the application of the experience criterion should be more equitable for all applicants.

Summary of Comments and Responses

The following is a summary of the substantive comments received on the subject of experience and performance standards and the Secretary's responses to those comments.

Comment. Several commenters expressed concern that to judge a project on unpublished performance standards would be an *ex post facto* judgment. The commenters recommended that the Secretary automatically award 30 points for experience to all currently funded projects.

Another commenter urged that performance standards not be applied during the year they are developed since projects should be given a fair opportunity to adapt to the criteria.

Response. A change has been made. The Secretary has decided not to publish performance standards. Instead, criteria for evaluating experience are proposed in these regulations. Since these criteria relate to the legislated goals of the programs, to project management, and to the previous grant award, they can be applied the year they are effective. These regulations do not propose to evaluate applicants with experience on factors that are new; all requirements are provisions that funded projects are required to meet as conditions of their grant awards. In addition, for the Secretary to award 30 points for experience automatically to all currently funded projects regardless of how they administered the projects would not be an appropriate evaluation practice.

Comment. One commenter stated that more important than experience of a given institution or agency is the need for the directors and staff of the program to have real experience. The commenter recommended that the regulations be liberalized to read: "The director and a significant number of his/her staff must have had direct experience in a Special Programs project."

Response. No change has been made. Although the Secretary agrees that experienced directors and staff can be an asset to a project, the legislation requires the Secretary to consider the experience of service delivery of each *applicant.* However, the qualifications of the director and staff are evaluated in each program under the selection criterion concerning quality of key personnel.

Comment. One commenter recommended that experience be based on an immediately contiguous program period. This would make the institution and concerned staff responsible for their actions without penalizing them unnecessarily for an unsuccessful program at a much earlier date.

Response. No change has been made. While the experience does not necessarily have to be contiguous, these regulations propose that the period of time be limited—as in the proposed regulations published on December 31, 1980—to the three fiscal years prior to the fiscal year for which the applicant is

applying. In this way, poor performance in the conduct of a project will not penalize an applicant indefinitely. Also, this approach will not preclude those applicants that might not have been funded the previous year from receiving consideration for good past performance.

Comment. One commenter suggested that 40 points rather than 30 points would bring a better balance to the general score.

Other commenters expressed concern over the fact that, while consideration of experience was valid, awarding up to 30 extra points was excessive and would tend to limit competition. These commenters stated that those projects previously funded would have an unfair advantage since they could receive up to 30 additional points. These commenters suggested that the number of points be reduced.

One commenter suggested that poor past performance should receive a negative rating in order for the criterion for experience to be applied equitably.

Response. A change has been made. In deciding on the weight to give this criterion, the Secretary was guided by the Senate report accompanying the Education Amendments of 1980 (Senate Report 96–733). This report urged the Secretary to provide at least a 30 percent weighting for experience. These proposed regulations permit the Secretary to deduct points, on the basis of the criteria proposed in these regulations, for poor performance. Therefore, the Secretary has proposed to change the maximum number of points that may be added, from 30 to 20 points and the number of points that may be deducted to 10 points. This permits a 30-point range.

Comment. Several commenters urged that past performance not be limited to experience in Special Programs projects. They noted that other programs offer services and activities similar to the Special Programs but are funded through other sources.

Response. No change has been made. Although the Secretary agrees that experience can be gained through conducting projects similar to the Special Programs, the legislation specifically limits experience to previous Special Programs project experience.

Section 417A(b)(2) of the Higher Education Act of 1965, as amended by the Education Amendment of 1980, reads: "* * * the Secretary shall consider the prior experience of service delivery under the particular program for which funds are sought by each applicant."

Furthermore, the Department of Education may have no way to verify the quality of experience gained in conducting projects not funded under these programs.

Comment. Several commenters recommended that successful programs automatically be awarded the extra 30 points for experience and then have points deducted from these extra 30 points, as appropriate. They stated that this would be fairer than the add-on approach.

Response. A change has been made. In developing these proposed regulations consideration was given to both alternatives. To avoid confusion regarding the awarding of points, the Secretary has spelled out the basis for the assignment of points with the newly proposed range of −10 points to +20 points. Paragraph (b) of the past performance section of each of the regulations details under what circumstances scores are assigned.

Comment. Several commenters suggested that site visit reports should not be considered in a review of experience because not all projects have been visited. Another commenter expressed concern over using site visit reports as a means of evaluation for awarding the additional points. The commenter stated that site visits are the best learning tools available to projects and should not be used as a way to penalize projects.

Response. No change has been made. The Secretary views the site visit as an important method for monitoring funded projects. It is not the only means the Secretary proposes to use, however. The intent of these regulations is to suggest that all documentation with respect to the performance of grantees will be made available to those evaluating applications.

Comment. Several commenters suggested that the Secretary consider the experience of the applicant based on the degree of success of the applicant in meeting previously approved project objectives. They suggested that the section titled "Performance standards" be deleted from the regulations.

Response. A change has been made. The Secretary has deleted from each of the program regulations the section originally proposed to include performance standards. In addition, the section titled "Prior experience" has been retitled "Past performance" and has been revised to include as an evaluation criterion the degree of success that the applicant has had in meeting previously approved project objectives.

Comment. Several commenters expressed concern over the development and use of performance standards. They commented that standards can stifle creativity and innovative approaches. In addition, due to the vast differences in geographic areas and populations that the Special Programs serve, they noted it would be impossible to develop uniform performance standards that would be fair and valid for all projects.

Other commenters noted that the application of any performance standards could dramatically refocus most project activities toward the particular standards since there would be such a direct tie to funding. Also, the commenters feared that national performance standards would initiate a competitive race among projects for the "numbers game" at the expense of quality services.

Other commenters questioned the authority for the Department to set performance standards since neither the law nor the House and Senate reports indicated that the legislative intent was to impose performance standards. These commenters suggested that the past performance of projects should be judged on the degree of accomplishment of previously approved applications.

Response. A change has been made. The Secretary has decided not to publish performance standards. The section on past performance has been revised to include several evaluation criteria that measure the degree of an applicant's accomplishment of its previously approved application.

Comment. Several commenters suggested that the experience section should be more specific and should include a checklist of things that would be measured. In addition, the commenters requested that the assessment procedure also be outlined and that it include a site visit report, an evaluation system of the reports sent in by the projects and the effectiveness of the project as documented via letters from target schools, placement of seniors in colleges, and related factors.

Response. A change has been made. The proposed new sections list factors the Secretary looks for in evaluating past performance. In addition, the Secretary believes that an applicant should have some flexibility using its internal evaluation system. It is not the intention of the Secretary to regulate on the precise means by which all applicants must measure the achievement of their project objectives.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before the 45th day after publication of this document will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3514, ROB–3, 7th and D Streets, SW., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Assessment of Educational Impact

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. The regulations govern the evaluation of past performance and are necessary to implement the Education Amendments of 1980.

Dated: December 9, 1981.

(Catalog of Federal Domestic Assistance Numbers: 84.103, Training Program for Special Programs Staff and Leadership Personnel; 84.044, Talent Search Program; 84.066, Educational Opportunity Centers Program; 84.047, Upward Bound Program; 84.042, Special Services for Disadvantaged Students Program)

T. H. Bell,

Secretary of Education.

PART 642—TRAINING PROGRAM FOR SPECIAL PROGRAMS STAFF AND LEADERSHIP PERSONNEL

The Secretary proposes to revise § 642.32 of the proposed regulations for the Training Program for Special Programs Staff and Leadership Personnel, 34 CFR Part 642, which were published in the **Federal Register** on December 31, 1980 (45 FR 86922, 86925), to read as follows:

§ 642.32 Past performance.

(a) For each applicant that has conducted a Training Program project under Title IV–A–4 of the Higher Education Act within the three fiscal years prior to the fiscal year for which the applicant is applying, the Secretary evaluates the performance of the applicant in carrying out the grant using the criteria in paragraph (c) of this section.

(b) The Secretary assigns points for past performance as follows:

(1) The Secretary gives no points or deducts from 1 to 10 points from the point score obtained in the basis of the selection criteria in § 642.31, based on the extent to which the applicant has failed to meet the administrative requirements and the programmatic objectives of paragraph (c) of this section.

(2) The Secretary adds from 1 to 10 points to the point score obtained on the basis of the selection criteria in § 642.31, based on the extent to which the applicant has met all of the administrative requirements and has met all of the programmatic objectives of paragraph (c) of this section.

(3) The Secretary adds from 11 to 20 points to the point score obtained on the basis of the selection criteria in § 642.31, based on the extent to which the applicant has met all of the administrative requirements and has met all and exceeded some of the programmatic objectives of paragraph (c) of this section.

(c) The Secretary—based on information contained in one or more of the following: performance reports, audit reports, training site visit reports, evaluations by participants, the previously funded application, and the application under consideration—looks for information that shows—

(1) The extent to which the project has served the number and kinds of training participants it was funded to serve;

(2) The extent to which participants benefited from training in areas such as—

(i) Increased qualifications and skills in meeting the needs of disadvantaged students; and

(ii) Increased knowledge and understanding of the Special Programs;

(3) The extent to which the applicant has achieved other goals and objectives as stated in the previously funded application; and

(4) The extent to which the applicant has met all administrative requirements—including recordkeeping, reporting, and financial accountability—under the terms of the previously funded award.

(20 U.S.C. 1070d, 1070d–1d; Senate Report 96–733, 96 Cong. 1st Sess. p.28)

PART 643—TALENT SEARCH PROGRAM

The Secretary proposes to revise § 643.32 of the proposed regulations for the Talent Search Program, 34 CFR Part 643, which were published in the **Federal Register** on December 31, 1980 (45 FR 86908, 86912), to read as follows:

§ 643.32 Past Performance.

(a) For each applicant that has conducted a Talent Search project within the three fiscal years prior to the fiscal year for which the applicant is applying, the Secretary evaluates the performance of the applicant in carrying out the grant using the criteria in paragraph (c) of this section.

(b) The Secretary assigns points for past performance as follows:

(1) The Secretary gives no points or deducts from 1 to 10 points from the point score obtained on the basis of the selection criteria in § 643.31, based on the extent to which the applicant has failed to meet the administrative requirements and the programmatic objectives of paragraph (c) of this section.

(2) The Secretary adds from 1 to 10 points to the point score obtained on the basis of the selection criteria in § 643.31, based on the extent to which the applicant has met all of the administrative requirements and has met all of the programmatic objectives of paragraph (c) of this section.

(3) The Secretary adds from 11 to 20 points to the point score obtained on the basis of the selection criteria in § 643.31, based on the extent to which the applicant has met all of the administrative requirements and has met all and exceeded some of the programmatic objectives of paragraph (c) of this section.

(c) The Secretary—based on information contained in one or more of the following: Performance reports, audit reports, site visit reports, the previously funded application, and the application under consideration—looks for information that shows—

(1) The extent to which the project has served the number of participants it was funded to serve;

(2) The extent to which the high school graduation rate of the project participants is higher than the graduation rates in the target schools before the Talent Search project began;

(3) The extent to which postsecondary placement of project participants is higher than the placement rates of the target schools before the Talent Search project began;

(4) The extent to which the applicant has achieved other goals and objectives as stated in the previously funded application; and

(5) The extent to which the applicant has met all administrative requirements—including recordkeeping, reporting, and financial accountability—under the terms of the previously funded award.

(20 U.S.C. 1070d, 1070d–1; Senate Report 96–733, 96 Cong. 1st Sess. p. 28)

PART 644—EDUCATIONAL OPPORTUNITY CENTERS

The Secretary proposes to revise § 644.32 of the proposed regulations for the Educational Opportunity Centers Program, 34 CFR Part 644, which were published in the **Federal Register** on December 31, 1980 (45 FR 86894, 86898), to read as follows:

§ 644.32 Past performance.

(a) For each applicant that has conducted an Educational Opportunity Centers project within the three fiscal years prior to the fiscal year for which the applicant is applying, the Secretary evaluates the performance of the applicant in carrying out the grant using the criteria in paragraph (c) of this section.

(b) The Secretary assigns points for past performance as follows:

(1) The Secretary gives no points or deducts from 1 to 10 points from the point score obtained on the basis of the selection criteria in § 644.31, based on the extent to which the applicant has failed to meet the administrative requirements and the programmatic objectives of paragraph (c) of this section.

(2) The Secretary adds from 1 to 10 points to the point score obtained on the basis of the selection criteria in § 644.31, based on the extent to which the applicant has met all of the administrative requirements and has met all of the programmatic objectives of paragraph (c) of this section.

(3) The Secretary adds from 11 to 20 points to the point score obtained on the basis of the selection criteria in § 644.31, based on the extent to which the applicant has met all of the administrative requirements and has met all and exceeded some of the programmatic objectives of paragraph (c) of this section.

(c) The Secretary, based on information contained in one or more of the following: performance reports, audit reports, site visit reports, the previously funded application, and the application under consideration—looks for information that shows—

(1) The extent to which the project has served the number of participants it was funded to serve;

(2) The extent to which the center has disseminated, in accordance with its approved program plan, information concerning financial and academic assistance available for individuals desiring to pursue a program of postsecondary education;

(3) The extent to which the center has specifically assisted participants in applying for admission to postsecondary educational programs, including assisting participants in preparing necessary applications for use by admissions and financial aid officers;

(4) The extent to which the applicant has achieved other goals and objectives as stated in the previously funded application; and

(5) The extent to which the applicant has met all administrative requirements—including recordkeeping, reporting, matching funds, and financial accountability—under the terms of the previously funded award.

(20 U.S.C. 1070, 1070d–1c; Senate Report 96–733, 96 Cong. 1st Sess. p. 28)

PART 645—UPWARD BOUND PROGRAM

The Secretary proposes to revise § 645.32 of the proposed regulations for the Upward Bound Program, 34 CFR Part 645, which were published in the **Federal Register** on December 31, 1980 (45 FR 86914, 86919), to read as follows:

§ 645.32 Past performance.

(a) For each applicant that has conducted an Upward Bound project within the three fiscal years prior to the fiscal year for which the applicant is applying, the Secretary evaluates the performance of the applicant in carrying out the grant using the criteria in paragraph (c) of this section.

(b) The Secretary assigns points for past performance as follows:

(1) The Secretary gives no points or deducts from 1 to 10 points from the point score obtained on the basis of the selection criteria in § 645.31, based on the extent to which the applicant has failed to meet the administrative requirements and the programmatic objectives of paragraph (c) of this section.

(2) The Secretary adds from 1 to 10 points to the point score obtained on the basis of the selection criteria in § 645.31, based on the extent to which the applicant has met all of the administrative requirements and has met all of the programmatic objectives of paragraph (c) of this section.

(3) The Secretary adds from 11 to 20 points to the point score obtained on the basis of the selection criteria in § 645.31, based on the extent to which the applicant has met all of the administrative requirements and has met all and exceeded some of the programmatic objectives of paragraph (c) of this section.

(c) The Secretary—based on information contained in one or more of the following: performance reports, audit reports, site visit reports, the previously funded application, and the application under consideration—looks for information that shows—

(1) The extent to which the project has served the number of participants it was funded to serve;

(2)(i) In the case of a regular Upward Bound project, the extent to which the high school graduation rate of the participants is greater than the high school graduation rates of the target schools; or

(ii) In the case of a Veterans Upward Bound project, the extent to which the project has provided services—including intensive basic skills development, short-term remedial-refresher courses, and preparation for a certificate of high school equivalency—to prepare participants for admission to postsecondary educational programs;

(3)(i) In the case of a regular Upward Bound project, the extent to which the postsecondary enrollment rate of project participants is greater than the postsecondary enrollment rates of the target schools; or

(ii) In the case of a Veterans Upward Bound project, the extent to which the project has assisted participants enroll in a postsecondary educational program;

(4) The extent to which the applicant has achieved other goals and objectives as stated in the previously funded application; and

(5) The extent to which the applicant has met all administrative requirements—including recordkeeping, reporting, and financial accountability—under the terms of the previously funded award.

(20 U.S.C. 1070d, 1070d–1a; Senate Report 96–733, 96 Cong. 1st Sess. p. 28)

PART 646—SPECIAL SERVICES FOR DISADVANTAGED STUDENTS PROGRAM

The Secretary proposes to revise § 646.32 of the proposed regulations for the Special Services Program, 34 CFR Part 646, which were published in the **Federal Register** on December 31, 1980 (45 FR 86900, 86904), to read as follows:

§ 646.32 Past performance.

(a) For each applicant that has conducted a Special Services project within the three fiscal years prior to the fiscal year for which the applicant is applying, the Secretary evaluates the performance of the applicant in carrying out the grant using the criteria in paragraph (c) of this section.

(b) The Secretary assigns points for past performance as follows:

(1) The Secretary gives no points or deducts from 1 to 10 points from the point score obtained on the basis of the selection criteria in § 646.31, based on the extent to which the applicant has failed to meet the administrative requirements and the programmatic objectives of paragraph (c) of this section.

(2) The Secretary adds from 1 to 10 points to the point score obtained on the basis of the selection criteria in § 646.31, based on the extent to which the applicant has met all of the administrative requirements and has met all of the programmatic objectives of paragraph (c) of this section.

(3) The Secretary adds from 11 to 20 points to the point score obtained on the basis of the selection criteria in § 646.31, based on the extent to which the applicant has met all of the administrative requirements and has met all and exceeded some of the programmatic objectives of paragraph (c) of this section.

(c) The Secretary —based on information contained in one or more of the following: performance reports, audit reports, site visit reports, the previously funded application, and the application under consideration—looks for information that shows—

(1) The extent to which the project has served the number of participants it was funded to serve;

(2) The extent to which project participants received sufficient financial assistance;

(3) The extent to which the retention rate of project participants meets the rate proposed in the previously funded application;

(4) The extent to which the graduation rate of project participants meets the rate proposed in the previously funded application;

(5) The extent to which the applicant has achieved other goals and objectives as stated in the previously funded application;

(6) The extent to which the applicant has met all administrative requirements—including recordkeeping, reporting, and financial accountability—under the terms of the previously funded award.

(20 U.S.C. 1070d, 1070d–1b; Senate Report 96–733, 96 Cong. 1st Sess. p. 28)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited.

Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

federal register

Tuesday
December 15, 1981

Highlights

61146 **Crime Insurance** FEMA proposes revisions to Federal Crime Insurance Program.

61236 **Handicapped Veterans** VA publishes standards for electrically powered wheelchairs. (Part III of this issue)

61074 **Employee Benefit Plans** Labor/P&WBP revises financial reporting requirements for plans participating in master trusts.

61084 PBCG issues interest rates and factors for valuation of benefits in non-multiemployer plans.

61066 **Government Employees—Health Insurance** OPM announces limited open season for eligible unenrolled employees.

61132 OPM withdraws proposal to transfer Uniform Plan enrollees to Indemnity Benefit Plan.

61065 **Government Employees** OPM permits noncompetitive temporary or term appointments without regard to existence of registers for certain former employees.

61222 **Natural Gas—Information** ANGTS provides for information gathering, treatment of sensitive and proprietary documents, and processing requests for public access. (Part II of this issue)

CONTINUED INSIDE

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

61134 **Nuclear Power Plants and Reactors** NRC proposes clarification of full-scale emergency preparedness exercise requirements.

61132 NRC proposes rules on emergency planning and preparedness for low power nuclear licensees.

61186 NRC requests comments on draft regulatory guide, "Emergency Action Levels for Light Water Reactors."

61140 **Commodity Futures** CFTC proposes exception to rules on application and closing out of offsetting long and short positions.

61195, 61196 **Treasury Notes** Treasury invites tenders for notes of December 31, 1983 (Series Y–1983) and December 31, 1985 (Series K–1985). (2 documents)

61157 **Tobacco** USDA/ASCS proposes marketing quotas for fire-cured, dark air-cured, Virginia sun-cured, cigar-binder, and cigar-filler and cigar-binder tobaccos.

61142 **Boat Safety** Treasury/Customs and DOT/CG propose revised safety standards for foreign-made boats and associated equipment.

61160 **Antidumping** Commerce/ITA extends period for determination on motorcycle batteries from Taiwan.

61160 **Countervailing Duties** Commerce/ITA postpones determination on ceramic tile from Mexico.

61193 **Imports** Trade Representative requests comments on determination on certain airless paint spray pumps.

61162 CITA adjusts restraint level for certain man-made fiber textile products from the Republic of the Philippines.

61127 **Government Procurement** GSA revises cost principles for contracts with commercial organizations and State, local, and federally recognized Indian tribal governments.

61136 **Regulatory Flexibility Agenda** NCUA

61115 **Privacy Act Document** DOD/Army

61199 **Sunshine Act Meetings**

Rules and Regulations

Federal Register
Vol. 46, No. 240
Tuesday, December 15, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 316

Temporary and Term Employment

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: This amendment permits agencies to give temporary or term appointments without regard to the existence of registers to former employees of the legislative or judicial branch who are eligible for noncompetitive career appointments. Such temporary or term appointments will not confer competitive status or extend the employees' eligibility for noncompetitive career appointment.

EFFECTIVE DATE: January 14, 1982.

FOR FURTHER INFORMATION CONTACT: William Bohling, (202) 632–6000.

SUPPLEMENTARY INFORMATION:

Background

On July 7, 1981, OPM published a proposed regulation in the **Federal Register** (46 FR 35108) which would permit agencies to give noncompetitive temporary or term appointments to persons eligible for career appointment under section 3304(c) of title 5, United States Code. That section provides for noncompetitive career appointment of former legislative or judicial branch employees who: (1) have 3 years of service in positions paid by the Secretary of the Senate or Clerk of the House of Representatives, or have 4 years of service as a secretary or law clerk to a justice or judge of the United States; (2) are separated from such employment involuntarily and without personal cause; (3) are appointed within 1 year following involuntary separation from qualifying service; and (4) meet competitive qualification standards for the position to which appointed. Because the law speaks of eligible employees' acquiring a competitive status, which is conferred only with permanent appointment, and because the intent of the law was to afford entry into the career service, the regulations had not previously provided eligibility for noncompetitive temporary or term appointment to Ramspeck Act eligibles.

The proposed regulations provided such eligibility, under the same conditions applied to time-limited appointments of persons eligible under other special appointing authorities. The time-limited appointments would be made under authority of the regulations, rather than under the statutory authority in 5 U.S.C. 3304(c), and would not confer competitive status or eligibility for conversion to competitive status. Neither would these appointments extend eligibility for permanent appointment under 5 U.S.C. 3304(c).

Discussion of Comments

Two written comments were received, both from Federal agencies. Both agencies supported the proposed regulations, but suggested the regulations state more clearly that temporary or term appointment would not extend eligibility for non-competitive career appointment.

Explanation of Final Regulation

In response to the agencies' comments, the suggested clarification has been added to the authorities for both temporary and term appointment. All other provisions of the final regulations are the same as those originally proposed.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule for the purposes of E.O. 12291, Federal Regulation, because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

I certify that this regulation will not have significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

U.S. Office of Personnel Management.

Donald J. Devine,

Director.

PART 316—TEMPORARY AND TERM EMPLOYMENT

Accordingly, 5 CFR 316.302(c)(6) and 5 CFR 316.402(b)(6) are added, to read as follows:

§ 316.302 Selection of term employees.

* * * * *

(c) An agency may give a term appointment without regard to the existence of an appropriate register to:

* * * * *

(6) A person eligible for acquisition of competitive status for career appointment under section 3304(c) of title 5, United States Code. However, a term employee does not acquire a competitive status on the basis of this term appointment; nor does this term appointment extend or terminate the employee's eligibility under 5 U.S.C. 3304(c).

§ 316.402 Authorities for temporary appointments.

* * * * *

(b) *Noncompetitive temporary limited appointments.* An agency may give a temporary limited appointment without regard to the existence of an appropriate register to:

* * * * *

(6) A person eligible for acquisition of competitive status for career appointment under section 3304(c) of title 5, United States Code. However, a temporary employee does not acquire a competitive status on the basis of this temporary appointment; nor does this temporary appointment extend or terminate the employee's eligibility under 5 U.S.C. 3304(c).

(5 U.S.C. 3301, 3302, 3304(c))

BILLING CODE 6325–01–M

5 CFR Part 890

Federal Employees Health Benefits Program; Limited Open Season

AGENCY: Office of Personnel Management.

ACTION: Notice of limited open season.

SUMMARY: This revises the notice published on December 4, 1981 (46 CFR 59227) which announced commencement of the 1981 open season for the Federal Employees Health Benefits (FEHB) Program. Pursuant to the order of the United States Court of Appeals for the District of Columbia Circuit, entered on December 4, 1981, in *National Federation of Federal Employees* v. *Donald J. Devine, et al.*, No. 81–2224; and to the authority contained in section 8913 of Chapter 89, title 5 of the United States Code, and section 301(d) of 5 CFR Part 890, the Office of Personnel Management (OPM) announces that a limited open season will be conducted for certain Federal employees. This limited open season, to be held from December 7, 1981 through December 31, 1981, is for those Federal employees eligible to participate in the FEHB Program who were not enrolled in a plan under the FEHB Program on December 4, 1981, the date of the Court order. During the limited open season, only those eligible unenrolled employees who were not enrolled on December 4, 1981, will have an opportunity to enroll in an approved health benefits plan. The general open season heretofore scheduled to commence on December 7, 1981, is hereby postponed until further notice.

EFFECTIVE DATE: December 7, 1981.

FOR FURTHER INFORMATION CONTACT: Lauretta Hall, Issuances and Instructions Staff, (202) 632–4684.

SUPPLEMENTARY INFORMATION: On December 4, 1981, a notice was published in the **Federal Register** (46 FR 59227) to the effect that a health benefits open season would be held from December 7, 1981 through December 31, 1981. However, the United States Court of Appeals for the District of Columbia Circuit, in *National Federation of Federal Employees* v. *Donald J. Devine, et al.*, No. 81–2224, and related cases, on December 4, 1981, stayed a prior order of the United States District Court for the District of Columbia which had directed the United States Government to hold a general open season for a minimum of two weeks commencing on December 7, 1981. The order of the Court of Appeals of December 4, 1981, further directed the United States Government to hold an open season limited to persons not presently enrolled under the FEHB Program. Therefore, OPM's December 4, 1981, notice is hereby modified to conform with the action of the Court of Appeals.

The Court of Appeals in its December 4, 1981, orders required only a limited open season because it found that a full-scale open season at this time could cause irreparable harm to participants who change their enrollments without full information, and amid confusion and rumors as to the status, benefits, and premium levels of some plans in 1982. The open season, previously announced for all employees for the period December 7–31, 1981, will not be held. Instead, a limited open season will be held from December 7 through December 31, 1981, inclusive, during which only elections made by employees who were not enrolled in the Federal Employees Health Benefits Program on December 4, 1981 (the date of the order of the Court of Appeals) shall be accepted.

Enrollments during the limited open season will take effect on the first day of the first pay period which begins on or after January 1, 1982, and which follows a pay period in any part of which the employee was in pay status. Employees who enroll in the FEHB Program during this limited open season, and who remain eligible for participation in the Program, will be eligible to participate in the general open season, if any, for the 1982 Program year, to be held at a later date.

U.S. Office of Personnel Management.

Donald J. Devine,

Director.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

Pink Bollworm Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of final rule.

SUMMARY: This action affirms the final rule which amended the list of regulated areas (regulated areas are divided into suppressive areas and generally infested areas) under the pink bollworm quarantine and regulations by adding Clark County, Dallas County, Ouachita County, and a portion of Jefferson County in Arkansas to the list of suppressive areas, and by deleting Yell County in Arkansas from the list of suppressive areas. The quarantine and regulations restrict the interstate movement of regulated articles from suppressive areas and generally infested areas. The final rule was published in the **Federal Register** on April 9, 1981. The amendments were necessary in order to prevent the artificial spread of pink bollworm, and to eliminate the imposition of unnecessary restrictions on the movement of certain articles.

EFFECTIVE DATE: December 15, 1981.

FOR FURTHER INFORMATION CONTACT: T. J. Lanier, Chief Staff Officer, Regulatory Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 635 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8247.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The final rule has been determined to be not a "major rule" in conformance with Executive Order 12291. Based on information compiled by the Department, it has been determined that the rule will have an annual effect on the economy of approximately $1,000; that this rule will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and that this rule will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Alternatives

Alternatives were considered in connection with the final rule. Consideration was given whether to (1) delete restrictions on the interstate movement of regulated articles from Yell County, Arkansas, where it has been determined that pink bollworm no longer exists, or to continue restrictions from Yell County, Arkansas; and (2) whether or not to impose restrictions on articles coming from Clark County, Dallas County, Ouachita County, and a portion of Jefferson County, Arkansas, where it has been established that pink bollworm exists or is likely to spread. Deletions were made in Yell County, Arkansas, because it would be an unnecessary restriction on the interstate movement of articles from this county if it is treated as a suppressive area. Clark County, Dallas County, Ouachita County, and a portion of Jefferson

County, Arkansas, were added to the list of suppressive areas, however, because it appears that otherwise there would be a significant threat of spread of pink bollworm throughout the United States from these counties. Under these circumstances, it appears that the final rule is necessary in order to prevent such spread, and as such, maximizes the net benefits to society at the lowest net cost.

Certification Under the Regulatory Flexibility Act

Dr. H. C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action affects the interstate movement of regulated articles from Clark County, Dallas County, Ouachita County, Yell County, and a portion of Jefferson County in Arkansas. Based on information compiled by the Department, it has been determined that there are approximately seventy-five small entities that move such articles interstate from Arkansas and many hundreds of small entities that move such articles interstate from other States, and that fewer than five entities move such articles interstate from the specified areas in Arkansas.

Background

A document published in the **Federal Register** on April 9, 1981 (46 FR 21148–21149) amended § 301.52–2a of the Pink Bollworm Quarantine and Regulations (7 CFR 301.52–2a) by adding Clark County, Dallas County, Ouachita County, and a portion of Jefferson County in Arkansas to the list of suppressive areas, and by deleting Yell County in Arkansas from the list of suppressive areas.

The document provided that the amendment was necessary as an emergency measure in order to prevent the artificial spread of the pink bollworm and to delete unnecessary restrictions on the movement of certain articles. The document also stated that the amendment became effective on April 9, 1981.

Comments were solicited for 60 days after publication of the amendment. No comments were received in response to the amendment. The factual situations which were set forth in the document of April 9, 1981, still provide a basis for the amendment. Accordingly, it has been determined that the final rule should remain effective as published in the **Federal Register** on April 9, 1981.

(Secs. 8, 9, 37 Stat. 318, as amended, sec. 106, 71 Stat. 33 (7 U.S.C. 161, 162, 150ee); 37 FR 28464, 28477, as amended; 38 FR 19141)

Done at Washington, D.C., this 7th day of December 1981.

H. L. Ford,

Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

Truth in Lending; Official Staff Commentary

Correction

In FR Doc. 81–29374 appearing on page 50288 in the issue of Friday, October 9, 1981, make the following corrections:

(1) On page 50293, third column, under "4. *Counting transactions.*", in the 25th line of the paragraph, "If the extends" should have read "If it extends".

(2) On page 50311, first column, under "1. *Payment requirements.*", in the sixth line, "number of the payment stub" should have read "number or the payment stub".

(3) On page 50317, first column, under "References" after the line reading *"Statute:* Sections 161 and 162" insert *"Other sections:* §§ 226.6 through 226.8."

(4) On page 50318, first column, under "3. *Charges not based on periodic rates",* in the 12th line, "(30% ¼₀×12) should have read "30% (¼₀×12)".

(5) On page 50343, first column, the Leading for Appendix F should have read "**Appendix F–Annual Percentage Rate Computations for Certain Open-End Credit Plans**".

(6) Also on page 50343, in the third column, five lines from the top of the page, "contains of final" should have read "contains a final".

(7) On page 50344, first column, in the 8th and 9th lines from the bottom of the page, "See Samples H–12 through H–14" should have read "See Samples H–12 and H–14".

(8) Also in that column, in the 6th and 7th lines from the bottom, "See Samples H–11 and H–15" should have read "See Samples H–11 through H–15".

(9) On page 50345, first column, in the 6th line from the top of the page, complete the last sentence as follows: "The odd days' interest ($26.67) is collected with the first payment. The remaining 23 monthly payments are equal."

BILLING CODE 1505–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 329

Interest on Deposits; Stock Savings Banks as Mutual Savings Banks

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The State of Washington recently enacted legislation authorizing stock savings banks. The State of Maine already has similar legislation. Since these banks would function essentially as mutual savings banks, but for the form of ownership, FDIC is amending its regulations to define stock savings banks chartered in the States of Washington and Maine as mutual savings banks. The purpose of the amendment is to allow stock savings banks in Washington and Maine to avail themselves of the one-quarter of one-percent interest rate differential allowed mutual savings banks.

EFFECTIVE DATE: December 7, 1981.

FOR FURTHER INFORMATION CONTACT: F. Douglas Birdzell, Counsel, (202) 389–4324, or Fredric H. Karr, Attorney, (202) 389–4237, Federal Deposit Insurance Corporation.

SUPPLEMENTARY INFORMATION: The legislature of the State of Washington has enacted substitute Senate Bill #3220 effective July 26, 1981 which authorizes stock savings banks in the State of Washington. Essentially these entities have all of the attributes of mutual savings banks except for the stock form of ownership. A similar statute has been in existence for some time in the State of Maine (Section 111 *et seq.* and Section 511 *et seq.* of Title 9–B, Maine Rev. St. Ann.).

Sections 329.0 and 329.7(a) of FDIC's regulations define the term "mutual savings bank" to include: (1) Any mutual savings bank, (2) any guaranty savings bank which operates in the State of New Hampshire subject to certain limitations and (3) any corporation operating in the Commonwealth of Massachusetts as a banking company pursuant to the provisions of Chapter 172A of the General Laws of the Commonwealth of Massachusetts. Mutual savings banks are generally allowed by applicable regulations of FDIC and DIDC to pay one-quarter percent more interest on deposits than commercial banks. However, under the present state of the regulations defining mutual savings banks, a stock savings bank formed under the provisions of the new Washington statute and the existing

Maine statute would not be entitled to pay the extra one-quarter of one percent because of the stock, as opposed to, mutual form of ownership.

FDIC's Board of Directors ("Board") is therefore amending § 329.0 and 329.7(a) to expand the definition of "mutual savings bank" to include stock savings banks in both Washington and Maine. This amendment may be viewed as technical and conforming in nature, since guaranty savings banks in the State of New Hampshire are included within the definition of "mutual savings bank" under § 329.7(a) of FDIC's regulations (12 CFR 329.7(a)), provided that such banks do not engage in a commercial banking business. Since guaranty savings banks in New Hampshire which are generally similar to stock savings banks authorized under the Washington and Maine statutes may pay the differential, the Board sees no reason why Washington and Maine stock savings banks should not be accorded similar treatment.

Because this amendment is largely conforming in nature and expands existing rights, it was deemed impracticable and unnecessary to follow the provisions of Section 553 of Title 5 of the United States Code (5 U.S.C. 553) respecting notice, public participation and deferred effective date. Therefore, a regulatory flexibility analysis pursuant to Section 601 *et seq.* of Title 5 of the United States Code (5 U.S.C. 601 *et seq.*) is unnecessary. The impact on small entities will probably be minimal, although it is expected that to the extent that stock savings banks are organized under the new law, they will provide a greater degree of competition for conventional mutual savings banks. However, since stock savings banks under the laws of both Washington and Maine have essentially no greater powers than mutual savings banks, which in turn are significantly restricted in their powers *vis a vis* commercial banks, the competitive issue appears academic.

The regulation will require no significant additional paperwork or recordkeeping.

No alternative courses of action were considered because specific regulatory action is required to allow the payment of the differential.

PART 329—INTEREST ON DEPOSITS

12 CFR Part 329 is amended as follows:

1. The authority citation for Part 329 reads as follows:

Authority: Sec. 9, Pub. L. 797, 64 Stat. 881 (12 U.S.C. 1819); Sec. 18, Pub. L. 797, 64 Stat. 893 (12 U.S.C. 1828); Sec. 303, Pub. L. 96-221, 94 Stat. 146 (12 U.S.C. 1832).

2. The third sentence of § 329.0 of Part 329 is revised to read as follows:

§ 329.0 Scope.

* * * Except for §§ 329.7, 329.8 and 329.10, and except as may be specifically stated otherwise in this Part 329, the provisions of this Part 329 do not apply to (a) mutual savings banks; (b) guaranty savings banks operating in the State of New Hampshire or stock savings banks in the States of Washington and Maine so long as such banks operate substantially under, and pursuant to the laws of their respective States pertaining to mutual savings banks and do not engage in commercial banking. * * *

2. Section 329.7(a) of Part 329 is revised as follows:

§ 329.7 Maximum rates of interest payable on deposits of insured nonmember mutual savings banks.

(a) Definitions. For the purpose of this section, the term "mutual savings bank" includes (1) any mutual savings bank, (2) any guaranty savings bank or stock savings bank which operates substantially under and pursuant to the laws of the States of New Hampshire, Washington, and Maine so long as such savings bank does not engage in commercial banking, and (3) any corporation operating in the Commonwealth of Massachusetts as a banking company pursuant to the provisions of Chapter 172A of the General Laws of the Commonwealth of Massachusetts.

* * * * *

By order of the Board of Directors, December 7, 1981.

Hoyle L. Robinson,

Executive Secretary.

[FR Doc. 81-35755 Filed 12-14-81; 8:45 am]

BILLING CODE 6714-01-M

CIVIL AERONAUTICS BOARD

14 CFR Part 250

[Economic Regulations Amdt. No. 18; ER-1266]

Oversales; Approval by the Office of Management and Budget

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule gives notice that on November 11, 1981, the Office of Management and Budget (OMB) approved the reporting requirements contained in Part 250 concerning air carrier explanations of their policies regarding denied boarding compensation and boarding priorities. OMB approval is required under the Paperwork Reduction Act of 1980.

DATES: Adopted: December 9, 1981. Effective: December 9, 1981.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue NW, Washington, D.C. 20428, (202) 673-6042.

Accordingly, the Civil Aeronautics Board amends Part 250 of its Economic Regulations (14 CFR 250) by revising the note at the end of Part 250 to read:

PART 250—OVERSALES

* * * * *

Note.—The reporting requirements contained in §§ 250.3 and 250.9 have been approved by the Office of Management and Budget under number 3024-0003.

This amendment is issued by the undersigned pursuant to delegation of authority from the Board to the Secretary in 14 CFR Sec. 385.24(b). (Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324).

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 430, 436, and 455

[Docket No. 81N-0320]

Antibiotic Drugs; Moxalactam Disodium for Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic drug regulations to provide for the certification of a new antibiotic drug, moxalactam disodium for injection. The manufacturer has supplied sufficient data and information to establish its safety and efficacy.

DATES: Effective December 15, 1981; comments, notice of participation, and request for hearing by January 14, 1982; data, information, and analyses to justify a hearing by February 16, 1982.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm.

4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joan Eckert, Bureau of Drugs (HFD–140), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4290.

SUPPLEMENTARY INFORMATION: FDA has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357), as amended, with respect to providing for the certification of a new antibiotic drug, moxalactam disodium for injection. The agency has concluded that the data supplied by the manufacturer concerning this antibiotic drug are adequate to establish its safety and efficacy when the drug is used as directed in the labeling and that the regulations should be amended in Parts 430, 436, and 455 (21 CFR Parts 430, 436, and 455) to provide for its certification.

The agency has determined pursuant to 21 CFR 25.24(b)(22) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (Secs. 507, 701 (f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 (formerly 5.1; see 46 FR 26052; May 11, 1981)), Parts 430, 436, and 455 are amended as follows:

PART 430—ANTIBIOTIC DRUGS; GENERAL

1. Part 430 is amended:

a. In § 430.4 by adding paragraph (a)(48), to read as follows:

§ 430.4 Definitions of antibiotic substances.

(a) * * *

(48) *Moxalactam.* 5-oxa-1-azabicyclo[4.2.0]oct-2-ene-2-carboxylic acid, 7-[[carboxy(4-hydroxyphenyl)acetyl]-amino]-7-methoxy-3-[[(1-methyl-1*H*-Tetrazol-5-yl)thio]-methyl]-8-oxo-, disodium salt.

b. In § 430.5 by adding paragraphs (a)(73) and (b)(73), to read as follows:

§ 430.5 Definitions of master and working standards.

(a) * * *

(73) *Moxalactam.* The term "moxalactam master standard" means a specific lot of moxalactam that is designated by the Commissioner as the standard of comparison in determining the potency of the moxalactam working standard.

(b) * * *

(73) *Moxalactam.* The term "moxalactam working standard" means a specific lot of homogeneous preparation of moxalactam.

c. In § 430.6 by adding paragraph (b)(75), to read as follows:

§ 430.6 Definitions of the terms "unit" and "microgram" as applied to antibiotic substances.

* * * * *

(b) * * *

(75) *Moxalactam.* The term "microgram" applied to moxalactam means the moxalactam activity (potency) contained in 1.1173 micrograms of the moxalactam master standard.

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

2. Part 436 is amended:

a. In § 436.33(b) by alphabetically inserting a new item in the table as follows:

§ 436.33 Safety test.

* * * * *

(b) * * *

Antibiotic drug	Diluent (diluent number as listed in § 436.31)	Test dose: Concentration in units or milligrams of activity per milliliter	Test dose: Volume in milliliters to be administered to each mouse	Route of administration as described in paragraph (c) of this section
Moxalactam disodium	3	40 mg	.5	Intravenous.

* * * * *

b. By adding new § 436.332, to read as follows:

§ 436.332 High-pressure liquid chromatographic assay for moxalactam.

(a) *Equipment.* A suitable high-pressure liquid chromatograph equipped with:

(1) A low dead volume cell 8 to 20 microliters;

(2) A light path length of 1 centimeter;

(3) A suitable ultraviolet detection system operating at a wavelength of 254 nanometers;

(4) A 30-centimeter column having an inside diameter of 4.0 millimeters and packed with octadecyl silane chemically bonded to porous silica or ceramic microparticles, 5 to 10 micrometers in diameter, U.S.P. XX;

(5) A suitable recorder of at least 25.4 centimeter deflection;

(6) A suitable integrator.

(b) *Mobile phase.* Mix 0.01*M* ammonium acetate:methanol (19:1). Filter the mobile phase through a suitable glass fiber filter or equivalent that is capable of removing particulate contamination to 1 micron in diameter. Degas the mobile phase just prior to its introduction into the chromatograph pumping system.

(c) *Operating conditions.* Perform the assay at ambient temperature with a typical flow rate of 0.5 milliliter per minute. Use a detector sensitivity setting that gives a peak height for the working standard that is at least 50 percent of scale.

(d) *Preparation of working standard solution.* Transfer the contents of an ampoule of working standard to a tared weighing bottle. Place the unstoppered weighing bottle in a desiccator containing a saturated aqueous solution of potassium carbonate to provide an atmosphere of 42 percent relative humidity. Allow the moisture content of the working standard to equilibrate for 16 hours. Determine the moisture content as described in § 436.201 of this chapter. Equilibrated standard material must be kept in a closed weighing bottle and used within 36 hours of equilibration. Dissolve approximately 50 milligrams of the working standard, accurately weighed and corrected for moisture, with sufficient distilled water to obtain a solution containing 0.5 milligram of moxalactam per milliliter. Use the prepared solution immediately.

(e) *Preparation of sample solution.* Mix contents of vial thoroughly. Dissolve an accurately weighed portion of approximately 50 milligrams of sample with distilled water to obtain a concentration of 0.5 milligram per

milliliter (estimated); also, reconstitute the sample as directed in the labeling. Then using a suitable hypodermic needle and syringe, remove all of the withdrawable contents if it is represented as a single dose container; or, if the labeling specifies the amount of potency in a given volume of the resultant preparation, remove an accurately measured representative portion from each container. Further dilute an aliquot of this solution with distilled water to obtain a concentration of 0.5 milligram per milliliter (estimated). Use the prepared solution immediately.

(f) *Procedure.* Using the equipment, reagents, and operating conditions as listed in paragraphs (a), (b), and (c) of this section, inject 5 microliters of the working standard solution into the chromatograph. Allow an elution time sufficient to obtain satisfactory separation of the expected components. After separation of the working standard solution has been completed, inject 5 microliters of the sample solution into the chromatograph and repeat the procedure described for the working standard solution.

(g) *Calculations.* (1) Calculate the moxalactam content in micrograms per milligram as follows:

$$\text{Micrograms of moxalactam per milligram of sample} = \frac{R_u \times W_s \times P}{R_s \times W_u}$$

where:

R_u = Sum of the areas of the moxalactam sample R-isomer and the S-isomer peaks;
R_s = Sum of the areas of the moxalactam working standard R-isomer and the S-isomer peaks;
W_u = Weight of the sample in milligrams;
W_s = Weight of the moxalactam working standard in milligrams;
P = Potency of the moxalactam working standard in micrograms per milligram, corrected for moisture.

(2) Calculate the moxalactam content of the vial as follows:

$$\text{Milligrams of moxalactam per vial} = \frac{R_u \times W_s \times P \times d}{R_s \times 100{,}000}$$

where:

R_u = Sum of the areas of the moxalactam R-isomer and the S-isomer peaks;
R_s = Sum of the areas of the moxalactam working standard R-isomer and the S-isomer peaks;
W_s = Weight of the moxalactam working standard in milligrams;
P = Potency of the moxalactam working standard in micrograms per milligram, corrected for moisture;
d = Dilution factor.

(3) Calculate the ratio of R-isomer to S-isomer as follows:

$$\text{Ratio of R-isomer to S-isomer} = \frac{\text{Area of the R-isomer peak}}{\text{Area of the S-isomer peak}}$$

c. By adding new § 436.333, to read as follows:

§ 436.333 Thin layer chromatographic identity test for moxalactam.

(a) *Equipment.*—(1) *Chromatography tank.* A rectangular tank, approximately 23 centimeters long, 23 centimeters high, and 9 centimeters wide, equipped with a glass solvent trough in the bottom and a tight-fitting cover for the top. Line the inside walls of the tank with Whatman #3MM chromatographic paper or equivalent.

(2) *Plates.* Use a 20×20 centimeter thin layer chromotagraphy plate coated with silca gel G or equivalent to a thickness of 250 micrometers.

(b) *Developing solvent.* Mix ethyl acetate, glacial acetic acid, acetonitrile, and water in volumetric proportions of 42:14:14:18, respectively.

(c) *Preparation of spotting solutions.* Prepare solutions of the sample and working standard, each containing 10 milligrams per milliliter of moxalactam in distilled water.

(d) *Procedure.* Pour developing solvent into the bottom of the chromatography tank. Cover and seal the tank. Allow it to equilibrate for 1 hour. Prepare a plate as follows: On a line 2 centimeters from the base of the silica gel plate, and at intervals of 2 centimeters, spot 10 microliters each of the standard solution and the sample solution. After all spots are thoroughly dry, place the silica gel plate directly into the glass trough. Cover and seal the tank. Allow the solvent front to travel about 15 centimeters from the starting line. Remove the plate from the tank and air dry. Expose the plate to iodine vapors for 40 minutes. Immediately circumscribe all spots using a suitable marker.

(e) *Evaluation.* Measure the distance the solvent front traveled from the starting line and the distance the spots are from the starting line. Calculate the R_f value by dividing the latter by the former. The sample and standard should have spots of corresponding R_f values and intensity.

PART 455—CERTAIN OTHER ANTIBIOTIC DRUGS

3. Part 455 is amended by adding new § 455.230, to read as follows:

§ 455.230 Moxalactam disodium for injection.

(a) *Requirements for certification.*—(1) *Standards of identity, strength, quality, and purity.* Moxalactam disodium for injection is a dry mixture of moxalactam disodium and mannitol. Its moxalactam content is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of moxalactam that it is represented to contain. The moxalactam content of the dry mixture is not less than 722 micrograms of moxalactam per milligram. The ratio of R-isomer to S-isomer is not less than 0.8 and not more than 1.4. It is steril. It is nonpyrogenic. It passes the safety test. Its moisture content is not more than 3.0 percent. Its pH is not less than 4.5 and not more than 7.0. It passes the identity test for moxalactam.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for moxalactam content, isomer ratio, sterility, pyrogens, safety, moisture, pH, and identity.

(ii) Samples required on the batch:

(*a*) For all tests except sterility: A minimum of 10 immediate containers.

(*b*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay*—(1) *Moxalactam content; isomer ratio.* Proceed as directed in § 436.332 of this chapter.

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e)(1) of that section.

(3) *Pyrogens.* Proceed as directed in § 436.32(b) of this chapter, using a solution containing 50 milligrams of moxalactam.

(4) *Safety.* Proceed as directed in § 436.33 of this chapter.

(5) *Moisture.* Proceed as directed in § 436.201 of this chapter.

(6) *pH.* Proceed as directed in § 436.202 of this chapter, using an aqueous solution containing 100 milligrams per milliliter.

(7) *Identity.* Proceed as directed in § 436.333 of this chapter.

This regulation announces standards that FDA has accepted in a request for approval of an antibiotic drug. In accordance with the conditions for certification in section 507 of the act, FDA permits the manufacturer to market this drug on a "release" status pending the regulation's becoming effective. Because this regulation is not controversial and because when effective it provides notice of accepted standards and permits earlier certification of regulated products, notice and comment procedure and

delayed effective date are found to be unnecessary and not in the public interest. The amendment, therefore, is effective upon the date of publication in the **Federal Register**. However, interested persons may, on or before January 14, 1982, submit written comments on this rule to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may file objections to it, request a hearing, and show reasonable grounds for the hearing. Any person who decides to seek a hearing must file (1) on or before January 14, 1982, a written notice of participation and request for hearing, and (2) on or before February 16, 1982, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 430.20. A request for a hearing may not rest upon mere allegiations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch.

The procedures and requirements governing this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in 21 CFR 430.20.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall be effective December 15, 1981.

(Secs. 507, 701 (f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g)))

Dated: November 19, 1981.

[Docket No. 81N-0066]

Antibiotics for Human Use; Revocation of Certain Monographs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic regulations by removing provisions providing for the certification of certain antibiotic drugs for human use that are no longer marketed. This action will result in more accurate and usable regulations that reflect current certification practices.

DATES: Effective January 14, 1982; comments, notice of participation, and request for hearing by January 14, 1982; data, information, and analyses to justify a hearing by February 16, 1982.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joan Eckert, Bureau of Drugs (HFD–140), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4290.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 8, 1981 (46 FR 25651), corrected on June 5, 1981 (46 FR 30115), FDA proposed to amend the antibiotic drug regulations by revoking certain antibiotic monographs.

As discussed in the proposal, the agency had not received requests for certification of certain antibiotic drugs for the past several years. Because these drugs are no longer marketed, the agency proposed that the monographs (regulations) providing for these drugs be removed to maintain current regulations.

Interested persons were given until July 7, 1981, to submit written comments. No comments were received. FDA concludes that the amendment should be adopted as proposed.

Consistent with this regulation, the agency is removing the fee for the determination of undecylenic acid content in § 431.53 (21 CFR 431.53). This test fee is no longer necessary because the subject test is performed only for an antibiotic monograph that is removed by this regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 507, 701 (f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 (formerly 5.1; see 46 FR 26052; May 11, 1981)), Parts 430, 431, 436, 440, 444, 448, and 452 are amended as follows:

PART 430—ANTIBIOTIC DRUGS; GENERAL

1. Part 430 is amended:

§§ 430.4, 430.5 and 430.6 [Amended]

a. In § 430.4 *Definitions of antibiotic substances,* by removing and reserving paragraph (a)(27).

b. In § 430.5 *Definitions of master and working standards,* by removing and reserving paragraphs (a)(1) (iv) and (v), (a)(28), (b)(1)(iv) and (b)(29).

c. In § 430.6 *Definitions of the terms "unit" and "microgram" as applied to antibiotic substances,* by removing and reserving paragraphs (a)(1)(iv) and (b)(28).

PART 431—CERTIFICATION OF ANTIBIOTIC DRUGS

2. Part 431 amended:

§ 431.53 [Amended]

In § 431.53 *Fees,* by removing the item "Undecylenic acid content" from the table in paragraph (b)(1).

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

3. Part 436 is amended:

§ 436.33 [Amended]

a. In § 436.33 *Safety test,* by amending the table in paragraph (b) by removing the items "Penicillin V hydrabamine [3]," "Phenethicillin potassium," and "Viomycin sulfate."

§ 436.35 [Amended]

b. In § 436.35 *Depressor substances test,* by amending the table in paragraph (c) by removing the item "Viomycin sulfate."

§ 436.105 [Amended]

c. In § 436.105 *Microbiological agar diffusion assay,* by amending the table in paragraph (a) by removing the items "Phenethicillin" and "Viomycin" and by amending the table in paragraph (b) by

removing the items "L-phenethicillin" and "Viomycin."

§ 436.106 [Amended]

d. In § 436.106 *Microbiological turbidimetric assay,* in paragraphs (a) and (b), by amending the tables by removing the item "Viomycin."

§ 436.204 [Amended]

e. In § 436.204 *Iodometric assay,* by amending the table in paragraph (b)(1) by removing the item "L-phenethicillin" and by amending the table in paragraph (b)(2) by removing the items "Penicillin V hydrabamine" and "Phenethicillin potassium."

§ 436.205 [Amended]

f. In § 436.205 *Hydroxylamine colorimetric assay,* by amending the table in paragraph (b) by removing the item "Phenethicillin" and by amending the table in paragraph (c) by removing the item "Phenethicillin potassium."

PART 440—PENICILLIN ANTIBIOTIC DRUGS

4. Part 440 is amended:

§ 440.69 [Removed]

a. By removing §440.69 *Penicillin V hydrabamine.*

§ 440.82 [Removed]

b. By removing §440.82 *Phenethicillin potassium.*

§ 440.169 [Removed]

c. By removing §440.169 *Penicillin V hydrabamine oral dosage forms.*

§ 440.169a [Removed]

d. By removing §440.169a *Penicillin V hydrabamine chewable tablets.*

§ 440.169b [Removed]

e. By removing §440.169b *Penicillin V hydrabamine oral suspension.*

§ 440.182 [Removed]

f. By removing § 440.182 *Phenethicillin potassium oral dosage forms.*

§ 440.182a [Removed]

g. By removing § 440.182a *Phenethicillin potassium tablets.*

§ 440.182b [Removed]

h. By removing § 440.182b *Phenethicillin potassium for oral solution.*

PART 444—OLIGOSACCHARIDE ANTIBIOTIC DRUGS

§ 444.44 [Removed]

5. Part 444 is amended by removing § 444.44 *Neomycin undecylenate.*

PART 448—PEPTIDE ANTIBIOTIC DRUGS

6. Part 448 is amended:

§ 448.80a [Removed]

a. By removing § 448.80a *Sterile viomycin sulfate.*

§ 448.280 [Removed]

b. By removing § 448.280 *Sterile viomycin sulfate.*

PART 452—MACROLIDE ANTIBIOTIC DRUGS

§ 452.40 [Removed]

7. Part 452 is amended by removing § 452.40 *Erythromycin sulfate.*

Any person who will be adversely affected by this regulation may file objections to it, request a hearing, and show reasonable grounds for the hearing. Any person who decides to seek a hearing must file (1) on or before January 14, 1982, a written notice of participation and request for hearing, and (2) on or before February 16, 1982, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 430.20. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) and request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch (address above).

The procedures and requirements governing this order, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in 21 CFR 430.20.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This amendment shall become effective January 14, 1982.

(Secs. 507, 701(f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371(f) and (g)))

Dated: November 19, 1981.

Mary A. McEniry,

Assistant Director for Regulatory Affairs, Bureau of Drugs.

BILLING CODE 4160–01–M

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Oxytocin Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Lemmon Co. providing for safe and effective use of oxytocin injection for treatment of horses, cattle, swine, sheep, dogs, and cats.

EFFECTIVE DATE: December 15, 1981.

FOR FURTHER INFORMATION CONTACT: Henry C. Hewitt, Bureau of Veterinary Medicine (HFV–110), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Lemmon Co., Sellersville, PA 18960, filed an NADA (49–183) providing for use of oxytocin injection (containing 20 USP units of oxytocin per milliliter) in horses, cattle, swine, sheep, dogs, and cats as a uterine contractor and in cattle and swine as a milk-releasing agent.

The product covered by this NADA (49–183) is identical to the two oxytocin products that are subjects of the National Academy of Sciences/National Research Council (NAS/NRC) notice published in the **Federal Register** of February 13, 1969 (34 FR 2146). In that publication, FDA concurred with the NAS/NRC conclusion that the products are effective provided certain labeling revisions were made. Section 522.1680 (21 CFR 522.1680) reflects the revised labeling and specifies those conditions of use for which approval of identical products may require submission of bioequivalency data in lieu of certain types of effectiveness data.

The firm has submitted data demonstrating bioequivalency between its product and the USP standard. The labeling for Lemmon's product complies with § 522.1680. Therefore, the NADA is approved on the basis of generic equivalence. The regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm, 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 (formerly 5.1; see 46 FR 26052; May 11, 1981)) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Part 522 is amended in § 522.1680 by revising paragraph (b) to read as follows:

§ 522.1680 Oxytocin injection.

* * * * *

(b) *Sponsors.* See Nos. 000010, 000381, 000693, 000845, 000856, 010271, 012481, 015562, and 032420 in § 510.600(c) of this chapter.

* * * * *

Effective date. December 15, 1981.

(Sec. 512(i) 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: December 7, 1981.

Terence Harvey,

Deputy Director, Bureau of Veterinary Medicine.

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Bacitracin Zinc

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by A. L. Laboratories, Inc., providing for use of a bacitracin premix to manufacture complete swine feeds containing 10 to 50 grams of bacitracin per ton for increased rate of weight gain and improved feed efficiency in growing-finishing swine.

EFFECTIVE DATE: December 15, 1981.

FOR FURTHER INFORMATION CONTACT: Adriano R. Gabuten, Bureau of Veterinary Medicine (HFV–149), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4913.

SUPPLEMENTARY INFORMATION: A. L. Laboratories, Inc., a subsidiary of A/S Apothekernes Laboratorium for Specialpraeparaten, 452 Hudson Terrace, Englewood Cliffs, NJ 07632, filed a supplemental NADA (98–452) providing for use of a premix containing 50 grams of bacitracin (as bacitracin zinc) per pound to manufacture a complete feed containing 10 to 50 grams of bacitracin per ton for growing and finishing swine for increased rate of weight gain and improved feed efficiency.

Bacitracin zinc at 10 to 50 grams per ton was in use for swine before October 10, 1962. The product was the subject of the National Academy of Sciences/National Research Council (NAS/NRC) notices published in the **Federal Register** of July 17, 1970 (DESI 0061NV, 35 FR 11531) and October 2, 1979 (DESI 0061 NV, 35 FR 15408). The NAS/NRC notices concluded, and FDA concurred, that more information is needed for swine growth claims, and that these products are probably not effective for swine therapeutic claims.

The firm submitted a supplemental NADA in response to the NAS/NRC notice providing revised claims and restricted use levels. The supplement is supported by several studies for effectiveness and safety. The supplemental NADA is approved and the regulations are amended to reflect the approval.

In the **Federal Register** of September 16, 1980 (45 FR 61289), the regulations for use of bacitracin zinc for swine feeds were inadvertently amended in § 558.78(e)(1) in the table to add a new item (iii)3. This item was subsequently redesignated (iv)3 in the **Federal Register** of April 10, 1981 (46 FR 21363). The amendment as redesignated was in error and was removed by the **Federal Register** of December 11, 1981. This supplement provides for the removed use. The supplement is approved and the regulations are amended to reestablish the revised language for the growth claims accordingly.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 (formerly § 5.1; see 46 FR 26052; May 11, 1981)) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 558.78 is amended in paragraph (e)(1) in the table by adding new item (iv)3 to read as follows:

§ 558.78 Bacitracin zinc.

DEPARTMENT OF LABOR

Office of Pension and Welfare Benefit Programs

29 CFR Part 2520

Revision of Annual Return/Reports and Regulations Regarding Plans Which Participate in a Master Trust

AGENCY: Office of Pension and Welfare Benefit Program, Labor.

ACTION: Final rules and adoption of revision of annual return/report forms.

SUMMARY: This document contains revisions of certain forms of the 5500 series (annual return/report for employee benefit plans) filed under the Employee Retirement Income Security Act of 1974 (ERISA), and of the instructions to these forms, and a revision of related employee benefit plan annual reporting regulations. The revisions affect the reporting of financial information by plans which participate in a master trust. The following forms are revised: Form 5500 (annual return/report form), Form 5500–C (return/report form for plans with fewer than 100 participants), and Form 5500–K (return/report form for plans with fewer than 100 participants and at least one owner-employee).

EFFECTIVE DATE: [30 days after adoption.]

FOR FURTHER INFORMATION CONTACT: John Christensen, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216, (202) 523–8684 or Stevan Durovic, Office of the Solicitor, Plan Benefits Security Division, U.S. Department of Labor, Washington, D.C. 20210, (202) 523–7924.

SUPPLEMENTARY INFORMATION: On December 30, 1980, notice was published in the **Federal Register** (45 FR 85793) that the Department had under consideration proposed revisions to 29 CFR 2520.103–1, relating to the contents of the annual report, Form 5500 (annual return/report for employee benefit plans) and instructions thereto. The revisions relate to the treatment of plans participating in master trusts for annual reporting purposes. Generally, a master trust is a trust maintained by a bank or similar financial institution to hold the assets of several plans that are all sponsored by a single employer or by several employers which are under common control. As noted in the December 30, 1980, proposal, the master trust revisions were developed by the Department at the suggestion of representatives of banks and the banking industry, largely utilizing concepts suggested by them.

The Department's annual reporting requirements are set forth at 29 CFR 2520.103–1 *et seq.* In accordance with these regulations, plans generally file annual reports on forms of the 5500 Series (Forms 5500, 5500–C, and 5500–K). The annual report contains financial statements, which include a statement of assets and liabilities (Item 13 of Form 5500 and Item 15 of Form 5500–C) and a statement of income, expenses and changes in net assets (Item 14 of Form 5500 and Item 16 of Form 5500–C).[1] Plan assets, liabilities, income and expenses are grouped in categories and sub-categories ("line items"). In general, the instructions to the forms prior to the revisions have required that if the assets of two or more plans are maintained in one trust (as in the case of a master trust), the statement of assets and liabilities and the statement of income, expenses, and changes in net assets should be completed by entering the allocable portion of each line item for the plan in question.[2]

Under the revisions, a plan which participates in a master trust is required to report the value of the plan's interest in the master trust as a single asset in the plan's statement of assets and liabilities. The plan's share of earnings and realized and unrealized gains and losses of the master trust is reported in the plan's statement of income, expenses, and changes in net assets as a single figure representing the increase (or decrease) in the value of the plan's interest in the master trust. More detailed financial information about the assets held in the master trust is provided in separate schedules and statements, but, in general, that information is not broken down on a plan-by-plan basis. Schedules of assets held for investment, loans or leases in default or classified as uncollectible, party-in-interest transactions and reportable transactions required in item 22(a) are also filed with respect to assets held in the master trust.

Upon consideration of public comments on the proposal, the Department has determined to adopt the proposed revisions to Form 5500 and instructions thereto, and the regulations, with certain modifications discussed below. In addition to revising Form 5500 and the instructions to it, the Department has also decided to revise Forms 5500–C and 5500–K and their instructions, instead of requiring plans that would otherwise be entitled to file the 5500–C and 5500–K to file Form 5500, as was proposed. In this connection, the proposed amendment to 29 CFR 2520.103–1(c), which would have required plans participating in master trusts to file only Form 5500, rather than Form 5500–C or 5500–K, where appropriate, has been eliminated. The following is an explanation of the revised method of reporting for plans participating in master trusts, and a discussion of the public comments received concerning the proposal and decisions made by the Department in light of the comments.

Revised Master Trust Reporting

Under the revisions a master trust is treated as consisting of one or more "investment accounts." Each of the following is to be treated as a separate investment account: (1) Each pool of assets such that each plan has the same fractional interest in each asset in the pool and each plan may not dispose of its interest in any asset in the pool without disposing of its interest in the pool, and (2) each asset held in the master trust which is not part of such a pool of assets. Thus, every asset held in the master trust is considered to be held in an investment account.

Under this definition, investment accounts are generally identical with investment funds in which assets of

[1] These items appear as a substantially abbreviated Item 13 on Form 5500–K.

[2] This rule does not apply with respect to common or collective trusts. See 29 CFR 2520.103–3.

participating plans are pooled for investment purposes, such as equity funds, real estate funds, bond funds, and money market funds. Where a master trust also permits separate assets to be held in the master trust outside of any pooled investment fund, for the benefit of a single participating plan, each such asset is treated as a separate investment fund.

A principal feature of the revisions to Forms 5500 and 5500–C is that financial information is to be provided with respect to each investment account maintained within the master trust. By contrast with prior requirements, it is not necessary to determine a plan's allocable share of each line item of Form 5500 or 5500–C for assets held in the master trust. On Form 5500–K, the financial information provided in item 13 is not broken down into categories. Consequently, no additional line items relating specifically to a plan's participation in a master trust are necessary.

On Forms 5500 and 5500–C, the current value of a plan's interest in a master trust at the beginning and end of the plan year is to be reported in the plan's statement of assets and liabilities (item 13(c)(x) of Form 5500; item 15(c)(v) of revised Form 5500–C). The value of the plan's interest in a master trust is the sum of the net values of the plan's interest in each master trust investment account. Detailed information on assets held in the master trust is to be provided with respect to each master trust investment account in a statement in the format of item 13 of Form 5500, or item 15 of Form 5500–C, as appropriate, showing the assets and liabilities of the investment account at the beginning and end of the most recent fiscal year of the investment account.

On Forms 5500 and 5500–C, the net investment gain (or loss) allocated to the plan from all master trust investment accounts for the plan year is to be reported in the plan's statement of income, expenses, and changes in net assets (item 14(n)(ii) of revised Form 5500 and item 16(m)(ii) of the revised Form 5500–C). This figure is determined by adding together all net investment gains allocated to the plan for the plan year and by subtracting from that sum any net investment losses allocated to the plan for the plan year.[3] A separate schedule must list each master trust investment account in which the plan has an interest and show the net investment gain (or loss) allocated to the plan from each such master trust investment account for the plan year. A statement prepared for each investment account reports, in the format of item 14 of Form 5500 (item 16 of Form 5500–C), the income, expenses, change in net assets, and net increase (decrease) in net assets of the investment account during the most recent fiscal year of the investment account.

Any expenses which are incurred by the plan in connection with the master trust but which are not subtracted from the gross income of one of the master trust investment accounts in determining the net increase (decrease) in net assets of such investment accounts are to be reported in item 14 (j) or (k) of the plan's Form 5500 (item 16 (i) or (j) of Form 5500–C).

Item 12 of Form 5500 must include the plan's share of amounts of compensation paid during the plan year to the trustee of the master trust and to persons providing services to the master trust, if such compensation is not substracted from the gross income of any investment account in determining the investment account's net increase (decrease) in net assets.[4] Any amounts of compensation paid to persons providing services to an investment account and taken into account in determining the net increase (decrease) in net assets of the investment account are to be reported in a statement prepared on a separate schedule for the investment account in the same format as item 12 of Form 5500.

Separate schedules of the information specified in item 22(a) of Form 5500 (*i.e.*, party in interest transactions, assets held for investment, loans or leases in default or classified as uncollectible, and reportable transactions) must be completed for each investment account.

Discussion of the Comments

(1) *Filing Responsibility.* The proposal would have required the bank maintaining the master trust to complete the master trust filing, consisting of the separate schedules and statements which contain financial information relating to the assets held in master trust investment accounts, and to file it directly with the Department. Certain comments objected to this requirement, arguing that under sections 103(a)(2) and 104 of the Act, it is the plan administrator of each plan participating in a master trust who has the duty to file the plan's annual report with the Department, including information pertaining to plan assets held in the master trust. The comments also questioned the Department's authority to shift the filing obligation to the bank serving as master trustee. In addition, the comments suggested that in some instances it might be advantageous for the master trust filing to be made by one of the plan administrators of the plans participating in the master trust. The Department has modified the proposed revisions to make it clear that the master trust filing may be made by the plan administrator or by his designee. Thus, each plan administrator retains the responsibility for ensuring that the master trust filing is made, yet the administrators of plans participating in the master trust and the master trustee can work out among themselves the most practical arrangement for the master trust filing. The master trust filing constitutes a part of the annual return/report of each plan participating in the master trust for purposes of satisfying the plan's disclosure obligations to participants and beneficiaries.[5]

(2) *Use of Forms 5500–C and 5500–K.* Under current requirements, a simplified method of reporting is in effect for plans with fewer than 100 participants. These plans are required to file a full return/report once every three years on Form 5500–C or 5500–K (Form 5500–K is for so-called "Keogh" or "H.R. 10" plans, *i.e.*, plans for sole proprietorships or partnerships that cover at least one owner-employee; Form 5500–C is for other plans with fewer than the 100 participants). The financial information that is required on Form 5500–C is less detailed than that required on Form 5500, while the financial information required in Form 5500–K is less detailed than that required on Form 5500–C. In two out of every three years, plans with fewer than 100 participants are only required to file a Form 5500–R, a registration statement that does not include financial information.

[3] The net investment gain (or loss) allocated to the plan from each investment account for the plan year is to be determined by subtracting the value of the plan's interest in the investment account at the beginning of the plan year from the value of the plan's interest at the end of the plan year and by adjusting that difference to eliminate the effect of any transfers of assets into or out of the investment account by the plan (*i.e.*, by subtracting any such transfers into the investment account and by adding transfers out of the investment account).

[4] No such information is required to be provided on Forms 5500–C and 5500–K.

[5] Section 104(b)(2) of the Act gives any plan participant or beneficiary the right to examine the plan's latest annual report at the plan administrator's principal office and such other places as may be necessary to make available all pertinent information to all participants. Further, section 104(b)(4) gives any plan participant or beneficiary the right to receive, upon his or her written request, a complete copy of the plan's latest annual report. The plan administrator may make a reasonable charge to cover the costs of furnishing such copy. (See also 29 CFR 2520.104–1 and 2520.104b–30).

The proposal would have required plans otherwise entitled to use Forms 5500–C or 5500–K to use instead the full Form 5500 if they participated in a master trust. This was proposed in order to provide a uniform method of financial reporting for all plans participating in master trusts. However, the Department received comments asking that it continue to permit use of the 5500–C and 5500–K for plans that participate in a master trust if they have fewer than 100 participants. According to these comments, requiring these plans to file a Form 5500 would lead to a substantial increase in the cost of annual reporting for them.

In light of these comments, the Department has decided to permit use of Forms 5500–C and 5500–K for plan participating in master trusts that otherwise meet the requirements for those forms. In addition, Forms 5500–C and 5500–K and the instructions thereto have been revised to reflect master trust reporting, as explained below.

The master trust revisions for plans with fewer than 100 participants provide for reporting of financial information along the same lines as for larger plans, *i.e.*, in general, reporting of net figures reflecting the plan's participation in the master trust in the plan's annual return/report, with more detailed information provided on master trust investment accounts in a single master trust filing. The revisions are generally designed to match the level of detail required in the master trust filing with the highest level of detail required in the annual return/report of any plan participating in the master trust. Thus, if all of the plans participating in a master trust file Form 5500–K, the master trust filing is not required to include detailed statements of assets and liabilities and income, expenses, and changes in net assets for each master trust investment fund, since detailed information about these items would not be required for any of the participating plans. Similarly, the categories in which the assets, liabilities, income and expenses of investment accounts must be reported for a master trust consisting solely of assets of plans filing Form 5500–C (or assets of plans filing Form 5500–C and plans filing Form 5500–K) are less detailed than the categories in which these items must be reported for a master trust that includes assets of plans filing Form 5500.

On the other hand, the filing requirements for a plan with fewer than 100 participants can be satisfied with a master trust filing that satisfies the requirements for a plan for which a higher level of detail is required: a master trust filing for plans filing Form 5500–C satisfies the requirements for plans filing Form 5500–K, while a master trust filing for plans filing Form 5500 satisfies the requirements both for plans filing Form 5500–C and Form 5500–K. Thus, in no case is more than one master trust filing necessary for any fiscal year of the master trust.

Several of the items of information that must be provided on Forms 5500–C and 5500–K consist of questions relating to a specified percentage of assets of the plan (items 17, 19(c), 20, and 21(b) of Form 5500–C; items 14(c) and 17(b) of Form 5500–K). With the exception of sub-item 21(b) of Form 5500–C and sub-item 17(b) of Form 5500–K, an answer must be provided on the plan's Form 5500–C or 5500–K with respect to plan assets not held in the master trust, using the total value of those assets as the asset base from which the applicable percentage is determined.[6]

These rules avoid the necessity of aggregating assets, or transactions involving assets, held in the master trust with assets, or transactions involving assets, held outside it. The exceptions to this treatment are questions involving qualifying employer securities and qualifying employer real property, where the questions will not provide meaningful information unless assets held in the master trust are aggregated with those held outside it, since the questions are designed to determine whether the plan is in compliance with the 10 percent limitation in section 407 of ERISA, a limitation that is based on total plan assets. The information necessary to answer these questions, however, should be readily available to plan fiduciaries, since it is necessary to have this information available in order to avoid contravention of section 407 and related provisions.

(3) *"Dedicated" Assets.* The proposal would have required a so-called "dedicated" asset, that is, an asset held in a master trust exclusively for the benefit of a single plan apart from any pool of investments, to be treated as a separate investment account. Certain comments suggested that a dedicated asset should be treated like an asset not held in the master trust. In the Department's view, however, if such an asset is held in the master trust and is characterized as part of the master trust, it should, for purposes of consistency, be reported in the same manner as other master trust assets are reported, that is, as a separate investment account. Therefore, the treatment of dedicated assets remains unchanged from the proposal. However, this would not prevent a dedicated asset held in a master trust from being separated from the master trust.

(4) *Reporting of 3% Transactions.* Several comments dealt with the asset base to be used for reporting 3% transactions involving assets held outside the master trust, as required in sub-item 22(a)(v) of Form 5500. Under the proposal, the asset base to be used in determining the 3% figure for plan assets held outside the master trust was the value of only those assets held outside the master trust. Comments on the proposal suggested that the asset base to be used for this purpose should be all plan assets, including those held in the master trust. The comments pointed out that use of the smaller base would result in reporting a number of small transactions which would not ordinarily reach the 3% threshold were all plan assets included in the base.

The 3% transactions that are reportable under section 103(b)(3)(H) of ERISA and 29 CFR 2520.103–6 include certain series of transactions, and certain transactions that are part of a series of transactions, that amount to 3% of plan assets when all the transactions in the series are aggregated. Under the master trust proposal, it would not be necessary in computing the 3% figure to aggregate transactions involving assets of a plan which are held in a master trust with transactions involving assets held outside the master trust. Instead, transactions involving the assets held outside the master trust would only be required to be aggregated with other transactions involving assets held outside the master trust. In the Department's view it would be inconsistent not to require transactions outside the master trust to be aggregated with transactions in it, while permitting plan assets which are held outside the master trust to be aggregated with plan assets held in it for purposes of establishing the base for determining the 3% figure. Therefore, the Department has decided to leave unchanged the rule requiring the asset base for determining 3% transactions involving plan assets held outside the master trust to include only those assets.

(5) *Filing Date for Master Trust Information.* Under the proposal, the master trust information would be required to be filed with the Department "no later than the earliest date on which Form 5500 must be filed for any plan participating in the master trust." This requirement was based on the fact that the master trust filing is a part of a participating plan's annual return/

[6] As explained below, these items are treated in the same manner as sub-item 22(a)(v) of Form 5500 (relating to three percent transactions).

report, which would not be complete without the master trust information. Some of the comments on the proposal criticized this requirement, apparently reading it in conjunction with language in the proposed instructions specifying that the information on each master trust investment account reflect "the most recent fiscal year of the investment account." These commenters seem to have assumed that the most recent fiscal year of the master trust investment accounts would be the most recent fiscal year ending before the filing date on which the plan's annual return/report is due. Their comments suggested that such a filing date for the master trust information would not allow sufficient time for an audit of the master trust in situations where the master trust fiscal year ends a short time before the filing date for the annual return/report for one or more of the plans participating in the master trust, or that the filing date for the master trust information might even be earlier than the end of the master trust fiscal year to which that information pertains. One of the comments cited an example in which a master trust fiscal year ends on September 30, while one of the participating plans has a calendar year plan year. The plan's annual return/report would be due on July 31, *i.e.*, seven months after the close of the plan year. The commenter apparently thought that the master trust information for the master trust fiscal year beginning in the same calendar year as the plan year in question would be due on the date on which the plan's annual return/report would be due, *i.e.*, July 31, or two months before the close of the master trust fiscal year.

The Department did not intend the filing date requirement in the proposal to operate in the manner suggested by the example. The requirements regarding the investment account information to be filed have been changed to make it clear that the master trust information that must be on file as part of a plan's annual return/report is information for the fiscal year of the master trust ending with or within the plan year. Thus, it is not necessary to file information pertaining to a particular master trust fiscal year until, at the earliest, the date on which the annual return/report is due for a plan whose plan year ends on or after that master trust fiscal year, *i.e.*, at the earliest, seven months after the close of the master trust fiscal year, if the plan year and the master trust fiscal year end on the same date. In the example cited above, the information to be on file with the Department by July 31 would be information pertaining to the master trust fiscal year ending on the previous, not the following, September 30. In effect, therefore, the filing date requirements both permit the master trust information to be filed no earlier than seven months after the close of the master trust fiscal year, as the comments suggested, and ensure that they are filed not later than the earliest date on which the annual return/report is due for any participating plan, as the Department intended to provide in the proposal.

In addition, a change has been made in the language of the filing date requirement for the master trust information. Instead of requiring the master trust information to be filed "no later than the earliest date on which Form 5500 must be filed for any plan participating in the master trust," the instructions require the information to be filed "no later than the date on which the plan's annual return/report is due." This change reflects the change discussed above in the person responsible for filing the master trust information, from the bank serving as master trustee to the plan administrator of each participating plan. [7]

(6) *Plan's Interest In Master Trust.* Another change in the instructions from that which was proposed relates to the calculations of the plan's interest in the master trust at the beginning and end of the plan year, which are entered in the plan's statement of assets and liabilities (item 13 of Form 5500; item 15 of Form 5500–C). As under the proposal, the final instructions provide that the value of the plan's interest in the master trust is the sum of the net values of its interests in master trust investment accounts. The proposal however, delineated this requirement by providing that the net value of the plan's interest in a master trust investment account was to be determined by multiplying the plan's percentage interest in the investment account by the net assets of the investment account reported in the applicable column of the "net assets" line item of the statement of assets and liabilities filed for the investment account. The difficulty with this approach is that the figures reported in the investment account's statement of assets and liabilities are figures as of the beginning and end of the fiscal year of the master trust (in the proposal, the fiscal year of the investment account) ending with or within the plan year. Thus, the values obtained from the investment account's statement of assets and liabilities will not be values as of the beginning and end of the plan year unless the plan year begins on the same date as the master trust fiscal year. The instructions have accordingly been changed to make it clear that the value of the plan's interest in the master trust at the beginning and end of the plan year are required to be determined with reference to the value of the plan's interest in each master trust investment account at the beginning and end of the plan year, not the beginning and end of the master trust fiscal year, and that plans with fiscal years that differ from the master trust's fiscal year must make appropriate adjustments to show values on the Form 5500 as of the beginning and the end of the plan year.

(7) *1980 Plan Year Reporting.* Another suggestion made in the comments was that the new method of master trust reporting be made available for master trusts for 1980 plan year filings. Since much 1980 plan year filing work will have been completed by the time this alternative is adopted, and since the new method of reporting would require revised forms and instructions which would not be available for the 1980 plan year filings, the new method cannot be made available sooner than for the 1981 plan year.

(8) *Mandatory Character of Master Trust Requirements.* Several comments suggested that the master trust reporting method set forth in the proposal be optional and that the Department permit plans participating in master trusts to elect to continue providing financial information in the manner in which they have been providing the information until now.

The proposal was issued on the basis of the Department's assessment that the proposed method of reporting for plans participating in master trusts would provide information in a more accurate form than previously provided. In particular, the Department understands that in some instances, persons responsible for preparing annual reports for plans participating in master trusts have interpreted the previous instructions to the forms to permit a plan's allocable portion of each line item to be determined by multiplying the plan's percentage interest in the master trust by each item of master trust assets, liabilities, income and expenses. This

[7] The instructions regarding information to be provided on master trust investment accounts have also been changed to specify the fiscal year of the master trust, rather than that of the master trust investment account, as the fiscal year to which the master trust investment account information must relate. It is assumed that the master trust investment accounts will have the same fiscal year as the master trust, but specifying the fiscal year of the master trust is more consistent with a single filing of information relating to a particular master trust fiscal year.

procedure produces misleading results in many instances. A plan's percentage interest in the master trust—that is, the percentage obtained by dividing the sum of the plan's interests in the master trust investment accounts by the value of net assets of the master trust—is not necessarily equal to the percentage representing the plan's allocable portion of each item of master trust assets, liabilities, income and expenses, because the plan's percentage interest in the master trust is not necessarily equal to its percentage interest in each of the master trust investment accounts. Accordingly, the Department does not believe that it should permit the plan's allocable share of each line item to be determined by multiplying the plan's percentage interest in the master trust by each item of master trust assets, liabilities, income and expenses.

The only accurate alternative to the revisions would be to: (1) Require the plan's allocable portion of each item of master trust assets and liabilities to be determined by multiplying the plan's percentage interest in each master trust investment account by the value of the assets and liabilities in the investment account corresponding to the line item in question, and by adding together the products obtained in this manner; and (2) require the plan's allocable portion of master trust income and expenses to be determined by multiplying each item of income received by, and expense paid from, each master trust investment account by each plan's percentage interest in the investment account as of the date when the item of income is received or the expense paid, and by aggregating by categories each plan's allocable portions of these items of income and expenses. From the perspective of plan administrators, such a procedure would be more burdensome than the method of reporting that has now been adopted because it would make it necessary to perform many more arithmetic operations. From the perspective of the Department, moreover, allowing two alternative methods of reporting financial information would pose difficulties in administering and monitoring reporting. Accordingly, the Department has decided to make the method of reporting adopted here mandatory for plans participating in master trusts.

However, a number of the comments suggesting that the proposed method of reporting be made optional appear to have been based on misunderstandings about the scope of the proposal. In particular, the comments in question seem to have been written under the impression that the proposed revisions would apply to arrangements under which assets of plans of unrelated employers are pooled for investment purposes. In fact, the master trust revisions apply only to a trust in which assets of plans sponsored by a single employer or by a group of employers under common control are held, among other requirements. Other types of multiple plan arrangements continue to be subject to the same annual reporting requirements as previously. In this connection, it is important to distinguish master *trusts* from master *plans*, which are generally arrangements in which plans sponsored by unrelated employers take part.

(9) *"Master Trust" Definition.* The definition of the term "master trust" that appeared in the proposed regulation and Form 5500 instructions has been modified in two significant respects. First, the phrase "maintained by a bank, trust company or similar institution" has been replaced by the phrase "for which a regulated financial institution (defined to include a bank, trust company, or similar financial institution) serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control with respect to the management of assets held in the trust)." This change was made in light of one of the comments which suggested that the words "maintained by a bank" might be interpreted to exclude situations where the financial institution's functions with respect to the master trust are purely custodial and do not involve the exercise of investment management discretion over the assets in the trust. The comment asserted that a controversy exists under statutes other than ERISA as to whether under those circumstances a master trust can be considered to be maintained by a bank. The Department does not want to draw any distinction for annual reporting purposes between master trusts with respect to which banks perform discretionary investment management functions and those with respect to which banks do not, and expresses no opinion regarding the interpretation of the words "maintained by a bank" under any other statute. The regulation has also been changed to make it clear that the "master trust" definition is limited in its scope to annual reporting under ERISA.

The second significant modification in the "master trust" definition has been the elimination of sections 414 (b) and (c) of the Internal Revenue Code of 1954 as the test for common control in determining whether all the employers sponsoring plans participating in a master trust are under common control, a key element in the master trust definition. This modification was not based on any public comment, but the Department believes that a common control test based on sections 414 (b) and (c) of the Code would be too restrictive, since those sections incorporate the 80% ownership tests of section 1563 of the Code. Under the regulation and forms, as adopted, common control is to be determined on the basis of all relevant facts and circumstances, not on the basis of any numerical ownership test.

In addition to the foregoing modifications, the "master trust" definition has been changed in several respects to enhance readability.

(10) *Arrangements other than Master Trusts.* In the proposal, the Department solicited comments regarding appropriate reporting methods for multiple plan arrangements other than master trusts and arrangements already subject to special reporting rules.

One comment suggested that a certain pooled investment trust that holds assets of many small individual account plans of unrelated employers in the same industry, if not brought within the scope of the master trusts reporting rules, should be subject to alternative reporting methods along the lines of 29 CFR 2520.103–3 and 103–4. The pooled investment trust in question would not be subject to master trust reporting because it holds assets of plans sponsored by unrelated employers and because it is not trusted by a regulated financial institution. The special reporting rules available in connection with bank-managed common and collective trust funds (29 CFR 2520.103–3) would also not be available. Since the Department has not received any comments indicating a widespread need for special reporting rules for similar trusts, the Department has decided to deal with this comment on an individual basis, instead of dealing with it in the context of the generally applicable annual return/report instructions.

Another comment on the proposal requested that the "master trust" definition be modified to include a "group trust," in which assets of more than one trust are held. The comment does not specify whether the assets in the "group trust" are assets of a single plan or of more than one plan. If they are assets of more than one plan sponsored by a single employer or by a group of employers under common control, and the trustee is a regulated bank, trust company, of similar financial institution, it appears that the group trust would meet the "master trust"

definition, as adopted, without further changes. If, on the other hand, the group trust consists of assets of a single plan, it does not appear that it would be appropriate to apply the revised method of reporting for master trusts to a situation that does not involve a fund in which assets of more than one plan are pooled for investment purposes.

(11) *Schedule A.* One comment on the proposal suggested that where insurance of annuity contracts are held in a master trust and are owned jointly by several plans participating in the master trust, the Department should permit a single Schedule A (consisting of insurance information) to be filed for each contract as a part of the master trust filing, instead of requiring each plan owning an interest in the contract to file a Schedule A. The comment stated that permitting a single Schedule A to be filed for each such contract would reduce administrative and paperwork burdens. In light of this comment, the Department has decided to permit a single Schedule A to be included in the master trust filing for each insurance or annuity contract held in a master trust. To the extent that an insurance or annuity contract held in a master trust involves unallocated funds (including a separate account), however, the unallocated funds or separate account would be required to be treated as a master trust investment account, or included in a master trust investment account, and the value of the unallocated funds (including the master trust's interest in the separate account, as the case may be) must be allocated among participating plans in preparing their annual return/reports.

Adopted Regulation

The revisions to Form 5500, 5500–C, and 5500–K are accompanied by a regulation adopted in this document (29 CFR 2520.103–1(e)) which requires the plan administrator of a plan participating in a master trust to follow the instructions to Form 5500, 5500–C, or 5500–K, as appropriate, regarding master trusts.

The regulation is issued pursuant to the Secretary's authority under section 110 of ERISA to prescribe alternative methods of compliance with respect to pension plans and pursuant to his authority under section 104(a)(3) of ERISA to exempt any welfare plan from all or part of the reporting and disclosure requirements of Title I of ERISA or to provide for simplified reporting and disclosure. With respect to pension plans participating in master trusts, the Department has determined that the use of the master trust reporting method prescribed in this notice is consistent with the purposes of Title I of ERISA and provides adequate disclosure to participants and beneficiaries in such plans, and adequate reporting to the Secretary; that application of the requirements of Part 1 of Title I unmodified by the master trust reporting method would increase the costs to such plans; and that application of such unmodified requirements would be adverse to the interests of participants in such plans. With respect to welfare plans participating in master trusts, the Department finds that the reporting and disclosure requirements of Title I of ERISA unmodified by the master trust reporting method prescribed in this notice would not be appropriate as applied to such plans.

Executive Order 12291 Statement

The Department has determined that the rule adopted herein is not a "major rule" within the meaning of section 1(b) of the Executive Order because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This rule will make annual reporting requirements easier to comply with for plans participating in master trusts, and will provide greater certainty for persons responsible for complying with those requirements.

Regulatory Flexibility Act

In view of the December 30, 1980, date of publication of the proposal of the rule adopted herein, the Regulatory Flexibility Act, 5 U.S.C. 604, *et seq.*, (Pub. L. 96–354, 94 Stat. 1164) does not apply to it since section 4 of that Act provides that it only applies to rules for which a notice of proposed rulemaking is issued on or after January 1, 1981.

Authority

Sections 101, 103, 104, 110 and 505 of the Employee Retirement Income Security Act of 1974; Pub. L. 93–406, 88 Stat. 840, 841, 847, 851 and 894 (29 U.S.C. 1021, 1023, 1024, 1030, and 1135).

Paperwork Reduction Act Information

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB #1210–0016.

1. Revisions of Annual Reporting Regulation

In consideration of the matters discussed above, § 2520.103–1 of Title 29 of the Code of Federal Regulations is hereby amended by adding a new paragraph (e) to read as set forth below.

§ 2520.103–1 Contents of the annual report.

* * * * *

(e) *Plans which participate in a master trust.* The plan administrator of a plan which participates in a master trust shall file an annual report on Form 5500, 5500–C, 5500–K, or 5500–R, as appropriate, in accordance with the specific instructions relating to master trusts on those forms and instructions thereto. For purposes of annual reporting, a master trust is a trust for which a regulated financial institution serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control respecting the management of assets held in the trust) and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held. For purpose of this paragraph, a regulated financial institution is a bank, trust company, or similar financial institution regulated, supervised, and subject to periodic examination by a State or Federal agency. Common control is determined on the basis of all relevant facts and circumstances (whether or not such employers are incorporated).

2. Revisions of Return/Reports

The annual return/report Form 5500 and return/report Forms 5500–C and 5500–K and instructions thereto are hereby amended in the manner described below.

I. Revisions to Form 5500

Add new sub-item 6(c)(v) "Master Trust (see instructions)."

Add new sub-item 13(c)(x) "Value of Interest in Master Trust" and renumber current 13(c)(x) and 13(c)(xi) as 13(c)(xi) and 13(c)(xii) respectively.

Add new sub-item 14(n)(ii) "Net investment gain (or loss) from all master trust investment accounts." Renumber current sub-item 14(n)(ii) ("Other changes") as 14(n)(iii).

II. Revisions to Instructions for Form 5500

[Insert at the end of "A. Who Must File—3. Kinds of Filers."]

(g) Master Trusts—For plans participating in a Master Trust, see page—for filing instructions.

[Insert after Specific Instructions for Form 5500 (ending on page 7)]

Filing Instructions for Plans Participating in Master Trust(s)

A. *General.* The annual return/report of a plan participating in a master trust must include statements and schedules providing information about assets held in the master trust, as specified in Part C, below, in addition to a Form 5500 completed as specified in Part B, below. The master trust information must be filed by the plan administrator or its designee *with the Department of Labor,* while the plan's Form 5500 and, if applicable, Schedules A and B must be filed *with the Internal Revenue Service.*

For reporting purposes, a master trust is a trust for which a regulated financial institution (as defined below) serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control with respect to the management of assests held in the trust) and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held. "Regulated financial institution" means a bank, trust company, or similar financial institution which is regulated, supervised, and subject to periodic examination by a State or Federal agency. Common control is determined on the basis of all relevant facts and circumstances (whether or not such employers are incorporated).

For reporting purposes, the assets of a master trust are considered to be held in one or more "investment accounts." A master trust investment account may consist of a pool of assets or a single asset. Each pool of assets held in a master trust must be treated as a separate master trust investment account if each plan which has an interest in the pool has the same fractional interest in each asset in the pool as its fractional interest in the entire pool, and if each such plan may not dispose of its interest in any asset in the pool without disposing of its interest in the pool. A master trust may also contain assets which are not held in such a pool. Each such asset must be treated as a separate master trust investment account.

Financial information must generally be provided with respect to each master trust investment account as specified in Part C, "Reporting Information Relating to Master Trusts and Master Trust Investment Accounts," below.

B. Reporting Information Relating to the Individual Plan. 1. In item 6(c)(v), if assets are held in a master trust of a single employer or controlled group, check the box and enter the name of the trust and bank or financial institution. Also enter the city and state where the trust is maintained.

2. In item 12, include the plan's share of amounts of compensation for services paid during the plan year to the master trustee and to persons providing services to the master trust if such compensation is not subtracted from the gross income of any master trust investment account in determining the net investment gain (or loss) from the investment account (see ¶ B6, below). Amounts of compensation subtracted from investment account gross income in determining the net investment gain (or loss) from the investment account must be reported on separate schedules (see ¶ C3, below).

3. Enter the current value of the plan's interest in the master trust at the beginning of the plan year and at the end of the plan year on line 13(c)(x). The value of the plan's interest in a master trust is the sum of the net values of the plan's interests in master trust investment accounts. The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account (total assets minus total liabilities) at the beginning and end of the plan year. If some plan funds are held in a master trust and other plan funds are held in other funding media, complete all applicable sub-items of item 13 with regard to assets held in other funding media.

4. In sub-items 14 (d), (e), (f), (i), (j), (k), and (n)(i), do not report earnings, expenses, gains or losses, and unrealized appreciation or depreciation which were included in computing the net investment gain (or loss) from any master trust investment account. (See ¶ B6, below, for explanation of net investment gain (or loss) from master trust investment account.) If some plan funds are held in a master trust and other plan funds are held in other funding media, complete all applicable sub-items of item 14 to report plan earnings, expenses, gains or losses, and unrealized appreciation or depreciation relating to the other funding media.

5. In sub-item 14(j), report all administrative expenses (by specified category) paid by or charged to the plan which were not subtracted from the gross income of a master trust investment account in determining the net investment gain (or loss) from the investment account (see ¶ B6, below).

6. Attach a list of each master trust investment account in which the plan has an interest, indicating the plan's name, EIN, and PN and the name of the master trust used in the master trust information filed with the Department of Labor (see Part C, below). In tabular format show the net value of the plan's interest in each investment account (see ¶ B3, above) at the beginning of the plan year and at the end of the plan year; the total amount of transfers to the investment account, and the total amount of transfers from the investment account, by the plan during the plan year; and the net investment gain (or loss) allocated to the plan for the plan year from the investment account. The net investment gain (or loss) allocated to the plan for the plan year from the investment account is equal to:

The current value of the plan's interest in the investment account at the end of the plan year,

Minus the current value of the plan's interest in the investment account at the beginning of the plan year,

Plus any amounts transferred out of the investment account by the plan during the plan year,

Minus any amounts transferred into the investment account by the plan during the plan year.

7. Enter in sub-item 14(n)(ii) the net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts. The net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts is obtained by subtracting any net investment losses allocated to the plan from master trust investment accounts from the sum of net investment gains allocated to the plan from master trust investment accounts. The net investment gain (or loss) allocated from each master trust investment account is reported on a separate schedule (see ¶ B6, above).

8. Do not complete sub-item 22(a) if all plan funds are held in master trusts. If some plan funds are held in master trusts and other plan funds are held in other funding media, complete sub-item 22(a) to report information relating to the other funding media. In such cases, complete item 22(a)(v) only with respect to transactions involving assets of the plan which are not held in a master trust. In determining the 3% figure, do not include the value of plan assets held in the master trust in the current value of the plan's assets at the beginning of the plan year. Do not report acquisitions or dispositions of interests in a master trust in sub-item 22(a)(v).

(See ¶ C6, below, with respect to information that must be included concerning each master trust investment account)

C. Reporting Information Relating to Master Trusts and Master Trust Investment Accounts. The information described below must be filed with the Department of Labor no later than the date on which the plan's annual return/report is due. The required information may be filed by the plan administrator or by a person designated by the plan administrator, such as the administrator of another plan participating in the master trust or the financial institution serving as trustee of the master trust. However, it is the obligation of the plan administrator to ensure that the required information is filed prior to or concurrent with the filing by the plan of Form 5500. While only one copy of the required information should be filed for all plans participating in the master trust, the information is an integral part of the annual return/report of each participating plan and a participating plan's annual return/report will not be deemed complete unless all the information is filed within the prescribed time.

Each of the required statements and schedules must indicate the name of the plan, the sponsor's employer identification number, and the three digit plan number. The required information shall be filed with the Department of Labor by mailing it to: Master Trust, Office of Reports and Disclosure, Pension and Welfare Benefit Programs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216.

1. The name and fiscal year of the master trust and the name and address of the master trustee.

2. A list of all plans participating in the master trust, showing each plan's name and its percentage interest in each master trust investment account as of the beginning and end of the fiscal year of the master trust ending with or within the plan year.

3. A statement, in the same format as item 12 of Form 5500, for each master trust investment account showing amounts of compensation paid during the fiscal year of the master trust ending with or within the plan year to persons providing services with respect to the investment account and subtracted from the gross income of the investment account in determining the net increase (decrease) in net assets of the investment account (see ¶ C5, below), and the other information specified in item 12 of Form 5500.

4. A statement for each master trust investment account showing the assets and liabilities of the investment account at the beginning and end of the fiscal year of the master trust ending with or within the plan year, grouped in the same categories as those specified in item 13 of Form 5500.

5. A statement for each master trust investment account showing the income, expenses, changes in net assets, and net increase (decrease) in net assets of each such investment account during the fiscal year of the master trust ending with or within the plan year, in the categories specified in item 14 of Form 5500. In place of sub-items (a), (b), and (c) of item 14, show all transfers of assets into the investment account by participating plans. In place of sub-item (h) of item 14, show all transfers of assets out of the investment account by participating plans. Do not complete sub-item 14(n)(iii).

6. Schedules, in the format set forth in the instructions to item 22 of Form 5500, of the following items with respect to each master trust investment account for the fiscal year of the master trust ending with or within the plan year: Assets held for investment, nonexempt party-in-interest transactions, defaulted or uncollectible loans and leases, and 3% transactions involving assets in the investment account. The 3% figure shall be determined by comparing the current value of the transaction at transaction date with the current value of the investment account assets at the beginning of the applicable fiscal year of the master trust.

III. Revisions to Form 5500–C

Add new sub-item 6(c)(v) "Master Trust (see instructions)."

Add new sub-item 15(c)(iv) "Value of Interest in Master Trust" and renumber current 15(c)(iv) and 15(c)(v) as 15(c)(v) and 15(c)(vi) respectively.

Add new sub-item 16(m)(ii) "Net investment gain (or loss) from all master trust investment accounts." Renumber current sub-item 16(m)(ii) ("Other changes") as 16(m)(iii).

IV. Revisions to Instructions for Form 5500–C

[Insert at the end of "A. Who Must File—3. Kinds of Filers."]

(f) Master Trusts—For plans participating in a Master Trust, see page — for filing instructions.

[Insert after Specific Instructions for Form 5500–C (ending on page 7)]

Filing Instructions for Plans Participating in Master Trust(s)

A. General. The return/report of a plan participating in a master trust must include statements and schedules providing information about assets held in the master trust, as specified in Part C, below, in addition to a Form 5500–C completed as specified in Part B, below. The master trust information must be filed by the plan administrator or its designee *with the Department of Labor*, while the plan's Form 5500–C and, if applicable, Schedules A and B must be filed *with the Internal Revenue Service.*

For reporting purposes, a master trust is a trust for which a regulated financial institution (as defined below) serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control with respect to the management of assets held in the trust) and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held. "Regulated financial institution" means a bank, trust company, or similar financial institution which is regulated, supervised, and subject to periodic examination by a State or Federal agency. Common control is determined on the basis of all relevant facts and circumstances (whether or not such employers are incorporated).

For reporting purposes, the assets of a master trust are considered to be held in one or more "investment accounts." A master trust investment account may consist of a pool of assets of a single asset. Each pool of assets held in a master trust must be treated as a separate master trust investment account if each plan which has an interest in the pool has the same fractional interest in each asset in the pool as it fractional interest in the entire pool, and if each such plan may not dispose of its interest in any asset in the pool without disposing of its interest in the pool. A master trust may also contain assets which are not held in such a pool. Each such asset must be treated as a separate master trust investment account.

B. Reporting Information Relating to the Individual Plan. 1. In item 6(c)(v), if assets are held in a master trust of a single employer or controlled group, check the box and enter the name of the trust and bank or financial institution. Also enter the city and state where the trust is maintained.

2. Enter the current value of the plan's interest in the master trust at the beginning of the plan year and at the end of the plan year on line 15(c)(iv). The value of the plan's interest in a master trust is the sum of the net values of the plan's interest in master trust investment accounts. The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account. If some plan funds are held in a master trust and other plan funds are held in other funding media, complete all applicable sub-items of item 15 with regard to assets held in other funding media.

3. In sub-items 16 (c), (d), (e), (h), (i), (j), and (m) (i), do not report earnings, expenses, gains or losses, and unrealized appreciation or depreciation which were included in determining the net investment gain (or loss) from any master trust investment account. (See definition net investment gain (or loss), below.) If some plan funds are held in a master trust and other plan funds are held in other funding media, complete all applicable sub-items of item 16 to report plan earnings, expenses, gains or losses, and unrealized appreciation or depreciation relating to the other funding media.

4. In sub-item 16(i), report all administrative expenses paid by or charged to the plan which were not subtracted from the gross income of a master trust investment account in determining the net investment gain (or loss) from the investment account. (See definition of net investment gain (or loss), below.)

5. Attach a list of each master trust investment account in which the plan has an interest, indicating the plan's name, EIN, and PN and the name of the master trust used in the master trust information filed with the Department of Labor (see Part C, below). In tabular format show the net value of the plan's interest in each investment account (see ¶B2, above) at the beginning of the plan year and at the end of the plan year; the total amount of transfers to the investment account, and the total amount of transfers from the investment account, by the plan during the plan year; and the net investment gain (or loss) allocated to the plan for the plan year from the investment account. The net investment gain (or loss) allocated to the plan for the plan year from the investment account is equal to:

The current value of the plan's interest in the investment account at the end of the plan year,

Minus the current value of the plan's interest in the investment account at the beginning of the plan year,

Plus any amounts transferred out of the investment account by the plan during the plan year,

Minus any amounts transferred into the investment account by the plan during the plan year.

6. Enter in sub-item 16(m)(ii) the net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts. The net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts is obtained by subtracting any net investment losses allocated to the plan from master trust investment accounts from the sum of net investment gains allocated to the plan from master trust investment accounts. The net investment gain (or loss) allocated to the plan for the year from each investment account is reported on a separate schedule (see ¶B5, above).

7. In item 17, answer the questions only with respect to plan assets which are not held in a master trust investment account. Use the total value of plan assets not held in such an investment account as the asset base in determining the percentage.

8. In item 18(c), do not include administrative expenses which have been subtracted from the gross income of a master trust investment account in determining the

net investment gain (or loss) from the investment account.

9. In item 19, answer the questions only with regard to plan assets which are not held in a master trust investment account. In sub-item 19(c), use the value of plan assets not held in a master trust investment account as the base for determining the 10 percent figure.

10. In item 20, answer the questions only with regard to plan assets which are not held in a master trust investment account. Use the value of plan assets not held in a master trust investment account as the base for determining the 15 percent figure.

11. In item 21, answer sub-item 21(a) taking into account *any* consideration received by an officer or employee of the plan sponsor, *including* any consideration paid out of the master trust or a master trust investment account. Answer sub-item 21(b) as specified below in ¶B12. Answer sub-item 21(c) taking into account *all* parties providing services to the plan, *including* parties providing services with respect to assets held in master trust investment accounts in which the plan has an interest, and taking into account *all* plan fiduciaries, *including* persons who are fiduciaries by reason of their relationship to a master trust investment account in which the plan has an interest or to the assets in such an investment account. Answer sub-items 21(e) and (f) only with respect to assets not held in a master trust investment account.

12. Answer sub-item 21(b) taking into account *all* qualifying employer securities and *all* qualifying employer real property, *including* the plan's share of qualifying employer securities and real property acquired by a master trust investment account. The plan's share in such qualifying employer securities or real property is determined by multiplying the plan's percentage interest in the investment account as of the acquisition date by the fair market value of the qualifying employer securities or real property as of the acquistion date. The asset base used in determining the 10 percent figure is the total value of plan assets as of the acquisition date, including the current value of the plan's interest in the master trust *as of the acquisition date*, determined as specified in ¶B2, above.

C. *Reporting Information Relating to Master Trusts and Master Trust Investment Accounts.* The following instructions are to be followed *only* if every plan participating in the master trust has fewer than 100 participants. Otherwise, information relating to master trusts and master trust investment accounts must be reported pursuant to the instructions to Form 5500.

The information specified below must be filed with the Department of Labor no later than the date on which the plan's return/report is due. The required information may be filed by the plan administrator or by a person designated by the plan administrator, such as the administrator of another plan participating in the master trust or the financial institution serving as trustee of the master trust. However, it is the obligation of the plan administrator to ensure that the required information is filed prior to or concurrent with the filing by the plan of Form 5500–C. While only one copy of the required information should be filed for all plans participating in the master trust, the information is an integral part of the return/report of each participating plan and a participating plan's return/report will not be deemed complete unless all the information is filed within the prescribed time.

Each of the required statements and schedules must indicate the name of the plan, the sponsor's employer identification number, and the three digit plan number. The required information must be filed with the Department of Labor by mailing it to: Master Trust, Office of Reports and Disclosure, Pension and Welfare Benefit Programs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216.

1. The name and fiscal year of the master trust and the name and address of the master trustee. If the information relating to the master trust is not filed in connection with any annual return/report filed on Form 5500, the name of the master trust must be followed by "(5500–C)."

2. A list of all plans participating in the master trust, showing each plan's name and its percentage interest in each master trust investment account as of the beginning and end of the most recent fiscal year of the master trust.

3. A statement for each master trust investment account showing the assets and liabilities of the investment account at the beginning and end of the fiscal year of the master trust ending with or within the plan year. This statement must be in the same format as item 13 of Form 5500, except that if every plan participating in the master trust has fewer than 100 participants at the beginning of the plan year with which or within which the fiscal year of the master trust ends, the format of item 15 of Form 5500–C may be used.

4. A statement for each master trust investment account showing the income, expenses, changes in net assets, and net increase (decrease) in net assets of each such investment account during the fiscal year of the master trust ending with or within the plan year. The statement must be in the same format as item 14 of Form 5500, except that if every plan participating in the master trust has fewer than 100 participants at the beginning of the plan year with which or within which the fiscal year of the master trust ends, the format of item 16 of Form 5500–C may be used. In place of sub-items (a), (b), and (c) of item 14, Form 5500 (or sub-items (a) and (b) of item 16, Form 5500–C, as appropriate), show the total of all transfers of assets into the investment account by participating plans. In place of sub-item 14(h), Form 5500 (or sub-item 16(g), Form 5500–C, as appropriate), show the total of all transfers of assets out of the investment account by participating plans. Do not complete sub-item 14(n)(iii), Form 5500 (or sub-item 16(m)(iii), Form 5500–C).

5. Schedules, in the format set forth in the instructions to item 17 of Form 5500–C, of the following information with respect to each master trust investment account:

(a) Percentage of assets in the investment account loaned to a person who is a party in interest with respect to any of the plans which have an interest in the investment account,

(b) Percentage of assets in the investment account which are invested in securities issued by a person who is a party in interest with respect to any of the plans which have an interest in the investment account, and

(c) Percentage of assets in the investment account which are invested in real estate leased by a person who is a party in interest with respect to any of the plans which have an interest in the investment account.

6. A statement of the administrative expenses of each master trust investment account for the fiscal years of the master trust ending with or within the preceding plan year and the second preceding plan year, if these figures have not already been reported to the Department in a statement of income, expenses, and changes in net assets filed for the master trust investment account.

7. A schedule, in the format set forth in the instructions to item 19 of Form 5500–C, for each master trust investment account showing party-in-interest transactions involving assets held in the investment account for the fiscal year of the master trust ending with or within the plan year.

8. For each master trust investment account, statements as to whether, since the end of the last fiscal year of the master trust for which financial information has been provided in connection with an annual return/report Form 5500 or return/report Form 5500–C or 5500–K filed for the plan or any other plan, (a) an extension has been granted on any loan of assets held in the investment account for which, prior to the granting of the extension, all principal and interest payments due under the terms of the loan have not been received; and

(b) An extension of time or renewal has been granted for the payment of any obligation held in the investment account which amounts to 10 percent of the assets in the investment account.

9. For each master trust investment account, statements as to whether, since the end of the last fiscal year of the master trust for which financial information has been provided in connection with an annual return/report Form 5500 or return/report Form 5500–C or 5500–K filed for the plan or any other plan, (a) the master trust investment account had any investments of the type reportable under item 15(c) (iv) or (v) of Form 5500–C which in the aggregate exceeded 15 percent of assets in the master trust investment account in either category; and (b) the master trust investment account had any loans outstanding or investments in a single enterprise (other than the United States Government) which exceeded 15 percent of the assets in the investment account.

10. Statements for each master trust investment account as to whether (a) any loans of assets held in the investment account or fixed income obligations held therein were in default as of the close of the fiscal year of the master trust ending with or within the plan year, or were classified as uncollectible during that fiscal year; and (b) any leases of property held in the investment account were in default or classified as uncollectible during the fiscal year of the

master trust ending with or within the plan year.

V. Revisions to Form 5500–K

Add new sub-item 11(d) "Master Trust (see instructions)" and renumber current sub-items 11(d) and 11(e) as 11(e) and 11(f).

VI. Revisions to Instructions for Form 5500–K

[Insert at the end of "B. Kinds of Filers."]

6. Master Trusts—For plans participating in a Master Trust, see page 6 for filing instructions.

[Insert after the Specific Instructions for Form 5500–K (ending on page 6)]

Filing Instructions for Plans Participating in Master Trust(s)

A. *General.* The return/report of a plan participating in a master trust must include statements and schedules providing information about assets held in the master trust, as specified in Part C, below, in addition to a Form 5500–K completed as specified in Part B, below. The statements and schedules must be filed *with the Department of Labor,* while the plan's Form 5500–K and, if applicable, Schedules A and B must be filed *with the Internal Revenue Service.*

For reporting purposes, a master trust is a trust for which a regulated financial institution (as defined below) serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control with respect to the management of assets held in the trust) and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held. "Regulated financial institution" means a bank, trust company, or similar financial institution which is regulated, supervised, and subject to periodic examination by a State or Federal agency. Common control is determined on the basis of all relevant facts and circumstances (whether or not such employers are incorporated).

For reporting purposes, the assets of a master trust are considered to be held in one or more "investment accounts." A master trust investment account may consist of a pool of assets or a single asset. Each pool of assets held in a master trust must be treated as a separate master trust investment account if each plan which has an interest in the pool has the same fractional interest in each asset in the pool as its fractional interest in the entire pool, and if each such plan may not dispose of its interest in any asset in the pool without disposing of its interest in the pool. A master trust may contain assets which are not held in such a pool. Each such asset must be treated as a separate master trust investment account.

B. *Reporting Information Relating to the Individual Plan.* 1. In item 11(d), if assets are held in a master trust of a single employer or controlled group, check the box and enter the name of the trust and bank or financial institution. Also enter the city and state where the trust is maintained.

2. In sub-item 13(a), in determining the net assets, include the current value of the plan's interest in the master trust. The value of the plan's interest in the master trust is the sum of the net values of the plan's interest in master trust investment accounts. The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account.

3. In sub-item 13(c), do not include any gain or appreciation of assets allocated to the plan from a master trust investment account if such gain or appreciation of assets is reflected in the figure for other changes in net assets entered in sub-item 13(f) (see ¶B5, below).

4. In sub-item 13(d), do not include expenses which were subtracted from the gross income of master trust investment accounts in determining the net investment gain (or loss) from the investment accounts for purposes of item 13(f) (see ¶B5, below).

5. In sub-item 13(f), include the net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts. The net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts is obtained by subtracting any net investment losses allocated to the plan from the master trust investment accounts from the sum of net investment gains allocated to the plan from master trust investment accounts. The net investment gain (or loss) allocated to the plan for the plan year from an investment account is equal to:

The current value of the plan's interest in the investment account at the end of the plan year,

Minus the current value of the plan's interest in the investment account at the beginning of the plan year,

Plus any amounts transferred out of the investment account by the plan during the plan year,

Minus any amounts transferred into the investment account by the plan during the plan year.

6. In item 14, answer the questions only with regard to plan assets which are not held in a master trust investment account. In sub-item 14(c), use the value of plan assets not held in a master trust investment account as the base for determining the 10 percent figure.

7. In sub-item 15(c), do not include the plan's share of administrative expenses which have been subtracted from the gross income of the master trust investment account in determining the net investment gain (or loss) from the investment account.

8. In Item 17, answer sub-item 17(a) taking into account *any* consideration received by an officer or employee of the plan sponsor, *including* any consideration paid out of the master trust or a master trust investment account. Answer sub-item 17(b) as specified below in ¶ B9. Answer sub-item 17(d) taking into account *all* parties providing services to the plan, *including* parties providing services with respect to assets held in master trust investment accounts in which the plan has an interest, and taking into account *all* plan fiduciaries, *including* persons who are fiduciaries by reason of their relationship to a master trust investment account in which the plan has an interest or to the assets in such an investment account. Answer sub-items 17 (f) and (g) only with respect to assets not held in a master trust investment account.

9. Answer sub-item 17(b) taking into account *all* qualifying employer securities and *all* qualifying employer real property, *including* the plan's share of qualifying employer securities and real property acquired by a master trust investment account. The plan's share in such qualifying employer securities or real property is determined by multiplying the plan's percentage interest in the investment account as of the acquisition date by the fair market value of the qualifying employer securities or real property as of the acquisition date. The asset base used in determining the 10 percent figure is the total value of plan assets as of the acquisition date, including the current value of the plan's interest in the master trust *as of the acquisition date,* determined as specified in ¶ B2, above.

C. *Reporting Information Relating to Master Trusts and Master Trust Investment Accounts.* The following instructions are to be followed only if every plan participating in the master trust has fewer than 100 participants and at least one owner-employee. Otherwise, information relating to master trusts and master trust investment accounts must be reported pursuant to the instructions to Form 5500 or 5500–C, as appropriate.

The information specified below must be filed with the Department of Labor no later than the date on which the plan's return/report is due. The required information may be filed by the plan administrator or by a person designated by the plan administrator, such as the administrator of another plan participating in the master trust or the financial institution serving as trustee of the master trust. However, it is the obligation of the plan administrator to ensure that the required information is filed prior to or concurrent with the filing by the plan of Form 5500–K. While only one copy of the required information should be filed for all plans participating in the master trust, the information is an integral part of the return/report of each participating plan and a participating plan's return/report will not be deemed complete unless all the information is filed within the prescribed time.

Each of the required statements and schedules must indicate the name of the plan, the sponsor's employer identification number, and the three digit plan number. The required information must be filed with the Department of Labor by mailing it to: Master Trust, Office of Reports and Disclosure, Pension and Welfare Benefit Programs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216.

1. The name and fiscal year of the master trust and the name and address of the master trustee. If the information relating to the master trust is not filed in connection with any annual return/report filed on Form 5500 or Form 5500–C, the name of the master trust must be followed by "(5500–K)."

2. A list of all plans participating in the master trust, showing each plan's name and its percentage interest in each master trust

investment account as of the beginning and end of the fiscal year of the master trust ending with or within the plan year.

3. A list of all master trust investment accounts as of the beginning and end of the most recent fiscal year of the master trust ending with or within the plan year.

4. A statement of the administrative expenses of each master trust investment account for the fiscal years of the master trust ending with or within the current plan year, the preceding plan year, and the second preceding plan year, in the format of sub-item 15(c) of Form 5500–K.

5. A schedule, in the format set forth in the instructions to sub-item 14(a) of Form 5500–K, for each master trust investment account showing party-in-interest transactions involving assets held in the investment account for the fiscal year of the master trust ending with or within the plan year.

6. For each master trust investment account, statements as to whether, since the end of the last fiscal year of the master trust for which financial information has been provided in connection with an annual return/report Form 5500 or return/report Form 5500–C or 5500–K filed for the plan or any other plan, (a) an extension has been granted on any loan of assets held in the investment account for which, prior to the granting of the extension, all principal and interest payments due under the terms of the loan have not been received; and

(b) an extension of time or renewal has been granted for the payment of any obligation held in the investment account which amounts to 10 percent of the assets in the investment account.

7. For each master trust investment account, a statement as to whether, as of the end of the fiscal year of the master trust for which financial information has been provided in connection with an annual return/report Form 5500 or return/report Form 5500–C or 5500–K filed for the plan or any other plan, the master trust investment account had any loans outstanding or investments in a single enterprise (other than the United States Government) which exceeded 15 percent of the assets in the investment account.

8. Statements for each master trust investment account as to whether (a) any loans of assets held in the investment account or fixed income obligations held therein were in default as of the close of the fiscal year of the master trust ending with or within the plan year, or were classified as uncollectible during that fiscal year; and (b) any leases of property held in the investment account were in default or classified as uncollectible during the fiscal year of the master trust ending with or within the plan year.

VII. Additional Instructions to Schedule A for Master Trust Filing

[Insert in the third paragraph of the General Instructions of the Schedule A]

Plans Participating in Master Trust(s).—For each insurance or annuity contract that is held in a master trust and owned jointly by two or more plans participating in the master trust, one Schedule A must be included in the information relating to the master trust which is filed with DOL. The individual plans need not file the Schedule A, but must treat unallocated funds or any interest in a separate account held in a master trust as part of an investment account for purposes of their return/reports. (See master trust filing instructions.)

Signed at Washington this 9th day of December 1981.

Jeffery N. Clayton,

Acting Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2619

Valuation of Plan Benefits in Non-Multiemployer Plans; Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the regulation on Valuation of Plan Benefits in Non-Multiemployer Plans contains the interest rates and factors for the period beginning January 1, 1982. The interest rates and factors are to be used to value benefits provided under terminating non-multiemployer pension plans covered by Title IV of the Employee Retirement Income Security Act of 1974, (the "Act").

The valuation of plan benefits is necessary because under section 4041 of the Act, the Pension Benefit Guaranty Corporation ("PBGC") and the plan administrator must determine whether a terminating pension plan has sufficient assets to pay all guaranteed benefits provided under the plan. If the assets are insufficient, the PBGC will pay the guaranteed benefits under the plan termination insurance program established under Title IV.

The interest rates and factors set forth in Appendix B to Part 2619 are adjusted periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after January 1, 1982, and enables the PBGC and plan administrators to value the benefits provided under those plans. These rates and factors will remain in effect until PBGC publishes an amendment revising them.

EFFECTIVE DATE: January 1, 1982.

FOR FURTHER INFORMATION CONTACT: Ms. Nina R. Hawes, Staff Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006, 202–254–3010.

SUPPLEMENTARY INFORMATION: On January 28, 1981, the Pension Benefit Guaranty Corporation (the "PBGC") issued a final regulation (46 FR 9492 *et seq.*) establishing the methods for valuing plan benefits of terminating non-multiemployer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1001 *et seq.* (1976), *as amended by* the Multiemployer Pension Plan Amendments Act of 1980, Pub. L. No. 96–364, 94 Stat. 1208 (the "Act"). That regulation, 29 CFR Part 2610, was recodified as 29 CFR Part 2619 on June 24, 1981, effective June 29, 1981 (46 FR 32574). That regulation contains a number of formulas for valuing different types of benefits. In addition, Appendix B to the regulation sets forth the various interest rates and factors that are to be used in the formulas. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

When first published, Appendix B contained interest rates and factors to be used to value benefits in plans that terminated on or after September 2, 1974, but before October 1, 1975. Subsequently, the PBGC adopted additional rates and factors for valuing benefits in plans that terminated on or after October 1, 1975, but before December 1, 1981. (29 CFR Part 2610 (1980), 45 FR 64907, 45 FR 75658, 45 FR 75209, 45 FR 82172, 46 FR 3510, 46 FR 16685, 46 FR 18312, 46 FR 26765, 46 FR 31257, 46 FR 36693, 46 FR 45761, 46 FR 50788).

On November 13, 1981, the PBGC last published rates for plans that terminate on or after December 1, 1981 (46 FR 55958). At this time, changes in the financial and annuity markets have necessitated a decrease in the rates used by the PBGC to value benefits. Although the PBGC has only changed its rates by ¼ percent per month in the past, unusually rapid changes in the financial markets have indicated that a decrease of ½ percent is warranted at this time. When the PBGC first adopted its procedure of issuing prospective interest rates, (45 FR 75209), the PBGC stated that it would normally change its interest rates only in ¼ percent increments. However, because of the exceptional circumstances occurring in the financial markets, PBGC has determined that a change of ½ percent

is necessary. Accordingly, this amendment changes the rates in Appendix B to add a set of interest rates and factors for plans that terminate on or after January 1, 1982. These rates and factors will remain in effect until such time as PBGC publishes another amendment which changes the rates.

As a rule, the rates will be in effect for at least one month. If the rates are to be changed, PBGC will publish an amendment in the **Federal Register**, normally by the 15th of the month prior to the month for which the new rates will be effective. If no change is to be made, no amendment will be published, and the current rates will remain in effect until further notice.

Because the Multiemployer Pension Plan Amendments Act of 1980 established a new insurance program for multiemployer plans, we note that the rates and factors contained in Appendix B to Part 2619 are applicable to non-multiemployer plans only.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This determination is based on the need to determine and issue new interest rates and factors promptly, so that the rates can reflect, as accurately as possible, current market conditions. The PBGC has found that the public interest is best served by issuing the rates and factors on a prospective basis so that plans may be able to calculate the value of plan benefits before submitting a notice of intent to terminate. Also, plans will be able to predict employer liability more accurately prior to plan termination. Moreover, because of the need to provide immediate guidance for the valuation of benefits under plans that will terminate on or after January 1, 1982, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment to the final regulation effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, February 17, 1981, (46 FR 13193) because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, innovation or competition.

PART 2619—VALUATION OF PLAN BENEFITS IN NON-MULTIEMPLOYER PLANS

In consideration of the foregoing, Part 2619 of Chapter XXVI, Title 29, Code of Federal Regulations, is hereby amended by revising Rate Set 30 and adding Rate Set 31 of Appendix B to read as follows:

Appendix B—Interest Rates and Quantities Used To Value Immediate and Deferred Annuities

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "G_y" for deferred annuities and to value both portions of a refund annuity. An interest rate of 5 percent shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, k_1, k_2, k_3, n_1, and n_2 are defined in § 2619.45.

Rate set	For plans with a valuation date—		Immediate annuity rate	Deferred annuities				
	On or after	Before		k_1	k_2	k_3	n_1	n_2
30	12-1-81	1-1-82	11.00	1.1025	1.0900	1.0400	7	8
31	1-1-82		10.50	1.0975	1.0850	1.0400	7	8

(Secs. 4002(b)(3), 4041(b), 4044, 4062(b)(1)(A), Pub. L. 93-406, 88 Stat. 1004, 1020, 1025-27, 1029, (1974) as amended by Secs. 403(l), 403(d) and 402(a)(7), Pub. L. 96-364, 94 Stat. 1302, 1301, 1299, (1980) (29 U.S.C. 1302, 1341, 1344, 1362))

Robert E. Nagle,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Approval of the Commonwealth of Virginia Reclamation Plan Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: On September 22, 1980, the Commonwealth of Virginia submitted to OSM its proposed Abandoned Mine Land Reclamation Plan (Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The purpose of this submission is to demonstrate the State's intent and capability to assume responsibility for administering and conducting the Abandoned Mine Land Reclamation Program established by Title IV of SMCRA and regulations adopted by OSM (30 CFR Chapter VII, Subchapter R, FR 49932-49952, October 25, 1978). After opportunity for public comment and review of the plan submission, the Assistant Secretary for Energy and Minerals of the Department of the Interior has determined that the Virginia Reclamation Plan meets the requirements of SMCRA and the Secretary's regulations. Accordingly, the Assistant Secretary has approved the Virginia Plan. Final promulgation of this rule was delayed because Virginia did not have an approved State regulatory program under Title V of SMCRA and was enjoined from submitting its program. Under Section 405(c) of the SMCRA, the Department cannot approve a State abandoned mine reclamation program unless that State has an approved State regulatory program pursuant to Section 503(c) of the SMCRA. The Commonwealth of Virginia received such approval on December 10, 1981.

EFFECTIVE DATE: The rule is effective upon date of publication. The good cause for making this rule effective upon date of publication is: (1) the Office of Surface Mining wants to minimize the time between the approval of Title V regulatory programs and Title IV State reclamation program plans; and (2) grants are pending approval of the Title IV plan and OSM wishes to expedite grant assistance to States to initiate needed reclamation work as required by the Act.

ADDRESSES: Copies of the full text of the Virginia Plan are available for review during regular business hours at the following locations:

Office of Surface Mining Reclamation and Enforcement, Region I, 603 Morris Street, Charleston, West Virginia 25301

Department of Conservation and Economic Development, Powell and River Streets, Big Stone Gap, Virginia 23219

The Office of Surface Mining Reclamation and Enforcement, Room 153, 1951 Constitution Avenue, NW, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:
Don Willen, Chief, Division of Abandoned Mine Land Reclamation, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW, Washington, D.C. 20240, Telephone (202) 343–7951.

SUPPLEMENTARY INFORMATION:

General Background of the Abandoned Mine Land Program

Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, establishes an abandoned mine land reclamation program for the purpose of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation under the program are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under State or Federal law.

Each State, having within its borders coal mined lands eligible for reclamation under Title IV of SMCRA, may submit to the Secretary a State reclamation plan demonstrating its capability for administering an abandoned mine reclamation program. Title IV provides that the Secretary may approve the plan once the State has an approved regulatory program under Title V of SMCRA. If the Secretary determines that a State has developed and submitted a program for reclamation and has the necessary State legislation to implement the provisions of Title IV, the Secretary shall grant the State exclusive responsibility and authority to implement the provisions of the approved plan. Section 405 of SMCRA (30 U.S.C. 1235) contains the requirements for State reclamation plans.

The Secretary has adopted regulations that specify the content requirements of a State reclamation plan and the criteria for plan approval (30 CFR Part 884, 43 FR 49932–49947, October 25, 1978). Under those regulations, the Director of the Office of Surface Mining is required to review the plan and solicit and consider comments of other Federal agencies and the public. If the State plan is disapproved, the State may resubmit a revised reclamation plan at any time.

Upon approval of the State reclamation plan, the State may submit to the Office on an annual basis an application for funds to be expended in that State on specific reclamation projects which are necessary to implement the State reclamation plan as approved. Such annual requests are reviewed and approved by OSM in compliance with the requirements of 30 CFR Part 886.

To codify information applicable to individual States under SMCRA, including decisions on State reclamation plans, OSM has established a new Subchapter T of 30 CFR Chapter VII. Subchapter T consists of parts 900 through 950. Provisions relating to Virginia are found in 30 CFR Part 946.

Background on the Virginia Reclamation Plan Submission

On April 26, 1979, a cooperative agreement between the Virginia Department of Conservation and Economic Development and the Office of Surface Mining was approved. The purpose of this agreement was to assure that information required for the preparation of the Virginia Reclamation Plan would be assembled.

On June 16, 1980, public meetings were held in Richmond and Big Stone Gap, Virginia on Virginia's proposed Plan. On September 22, 1980, the Commonwealth of Virginia submitted its proposed Plan to OSM.

On October 8, 15 and 28, 1980, representatives of the Virginia Department of Conservation and Economic Development and OSM met to discuss amendments and modifications to the original Plan. On October 28, and November 7 and 17, 1980, the Virginia Department of Conservation and Economic Development submitted revised pages to the Virginia Reclamation Plan. These pages contained several amendments and modifications to the original Plan. The Department has determined that these additions and revisions were insignificant in nature and, accordingly, required no further public comment.

The necessary changes have been incorporated into the Plan. All of the documents mentioned above are available for public inspection at the offices of OSM and at the Office of the Department of Conservation and Economic Development listed above under "Addresses."

Notice of receipt of the submission initiating the Plan review was published November 5, 1980 (45 FR 73512–73514). The announcement requested public comments and scheduled a public hearing for October 29, 1980. The public hearing was not held because of lack of public interest. OSM has concluded that the Commonwealth of Virginia has provided adequate notice and opportunity for public participation in development of the Plan and no unresolved controversies exist.

The Regional Director, on October 18, 1981, and the Assistant Director for Program Operations and Inspection, on November 9, 1981, recommended to the Director that the Assistant Secretary approve the Virginia Reclamation Plan.

The administrative record on the Virginia Plan is available for review during regular business hours at the Office of Surface Mining Reclamation and Enforcement, Region I, 603 Morris Street, Charleston, West Virginia 25301.

Assistant Secretary's Findings

1. In accordance with section 405 of SMCRA the Assistant Secretary finds that Virginia has submitted a Plan for reclamation of abandoned mine lands and has the ability and necessary State legislation to implement the provisions of Title IV of SMCRA.

2. The Assistant Secretary has determined, pursuant to 30 CFR 884.14, that:

(a) the Department of Conservation and Economic Development has the legal authority, policies and administrative structure necessary to carry out the Plan;

(b) the Plan meets all the requirements of 30 CFR Chapter VII, Subchapter R;

(c) the State has an approved regulatory program; and

(d) the Plan is in compliance with all applicable State and Federal laws and regulations.

3. The Assistant Secretary has solicited and considered the views of other Federal agencies having an interest in the plan as required by 30 CFR 884.14(a)(2). These agencies include the U.S. Forest Service (USFS), U.S. Fish and Wildlife Service (FWS), and the Bureau of Mines (BOM).

Disposition of Comments

The following comments received on the Virginia Abandoned Mine Land Reclamation Plan during the public comment period were considered in the Assistant Secretary's evaluation of the Virginia plan as indicated.

1. The USFS commented that since the single dominant land use of the coal region in the State is forest land, the Virginia Division of Forestry should be a member of the RAMP State Reclamation Committee and the Abandoned Mine Land Advisory Committee. OSM's response is that Section 406 of SMCRA provides for the Secretary of Agriculture through the Soil Conservation Service

(SCS) to manage the RAMP program. The Commonwealth of Virginia has no objections to the Division of Forestry being included on the RAMP Committee. Therefore, OSM will make that recommendation to SCS. The Virginia Division of Forestry is a sister agency of the Division of Mined Land Reclamation in the Department of Conservation and Economic Development. The Plan on page 69 provides for technical assistance by other agencies under the Secretary of Commerce and Resources, and the A–95 review process will provide opportunity for the Division of Forestry to review and comment on proposed projects. The OSM is satisfied that adequate opportunity for participation by the Virginia Division of Forestry will be provided under the Plan.

2. The USFS had several editorial comments relating to forest acreage and provided recent information on the Mount Rogers National Recreation Area Management Plan and its Final Environmental Impact Statement. These comments were brought to the attention of the Regulatory Authority and the Reclamation Plan was corrected.

3. The FWS commented that Figure 11, page 99, the "Environmental Problems Matrix", should include "impacts to fish and wildlife" and that such impacts should be considered in determining reclamation priorities. OSM's response is that the Virginia Plan provides for the consideration of fish and wildlife values in the ranking and selection procedures, page 33, Figure 2, Site Evaluation Matrix, under the heading "Biota." The environmental problems matrix is not intended to identify problems such as fish and wildlife but rather generic mining problems. OSM is satisfied that impacts on fish and wildlife will receive adequate consideration through the A–95 process, the memorandum of understanding with the Commission of Game and Inland Fisheries, and the ranking and selection process in the Plan.

4. The FWS commented: "What is the basis for assuming that complete abatement of mine drainage will occur with reclamation of surface mines and refuse piles?" OSM's response is that the Virginia Department of Conservation and Economic Development has agreed to delete the sentence from page 120 of the Plan.

5. The FWS commented that the information regarding endangered or threatened species was out of date and incomplete. OSM brought this matter to the attention of the Virginia Department of Conservation and Economic Development and this section of the Plan was amended and the information furnished by FWS included in the Plan.

6. The BOM commented that more detail needs to be given to data collection and interpretation with regard to base line studies in such areas as surface and subsurface hydrology and acid mine drainage and abatement methods in the southwest coalfield. OSM's response is that, as stated in the Abandoned Mine Land Reclamation Program Final Rules, "Responses to Comments, Part 884", (43 FR 49938 October 25, 1978), ". . . existing and readily available information would be gathered, analyzed and summarized" for the State Plans. It is recognized that additional information may have to be obtained in the future to update or fill information gaps. The OSM is satisfied that information needs will be identified in the ranking, selection and review process provided for in the Plan prior to the funding of specific projects.

7. The BOM commented that there are certain differences between requirements of 30 CFR Parts 874, 879 and 882 of the Secretary's implementing regulations, Titles I, II, III, IV and V of SMCRA, and the provisions contained in the Virginia Reclamation Plan and supporting documents. OSM's response is that the sections of 30 CFR not included in the Virginia supporting documents are not applicable for a Virginia State Plan. Moreover, Titie I, II, III and V of the SMCRA are not addressed in the State Reclamation Plan as these titles are not applicable to the Plan.

8. The BOM also commented that: "It should be indicated that the No. 1 priority problem in the Virginia Reclamation Plan is the landslide hazard due to abandoned surface mines and refuse piles." OSM's response is that this is specifically stated and outlined on page 140 of the Plan which discusses planned priority reclamation efforts.

9. The Appalachian Regional Commission (ARC) commented that the Plan states that Virginia has the necessary laws to comply with OSM regulations but has not elaborated on this existing legislation. OSM's response is that 30 CFR 884.13(b) requires an opinion of the State's chief legal officer that the designated agency has the authority under State law to conduct the program in accordance with the requirements of Title IV of the Act, the regulations of this subchapter (i.e. subchapter R) and the State reclamation plan. The Virginia Plan furnishes such an opinion and the OSM has examined the Commonwealth of Virginia statute and concludes that the statute complies with the SMCRA and no further elaboration is necessary.

10. The ARC commented that the Virginia Plan indicates that the State has a regulatory agency that can run a State program and receive primacy from OSM. However, the Plan does not elaborate on what the agency consists of or how it will regulate under the Federal law. OSM disagrees, because pp. 69–83 of the Virginia Plan describes in sufficient detail the administrative structure and policies of the Division of Mined Land Reclamation which will be responsible for the Virginia abandoned mine reclamation program.

Additional Findings

The Office of Surface Mining has examined this rulemaking under section 1(b) of Executive Order No. 12291 (February 17, 1981), and has determined that, based on available quantitative data, it does not constitute a major rule The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and the Office of Surface Mining has determined that the rule will not have a significant economic effect on a substantial number of small entities. The reason for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable costs, competitive effects, enforcement costs or aggregate effects on small entities.

The Assistant Secretary has determined that the Virginia Abandoned Mine Land Reclamation Plan will not have a significant effect on the quality of the human environment because the decision relates only to policies, procedures and organization of the Commonwealth's Abandoned Mine Land Reclamation Program. Therefore, under the Department of Interior Manual (DM) 516.2.3(A)(1), the Assistant Secretary's decision on the Virginia Plan is categorically excluded from the National Environmental Policy Act requirements. As a result, no environmental assessment or

environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Also, an environmental analysis or an EIS will be prepared for the approval of grants for the abandoned mine lands reclamation projects under 30 CFR Part 886.

Dated: December 10, 1981.

J. R. Harris,

Director, Office of Surface Mining.

Dated: December 10, 1981.

W. L. Dare,

Assistant Secretary—Energy and Minerals.

Therefore, Part 946 is amended by adding Section 20 to read as follows:

PART 946—VIRGINIA

§ 946.20 Approval of Virginia abandoned mine plan.

The Virginia Abandoned Mine Plan, as submitted on September 22, 1980, is approved. Copies of the approved program are available at:

Office of Surface Mining Reclamation and Enforcement, Region I, 603 Morris St., Charleston, West Virginia 25301

Department of Conservation and Economic Development, Powell and River Streets, Big Stone Gap, Virginia

The Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, D.C. 20240

[FR Doc. 81-35821 Filed 12-14-81; 8:45 am]

BILLING CODE 4310-05-M

---

30 CFR Part 946

Approval of Permanent Regulatory Program Submission; Commonwealth of Virginia

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule; conditional approval of Virginia's proposed permanent regulatory program.

SUMMARY: On August 13, 1981, the Commonwealth of Virginia resubmitted to the Department of the Interior its proposed permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This follows an initial approval in part and disapproval in part of the proposed program which was published in the **Federal Register** on October 22, 1980, 45 FR 69977–70000. The purpose of the resubmission is to demonstrate the State's intent and capability to administer and enforce the provisions of SMCRA and the permanent regulatory program regulations, 30 CFR Chapter VII. Only those portions of the Commonwealth's original submission which were not initially approved or which were changed are considered in this decision. A new Part 946 is being added to 30 CFR Chapter VII to implement this decision. This rule grants conditional approval of the Virginia permanent regulatory program.

EFFECTIVE DATE: This conditional approval is effective December 15, 1981. This conditional approval will terminate as specified in 30 CFR 946.11 unless the deficiencies identified below have been corrected in accordance with the dates specified in 30 CFR 946.11, adopted below.

ADDRESS: Copies of the Virginia program and the administrative record on the Virginia program are available for public inspection and copying during regular business hours at:

Office of Surface Mining, Room 153, Interior South Building, 1951 Constitution Avenue, N.W., Washington, D.C. 20240, Phone: (202) 343–4728

Office of Surface Mining, Region I, 603 Morris Street, Charleston, West Virginia 25301, Phone: (304) 342–8125

Virginia Division of Mined Land Reclamation, P.O. Drawer U, 620 Powell Avenue, Big Stone Gap, Virginia 24219, Phone: (703) 523–2925

For locations where copies of the full text of the program are available for inspection, see "SUPPLEMENTARY INFORMATION."

FOR FURTHER INFORMATION CONTACT: Mr. Arthur Abbs, Chief, Division of State Program Assistance, Program Operations and Inspection, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, South Building, 1951 Constitution Avenue, N.W., Washington, D.C. 20240, Phone: (202) 343–5351.

SUPPLEMENTARY INFORMATION: A. Copies of the full text of the program are available for inspection during regular business hours at the following locations:

Office of Surface Mining, Lebanon District Office, Flannagan and Carroll Streets, Lebanon, VA 24266, Phone: (703) 889–4032

Dept. of Conservation and Economic Development, 1100 State Office Bldg., Richmond, VA 23219, Phone: (804) 786–2121

Buchanan County Public Library, Grundy, VA 24614, Phone: (703) 546–1141

Lee County Public Library, 406 Joslyn Avenue, Pennington Gap, VA 24277, Phone: (703) 546–1141

Scott County Public Library, Gate City, VA 24251, Phone: (703) 386–3302

Wise County Public Library, Ridgefield Acres, Wise, VA 24293, Phone: (703) 328–8061

Background

The general background on the permanent program, the program approval process, and the Virginia program submission were discussed in the **Federal Register** notice of October 22, 1980 (45 FR 69978–69981). Amendments to the Federal regulations were published January 23, 1981 (46 FR 7894, FR 7906); July 17, 1981 (46 FR 37232); August 17, 1981 (46 FR 41702); September 29, 1981 (46 FR 47720), October 8, 1981 (46 FR 50018); October 28, 1981 (46 FR 53376); and November 2, 1981 (46 FR 54495). An interpretive rule was published November 7, 1980 (45 FR 73945). Additional regulations were suspended pending further rulemaking August 19, 1981 (46 FR 42063).

Also, in the October 22, 1980 **Federal Register** notice, the Secretary announced his partial approval and partial disapproval of the Virginia program. The rules and legislative provisions in the Commonwealth's initial submission were approved with the exceptions noted under the heading "SECRETARY'S DECISION", October 22, 1980 (45 FR 69996–70000).

A. Background on the Virginia Resubmission

In accordance with the procedures set forth in 30 CFR 732.13(f), the Commonwealth of Virginia originally had 60 days from the date of publication of the Secretary's partial approval decision on October 22, 1980, to resubmit a revised program for consideration. On December 3, 1980, the Virginia Circuit Court for Dickenson County enjoined the Virginia Department of Conservation and Economic Development from submitting or resubmitting to the Office of Surface Mining (OSM) the Virginia Permanent

State Program. The Court also enjoined Virginia from implementing or enforcing the Virginia Permanent State Program. On July 22, 1981, acting upon a motion by Virginia, the Court modified its order to permit the submission to OSM of the revised program. The State submitted its revised program for consideration on August 13, 1981. Announcement of Virginia's resubmission was made in newspapers of general circulation within the Commonwealth of Virginia and published in the **Federal Register** on August 17, 1981 (46 FR 41525–41527). That **Federal Register** notice also announced a public comment period extending to September 4, 1981, and a public hearing which was held on September 3, 1981, in Wise, Virginia. In response to environmental public interest groups, the public comment period was extended until September 8, 1981. This extension was announced in the **Federal Register** on August 31, 1981. An additional 15 day public comment period was announced in the **Federal Register** on November 2, 1981 (46 FR 54385), in order to allow public comment on additional information submitted by Virginia and to consider the Virginia program in light of the new definition of "consistent with", which sets a new standard for comparison of the State programs with the Federal regulations, 30 CFR 732.15 (46 FR 53376–53384 October 28, 1981). The second public comment period ended on November 17, 1981. Public disclosure of comments by Federal agencies was made on December 9, 1981 (46 FR 60216).

On December 8, 1981, the Administrator of the Environmental Protection Agency transmitted her written concurrence on the Virginia program.

The Regional Director completed his program review on December 1, 1981, and forwarded the public hearing transcripts, written presentations, and copies of all comments to the Director together with a recommendation that the program be conditionally approved.

On December 8, 1981, the Director recommended to the Secretary that the Virginia program be conditionally approved.

The basis and purpose statement for the Secretary's decision to conditionally approve Virginia's program consists of this notice and the October 22, 1980 **Federal Register** notice, announcing the Secretary's initial decision. The Virginia program consists of the formal submission of March 3, 1980 (Administrative Record No. VA 1), as amended on April 10, 1980, May 5, 1980, June 13, 1980, June 16, 1980, August 13, 1981, September 21 and 22, 1981, and October 19, 1981 (Administrative Record Nos. VA 44, 65, 93, 94, 268, 314, 329).

Throughout the remainder of this notice, "Virginia program" or "Virginia submission" is used to mean the documents cited above together with those parts of the initial submission partially approved on October 22, 1980. The term "resubmission" only refers to those portions of the Virginia program resubmitted on August 13, 1981 (Administrative Record No. VA 268). The term "September 21 and 22, 1981, meeting" refers to a meeting held between OSM and the Virginia Department of Conservation and Economic Development (Administrative Record No. VA 314), the purpose of which was to discuss apparent deficiencies which had been found in the Virginia program submission. The term "October 15, 1981, letter" refers to a letter from Virginia to OSM responding to the minutes of the September 21 and 22, 1981, meeting (Administrative Record No. VA 329).

The Secretary's Findings below are organized to follow the order set forth in Section 503 of SMCRA and 30 CFR 732.15. These sections specify the findings which the Secretary must make before he may approve a regulatory program. When the Secretary announced his initial decision on the Virginia program, he included with the analysis his findings on the program provisions. In each instance, except as noted under the heading "SECRETARY'S FINDINGS" below, Virginia has amended its program through its resubmission and its October 15, 1981, letter to correct the deficiencies cited in the notice announcing the Secretary's initial decision. Where appropriate, the reader is referred to specific findings in the October 22, 1980, **Federal Register** notice for a complete discussion of the issues.

B. Secretary's Findings

1. The Secretary finds, in accordance with Section 503(a) of SMCRA and 30 CFR 732.15, that Virginia has the capability to carry out the provisions of SMCRA and to meet its purposes in the following ways.

(a) The Virginia Coal Surface Mining Control and Reclamation Act of 1979, House Bill 1514 (Virginia CSMCRA), and the regulations adopted thereunder provide, except as noted in the findings below, for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands in Virginia in accordance with SMCRA. This finding is based on the requirements of Section 503(a)(1) of SMCRA [30 U.S.C. 1253(a)(1)]. The issues underlying this finding are analyzed in Findings 4b, 4c, 4j, 4k, 4l, 4q and 4s, below.

(b) The Virginia CSMCRA provides, except as noted in the finding below, sanctions for violations of Virginia laws, regulations or conditions of permits concerning surface coal mining and reclamation operations, and these sanctions meet the requirements of SMCRA, including civil and criminal actions, forfeiture of bonds, suspensions, revocations, and withholding of permits, and the issuance of cease-and-desist orders by the Virginia Department of Conservation and Economic Development or its inspectors.

This finding is based on the requirements of Section 503(a)(2) of SMCRA [30 U.S.C. 1253(a)(2)]. The issues underlying this finding are analyzed in Finding 4j, below.

(c) The Virginia Department of Conservation and Economic Development has sufficient administrative and technical personnel and sufficient funds to enable Virginia to regulate surface coal mining and reclamation operations in accordance with the requirements of SMCRA. This finding is based on the requirements of Section 503(a)(3) of SMCRA [30 U.S.C. 1253(A)(3)].

(d) Virginia SMCRA provides for the effective implementation, maintenance, and enforcement of a permit system that meets the requirements of SMCRA for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within Virginia.

This finding is based on the requirements of Section 503(a)(4) of SMCRA [30 U.S.C. 1253(a)(4)].

(e) Virginia has established, except as noted in the findings below, a process for the designation of areas as unsuitable for surface coal mining in accordance with Section 522 of SMCRA, 30 U.S.C. 1272.

This finding is based on the requirements of Section 503(a)(5) of SMCRA [30 U.S.C. 1253(a)(5)]. The issues underlying the finding are analyzed in Finding 4k, below.

(f) Virginia has established, for the purpose of avoiding duplication, a process for coordinating the review and issuance of permits for surface coal mining and reclamation operations with other Federal and State permit processes applicable to the proposed operations.

This finding is based on the requirements of Section 503(a)(6) of SMCRA [30 U.S.C. 1253(a)(6)].

(g) Virginia has, except as noted in the findings below, fully enacted regulations

consistent with regulations issued pursuant to SMCRA.

This finding is based on the requirements of Section 503(a)(7) of SMCRA [30 U.S.C. 1253(a)(7)]. The issues underlying this finding are analyzed in Findings 4b, 4c, 4d, 4j, 4k, 4l, and 4q, below.

2. As required by Section 503(b)(1)-(3) of SMCRA, 30 U.S.C. 1253(b)(1)-(3), and 30 CFR 732.11–732.13, the Secretary has, through OSM:

(a) Solicited and publicly disclosed on December 9, 1981, (46 FR 60216), the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other Federal agencies concerned with or having special expertise pertinent to the proposed Virginia program;

(b) Obtained the written concurrence of the Administrator of the Environmental Protection Agency with respect to those aspects of the Virginia program being approved today which relate to air or water quality standards promulgated under the authority of the Clean Water Act, as amended, 33 U.S.C. 1151–1175, and The Clean Air Act, as amended, 42 U.S.C. 1857 *et seq.;* and

(c) Held a public review meeting in Big Stone Gap, Virginia on April 10, 1980, to discuss the completeness of the Virginia program submission, held a public hearing in Wise, Virginia on July 17, 1980, on the adequacy of the Virginia program submission, and held a public hearing on the resubmission of the Virginia program on September 3, 1981, in Wise, Virginia.

3. The Secretary finds that the Commonwealth of Virginia has the legal authority and qualified personnel necessary for the enforcement of the environmental protection standards of SMCRA and 30 CFR Chapter VII.

This finding is based on the requirements of Section 503(b)(4) of SMCRA [30 U.S.C. 1253(b)(4)].

4. In accordance with 30 CFR 732.15, the Secretary finds, on the basis of information in the Virginia program submission, including the section-by-section comparison of the Virginia law and the regulations with SMCRA and 30 CFR Chapter VII, public comments, testimony and written presentations at the public hearings, and other relevant information, that:

4a. The Virginia program provides, except as noted in the findings below, for Virginia to carry out the provisions and meet the purposes of SMCRA and 30 CFR Chapter VII. The issues underlying this finding are analyzed in the findings discussed throughout this **Federal Register** notice.

4b. As discussed in Finding 4(b) of the October 22, 1980 **Federal Register** notice, Virginia submitted eight "state window" alternative approaches to the requirements of 30 CFR Chapter VII under the provisions of 30 CFR 731.13 (44 FR 15324). The Federal standards for reviewing State alternatives were amended in the final rules published in the **Federal Register** on October 28, 1981 (46 FR 533376–533389). That notice further stated that the Secretary would evaluate the Virginia program under the new criterion established in the new rule. As a result, the Virginia alternative proposals were reviewed under the new criterion which provides that a State may adopt any provisions which are as effective as the Federal regulations. In addition, the new rule eliminated the requirement that a State demonstrate that the proposed alternative is necessary because of local requirements or conditions.

The Virginia alternatives were discussed at Findings 4(b)(i) through 4(b)(viii) in the October 22, 1980 **Federal Register**. In view of the subsequent change in the Federal rule concerning evaluation of alternatives, they are no longer considered as a group. Discussion of the original alternatives is arranged in this **Federal Register** notice as follows:

Existing Structures as discussed in Finding 4(b)(i) of the October 22, 1980 **Federal Register** notice, is now discussed in Finding 4(d)(iii).

Designating Areas Unsuitable for Surface Coal Mining Operations as discussed in Finding 4(b)(ii) of the October 22, 1980 **Federal Register** notice, is now discussed in Finding 4(k)(iii).

Backfilling and Grading Previously Mined Areas as discussed in Finding 4(b)(iii) of the October 22, 1980 **Federal Register**, is now discussed in Finding 4(c)(iii).

Topsoil Removal as discussed in Finding 4(b)(iv) of the October 22, 1980 **Federal Register**, is now discussed in Finding 4(c)(iv).

Sediment Ponds as discussed in Finding 4(b)(v) of the October 22, 1980 **Federal Register**, is now discussed in Finding 4(c)(v).

Disposal of Excess Spoil as discussed in Finding 4(b)(vi) of the October 22, 1980 **Federal Register**, is now discussed in Finding 4(c)(vi).

Steep Slope Mining as discussed in Finding 4(b)(vii) of the October 22, 1980 **Federal Register**, is now discussed in Finding 4(c)(vii).

Haul roads as discussed in Finding 4(b)(viii) of the October 22, 1980 **Federal Register**, is now discussed in Finding 4(c)(viii).

4c. The Secretary finds that the Virginia Department of Economic Development has authority under Virginia laws to implement, administer, and enforce all applicable requirements consistent with 30 CFR Chapter VII, Subchapter K, and the Virginia program includes provisions, except as noted below, adequate to do so. Special provisions comparable to 30 CFR Parts 820, 822 and 825 for anthracite mines and operations in alluvial valley floors are not applicable to or included in the Virginia law or regulations. This finding is made under the requirements of 30 CFR 732.15(b)(1).

Virginia incorporates provisions corresponding to Sections 515 and 516 of SMCRA in Chapter 19, Virginia CSMCRA Sections 45.1–242 and 45.1–243 and in the Virginia Regulations Subchapter VK.

Discussion of significant issues raised during the review of the Virginia environmental performance standards follows.

(i) As discussed in Finding 4(c)(i) of the October 22, 1980 **Federal Register** notice, Virginia Regulation V817.48 omitted the phrase "underground development waste and". Virginia has corrected Virginia Regulation V817.48 by incorporating these words. Therefore, the Secretary finds that the State provision is consistent with the Federal requirements.

(ii) As discussed in Finding 4(c)(ii) of the October 22, 1980 **Federal Register** notice, Virginia Regulation V817.59 (Coal Recovery) had modified the term "best technology currently available" to read "best appropriate technology currently available." As requested by the Secretary (45 FR 69985), Virginia deleted the word "appropriate." However, in the resubmission the word "reasonably" was used instead of "currently" in this phrase.

The Secretary has reconsidered the requirements of 30 CFR 817.59 and has concluded that Virginia's regulations would be consistent with the Secretary's regulations, for purposes of Virginia Regulation 817.59, through use of either the term "appropriate" or "reasonably available" technology. The intent of the section was to ensure that coal operators would conduct mining operations so as to maximize resource recovery while at the same time preserving the environmental balances after mining has ended. This same standard was met in the Secretary's regulations for surface mining activities in 30 CFR 816.59 through the stipulation that the "best appropriate technology currently available" be used to maintain environmental integrity. The preamble to the Federal permanent program regulations does not explain why 30

CFR 816.59 and 817.59 use different terminology. This finding is not intended to indicate that the "best technology currently available," the "best appropriate technology currently available" or the "best technology reasonably available" are equivalent in every usage. Rather, it is a recognition that the purpose of 30 CFR 817.59, which is to ensure that maximization of coal recovery not supersede the requirement of other standards, can be satisfied by any of the above terms (44 FR 15178–9, March 13, 1979). For this reason, the Secretary finds that the State's provision in V817.59 is consistent with the Federal requirements.

For purposes of the Virginia regulations, except Virginia Regulation V817.59, the Secretary finds that the use of the term "best technology reasonably available" is not consistent with the definition of "best technology currently available" in 30 CFR 701.5 and its use in SMCRA. For example, in Virginia Regulation V786.21(c)(4)(i)(A), regarding existing structures, the use of the term "best technology reasonably available" as defined in Virginia Regulation V701.5 would mean that a sediment control measure would be required to "minimize, to the extent feasible, additional contributions of suspended solids to streamflow or runoff outside the permit area." However, if the term "best technology currently available" is used, the Virginia regulation would require sediment control measures "to prevent to the extent possible additional contributions of suspended solids to streamflow or runoff outside the permit area." The fact that Virginia requires coal mines to *minimize* sediment contributions using the "best technology reasonably available," indicates that the Virginia requirement is not as stringent as that contained in SMCRA.

Approval of the Virginia program is conditioned upon the State adopting the term "best technology currently available" defining the term consistent with SMCRA and the Federal regulations, and incorporating the term into all Virginia regulations where "best technology reasonably available" is now used with the exception of Virginia Regulation V817.59, as discussed above.

(iii) As discussed in Finding 4(b)(iii) of the October 22, 1980 **Federal Register** notice, Virginia proposed alternative provisions in Virginia Regulations V816.107 and V817.107, which addressed backfilling and grading of previously mined areas. The Secretary disapproved these provisions in the original submission. The Secretary listed six important considerations which he believed Virginia should address in its rationale supporting the proposal (45 FR 69983). In Volume I, pages 11–25, of its resubmission, Virginia addressed these considerations with the exception of whether material will be placed in fills or otherwise disposed of off the premined bench. At the September 21 and 22, 1981, meeting, Virginia assured OSM that its program addressed this consideration though Virginia Regulations V826.13 and V826.15(f), which limit spoil placement and require that all overburden resulting from mining on previously mined benches be kept on the bench and not placed in fills except in limited and acceptable situations as set forth in Virginia Regulation V826.15(f). After considering Virginia's supporting rationale for the proposal and the discussion of the September 21 and 22 meeting, the Secretary finds that so long as it is Virginia's intention to interpret its regulations as requiring a variance from AOC under Virginia Regulation V826.15(f) before an operator may rely on the provisions contained in Virginia Regulations V816.107, V817.107 and V826.13 for previously mined areas, the Secretary's previous considerations have been addressed. Virginia may, if it wishes, make this clear by incorporating the language of Virginia Regulation V826.15(f) in the other sections. The Secretary finds that the Virginia program addresses unique environmental circumstances, attendant to the remining of previously mined areas, which are not specifically addressed in SMCRA. Further, OSM has not yet promulgated regulations on this issue which Virginia could utilize in drafting its proposal. Therefore, the Secretary approves Virginia Regulations V816.107 and V817.107 for backfilling and grading of previously mined areas. Virginia may have to amend these regulations if necessary to be consistent with any rules subsequently promulgated by OSM on this subject.

(iv) As discussed in Finding 4(b)(iv) of the October 22, 1980 **Federal Register** notice, the Virginia alternative to 30 CFR 816.22 and 817.22 proposed that selected overburden materials may be substituted for or used as a supplement to topsoil if the slope of the land containing the topsoil is greater than 60 percent and the selected overburden materials satisfy certain criteria. In those situations, Virginia would not require additional comparisons of the existing topsoil and the proposed substitute. In the October 22, 1980 **Federal Register** notice, the Secretary asked Virginia for assurances that the proposed alternative would be implemented consistent with the interpretive rules relating to topsoil substitutes and supplements (45 FR 39447; June 10, 1980). In Volume I, pages 25–27, of the Virginia resubmission, this assurance was provided to the Secretary. In implementing the alternative on areas having a slope greater than 60 percent Virginia will require the operator to demonstrate that the substitute or supplemental material meets the minimum criteria. Since the Division of Mined Land Reclamation (DMLR) already has information to satisfy the interpretive rule regarding insufficient existing topsoil, the operator will not be required to submit the documentation for areas having a slope greater than 60 percent. Based on these assurances, the Secretary finds that Virginia's proposal is consistent with 30 CFR 816.22(e) and 817.22(e) and the interpretive rules relating to topsoil substitutes and supplements.

(v) As discussed in Finding 4(b)(v) of the October 22, 1980 **Federal Register** notice, the Secretary found that Virginia's provision for allowing the use of non-toxic and non-acid forming coal waste in the construction of sediment structures under certain conditions would be acceptable if Virginia would require compliance with the provisions of 30 CFR 816.91 through 816.93 and 817.91 through 817.93. Virginia Regulations V816.91 through V816.93 and V817.91 through V817.93 incorporate provisions identical to the Federal requirements. Furthermore, in Volume I, pages 32–34, of its resubmission, Virginia states that compliance with the Virginia regulations cited above is required in all instances, including sediment ponds, where coal processing waste is used in dams and embankments. Therefore, the Secretary finds the Virginia proposal to be consistent with the Federal requirements.

(vi) As discussed in Finding 4(b)(vi) of the October 22, 1980 **Federal Register** notice, Virginia proposed an alternative for disposal of excess spoil in Virginia Regulations V816.75 and V817.75 which provided an additional method for the disposal of excess spoil in areas other than the actual mined area. In his initial decision, the Secretary found the proposed alternative to be less stringent than the requirements of the Federal regulations and SMCRA (45 FR 69984). A number of findings were included in the Secretary's decision which addressed logistical problems in construction and design and the omission of certain statutory requirements. These included: 1. Drainage over the outslope; 2. failure to remove vegetation and topsoil: 3. end-dumping; 4. failure to require

underdrains under the non-structural zone; 5. lack of specified lift thicknesses; 6. lack of a filter system to protect the underdrains; and 7. lack of controlled transportation of spoil. The resubmitted program made no changes to the original regulations. However, in Volume I, pages 35–42 of the Virginia resubmission, Virginia provided justification in support of the proposal which is discussed below.

a.1. *Drainage over the Out-slope.* Virginia provision provides that water may be discharged over the out-slope of fills. The State's justification is that SMCRA does not expressly prohibit this provision since Section 515(b)(22)(c) of SMCRA simply requires "appropriate" systems to control surface and subsurface drainage. Virginia maintains that as long as the drainage system is properly designed, its proposal is no less effective than the requirements of SMCRA. Although the Secretary recognizes that it may be feasible to locate ditches on fill material, the Virginia regulation, standing alone, does not indicate how Virginia intends to control design and construction of such ditches to minimize the risk of infiltration from the ditch adversely impacting the integrity and stability of the fill.

2. *Failure to Remove Vegetation and Topsoil.* Virginia contends that since the language of 30 CFR 730.5 requires only that State submissions contain requirements corresponding to "applicable provisions" of SMCRA, it may omit those requirements in Section 515(b)(22) of SMCRA, such as removal of organic material and construction of underdrains in portions of the fill in which such requirements are not necessary to the "zoned" concept of constructing fills proposed by Virginia. The Secretary finds that all provisions of Section 515(b)(22) of SMCRA are applicable to disposal of excess spoil in Virginia. The only instance in which the Secretary believes that the selected provisions of 515(b)(22) would not be "applicable" would be where, due to conditions in the area of mining, such as terrain, climate, biologic, chemical or other physical conditions, the particular requirement is not applicable. The Secretary does not believe that the SMCRA allows the State to select "applicable" requirements solely based upon the method of mine design selected.

3. *End-Dumping.* Virginia maintains that spoil in the structural zone would be placed in near horizontal lifts and compacted to densities and strengths required to assure proper stability. Further, spoil in the non-structural zone would be placed to assure mass stability and prevent mass movement. Based on these assurances, the Secretary finds that the Virginia provisions for controlled placement are consistent with 30 CFR 816.71(f) and 817.71(f).

4. *Failure to Require Underdrains Under the Non-Structural Zone.* Virginia contends that the construction of underdrains in the non-structural zone is not necessary in all situations and therefore is not an "applicable provision" as addressed by 30 CFR 730.5. See the previous discussion concerning this issue in "2" above.

5. *Lack of Specified Lift Thicknesses.* See discussion of this issue in "3" above.

6. *Lack of Filter System to Protect Underdrains.* Virginia disagrees with the Secretary's finding that filter systems must be required to protect the underdrain system. While Virginia's provision requires filters "unless otherwise approved" by the regulatory authority, Virginia's resubmission Volume I, page 40–41, states that "a filter system may not be required for a given design" but fails to illustrate situations where the absence of a filter system is acceptable. Filters are state-of-the-art for protection of underdrain permeability and prevention of piping, and thus intrinsic to "appropriate . . . internal drainage systems . . . to prevent spoil erosion and movement", as required by 515(b)(22)(c) of SMCRA. Therefore, the Secretary's concern remains and Virginia's argument is rejected.

7. *Controlled Transportation of Spoil.* The Secretary objected to the lack of provisions for controlled transportation of spoil. In Virginia's resubmission, the State contends that its regulations required controlled transportation. Virginia Regulations V816.71(g) and V817.71(g) require that a spoil be transported and placed in a controlled manner. Based on discussion of those requirements in the program resubmission and the requirements of Virginia's regulations, the Secretary finds Virginia's provisions for controlled transportation are consistent with the Secretary's regulations.

Virginia fails to address certain other concerns raised in the October 22, 1980, decision related to Virginia Regulations V816.75 and V817.75, which govern disposal of spoil. These issues will not be discussed again at this juncture, but may be found in Administrative Record No. VA 122.

Because most of the Secretary's concerns regarding Virginia Regulations V816.75 and V817.75 remain unresolved, the Secretary cannot accept these regulations and conditions approval of the Virginia program on deletion of these provisions.

b. Although Virginia failed to correct the deficiencies in its regulations, it did submit proposed regulations which would modify Virginia Regulations V816.75 and V817.75. The State believes that the proposed regulations would address all of the concerns of the Secretary as expressed in the initial decision.

The modified version of V816.75 contained in Volume I, Appendix D, of the resubmission, is proposed as an alternative to resolve the issues raised by the previously discussed rules. Subject to public comment when Virginia submits these provisions as a program amendment, they appear to resolve all of the issues with the exception of the following.

In Volume I, page 35–42, of its resubmission, Virginia states that Virginia Regulation V816.75(d) was modified to require removal of organic material in the non-structural zone. The Secretary cannot determine that this change has been made. This deficiency may be corrected by changing the proposed V816.75(d) and V817.75(d) to read ". . . topsoil in the structural zone of the embankment *and the non-structural zone of the fill* shall be removed . . ." Virginia officials agreed to make this correction at the September 21 and 22, 1981, meeting.

With the above change, the proposed modified version of V816.75 and V817.75 would appear, subject to public comment, to be acceptable as regulations which are consistent with the Federal regulations and in accordance with Section 515(b)(22) of SMCRA. Once this change is made and the regulation formally promulgated, Virginia may resubmit it as an amendment to the program being conditionally approved by this notice.

(vii) As discussed in Finding 4(b)(vii) of the October 22, 1980 **Federal Register** notice, Virginia proposed an alternative in Virginia Regulations V826.12(b) and (g) regarding stability of backfilled areas and incorporation of drainage channels, terraces, and roads into the backfilled area. The Secretary disapproved these provisions in Virginia's original submission.

Virginia Regulation V826.12(b) allows the regulatory authority to specify a static safety factor higher or lower than 1.3. 30 CFR 826.12(b) requires a safety factor of 1.3. In Volume I, pages 42–47, of its resubmission, Virginia has provided additional rationale in support of its proposal and cited a publication by Bowles, 1977, entitled *Foundation*

Analysis and Design, which contains an assessment of accuracy in developing design/analysis methods. Virginia also provided a compilation of a family of curves constructed from stability analysis of various fill embankment configurations using an array of strength and hydraulic parameters prepared by D'Appolonia Engineers under contract to Virginia which demonstrated the need to consider special design considerations due to the particular conditions existing in the steep sloped areas of Virginia. Based on this additional information, the Secretary accepts Virginia's position that application of safety factors must be based on their relation to the overall knowledge and uncertainty that exists under site-specific circumstances. The Secretary continues to believe that a factor of safety of 1.3 represents good engineering practices for backfilled areas under most design conditions. However, the Secretary recognizes that the degree of uncertainty in the stability calculation can be reduced through thorough geotechnical testing and analyses. For these reasons, and because Virginia will strictly limit any variances, the Secretary accepts Virginia's regulation based on Virginia's assurance that it will allow a factor of safety of no lower than 1.2. The Secretary feels this lower limitation is justified based upon accepted engineering practice and the necessity to ensure that backfilled areas achieve an adequate long term stability as required by SMCRA. Virginia has indicated that it will limit its proposal to allow a factor of safety of no lower than 1.2. Based on this assurance, the Secretary finds this part of the Virginia program consistent with the Federal requirements.

Virginia Regulation V826.12(g) allows the uppermost portion of the highwall to be incorporated into a road or drainage structure at the top of the backfill area. This provision was disapproved by the Secretary in the October 22, 1980 **Federal Register** notice. In the Virginia resubmission, Virginia did not amend this proposal to include the suggestions of OSM that vertical highwalls be "shaved" to blend into the surrounding terrain and complement the existing drainage patterns and that only short sections of rock or sandstone might be allowed to remain (Administrative Record No. VA 265). In its October 15, 1981 letter, Virginia provided assurance that in the interim period prior to the promulgation of a regulatory change, it will require the shaving or blending of highwalls serving as an integral part of a road or drainage structure to conform to the surrounding terrain. Based on this assurance, the Secretary is conditioning approval upon the State adopting regulations or otherwise amending its program to require that where roads or drainage structures would be left at the top of the backfill area, the highwall must still be eliminated by shaving and blending into the surrounding natural terrain.

(viii) As discussed in Finding 4(b)(viii) of the October 22, 1980 **Federal Register** notice, Virginia allows substrata materials exposed by road cuts to be used in place of topsoil or other suitable materials, if such materials are demonstrated to be topsoil substitutes satisfactory for establishing vegetation, as required by Virginia Regulation V816.22(e)(1)(A).

As discussed in Finding 4(c)(iv) above, Virginia has provided assurances that its provisions will be implemented consistent with the interpretive rule published by OSM in the **Federal Register** on June 10, 1980 (45 FR 39447). Based on this assurance, the Secretary approves this part of the Virginia program.

(ix) In Virginia Regulation V816.33 and the Virginia Coal Surface Mining Technical Handbook, Virginia does not provide for requirements consistent with 30 CFR 816.43(d) (Hydrologic Balance: Diversions), which prohibits locating diversions where they would increase landslide potential or constructing them on existing landslide areas. Furthermore, Virginia has no provision consistent with the requirement in 30 CFR 816.43(f)(4) that excess excavated material from diversion construction be treated as excess spoil. The Virginia program also fails to provide any alternative standards for the disposal of such material.

The Secretary finds Virginia's regulations not as effective as the Federal regulations and not consistent with Section 515(b)(4) of SMCRA, which requires all surface mining and reclamation operations to stabilize and protect all surface areas to control erosion and water pollution. Therefore, approval of the Virginia program is conditioned upon the State amending its program to standards for diversion structures consistent with those in 30 CFR 816.43(d), 816.43(f) (3) and (4).

(x) In Virginia Regulations V816.37(b) and V817.37(b), Virginia authorizes the granting of exemptions from Virginia Regulations V816.37(a) and V817.37(a), which require that discharges meet all applicable Federal and State laws and regulations and applicable effluent limits set forth in the National Pollutant Discharge Elimination System (NPDES). The exemption would be allowed when the operator demonstrates with pre-existing baseline data that the existing water quality does not meet the effluent limitations. The applicable effluent limits are set forth to conform with the NPDES under the Federal Water Pollution Control Act of 1972 (P.L. 92–500, as amended by P.L. 95–217) program. This program is administered by the Environmental Protection Agency under 40 CFR 434. The Secretary finds the Virginia provisions which allow the exemption inconsistent with Sections 515(b)(8)(c) and (10)(B) of SMCRA and 30 CFR 816.42 and 817.42, which require discharges to comply with applicable Federal laws. Therefore, as a condition of approval, Virginia must remove the exemption provided for under Virginia Regulations V816.37(b) and V817.37(b).

(xi) Virginia's blasting regulations differ from the Federal regulations and in certain instances omit requirements of SMCRA. These departures are as follows:

(1) *Blasting Schedule.* Virginia Regulations V816.61(b) and V816.64(a)(1) allow up to fifty (50) pounds of explosives to be detonated without publishing notice in the operator's blasting schedule. The Federal requirements in 30 CFR 816.61(b) and 816.64(a)(1) provide that blasts using more than five pounds of explosive or blasting agent shall be conducted according to the published schedule. Thus, Virginia's provisions are inconsistent with the Federal requirements. As a condition of approval, Virginia must modify its regulations to fully inform the public of all blasts in which more than five pounds of explosive or blasting agent are to be detonated.

(2) *Vibration Limit.* In Virginia Regulations V816.65(i) and V817.65(i), Virginia allows the maximum ground vibrations from an explosive detonation to be 2.0 inch per second. 30 CFR 816.65(i) requires a 1.0 inch per second limit. The U.S. District Court for the District of Columbia did not invalidate or remand 30 CFR 816.65(i) in its May 16, 1980, decision on the permanent program rules (*In re: Permanent Surface Mining Regulation Litigation,* Civil No. 79–1144), although the Court of Appeals had done so with a similar provision in the interim program regulations, 30 CFR 715.19(e)(2)(ii) (*In re: Permanent Surface Mining Regulation Litigation,* appeal from Civil No. 78–0162). Therefore, as a condition of approval, Virginia must amend its regulations to adopt the 1.0 inch per second criterion.

(3) *Distance Factor.* Virginia Regulations V816.65(k) and V817.65(k) allow for a scaled distance factor of 50

to be used in determining the maximum pounds of explosive to be used per delay. 30 CFR 816.65(k) requires a scaled distance of 60. The scaled distance factor is related to the maximum ground vibration. As noted in (2) above, Virginia must amend its regulations to adopt a 1.0 inch per second standard for ground vibration. For the same reasons, Virginia must adopt a factor of 60 in accordance with Federal requirements.

(xii) Virginia Regulations V816.76 and V817.76 allow disposal of excess spoil on areas other than the permit area where environmental benefits will occur. The Virginia regulations provide that excess spoil must be placed on (a) another area under a permit, (b) abandoned mine lands under a contract for reclamation according to OSM's Abandoned Mine Lands Guidelines and approved by DMLR, or (c) any other area upon approval of DMLR.

Section 515(b)(22)(B) of SMCRA requires that the areas for disposal of excess spoil be within the bonded permit area. The Secretary interprets the provision relating to the use of excess spoil on abandoned mine lands to mean that the project is approved and funded through the State Reclamation Plan submitted under Section 405 of SMCRA. The Secretary considers the existence of a contract for such abandoned mine land reclamation to be equivalent to a permit and bond. Based on the above, the Secretary finds Virginia Regulations V816.76 (a) and (b) and V817.76 (a) and (b) consistent with Section 515(b)(22) of SMCRA. However, Virginia Regulations V816.76(c) and V817.76(c) do not appear to provide any assurance of reclamation equivalent to a permit and bond. For this reason, the Secretary finds Virginia Regulations V816.76(c) and V817.76(c) to be inconsistent with the provisions of Section 515(b)(22) of SMCRA, and approval of the Virginia program is conditioned on Virginia deleting this portion of the program.

(xiii) The Virginia Coal Surface Mining Technical Handbook addresses removal of temporary diversions, but does not contain a requirement to remove the structure and regrade and revegetate the affected land similar to those in 30 CFR 816.43(e) and 816.44 (c) and (d). Instead, the Virginia program provides the following various alternative methods of removal: (a) The inlet of the diversion can be blocked and the water returned to its original channel; (b) the diversion can be backfilled and revegetated; (c) the diversion can be upgraded to a permanent diversion as necessary; or (d) other approved methods can be used. Alternative methods (a) and (d) do not appear to require that temporary diversions be removed and disturbed areas reclaimed after mining. For this reason, the Secretary finds (a) and (d) to be inconsistent with the Federal regulations. Alternative method (c) appears acceptable provided that the permanent diversion is approved in accordance with the standards for permanent diversions and the permanent diversion is consistent with the approved postmining land use. The Virginia regulation, however, does not specify what standards the permanent diversion must meet and, therefore, the Secretary finds this provision to be inconsistent with the Federal regulations. Alternative method (b) may be acceptable, provided that the contour is regraded to blend with the original contour, the area is topsoiled in accordance with applicable regulations, and the other requirements of 30 CFR 816.43(e) and 816.44 (c) and (d) are met. Virginia's regulations do not specify what standards must be met for the reclamation of these backfilled areas and, therefore, the Secretary finds this provision to be inconsistent with the Federal regulations. As a condition of approval, Virginia must change its program to require removal of temporary diversions as provided in 30 CFR 816.43(e) and 816.44 (c) and (d).

4d. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws and the Virginia program includes provisions, except as noted below, to implement, administer and enforce a permit system consistent with 30 CFR Chapter VII, Subchapter G. This finding is made under the requirements of 30 CFR 732.15(b)(12).

Virginia incorporates provisions corresponding to Sections 506, 507, 508, 510, 511 and 513 of SMCRA and Subchapter G of 30 CFR Chapter VII in Chapter 19, Virginia CSMCRA Sections 45.1–234, 45.1–235, 45.1–236, 45.1–237, 45.1–238 and 45.1–239 and in the Virginia Regulations Subchapter VG.

Discussion of significant issues raised during the review of the Virginia permitting provisions follows.

(i) As discussed in Finding 4(d)(ii) of the October 22, 1980 **Federal Register** notice, the term "known uses" was used in Virginia Regulation V783.15(a)(3), instead of "the uses" as found in 30 CFR 783.15(a). In that finding, the Secretary pointed out the necessity of interpreting "known uses" to include all potential uses. In Volume I, page 49, of the resubmission, Virginia has assured OSM that its regulations will be interpreted as requiring that a thorough investigation be conducted to identify all uses of groundwater and its function in the hydrologic balance through Virginia Regulations Parts V799 and V783 regarding surface and underground mining permit application requirements for information on environmental resources and Virginia Regulations V780.21 and V784.17, which provide for protection of the hydrologic balance as a part of the reclamation plan. Based on this assurance, the Secretary finds the term "known uses" to be consistent with the Federal provisions.

(ii) As discussed in Finding 4(d)(iii) of the October 22, 1980 **Federal Register** notice, Virginia identified as an editorial error the use of the words "property to be mined" in Virginia Regulation V782.13(a)(2) (3) and (4) instead of the phrase "area to be affected" as in 30 CFR 782.13. Virginia has corrected the error and the Secretary finds the State provision to be consistent with the Federal requirements.

(iii) As discussed in Findings 4(b)(i) and 4(d)(iv) of the October 22, 1980 **Federal Register** notice, Virginia proposed guidelines in Virginia Regulation V786.21(c) for permit review when the permit applicant requests an exemption from design criteria for an existing structure which would meet appropriate performance standards. Virginia identified those standards which would be considered performance standards and those that would be considered design standards. The Secretary approved the Virginia procedures and found 14 of the 22 provisions identified as performance standards acceptable in Virginia's program submittal. In its resubmission, Virginia has corrected the remaining problems by adopting the changes requested by the Secretary in his initial decision of October 22, 1980. All 22 alternative performance standards proposed by Virginia are now consistent with 30 CFR Chapter VII, Subchapter K and Section 515 of SMCRA, and the Secretary finds the Virginia guidelines set forth in Virginia Regulation V786.21(e) to be consistent with 30 CFR 786.21 and 30 CFR 701.11.

(iv) As discussed in Finding 4(d)(v) of the October 22, 1980 **Federal Register** notice, Virginia regulations omitted the requirement of 30 CFR 786.27(b) that there be a permit term allowing citizens to accompany inspectors on the mine site. In its resubmission, Virginia incorporated this provision in Virginia Regulation V786.27. The Secretary finds this provision to be consistent with the Federal requirements.

(v) As discussed in Finding 4(d)(vi) of the October 22, 1980 **Federal Register**

notice, Virginia indicated that Virginia Regulation V784.19(p) contained a typographical error. This error resulted in the omission of the requirement of 30 CFR 784.16(e) that the plan for coal processing waste dams and embankments include a stability analysis of each structure if the structure is 20 feet or higher or impounds more than 20 acre feet. In the Virginia resubmission, Virginia Regulation V784.19(p) was deleted. However, the requirements which were previously omitted have now been incorporated in Virginia Regulation V784.19(f). The Secretary finds that this change renders Virginia's program consistent with the Federal requirements.

4e. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority to regulate or prohibit coal exploration consistent with 30 CFR Parts 776 and 815 (coal exploration), and that the Virginia program includes provisions adequate to do so. This finding is made under the requirements of 30 CFR 732.15(b)(3).

The Virginia program incorporates provisions corresponding to Section 512 of SMCRA and 30 CFR Parts 776 and 815 in Chapter 19, Virginia CSMCRA Section 45.1–233 and in the Virginia Regulations Parts V776 and V815.

4f. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws and regulations to require that persons extracting coal incidental to government-financed construction maintain information on site consistent with 30 CFR Part 707.12. This finding is made under the requirements of 30 CFR 732.15(b)(4).

The Virginia program incorporates provisions corresponding to Section 528 of SMCRA and 30 CFR Part 707 in Chapter 19, Virginia CSMCRA Section 45.1–253 and the Virginia Regulations Part V707.

4g. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws to enter, inspect, and monitor all coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian land within Virginia consistent with the requirements of Section 517 of SMCRA (inspections and monitoring) and 30 CFR Chapter VII, Subchapter L (inspections and enforcement), and that the Virginia program includes provisions adequate to do so. This finding is made under the requirements of 30 CFR 732.15(b)(5).

Provisions corresponding to Section 517 of SMCRA and Subchapter L of 30 CFR Chapter VII for inspection and monitoring are found in Chapter 19, Virginia CSMCRA Section 45.1–244 and in the Virginia Regulations Subchapter VL (inspection and enforcement).

4h. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws and regulations and the Virginia program includes provisions for implementation, administration and enforcement of a system of performance bonds and liability insurance, or other equivalent guarantees, consistent with 30 CFR Chapter VII, Subchapter J. This finding is made under the requirements of 30 CFR 732.15(b)(6).

The performance bond and liability insurance provisions of Sections 507(f), 509, 510 and 519 of SMCRA and 30 CFR Chapter VII, Subchapter J are incorporated in Chapter 19, Virginia CSMCRA Sections 45.1–235(G), 45.1–238, 45.1–241, 45.1–247 and in the Virginia Regulations Subchapter VJ.

4i. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia law and provides regulations for civil and criminal sanctions for violations of Virginia law, regulations and conditions of permits and exploration approval, including civil and criminal penalties, in accordance with Section 518 of SMCRA (30 U.S.C. 1268) and consistent with 30 CFR Part 845. This finding is made under the requirements of 30 CFR 732.15(b)(7).

The Virginia program incorporates provisions corresponding to Section 518 of SMCRA and 30 CFR, Part 845 in Chapter 19, Virginia CSMCRA Section 45.1–246 and in the Virginia Regulations Part V845.

4j. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws to issue, modify, terminate and enforce notices of violations, cessation orders and show cause orders in accordance with Section 521 of SMCRA (30 U.S.C. 1271) and 30 CFR Chapter VII, Subchapter L and that the Virginia program includes provisions, except as noted below, adequate to do so. This finding is made under the requirements of 30 CFR 732.15(b)(8).

The authority to issue, modify, terminate and enforce notices of violation, cessation orders and show cause orders is contained in Chapter 19, Virginia CSMCRA Section 45.1–245 and in the Virginia Regulations Subchapter VL.

Discussion of significant issues raised during the review of the Virginia enforcement provisions follows.

(i) As discussed in Finding 4(j)(i) of the October 22, 1980 Federal Register notice, Virginia did not provide either a definition of an "authorized representative" or any provision stating that the field inspector would be a representative of the Director who would be authorized to issue notices of violations and cessation orders. The Secretary found this omission to be unacceptable.

In Volume I, Appendix D, of the Virginia resubmission, Virginia provided a designation of authorized representatives for specific enforcement procedures. This designation provides that the field inspector is an authorized representative of the Director. He or she may issue notices of violations and after consulting with his or her supervisor by either telephone or radio, may issue a cessation order for imminent danger or harm. However, Virginia failed to provide that if the supervisor is not available by either telephone or radio, the inspector will issue the cessation order for imminent danger or harm on his or her own authority. While the Secretary acknowledges that there would be very few instances when prompt communication could not be made, he finds that it is imperative that field enforcement personnel be authorized to act in such situations. Accordingly, approval of the Virginia program is conditioned upon revisions to the program which correct this deficiency.

(ii) Virginia Regulations V843.12(c) and (f) specify the circumstances under which an operator may have more than 90 days to abate a violation. The Virginia provisions closely parallel the proposed Federal regulation providing for extensions of the 90 day abatement period (46 FR 22902; April 22, 1981). However, in the Secretary's August 17, 1981 final rule (46 FR 41705), certain revisions were made which resulted in some minor inconsistencies between Virginia's regulations and the final Federal rule.

The changes made to the final Federal rule limited the granting of extensions to situations where, due to climatic conditions, abatement within 90 days would clearly cause more environmental harm than it would prevent or require action that would violate safety standards established by statute or regulation under the Mine Safety and Health Act.

The Virginia regulations contain all of the final Federal requirements except the above noted changes. Where there

have been changes in the Federal regulations since the permanent program regulations were promulgated on March 13, 1979, the States, for purposes of program approval, have the choice of meeting either the old 1979 rule or the newer rule; however, they must have rules consistent with one or the other. In this instance, Virginia meets neither the August 17, 1981 rule nor the original 30 CFR 843.12, which did not allow extensions of the abatement period beyond 90 days. As a result, the Secretary finds Virginia Regulations V843.12(f)(1) and V843.12(f)(4) to be inconsistent with the Federal provisions. As a condition of approval, Virginia must amend its program to be consistent with the Federal rules.

(iii) For the purpose of terminating a notice of violation, Virginia Regulation V843.12(e) allows the determination that a violation has been abated to be based on information obtained from a government agency or a signed statement from a permittee that the violation has been abated. These methods for determining abatement are not permitted under Section 521(a)(5) of SMCRA or 30 CFR 843.12(e). Accordingly, approval of the Virginia program is conditioned upon revisions to the program to require that an authorized representative of the regulatory authority confirm abatement of all violations.

(iv) Section 521(a)(4) of SMCRA requires that a show cause order be issued when it is determined that a pattern of violations exists which were caused willfully or by unwarranted failure of the permittee to comply with applicable requirements. The Secretary set forth an objective basis in 30 CFR 843.13(a) (3) and (4) to determine what would constitute a pattern of violations sufficient to require issuance of a show cause order. The Federal regulation requires that the Director "shall determine that a pattern of violations exists if he finds that there were violations of the same or related requirements during three or more State inspections . . . within any 12-month period." Virginia has no such provision.

Therefore, the Secretary finds that Virginia Regulation V843.13(b) is inconsistent with 30 CFR 843.13(a) (3) and (4). Approval of the Virginia program is conditioned upon revisions to the program to correct this deficiency.

(v) Unlike 30 CFR 843.13(c), Virginia Regulation V843.13(c) fails to require that, at the same time a show cause order is issued, a notice shall be posted at the State office closest to the area of the surface coal mining and reclamation operations. Likewise, Virginia Regulation V843.13(c) fails to require that the notice of a public hearing concerning a show cause order also be posted at the State office closest to the area of the surface coal mining and reclamation operations.

In the September 21 and 22, 1981 meeting, Virginia assured the Secretary that it intends, as a matter of policy, to post notice of the issuance of a show cause order and of any hearing thereon in accordance with 30 CFR 843.13(c). The notices will be posted at the Big Stone Gap office of the DMLR, the only office of the regulatory authority located in the coalfields. Based on this assurance, the Secretary finds that the Virginia program is consistent with 30 CFR 843.13(c).

4k. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws and regulations to provide for designation of areas as unsuitable for surface coal mining consistent with 30 CFR Chapter VII, Subchapter F, except as noted below. This finding is made under the requirements of 30 CFR 732.15(b)(9).

Virginia incorporates provisions corresponding to 30 CFR Chapter VII, Subchapter F in Chapter 19, Virginia CSMCRA Section 45.1–252, and in the Virginia Regulations Subchapter VF.

Discussion of significant issues raised during the review of the Virginia provisions to designate areas as unsuitable for surface coal mining follows.

(i) As discussed in Finding 4(k)(i) of the October 22, 1980 **Federal Register** notice, 30 CFR 764.15(b)(2) provides that the regulatory authority shall notify the general public of the receipt of a petition by a newspaper advertisement placed in the locale of the area covered by the petition; in the newspaper of largest circulation in the State; and in any official State register of public notices. Virginia Regulation V764.15(b)(2) provides that the newspaper advertisement announcing receipt of a petition shall be placed only in a newspaper of general circulation in the locale of the area.

The newspaper of largest circulation in the State is the *Washington Post.* Virginia maintains in Volume I, pages 52–53, of the program resubmission that there is no broad interest in the Washington metropolitan area in designating lands unsuitable which would justify the expense of newspaper notices in the *Washington Post.* Virginia states that experience has shown that persons who have an interest in Virginia coal lands are either located in the coal fields, have agents or representatives in that region, or rely on newspapers published in that region for local information. Therefore, notices outside of the coal fields are unnecessary.

In view of the above, the Secretary finds the Virginia provision for newspaper notices concerning the receipt of petitions to be as effective as, and therefore consistent with, the Federal rule in meeting the purpose of Section 522(c) of SMCRA to provide adequate public notice of designation hearings.

(ii) As discussed in Findings 4(b)(ii) and 4(k)(iii) of the October 22, 1980 **Federal Register** notice, Virginia Regulation V764.13 directs a petitioner to supply more information than is required by Section 522 of SMCRA and 30 CFR 764.13. In addition, Virginia Regulations V764.15 and V764.17(a) reduce both the time limit for filing a petition in response to a permit application and the time limit for holding a hearing for a petition filed in response to a permit application.

First, with respect to the provision relating to information contained in petitions, Federal requirements concerning the information that a petitioner must provide for designations and terminations are specified at 30 CFR 764.13(b) and 30 CFR 764.13(c), respectively. These information requirements provide a very low threshold for the petitioner to meet in order to have a petition considered. Although Virginia seeks out more information in the filing of petitions than that specified in the Federal rule, Virginia indicated at the meeting of September 21 and 22, 1981, that the additional information only needs to be provided when it is known, and only to the extent known by the petitioner. Virginia is requesting this information to provide assistance to the regulatory authority in considering the petition (Administrative Record Nos. VA 268 and 314). This explanation confirms that petitioners would not be required to research or otherwise collect information not already known to them, and based on this explanation, the Secretary finds Virginia provisions consistent with the Federal requirements.

Secondly, Virginia Regulation V764.15(a)(7) allows the filing of a petition to designate an area for which a permit application has been filed at any time up to the end of the public comment period on that permit application. Virginia does not provide that the public comment period extends to the informal conference, as provided in 30 CFR 764.15(a)(7). However, this is not so significant a difference as to make Virginia's provision less effective than the Federal rule. Under Virginia

Regulation V786.12 (b) and (c), the public has 30 days to comment on a permit application. This period would not be extended to any great extent by allowing petitions to be filed up until the informal conference, because such a conference must be requested within that same 30-day period and must be held "within a reasonable time" as provided by Virginia Regulation V786.14. In view of the minimal information required in a petition, these petitions should not require a great deal of time to prepare, and the difference between Virginia Regulation V764.15(a)(7) and the Federal provision is not significant, since Virginia provides ample time for a petition to be filed.

Thirdly, Virginia Regulation V764.17(a) requires that when the allegations are not complex, the hearing on a petition to designate lands unsuitable for surface coal filed during the public comment period on a permit application must be held within three months. This differs from the provisions of 30 CFR 764.17(a) and Section 522(c) of SMCRA, which provide for a hearing within ten months.

Virginia says it intends to more closely coordinate the petition and permitting processes so as not to cause unnecessary delays in the permitting process. The requirement for conducting a public hearing on a petition within three months is an attempt by Virginia to separate petitions into those containing simple allegations and those containing complex allegations. If the petition allegations are simple, a hearing would be conducted within three months of receiving the petition. If the allegations are complex, the hearing deadline would extend up to the ten-month limit. Virginia's provision is not inconsistent with the Federal provisions, which merely require that hearings be held within ten months, rather than forbiding them to be held sooner even when the issues are simple. The clarification of the hearing procedures provided in Volume I, page 11, of the program resubmission addresses the concerns expressed by the Secretary in his initial decision.

The Secretary finds that each of these provisions is consistent with the Federal requirements.

(iii) Virginia Regulation V762.5 contains a definition of "substantial legal and financial commitments in surface or underground coal mining operation" (SLFC) similar to the Federal definition at 30 CFR 762.5.

However, in Volume II, page 5 of the resubmission Virginia explained that it interprets its definition to result in a finding of SLFC in cases where a person possessed mineral leases on properties prior to January 4, 1977. Virginia maintained that the acquisition of mineral rights leases is a capital-intensive investment and should be protected.

The legislative history of SMCRA clearly indicates that mere ownership or acquisition costs of the coal does not constitute SLFC.

"The phrase *substantial legal and financial commitments* in the designation section and other provisions of SMCRA is intended to apply to situations where, on the basis of a long-term coal contract, investments have been made in power plants, railroads, coal handling and storage facilities and other capital-intensive activities. The Committee does not intend that mere ownership or acquisition cost of the coal itself or the right to mine it should constitute 'substantial' legal and financial commitments" [H.R. 95–218, 95th Cong., 1st Sess. 95 (1977)].

The Secretary's definition of SLFC in 30 CFR 762.5 also states that the cost of acquiring the right to mine coal is not sufficient for SLFC. Program approval is conditioned on Virginia revising its policy on SLFC to conform to the Federal requirements.

4l. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws and the Virginia program contains provisions for public participation in the development, revision and enforcement of the Virginia regulations and program except as noted below. This finding is made under the requirements of 30 CFR 732.15(b)(10).

Virginia provides authority for public participation in the development, revision and enforcement of the Virginia program throughout the Virginia CSMCRA and Coal Surface Mining Regulations.

Discussion of significant issues raised during the review of the Virginia public participation provisions follows.

(i) As discussed in Finding 4(1)(i) of the October 22, 1980 **Federal Register** notice, Virginia Regulation V842.12(b) used the word "citizen" instead of "person" as found in 30 CFR 842.12(b). This change could exclude out-of-state persons, corporations, associations, etc., from the protection of having their identities kept confidential when supplying information to DMLR regarding possible violations or imminent danger or harm. Virginia has corrected Virginia Regulation V842.12(b) by using the word "person", thereby protecting the right of any person to have his/her identity remain confidential. The Secretary finds this provision to be consistent with the Federal requirements.

(ii) As discussed in Finding 4(1)(ii) of the October 22, 1980 **Federal Register** notice, Virginia regulations did not contain provisions allowing a citizen to accompany an inspector during an inspection conducted as a result of information provided to the regulatory authority by the citizen, as provided in 30 CFR 842.12. Virginia Regulation V842.12(c) now provides that citizens shall be allowed to accompany an inspector during a citizen complaint investigation. However, the Virginia regulation adds language stating that,

a citizen accompanying an inspector does so at his/her own risk and neither the Division nor its personnel, nor the operator nor its personnel, shall be liable for any injury or damage sustained by such citizen. The Division may require such citizen to provide in advance a written acknowledgment of the foregoing.

The State provision may operate as a constraint on citizens who choose to exercise their right to go onto a mine site. Further, it is not consistent with 30 CFR 842.12.

In contrast, 30 CFR 842.12(b) provides that the citizen "has a right of entry" into the mine area as long as he or she is under the control of the inspector. The Secretary, in promulgating this regulation, specifically rejected the suggestion that such a waiver be authorized. Ordinary tort law principles can be used to determine whether, if a citizen is injured on the site during an inspection, he may hold the operator liable for such injury. The preamble to 30 CFR 842.12(b) goes on to note that "there is nothing in the Act or the legislative history to require a citizen to sign a release," although he or she must follow Mine Safety and Health Act regulations and be under the control of the inspector (44 FR 15299; March 13, 1979).

The Secretary finds that Virginia Regulation V842.12(c) is inconsistent with the Federal requirements found in 30 CFR 842.12(c). Approval of the Virginia program is conditioned upon revisions to the program which correct this deficiency.

(iii) As discussed in Finding 4(1)(iii) of the October 22, 1980 **Federal Register** notice, the Virginia regulations omitted provisions requiring notice of citizen suits, as provided in 30 CFR 700.13. Virginia has provided for such notice in Virginia Regulation V790. The Secretary finds the Virginia provision to be consistent with Section 520(d) of SMCRA and the Federal regulations.

4m. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia law, and the Virginia program includes provisions to monitor, review and enforce the

prohibition against indirect or direct financial interests in coal mining operations by employees of the Virginia Department of Conservation and Economic Development consistent with 30 CFR Part 705, except as noted below. This finding is made under the requirements of 30 CFR 732.15(b)(11).

Virginia incorporates provisions which prohibit financial interests in coal mining operations in Chapter 19, Virginia CSMCRA Sections 45.1–231 and 45.2–232, in the Virginia Regulations Part V705, and in Section 8.12 of the Virginia program narrative.

Discussion of significant issues raised during the review of the Virginia prohibition against indirect or direct financial interests in coal mining operations by employees of the regulatory authority follows.

(i) As discussed in Finding 4(m)(i) of the October 22, 1980 **Federal Register** notice, Virginia does not subject the Board of Conservation and Economic Development to the conflict of interest provisions of 30 CFR Part 705. In that finding, the Secretary requested Virginia to clearly demonstrate that the Board is multi-interest, a characteristic which would exempt the Board as provided by 30 CFR Part 705. In Volume I, pages 56–59, of the Virginia resubmission, Virginia notes that only one member of the Board currently represents coal mining interests. The basic statute [Section 10–3, Code of Virginia (1950)] establishing the Board directs the Governor in making appointments to select persons suitably qualified to consider and act upon the various special interests and problems of importance which may come before the Board. According to the Virginia resubmission, Sections 45.1–231 and 45.1–232 of the Virginia CSMCRA do not change the basic tenet of Section 10–3, which is to create a multi-interest Board. Virginia maintains that Section 45.1–232 limits the number of Board members who represent the coal mining industry to not more than three and that this limitation was established to avoid the objection that all or a majority of the Board could consist of coal mining members. Thus, in effect, Section 45.1–232 insures that special interests other than coal mining will be represented on the Board.

The Secretary finds that Virginia has adequately demonstrated that the Board is multi-interest and, therefore, not subject to the conflict of interest provisions of 30 CFR Part 705.

4n. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under the Virginia CSMCRA Section 45.1–256 to require the examination, and certification of persons engaged in or responsible for blasting and the use of explosives in accordance with Section 719 of SMCRA. This finding is made under the requirements of 30 CFR 732.15(b)(12).

Under 30 CFR 732.15(b)(12), the State is not required to implement regulations governing such training, examination and certification until six months after Federal regulations for these provisions have been promulgated. Federal regulations have not been promulgated at this time. However, when the Secretary issues final rules on this subject, Virginia will be required to amend its program to have consistent regulations (30 CFR 732.17).

4o. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia law and regulations to provide for a small operator assistance program consistent with Section 507(c) of SMCRA and 30 CFR Part 795. This finding is made under the requirements of 30 CFR 732.15(b)(13).

The Virginia program incorporates provisions corresponding to Section 507(c) of SMCRA and 30 CFR Part 795 in Chapter 19, Virginia CSMCRA Section 45.1–235 and in the Virginia Regulations Part V795.

4p. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws and regulations to provide for protection of its employees in accordance with the protection afforded Federal employees under Section 704 of SMCRA. This finding is made under the requirements of 30 CFR 732.15(b)(14).

The Virginia program incorporates provisions corresponding to Section 704 of SMCRA in Chapter 19, Virginia CSMCRA Section 45.1–257.

4q. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia law and the Virginia regulations provide for administrative and judicial review of State program actions in accordance with Sections 525 and 526 of SMCRA and 30 CFR Chapter VII except as discussed below. This finding is made under the requirements of 30 CFR 732.15(b)(15).

The Virginia program incorporates provisions corresponding to Sections 525 and 526 of SMCRA and 30 CFR Chapter VII Subchapter L in Chapter 19, Virginia CSMCRA Sections 45.1–249, 45.1–250, and 45.1–251; the Virginia Administrative Process Act, *Va. Ann. Code* 9–6:14:12 *et seq.* and in the Virginia Regulations Subchapter VL.

Discussion of significant issues raised during review of the Virginia provision for administrative and judicial review of State program activities follows.

(i) As discussed in Finding 4(q)(i) of the October 22, 1980 **Federal Register** notice, the Virginia provision for jury trial *de novo* did not meet the Secretary's *de novo* review requirements. Rather than amend the Virginia code to conform to these procedures, Virginia relied upon Virginia CSMCRA Section 45.1–251A, which provides that if the Secretary should disapprove the provision for jury trial *de novo*, the provision shall be severable and of no effect unless otherwise ordered by a court of competent jurisdiction. In Volume I, page 59, of the resubmission, Virginia includes an opinion of the Virginia Attorney General's Office that the Secretary's October 22, 1980, disapproval of the *de novo* provision severed the provision from the Virginia statute. The Secretary therefore, finds the State program to be consistent with the Federal requirements.

(ii) As discussed in Finding 4(q)(ii) of the October 22, 1980 **Federal Register** notice, the Virginia Administrative Process Act empowers the presiding hearing officer to oversee an accurate verbatim recording of the evidence. However, it does not require that all hearings be of record, as required by Section 518(b) of SMCRA. Virginia has corrected this deficiency by incorporating this provision into Virginia Regulation V787(b)(3)(ii). The Secretary finds this provision to be consistent with the Federal requirement.

(iii) As discussed in Finding 4(q)(iii) of the October 22, 1980 **Federal Register** notice, the Secretary found that Virginia CSMCRA Sections 45.1–249E and 45.1–251C were not consistent with Section 525(e) of SMCRA, 30 CFR 732.15(b)(10) and 840.15. While the State provisions allow the assessment of costs and attorney's fees against any party, the State is specifically exempted from such an assessment. Although this language was not amended in the Virginia CSMCRA, the State submitted a copy of Article 6, Section 9–6–14:21 of the Code of Virginia in Volume I, page 61, of the resubmission which provides that,

> "in any civil case * * * in which any person contests any agency action, as defined in Section 9–6–14:4, such person shall be entitled to recover from that agency, * * * reasonable costs and attorney fees if such person substantially prevails on the merits of the case and the agency is found to have acted unreasonably, unless special circumstances would make an award unjust."

This amendment to the Virginia Administrative Process Act (APA) was passed in the 1981 session of the

General Assembly. Therefore, this amendment became law after the Virginia CSMCRA. However, in the September 21 and 22, 1981 meetings, the Commonwealth was unable to assure the Secretary that this amendment to the APA would supersede the prohibition against the assessment of costs and attorneys' fees against the State in Virginia CSMCRA Section 45.1–294E. Also, as Virginia notes in its narrative explanation, the amendment to the Virginia APA authorizes the award of costs and fees against the State only where civil litigation has been filed, and not in administrative proceedings.

The preamble to the Federal permanent regulations makes clear that the availability of costs and expenses is an integral part of the public participation in administrative and judicial review required to be in State programs [44 FR 14965–15297 (March 13, 1977)]. The Secretary finds that the Virginia program is deficient insofar as it limits the awarding of costs, expenses, and attorneys' fees resulting from administrative and judicial proceedings against the State. Therefore, approval of the Virginia program is conditioned upon:

1. A statutory amendment or other program change which would allow the award of costs and attorneys' fees against the State resulting from matters in administrative litigation.

2. A statutory amendment or other program change which would authorize the award of costs, expenses, and attorneys' fees against the State in judicial proceedings.

(iv) As discussed in Finding 4(q)(iv) of the October 22, 1980 **Federal Register** notice, the Secretary found that Virginia had not submitted procedural regulations which were the same or similar to the intervention and discovery rules in 43 CFR Part 4 and that the omission was inconsistent with 30 CFR 840.15 and 43 CFR Part 4.

In Volume I, pages 61–62, of its resubmission, Virginia states that Section 9–6.14:12C of the Virginia APA empowers the hearing officer to dispose of procedural requests and to regulate the course of the hearing. Virginia notes that these powers in conjunction with Virginia Regulation V 789.2 (Intervention) would encompass questions concerning intervention. This regulation provides for mandatory intervention under the same circumstances as under 30 CFR 4.110.

With regard to discovery, under Section 9–6.14:13 of the Virginia APA the State agency or its designated representatives may, at the request of any party, issue subpoenas requiring testimony or production of books, papers, or other evidence. Requests for admission are also allowed. Although Virginia does not provide for depositions or written interrogatories, as do the Federal rules, 43 CFR 4.1130, the Secretary's experience in processing over two thousand administrative cases in Virginia over the past several years has demonstrated that depositions and written interrogatories are rarely used. This will be even more true under the permanent program because much of the information needed in an administrative case will be readily available, as a result of the extensive permit application information required under the permanent program. Thus, the Secretary finds that Virginia's discovery provisions are as effective as and therefore consistent with the Federal rules.

4r. The Secretary finds that the Virginia Department of Conservation and Economic Development has the authority under Virginia laws, and the Virginia program contains provisions to cooperate and coordinate with and provide documents and other information to the Office of Surface Mining under the provisions of 30 CFR Chapter VII. This finding is made under the requirements of 30 CFR 732.15(b)(16).

This authority is provided throughout the Virginia CSMCRA and the Virginia regulations.

4s. The Secretary finds that the Virginia CSMCRA and regulations adopted thereunder and other laws and regulations of Virginia do not contain provisions that would interfere with or preclude implementation of the provisions of SMCRA and 30 CFR Chapter VII, except as noted below. This finding is made under the requirements of 30 CFR 732.15(c).

(i) As discussed in Finding 4(s) of the October 22, 1980 **Federal Register** notice, the Virginia legislature and several counties have passed statutes and ordinances allowing coal companies to deed their coal haul roads to counties as "public roads." The Secretary finds that Va. Code 33.1–246.1, and those ordinances and has determined that they would allow the haul road requirements of SMCRA to be circumvented and are inconsistent with SMCRA.

Specifically, Section 701(28)(B) of SMCRA specifies that "all lands affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of such [mining] activities and for haulage * * *." must be considered part of the surface coal mining operation.

In the Secretary's October 22, 1980 decision, the Secretary found that the State law and policy which allowed the coal haul road requirements of SMCRA to be circumvented were unacceptable. In that finding the Secretary stated that "haulroads which otherwise would be required to be a part of the permitted area of the surface coal mining operation arguably elude the requirements of SMCRA and 30 CFR Chapter VII because as 'county owned' roads the State might not require they be included as a part of the permitted area."

The failure to include haul roads which are constructed, reconstructed or used to facilitate surface coal mining operations as a part of the affected area is of particular significance in Virginia because of the large number of coal mining operations that would thereby qualify for the two-acre exemption under Section 528 of SMCRA.

In its resubmission, Volume I, Appendix J, Virginia included a "Policy for Interpretation" with respect to the coal haul roads which provides as follows:

> "Haul roads will not be included in acreage calculations under this section if the following four criteria are met.
>
> A. The road has been duly established as a public road according to the laws of the jurisdiction in which it is located.
>
> B. The road is open continuously to the public.
>
> C. Public funds are provided for maintenance.
>
> D. The County or State within which the road is located has construction standards at least as stringent as the applicable minimum standards as stated in the VDMLR Reclamation Manual, Coal Surface Mining Regulations for Haulage Ways, Section 7."

The Secretary agrees that under certain circumstances, based on the roads function and actual usage, a public road need not be considered a part of an operation's affected area and need not be included within an operator's permit area, even though the public road is used for coal haulage. However, the Virginia policy, with respect to coal access and haul roads contained in the August 13, 1981 resubmission, is inadequate because it does not distinguish between roads which are used primarily as haul or access roads and roads which are primarily used by the general public.

There is no requirement in this Virginia policy that roads deeded by coal operators to the county actually be used by the public. In many cases, roads deeded to the county have no function except to provide access to, and for coal haulage from, a surface coal mining operation. Therefore, the State's requirement that the road be continuously open to the public is insufficient alone to exclude the road

from regulation. In order to avoid responsibility for the haul road maintenance requirements of SMCRA and regulations, and possibly escape environmental regulation altogether, an operator could simply take down the gate to his mine access road and convey his legal interest in the road to the county. This could occur despite the fact that the road really has no purpose other than access or coal haulage and that no member of the public would ever be likely to use the road.

The deficiencies in Virginia's proposal for allowing operators to escape regulation by deeding access and haul roads to the counties is not overcome by the requirement that public funds be provided for maintenance.

Lack of funds would almost certainly be an adequate excuse for the failure of the county to maintain such a road in accordance with the requirements of the permanent program, and the Secretary is aware of no way a citizen could take legal action to force a county to repair or otherwise maintain a haul road that had been conveyed to the county. Thus, the requirement that public funds be provided for maintenance does not legally bind the county to actually perform routine and preventative maintenance, and certainly does not insure that the road will be maintained in accordance with the performance standards of the State program.

These deficiencies in the Commonwealth's haul road policy were discussed with Virginia officials at the September 21 and 22, 1981 meeting. In the October 15, 1981 letter, the State submitted an amendment to its program which revised its haul road policy.

That change consists of the addition of the following paragraph to its "Policy for Interpretation".

All roads must be included in the permit area which are used, constructed or significantly improved for coal haulage or minesite access, except those for which there is substantial (more than incidental) public use and which are actually maintained with public funds in a manner similar to other public roads in the vicinity.

After careful review, the Secretary has determined that Virginia's policy statement, Attachment 5 of the October 15, 1981 letter, continues to pose a minor ambiguity concerning the State's treatment of haul roads. This occurred because the State added language to its policy statement which conflicts with its earlier policy language, which remains in the August 13, 1981 resubmission. That is, while Virginia's new policy statement indicates that there must be "substantial (more than incidental) public use, it fails to delete the statement suggesting that merely having the road "open continuously to the public" is sufficient. Further, while the new policy statment indicates that the road "must *actually be maintained* with public funds" in a manner similar to other public roads in the vicinity, it fails to delete the statement suggesting that merely providing public funds for its maintenance is sufficient.

Although the Secretary believes it was Virginia's intent in revising the policy to provide clear guidance on the haul road question, he has determined that, in view of the importance of this issue, it must be further revised to eliminate any ambiguity or inconsistency. Therefore, to ensure consistency with SMCRA and the Federal regulations, the Secretary requires Virginia, as a condition of approval, to revise its policy statement on coal haul roads to delete items (B) and (C) of its original submission and include the policy from Attachment 5 of the October 15, 1981 letter. The revised policy statement should read as follows:

"DMLR Coal Haulroad Policy

"All roads must be included in the permit area which are used, constructed or significantly improved for coal haulage or minesite access, except those for which there is substantial (more than incidental) public use and which are actually maintained with public funds in a manner similar to other public roads in the vicinity.

"Coal haul and access roads as defined in permanent program regulation Section V701.5 will be considered part of the affected area of an operation and included in acreage calculations thereof unless all of the following conditions are met:

"1. The road has been duly established as a public road according to the laws of the jurisdiction in which it is located.

"2. There is substantial (more than incidental) public use of the road.

"3. The road is actually maintained with public funds in a manner similar to other public roads in the vicinity.

"4. The County within which the road is located has construction standards at least as stringent as the applicable minimum standards as stated in the VDMLR Reclamation Manual, Coal Surface Mining Regulation for Haulageways, Section 7.

"The foregoing criteria will apply in repermitting of operations previously permitted under the interim program regardless of whether or not a particular road was previously permitted."

The Secretary has determined that early oversight of the Virginia regulatory program must concentrate on Virginia's implementation of this haul road policy, as well as the related application of the two-acre exemption provisions. To facilitate OSM oversight of these matters, the Secretary requires the Commonwealth to submit, not later than April 1, 1982, an interim report and, not later than June 30, 1982, a final report on Virginia's implementation of the haul road and two-acre exemption policies being approved and mandated by the Secretary. At a minimum, that report shall contain a narrative description of the State's activities in these areas and a comprehensive inventory of all surface mining operations in Virginia which are not being regulated and the reason for that non-regulated status. OSM will provide resources as available to assist Virginia in meeting this requirement.

(ii) Virginia Regulation V700.11(b) provides that the two-acre exemption as provided under Section 528(2) of SMCRA shall not be applicable to operations which are "related". This is consistent with 30 CFR 700.11(b), which provides in pertinent part, that the Act is applicable to any person "who affects or intends to affect more than two acres at physically related sites."

In addition to its permanent program for regulating operations which affect more than two acres, Virginia has submitted draft legislation (Chapter 21 of Title 45.1 of the Code of Virginia) which the State intends to submit to the General Assembly for enactment which would regulate operations disturbing two surface acres or less. That proposed legislation, contained in Volume I, Appendix J, of the Virginia resubmission, states at Section 45.1–273(a)(2) that:

Two or more coal mining operations which are not contiguous but which are owned or operated by the same operator, are in close proximity to each other, have a total combined area exceeding two acres, and the cumulative impact of which, as determined by the division, have the same or greater [effects] of single coal mining operation in excess of two acres shall be deemed a single operation affecting more than two surface acres and subject to the applicable provisions of Chapter 19. The cumulative environmental impacts will be evaluated on the basis of the proposed plans for the multiple two acre or less operations as compared with the impacts of a single operation under the performance standards established pursuant to Chapter 19."

In Volume I, pages 166 and 167, of its program resubmission, Virginia provides a "Policy for Interpretation" which further amplifies how this proposed legislation would be interpreted. In essence, under this policy the Commonwealth would consider non-contiguous operations to be unrelated and, therefore, not subject to the full permitting, bonding, and permanent program requirements of its program unless the non-contiguous sites have a combined environmental impact comparable to that of a single operation exceeding two acres.

The relationship between Virginia's proposal for regulating operations

affecting two acres or less and their permanent program submission which pertains to operations in excess of two acres was discussed at the September 21 and 22, 1981 meeting. OSM officials noted that the language in Virginia Regulation V700.11(b) which says that the two-acre exemption is not applicable where sites are "related" was not materially different from the term "physically related" appearing at 30 CFR 700.11(b) because the concept of "related sites" would seem to include "physically related sites".

There would be considerable practical difficulty in applying the concept of cumulative impacts. Also, to the extent that the draft legislation or policy would preclude the regulatory authority from applying other criteria to determine if two non-contiguous operations, each two acres or less, are related sites, the Virginia proposal is too restrictive. The concept of relatedness, while necessarily applied on a case-by-case basis, under existing regulations and administrative case law, must encompass other criteria, such as the relative location and economic interrelationship of sites (e.g. sharing of equipment, labor, facilities) that would tend to establish a physical connection.

The Secretary believes that, even if it were possible to make objective determinations as to the possible or probable environmental effects of a particular operation and, in turn, compare that to some hypothetical or theoretical reference site, focusing on this criterion to the exclusion of other relationships tying the sites together is inconsistent with the narrow exemption intended by Section 528(2) of SMCRA and 30 CFR 700.11(b).

In the October 15, 1981 letter, Virginia addressed this concern by submitting a revised policy statement, which added the following additional paragraph:

> Throughout this policy statement, the use of the term "cumulative environmental impacts" will be consistently applied by Virginia as synonymous with the Office of Surface Mining's term "physically related."

The original concern raised with Virginia officials at the September 21 and 22, 1981 meeting was that certain language in the policy for interpretation indicated Virginia might not interpret "related sites" in the same manner as OSM. The State resolved this concern when, in the October 15, 1981 letter, it committed to apply its policy "as synonymous with the Office of Surface Mining's term 'physically related'." This assurance satisfies the Secretary's concern about the way Virginia Regulation V700.11(b) will be interpreted. The Commonwealth's proposal to establish environmental controls over these small mining operations is commendable and, if enacted, will certainly result in a comprehensive scheme for insuring environmental protection for the coal producing areas of southwestern Virginia.

In order for the Virginia proposal to be acceptable, it could not conflict with the conditionally approved permanent regulatory program by appearing to exempt mining operations which should be subject to the full standards of the permanent program. With respect to proposed legislation which has not been submitted to the General Assembly, the Secretary is not approving or disapproving the proposal at this time. The State may enact legislation to regulate mining operations that are presently exempt under Section 528(2) of SMCRA and the comparable Virginia exemption; however, the Secretary notes that such legislation would have to be consistent with the discussion in this finding. The Secretary notes that additional Federal rules relating to the two-acrea exemption question, including clarification on the "physically related" issue will be proposed soon. The Secretary is reluctant to take a position on Virginia's draft law and policy in view of these pending Federal changes. Any policy statement implementing such legislation would also have to meet these concerns as well as other changes being made by Virginia to obtain Secretarial approval, such as the revised policy on haul roads.

(iii) The original definition of "affected area" in 30 CFR 701.5 of the Federal permanent program rules states in pertinent part that affected areas include, "land or water which is located above underground mine workings." On August 10, 1981, the rule proposed on January 23, 1981 (46 FR 7904) was withdrawn and the Secretary stated in part that, "OSM is taking this action in part because it believes that the January 23, 1981, rule may unnecessarily restrict the availability of the [two acre] exemption to underground mines by including all land above underground mine workings in determining the size of a mine" (46 FR 40650).

Although the Secretary withdrew this rule and indicated an intention to reconsider whether all land above underground mine workings should be considered in determining the size of the mining operation, the original definition of "affected area" at 30 CFR 701.5 was not withdrawn and is the standard by which Virginia's program must be judged.

In its program submission, Virginia has defined "affected area" as "land or water area actually affected by subsidence or which may be affected by planned subsidence, which is located above underground mine workings." Virginia Regulation V701.5. The Virginia regulation is not consistent with the existing Federal requirement because Virginia would regulate only that surface area which is actually affected by subsidence, or which may be affected by planned subsidence. Subsidence, however, frequently does not occur until years after mining has been completed. Therefore, under the Virginia proposal it is possible that, except in situations involving longwall mining operations or similar techniques where subsidence is a planned part of the mining operation, the State may not include as part of the affected area underground mining operations where subsidence may occur.

Accordingly, the Secretary is unable to approve the Virginia definition of "affected area." As a condition of approval, Virginia must change its definition of "affected area" to include all land and water overlying underground mine workings until such time as the Secretary changes his regulations as indicated in the August 10, 1981 **Federal Register** notice.

4t. The Secretary finds that the Virginia Department of Conservation and Economic Development and other agencies having a role in the program have sufficient legal, technical, and administrative personnel and funds to implement, administer, and enforce the provisions of the program, the requirements of 30 CFR 732.15(d) and other applicable State and Federal laws. This finding is made under the requirements of 30 CFR 732.15(d).

(i) In finding 4(t)(i) of the October 22, 1980 **Federal Register** notice, the Secretary requested that Virginia provide additional information in order that he might evalute adquately the State's inspection staffing plan. In Volume I, pages 64–66, of the Virginia resubmission, additional discussion pertaining to the field inspection staff of DMLR was presented. In this discussion, Virginia assured the Secretary that the field inspection staff will be adequate to meet the requirements of the permanent regulatory program. This assurance is based on the ability of the field inspection staff to presently inspect and/or observe all permitted areas, all proposed permit areas, and all areas subject to the two-acre exemption on a monthly basis. Based on these assurances by Virginia, the Secretary approves Virginia's field inspection staffing plan.

C. Disposition of Agency and Public Comments

In three instances public comments were submitted by a collective of organizations as a group. The organizations represented all or most of the following in each instance: the Environmental Policy Institute (EPI), the Council of Southern Mountains, Inc., the Virginia Citizens for Better Reclamation, the Environmental Defense Fund, the Conservation Council of Virginia Foundation, the Rural Virginia, Inc., and the Citizen Mining Project. In addressing the comments made by these groups, the Secretary has identified the commenter as "EPI *et al.*"

I. General

1. One commenter stated that Virginia allows bonds to be *reduced* without complying with the bond *release* procedures which provide for citizen participation, and that Virginia has proposed to eliminate the informal conference from the bond release procedures. The commenter did not identify a specific Virginia regulation. Virginia Regulation V807.11(e) provides that any person with a valid legal interest which may be adversely affected by release of the bond shall have the right to file written objections to the proposed bond release with the regulatory authority within thirty days after the last publication of the notice and to request a hearing. Virginia also provides in V807.11(f) that the Division may establish an informal conference to resolve such written objections without prejudice to the rights of the objectors, the applicant, or the responsibilities of the Division. The Secretary found in his initial decision on October 22, 1980, that the Virginia bonding regulations consistent with the Federal requirements. Therefore, the Secretary will not require a change in the Virginia regulations.

2. The Environmental Protection Agency (EPA) pointed out that the reference to the Federal Water Pollution Control Act on page 240 of the Virginia Coal Surface Mining Technical Handbook is incorrectly cited as 33 USC Section 125. The correct cite is 33 USC Section 1251. This is obviously a typographical error and does not affect the substantive program because all other references to the Federal Water Pollution Control Act are correct. The Secretary presumes this will be corrected.

3. EPI *et al.* felt that Virginia had failed to prove that it has an adequate number of inspectors to meet minimum inspection requirements. In the commenters' second set of comments (November 17, 1981), they included a discussion on the effect of the number of two-acre exemptions and included an Appendix listing approximately 750 mines which they felt were not accounted for by the State in determining the adequacy of the inspection staff. In the resubmission, Virginia provided assurance that the staffing plan took into account all areas including those subject to the two-acre exemption. Based on these assurances, the Secretary finds that the inspection staffing level planned for the Virginia program operation is adequate. [See Finding 4(t)(i), above.]

4. EPI *et al.* commented that the revised DMLR Coal Haul Road Policy submitted as Attachment Five to Virginia's October 15, 1981 letter did not clearly include the concept of substantial public use. The Secretary agrees with this comment and has conditioned approval of the program on the clarification of this issue. [See Finding 4(s)(i), above.]

5. Virginia Citizens for Better Reclamation (VCBR) said that the Virginia program should be rejected because Virginia law allows haul roads to be deeded to county governments and because of Virginia's alleged failure to show that it has the legal authority to enforce environmental standards on all haul roads subject to SMCRA. The commenter considers this a major deficiency in the Virginia program.

The Secretary shares this commenter's concern. However, in the October 15, 1981 letter, Virginia included a revised policy statement regarding haul roads which requires roads conveyed to the county to be included in the permit area unless there is substantial (more than incidental) public use and the roads are actually maintained with public funds in a manner similar to other public roads in the vicinity. Because of remaining ambiguities in Virginia's position on this issue, the Secretary is requiring certain changes in Virginia policy as a condition of approval [See Finding 4(s)(i), above]. Although the revised policy statement needs to be clarified, the Secretary believes that it is strong enough to keep the deficiency from being major, in view of Virginia's evident intention to comply with the Federal requirements.

6. One commenter stated that Virginia does not offer any concrete means, either through a statute, regulations or even a policy statement to end the abuse of the two-acre exemption by excluding certain roads used as haul roads from the permitting area of the operator. The Secretary disagrees for the reasons set forth at Finding 4(s)(i), above.

7. The Virginia Surface Mining and Reclamation Association, Inc. (VMRA) requested that OSM's policies on "two-acre exemption—physically related sites" be abandoned and that the "reasonable and workable" standards proposed by Virginia be adopted. The Secretary did not object to the application of a "cumulative impacts test" but found it is not consistent with the two-acre rule because it does not encompass criteria such as the physical and economic relationships between proximate but non-contiguous sites. [See Finding 4(s)(ii), above.]

8. EPI *et al.* disagreed with Virginia's proposed policy on two-acre exemptions as it deals with physically related sites and the surface area over underground mines. They specifically objected to the "cumulative environmental impacts" test contained in the related sites portion of the policy.

The Secretary agrees that the "cumulative environmental impacts" test is difficult to apply and does not address the problem of actual physical relatedness.

The Secretary notes that the language in Virginia's regulation on this point is not objectionable. It states clearly that "related operations" will be treated as a single entity for the purpose of determining whether or not the two-acre exemption applies. At the Secretary's request, Virginia provided assurances that the term "cumulative environmental impacts" would be applied by the Commonwealth synonymously with OSM's term "physically related." Thus all related operations which physically disturb more than two acres will be regulated regardless of the amount of environmental impact of the related operations. [See Finding 4(s)(ii), above.]

9. Jewel Ridge Coal Corporation fully supported and recommended approval of Virginia's proposed law, regulations and policy for surface coal mining operations affecting two acres or less which Virginia included in its resubmission. Since under Section 528(2) of SMCRA, operations disturbing two acres or less are exempt from Federal regulation the Secretary reviewed the proposed law, regulations and policy only to the extent that they might affect the State's permanent program as it applies to operations affecting more than two acres. The concerns relating to the two-acre exemption policy are discussed in greater detail in Finding 4(s)(ii), above.

10. VMRA stated that there is apparent disagreement between OSM and Virginia officials as to how much of

the Virginia Coal Surface Mining Technical Handbook has actually been promulgated as State regulations, and stated this point places industry in the position of agreeing to a "blank check" of technical requirements. The EPA also expressed concern that the Technical Handbook may be merely guidance and not actually a regulation. Because the Virginia resubmission did not clearly demonstrate that the Virginia Technical Handbook had the legal effect of regulations and, thus would be subject to rulemaking procedures if changed, OSM requested clarification from Virginia. In the October 15, 1981, letter Virginia stated that the Technical Handbook has been duly and lawfully promulgated and its contents are enforceable as regulations. There is no question of a "blank check;" all requirements are set forth in the handbook and any changes would have to go through Virginia's rulemaking procedures as well as the program amendment procedures of 30 CFR 732.17. Thus, the industry, environmental groups and the general public would have an opportunity to comment on any proposed revisions.

11. EPI *et al.* commented that the Attorney General's opinion supplied in the October 15, 1981 letter did not address the specific legal problems raised by the differences between Virginia's program and the Federal law. The lack of a detailed Attorney General's opinion does not inhibit review of the program. The original side-by-side comparison supplied by the State, along with the issue by issue discussion of changes contained in the program resubmission, enabled reviewers to review the program thoroughly to determine compliance with Federal requirements. In addition, the public was provided access to, and granted the opportunity to comment on, the results of the Department's review during the final comment period which ended on November 17, 1981. In this case, the Secretary believes the Attorney General's Opinion, which primarily serves to certify the legal enforceability of the program changes, is sufficient. The Secretary has required the State to provide a legal opinion that new policy statements which will be furnished pursuant to conditions imposed at 30 CFR 946.11(15) and (18) are enforceable.

12. EPA stated it could not concur with the program if Virginia meant to satisfy the National Pollutant Discharge Elimination System (NPDES) requirements with the requirements of the coal regulatory program. EPA has delegated the authority for NPDES to the State Water Control Board (SWCB) and recognizes it as the only State agency in Virginia authorized to administer the NPDES program until that authority is formally transferred. The Secretary has noted the status of the NPDES program in Virginia and the fact that the SWCB has the NPDES authority in the State. Any delegation of NPDES authority to DMLR for surface coal mining operations must be processed as an action separate from the decision on the coal regulatory program under SMCRA, and it must be done through the EPA in accordance with the requirements of the Federal Water Pollution Control Act.

13. Jewel Ridge and Lambert Coal Companies recommended that the Secretary delay his decision on the Virginia proposed program because OSM is currently revising many of its regulations. They also recommended that Virginia delete from its program resubmission those regulations identical to OSM regulations which are currently being reviewed under OSM's regulatory reform effort. Upon resubmission of a State program, the Secretary, in accordance with 503(c) of SMCRA, is required to begin the process leading to his decision. The Secretary does not believe that OSM's current regulatory revision activities constitute legal grounds upon which to ignore the Congressional directive, especially when regulatory reform is an ongoing process that may well extend over a long period of time. In addition, the Secretary cannot require deletion of any requirements contained in the Virginia program unless they are determined to be inconsistent with Federal requirements. This would include provisions which correspond to Federal regulations which are in the process of being amended. Virginia will have an opportunity to amend its program to take into account any changes in the Federal law and regulations pursuant to the program amendment provisions of 30 CFR 732.17.

14. A commenter stated that the use of the standard for approval of State programs proposed on July 1, 1981 (46 FR 34340), as Virginia has suggested in its resubmission, would be illegal. The commenter further stated that his objection would not be ameliorated even if the new standard for approval is promulgated before the Secretary's final approval/disapproval decision, as the commenter believed that if this were to occur it would be necessary to return the submitted program to Virginia and allow it to resubmit. The regulation to which the commenter referred is the new definition of "consistent with", the principal standard used by the Secretary in reviewing state programs, which was promulgated during the review period for the Virginia program (46 FR 53376–53384; October 28, 1981).

Rather than require Virginia to resubmit its program, the Secretary provided a second 15-day public comment period after that rule became final to allow full public comment on the Virginia program in light of this new standard for state program review and approval (46 FR 54385; November 2, 1981). The Secretary believes that the public has been provided sufficient opportunity to comment on the Virginia program under the new State program approval standard, especially since the public has been aware of the proposed rule change on the standard of review since July 1, 1981.

15. A commenter objected to the participation of J. Steven Griles, Deputy Director of OSM, and Dean Hunt, Assistant Director for Technical Services and Research, in the consideration of the Virginia program. The commenter alleged that in their positions prior to joining OSM these officials played a prominent role in developing the Virginia program, in advocating its acceptance by OSM during the initial submittal period, and in preparing the resubmission. The Secretary has determined that Mr. Griles and Mr. Hunt have retained open minds on all issues in this matter, fully considered the comments of all interested parties, vigorously challenged many views advanced by interested parties (including many of those advanced by the Commonwealth), demonstrated no bias for or against any interested party, and thus that they should not be precluded from advising the Secretary on this matter. In any event, the recommendation to conditionally approve the Virginia program was made by James R. Harris, Director of OSM, and the decision on Virginia's resubmission ultimately is a personal decision which has been made by the Secretary.

16. Jewel Ridge and Pittston Coal Companies pointed out that Virginia's resubmission includes regulatory provisions parallel to sections of OSM's regulations which have been suspended. They further stated that the U.S. District Court of the District of Columbia ordered the Secretary, on May 16, 1980, to disapprove any regulation submitted as part of a state program which was comparable to an OSM regulation that had been suspended by the Secretary or set aside by the Court [*In re: Permanent Surface Mining Regulation Litigation*, Civil No. 79–1144]. The commenters referred specifically to Virginia

Regulation V783.20, fish and wildlife resources and information.

The Court's order was stayed on August 15, 1980. The stay has the effect of allowing the Secretary to approve state program provisions equivalent to remanded or suspended Federal provisions. As a result of this order, the Secretary need not affirmatively disapprove state provisions similar to those Federal regulations which have been suspended or remanded by the District Court where the State has adopted such provisions in a rulemaking or legislative proceeding which occurred after the date of the Round II District Court decision, since such state regulations clearly are not based solely upon the suspended or remanded Federal regulations. 45 FR 69979 (October 22, 1980). Since Virginia's regulations were adopted after the date of the Round II District Court decision, they are not subject to the Court's May 16, 1980, Order.

17. EPI *et al.* stated that Section 503(c) of SMCRA prohibits Virginia from submitting changes to any portion of the program which was approved in the first submittal. The commenter stated that to alter that part of the program which already has been approved, Virginia must first receive approval of the disapproved portion and then submit a proposal to amend its program. Section 503(c) of SMCRA contains no provision prohibiting a state from proposing amendments to the approved portion of its program as part of its resubmission. Rather, that section states in pertinent part, "The State shall have sixty days in which to resubmit a revised state program or portion thereof." The changes made by Virginia to portions of the program previously approved were submitted pursuant to 30 CFR 732.17, and a full public comment period on all such changes was provided. To accept this commenter's interpretation of Section 503(c) of SMCRA would result in a meaningless and counter-productive exercise.

18. One commenter stated that if the Virginia program was conditionally approved the State should be required to satisfy the conditions as quickly as possible. The Secretary agrees with this comment. After discussion with Virginia officials (Administrative Record No. VA 354), the Secretary has determined that the time periods for meeting the conditions set forth in Part 946 of this **Federal Register** notice constitute the shortest periods reasonably practicable for making the required changes.

II. Designating Lands Unsuitable

1. VCBR, EPI *et al.* and another commenter said that Virginia Regulation V764.13 is little more than a thinly disguised attempt to burden citizen petitioners with unnecessary requirements so that petitions can be found incomplete and thus rejected. They further stated that the Virginia regulation was objectionable because it allegedly sets forth a higher threshold for filing a petition than SMCRA either requires or intends. The Secretary finds the Virginia proposal acceptable in light of Virginia's confirmation that petitioners would not be required to research or otherwise collect information not already known to them. This issue is more fully discussed in Finding 4(k)(ii), above.

2. EPI *et al.* stated that Virginia Regulation V764.15(a)(7) will restrict and hamper public participation because it will not allow the filing of a petition for designating lands unsuitable for mining on a permit application up to the close of any informal conference held pursuant to 30 CFR 786.14. The commenters pointed out that 30 CFR 764.15(a)(7) allows approximately 60 days after the last public notice of a permit application to file a petition, while Virginia's program would allow only 30 days for the filing of a petition. The Secretary finds Virginia Regulation V764.15(a)(7) to be consistent with the Federal requirements as discussed in Finding 4(k)(ii), above.

3. The Secretary received comments supporting and comments expressing concern about, Virginia's definition of substantial legal and financial commitments (SLFC). VMRA and others stated that the definition of significant legal and financial commitments in the Virginia program is in harmony with SMCRA and should be approved by the Secretary. For the reasons set forth in Finding 4(k(iii), the Secretary disagrees with this comment. It is important to note that the fact an operator cannot demonstrate SLFC does not mean he is precluded from mining his holdings. It means only that the area in question can be the subject of a petition to designate the area as unsuitable for all or certain types of mining. VCBR and EPI *et al.* stated that the major difference between the Virginia and the Federal definitions of substantial financial and legal commitment is Virginia's inclusion of mineral leases as a "substantial financial and legal commitment." The Secretary agrees with this comment and is requiring a change in the program prohibiting Virginia from making a determination of SLFC solely on the basis of mineral leases. [See Finding 4(k)(iii), above]

4. VCBR and EPI *et al.* commented that Virginia Regulation V764.17 should be rejected because it allows for cross-examination of witnesses in hearings pertaining to designation of lands unsuitable for mining, allegedly contrary to the Federal regulations and the intent of SMCRA. The commenters went on to say that a regulatory agency's hearing officer will not have the judicial training and would hence not have the training necessary to prevent abuse of the process or harassment of witnesses. The Secretary addressed the concern regarding cross-examination in his initial decision of October 22, 1980 [45 FR 69988] and found it acceptable. This comment is outside the scope of this rulemaking.

III. Permitting

1. VMRA objected to the OSM requirement that Virginia change its definition of "affected area" to include the entire area overlying deep mine workings. The Secretary cannot accept the definition of "affected area" presented by Virginia because it is not consistent with the Federal requirements. The Virginia definition would result in the regulation of only that surface area which is actually affected by subsidence or which may be affected by planned subsidence. [See Finding 4(s)(iii), above]

2. EPI *et al.* noted that Virginia Regulation V778.13(d) requires that an applicant for a permit list all permits held subsequent to 1975 while 30 CFR 778.13(d) requires the applicant to list all permits held subsequent to 1970.

The preamble to the Federal regulations (44 FR 15022) points out that the 1970 cutoff date was established in response to comments which contended that information regarding permits prior to 1970 will have little present relevance. Section 507(b)(3) of SMCRA does not establish a specific cutoff date. The Secretary believes that the 1975 limit provided by Virginia is adequate, as this cutoff date will result in securing almost eight years of historical permit information.

3. EPI *et al.* commented on the failure of the Virginia program to require listing "Special Orders" as part of a permit application. They stated that citizens were required to pay to have records provided by the State and that it would be difficult to obtain all records since citizens would not be aware of other names under which an operator may have obtained a permit. This issue was discussed at the September 21 and 22, 1981 meeting. Virginia officials stated that all records are maintained by permit numbers and that they had quick access to all permit numbers previously held by an operator. Since the application contains a list of names the

applicant used previously it would be a simple matter to check all relevant enforcement records. In addition, the State has agreed not to charge for providing citizens other permit numbers or listings of "Special Orders" under those permits (Administrative Record No. VA 345).

4. EPI *et al.* stated that Virginia Regulation V779.14(b)(1) appears to impermissibly limit the extent of the area from which test borings or core samples should be taken to be analyzed. The Secretary has found the Virginia regulation consistent with 30 CFR 779.14(b)(1). Virginia has included provisions to allow the use of outcrop or highwall exposures for study and analysis as a part of the study required for the geology description and this is acceptable as a means of acquiring geological information.

5. EPI *et al.* stated that Virginia Regulation V779.14(b)(2) appears to impermissibly limit the area in which the Division could require test borings or core samples because the Virginia Regulation provides that the Division may require test borings or core samples to greater depth within the permit area or adjacent areas while 30 CFR 779.14(b)(2) provides that these borings or samples may be required within the proposed permit area or areas outside the proposed permit area. Virginia Regulation V779.14(b)(2) is consistent with 30 CFR 779.14(b)(2) as the definition of adjacent area in 30 CFR 701.5 places that area outside of the permit area.

6. EPI *et al.* stated that a pattern of limitation with respect to ground water makes the Virginia program unacceptable because it does not meet the requirement of Section 503(a)(7) of SMCRA that state regulations be consistent with the Federal regulations. The variations noted by this commenter are: the use of adjectives such as "known" uses and "useable" groundwater in Virginia Regulation V783.15(a); changing "and" to "or" in Virginia Regulation V780.21(b)(2); deleting the reference to "groundwater" in Virginia Regulation V780.21(b)(1); and substitution of "minimization of adverse effects" for "adverse effects" in Virginia Regulations V780.21(a) (1) and (3). After a thorough review of the Virginia regulations, including the Virginia Coal Surface Mining Technical Handbook, regarding protection of the hydrologic balance, the Secretary finds that the Virginia regulations in regard to groundwater are consistent with the Federal regulations as required by Section 503(a)(7) of SMCRA.

7. EPI *et al.* objected to Virginia's alternative provisions in Virginia Regulation V786.21 for pre-existing structures, and stated that it would, in effect, exempt certain existing structures from certain performance standards. In Virginia Regulation V786.21(c) the performance standards required for existing structures have been enumerated by Virginia to clarify the requirements of 30 CFR 701.11 regarding the applicability of the Federal regulations to existing structures. In Findings 4(b)(i) (45 FR 69982) and 4(d)(iv) (45 FR 69986) of the initial decision regarding the Virginia program, the Secretary found that fourteen of the twenty-two performance standards proposed by Virginia met Federal requirements. In its resubmission of August 13, 1981, Virginia has satisfied the concerns of the Secretary regarding the eight remaining performance standards. Therefore, the Secretary finds Virginia Regulation V786.21(c) acceptable. [See Finding 4(d)(iii), above]

8. The EPA commented that Virginia regulations requiring permitting to comply with all Federal and State statutes and regulations should specifically reference the applicable statutes or regulations which apply. The EPA went on to identify the provisions of the Virginia regulations and the Virginia Coal Surface Mining Technical Handbook which it believed should contain specific references. While the Secretary agrees that cross-referencing can be helpful in many situations, there is no authority which allows the Secretary to demand specific references of this type, provided a state program requires compliance with all substantive provisions of Federal law.

9. The EPA commented that Virginia Regulation V786.21(c)(12)(iv) should contain a specific reference for requiring a permit from the U.S. Army Corps of Engineers under Section 404 of the Clean Water Act for cases where the State approves construction of part of a road in the channel of an intermittent or perennial stream. A specific reference is not needed in Virginia Regulation V786.21(c)(12)(iv), since Virginia Regulation V786.17(c) requires the permittee to demonstrate that he or she is in compliance with all applicable State and Federal laws and regulations before a permit is issued.

10. A commenter said that Virginia Regulations V786.27(b) (1) and (2) improperly omit the provision in 30 CFR 786.27(b) (1) and (2) which requires permits to contain a stipulation allowing the regulatory authority to enter a mine site. The Secretary found that Virginia Regulations V786.27(b) (1) and (2) require such a stipulation as part of the permit terms.

11. EPI *et al.* noted that under Virginia's administrative review process the Director of the Department of Conservation and Development reviews both permit decisions and hearing officer decisions on show cause orders pursuant to Virginia Regulation V787.11(c), with the authority to independently modify such decisions. The commenter stated that minimal Administrative Process Act procedures (i.e., no ex parte contact, equal opportunity to present arguments, etc.) must be applied. The Secretary approved this provision of the Virginia program in his initial decision [45 FR 69977–70000; October 22, 1980] so this comment is outside the scope of this decision. In addition, the requirements of Virginia's Administrative Process Act would apply to any ageny action in a contested case.

12. EPI *et al.* stated that Virginia Regulations V788.14, V788.16 and V788.18 do not establish procedures or standards for public participation in the revision or renewals of permits and the transfer, sale, or assignment of rights. The Virginia regulations are consistent with 30 CFR 788.14, 788.16 and 788.18 and require no changes.

IV. Performance Standards

1. EPA commented that the term "best technology reasonably available" and the definition for that term in Virginia Regulation V701.5 conflict with the SMCRA term "best technology currently available" and may interfere with the attainment of the Clean Water Act Section 303 water quality objectives. The Secretary agrees with this comment and is requiring Virginia to change this term and definition to make them consistent with the requirements of SMCRA with regard to "best technology currently available." [See Finding 4(c)(ii), above]

2. EPA commented that Virginia Regulations V816.21(c)(3), V816.38 and V817.38 providing for in-stream impoundments would have to be revised if EPA promulgates regulations it is presently considering. These EPA regulations, if promulgated, would designate in-stream impoundments as waters of the United States, would require an NPDES permit prior to point source discharge into the impoundment and would prohibit in-stream impoundments *per se* as sedimentation ponds. The Secretary must base his decision to approve or disapprove the Virginia program on existing Federal standards. If the standards upon which the Secretary's decision is made are later changed, the Secretary can require

the State to amend its program accordingly pursuant to 30 CFR 732.17.

3. EPI *et al.* argued that the Secretary should reject Virginia Regulations V816.22(e)(3) and V817.22(e)(3), which allow an alternative for topsoil removal. These provisions would allow overburden materials to be used in place of topsoil without a comparison between topsoil and selected overburden when the natural slopes are in excess of 60 percent. The commenter asserted that under this alternative the operator need not show that selected overburden is equal to or better than the native topsoil and also questioned the method to be employed for determining acidity. The Secretary has found that Virginia Regulations V816.22(e)(3) and V817.22(e)(3) are consistent with OSM requirements. [See Finding 4(c)(iv), above]

4. The Virginia Cooperative Extension Service expressed concerns relating to the plant growth medium properties. The commenter suggested that in order to prevent revegetation from being severely hampered, heavy compaction of minesoil material during placement should be avoided, that soil testing of the surface soil and application of recommended plant nutrients be required, and that the 10–12" surface layer of solid be free of boulders and rocks larger than 3–4" in diameter. Virginia Regulations V816.24(a)(2) and V817.24(a)(2) provide that topsoil and other materials shall be redistributed in a manner that prevents excessive compaction of the topsoil and Virginia Regulations V816.25 and V817.25 require soil testing and the application of any required amendments. There is no specific provision in 30 CFR Chapter VII or SMCRA which addresses the maximum size of rock allowed in the topsoil materials. However, both the Federal regulations and Virginia regulations require the removal and subsequent replacement of the topsoil or approved substitutes in a manner consistent with the approved postmining land uses. Therefore, the Secretary believes no changes are needed.

5. EPI *et al.* stated that Virginia Regulations V816.31, V817.31, and V816.32 permit the use of methods and designs other than sediment ponds as sediment control structures. They contend that this is inconsistent with Federal requirements and the position taken in other state programs. The Secretary disagrees with this comment. Generally, Virginia Regulation at V816.32(a) and V817.32(a) do require sediment ponds. The limited exemptions from this requirement for small areas granted at Virginia Regulations V816.32(b) and V817.32(b) is consistent with that provided by 30 CFR 816.42(a)(3) and 817.42(a)(3). Therefore, the Secretary believes no changes are needed.

6. The EPA, EPI *et al.* and others commented that Virginia Regulations V816.37(b) and V817.37(b) allow the State, under certain conditions, to grant exemptions from effluent limitations. They pointed out that the District of Columbia Circuit Court has interpreted Section 702 of SMCRA as prohibiting the Department of the Interior from alllowing less stringent effluent limitations than those required by EPA. [In re: *Surface Mining Regulation Litigation*, 627 F. 2d 1346, 1366 (D.C. Cir. 1980)] The Secretary has found that Virginia Regulations V816.37(b) and V817.37(b) are not acceptable and will require Virginia to change or delete them. [See Finding 4(c)(x), above]

7. VMRA stated that the effluent standards require an operator to improve natural and/or existing water quality where such quality does not meet minimum standards. The commenter felt that operators should not be charged with correcting situation which they did not create. The Secretary disagrees with this comment because Sections 515(b)(8) and 515(b)(10) of SMCRA contain provisions requiring operators to meet effluent limits during surface coal mining and reclamation operations. [See Finding 4(c)(x), above]

EPI *et al.* stated that Virginia's proposal to use coal processing waste in sediment pond construction is inconsistent with 30 CFR 816.40(o) and noted that the Secretary rejected Virginia's approach as submitted in its initial proposal (45 FR 69984, October 22, 1980). The commenter also stated that Virginia has deleted both performance and design standards from the state regulations and placed them in the Virginia Coal Surface Mining Technical Handbook without specifying whether or not the standards are enforceable as regulations. The commenter pointed out that even if the standards are enforceable they could be changed without notice or public comment or formal amendment of the State program, a clear contradiction of SMCRA. Virginia has addressed the Secretary's concerns as stated in the previous rejection of the Virginia proposal for use of coal processing waste in sediment pond construction. [See Finding 4(c)(v), and response to comment I, 10, above]

9. EPI *et al.* stated that by substituting the term "best *appropriate* technology available" in Virginia Regulation V817.59 for the term "best technology currently available" found in 30 CFR 817.59, Virginia has weakened the intent of this provision. In its resubmission, Virginia now uses the term "best technology reasonably available." The Secretary has, with the exception of Virginia Regulation V817.59, found that the term used by Virginia throughout its regulations and the definition for the term is inconsistent with the Federal requirements. [See Finding 4(c)(ii), above]

10. EPI *et al.* stated that the Virginia regulations fail to require a preblast survey consistent with federal requirements. Specifically, they argued that the Virginia requirements fail to address the quality and quantity of well water and that the Virginia regulations simply require monitoring of the effects of operations rather than a survey prior to blasting. One Secretary disagrees with this comment. The purpose of the survey is to ascertain the quality of well water in an area prior to the initiation of mining operations in order to determine if the mining negatively affects the water supply. This provision protects both the operator and individuals in the area. Virginia requires a preblast survey and Virginia Regulation V816.62(b) makes the condition of well water a part of that survey. The State will obtain the necessary information concerning ground water via the information submitted by the operator in his permit application. In addition, Virginia Regulation V816.52 requires monitoring of ground water to keep track of the effect of operations on "the quantity and quality of water in the ground water systems in the permit and adjacent areas."

11. EPI stated that Virginia Regulation V816.65(b) is a vague standard and appears to provide a large loophole in the requirement that the operator follow the blasting schedule. The Secretary disagrees with this comment. 30 CFR 816.65(b) allows the regulatory authority to determine what hazardous situations would be grounds for changes in the blasting schedule and Virginia regulation merely identifies those hazardous situations which could result in changes to the scheduled detonation of explosives.

12. EPI stated that although Virginia Regulation V816.65(e) provides that the Division may require air blast measurement, the Division should require air blast measurement of all blasts. The Secretary disagrees. 30 CFR 816.65(e)(4) provides that the regulatory authority may require an air blast measurement of any or all blasts and may specify the location of such measurements and the Secretary is not empowered to require States to exceed

the requirements in the Federal regulation.

13. One commenter stated that the peak particle velocity of one inch per second is not justified and that allowable peak particle velocity should be determined on a case-by-case basis. The Secretary must base his decision to approve or disapprove the Virginia regulation on the existing Federal regulation at 30 CFR 816.65(i) which limits the peak particle velocity to one inch per second. If the standards upon which the Secretary's decision is made are later changed, the Secretary can require the State to amend its program accordingly pursuant to 30 CFR 732.17.

14. EPI commented that OSM cannot approve Virginia Regulations V816.71(o) and V817.71(o) pertaining to gravity transport of spoil since these sections have not been formally adopted by Virginia. The Secretary agrees.

Virginia Regulations V816.71(o) and V817.71(o) were submitted as regulations to be adopted pursuant to OSM's final rule on gravity transport of spoil, published on July 17, 1981 [46 FR 37232–37235]. The Secretary has reviewed the proposed regulations submitted along with the Virginia resubmission however, and subject to public comment, when they are submitted as a program amendment, they appear to be consistent with the Federal regulation.

15. The Bureau of Mines commented that Virginia's proposal regarding the lack of spoil for regrading on previously mined land was worthy of consideration and suggested that perhaps the excess spoil from other sites could be used to alleviate spoil deficiency problems in previously mined areas if these problems coexist in adjacent areas. Virginia Regulations V816.76 and V817.76 provide that the regulatory authority may approve the placement of spoil not needed to restore the approximate original contour and reclaim land within the permit area on other specific areas where environmental benefits will occur. Although the Secretary could not approve all parts of the proposal, the portion allowing spoil to be placed on another area under a permit issued pursuant to the Act and on abandoned mine lands under an Abandoned Mine Lands contract were approved. [See Finding 4(c)(xii), above]

16. EPI *et al.* stated Virginia's zone fill provision for disposal of excess spoil should be disapproved. The commenter went on to identify the Federal Standards and requirements which it believed were not met and the standards and requirements which should be included before the provision could be accepted.

The Secretary agrees; he originally rejected Virginia's proposal for disposal of excess spoil (45 FR 69984, October 22, 1980). The resubmitted regulations were not changed and are still not consistent with the Federal standards. Virginia also submitted proposed regulations V816.75 and V817.75 which are separate from its enacted regulation. If submitted as finalized regulations, the proposed regulations, subject to public comment, appear to meet the standards of Section 515(b)(22) of SMCRA and appear to be acceptable with one minor change. [See Finding 4(c)(vi), above]

17. EPI *et al.* stated that Virginia Regulations V816.76(a), (b) and (c) and V817.76(a), (b) and (c) allowing disposal of spoil off the permitted area are contrary to the provisions of the Federal Act and regulations and could cause massive environmental harm. The Secretary agrees in part with this comment and has required that Virginia delete the provision in Virginia Regulations V816.76(c) and V817.76(c) which allows the disposal of excess spoil on any area with the approval of the regulatory authority. However, the Secretary has found that Virginia Regulations V816.76(a) and (b) and V817.76(a) and (b) are consistent with Section 515(b)(22) of SMCRA. [See Finding 4(c)(xii), above]

18. VMRA stated that they felt the Secretary should approve Virginia Regulations V816.76 and V817.76, which would allow the disposal of excess spoil on unpermitted areas such as lawns, fields or commercial development sites at the request and with the approval of the landowner. The Secretary cannot approve this Virginia regulation and is requiring Virginia to delete this regulation in order to make the Virginia program consistent with the requirements of Section 515(b)(22)(B) of SMCRA. [See Finding 4(c)(xii), above]

19. EPA pointed out that Virginia has omitted requirements comparable to those in 30 CFR 816.95(b)(5) and (7) and 817.95(b)(5) and (7) pertaining to the control of fugitive dust by limiting the speed of vehicles and restricting travel of unauthorized vehicles. On May 16, 1980, the District Court of the District of Columbia remanded all of OSM's fugitive dust control measures except those dealing with the prevention of wind erosion. [*In re: Permanent Surface Mining Regulation Litigation*, Civil No. 79–1144] Therefore, the Secretary cannot require that these provisions be included.

20. The EPA commented that the air monitoring equipment and monitoring should be dictated by an air monitoring plan rather than by the Department of Conservation and Economic Development as stated in Virginia Regulations V816.95(d) and V817.95(d). EPA recommended that the regulations be revised to correspond with 30 CFR 816.95(d). The Virginia regulations merely employ the discretion allowed in 30 CFR 780.15(b)(1), which states that an air quality monitoring program shall be provided if required by the regulatory authority. In addition, on May 16, 1980, the District Court of the District of Columbia remanded 30 CFR 817.95. [*In re: Permanent Surface Mining Regulation Litigation*, Civil No. 79–1144] Therefore, the Secretary cannot require Virginia to include that regulation in its program.

21. VCBR expressed several concerns with Virginia Regulations V826.13 and V816.107 which would allow less than total highwall elimination where sufficient spoil is not available to eliminate the highwall completely because of previous mining. The commenter asserted that because insufficient spoil on previously mined lands is a problem common throughout all of Appalachia, it does not constitute a problem based on local conditions in accordance with the "state window" provision of 30 CFR 731.13. Second, the commenter believed that the State's alternative would lead to abuse. An example was cited where a Virginia operator was given a mine permit variance which allowed highwalls to be eliminated only to "whatever extent possible" because insufficient spoil remained as a result of previous mining; however, the same permit also allowed the operator to dispose of spoil in fills. Third, the commenter stated that the Virginia provision differs substantially from a draft proposed regulation developed by OSM.

In his initial decision of October 22, 1981, the Secretary disapproved Virginia's alternative to 30 CFR 816.101 and 817.101, listing six important considerations (45 FR 69982–69983). Since this decision, OSM has promulgated a final rule establishing the standards to be used in the review and approval of a state program, 30 CFR 732.15(a). As part of this rule change, 30 CFR 731.13, which required an alternative to be justified on the basis of local conditions was deleted (46 FR 53384). Under the new rule, State provisions which are as effective as the Federal regulations in meeting the purposes of SMCRA are consistent with the Federal regulations. An additional public comment period was provided by OSM on the Virginia program in order to

accomodate review under this new standard.

In addition, Virginia, in its resubmission, has revised the alternative to meet the six concerns expressed by the Secretary. The revised Virginia rules on this topic would not allow the situation identified by this commenter to occur, because the disposal of spoil in fills is prohibited unless the spoil is unnecessary to achieve approximate original contour. Based on the revisions and subsequent information provided by Virginia at the September 21 and 22, 1981 meeting, the Secretary has found the Virginia provisions acceptable. With regard to Virginia's deviation from OSM's draft proposed regulation on restoration of previously mined lands, this proposed regulation cannot be considered in the Secretary's decision because it is not final and effective. If the Virginia provisions are not consistent with the final Federal regulations, the State will be required to amend its program pursuant to 30 CFR 742.17. [See Finding 4(c)(iii), above and comment 22, below]

22. EPI *et al.* stated that Virginia Regulations V816.107 and V817.107 should be rejected because they are allegedly inconsistent with Sections 515(b)(3) and 515(d)(2) of SMCRA which require that mined land be returned to its approximate original contour and that the highwalls be eliminated. The commenter went on to suggest safeguards which should be imposed if it is determined that highwalls can be left on previously mined areas.

As was discussed in the October 22, 1980 **Federal Register** notice (45 FR 69982), many areas mined before SMCRA was enacted were left in an unreclaimed state and no effort was made to restore them to AOC. It has become economically and technologically feasible to re-mine some of these sites, but frequently it is imposible to obtain sufficient overburden and spoil to return the site to the original contour of the land or to eliminate completely the newly created highwall. In most cases remining these sites will lead to noticeable improvements in overall environmental quality, since the areas will be regraded, stabilized, revegetated and subjected to much improved drainage and erosion control. In every case there should be much less highwall left than was the case before the remining began.

At Section 101(h) of SMCRA, Congress found that:

> there are a substantial number of acres of land throughout major regions of the United States disturbed by surface and underground coal [mining] on which little or no reclamation was conducted, and the impacts from these unreclaimed lands impose social and economic costs on residents in nearby and adjoining areas as well as continuing to impair environmental quality.

Congress stated at Section 102(h) of SMCRA that one purpose of the Act is to:

> promote the reclamation of mined areas left without adequate reclamation prior to the enactment of this Act and which continue, in their unreclaimed condition, to substantially degrade the quality of the environment, prevent or damage the beneficial use of land or water resources, or endanger the health or safety of the public.

The Secretary believes that remining these abandoned areas will do much to accomplish Congress' intent even if complete highwall elimination is not always possible. This is especially true in view of the safeguards Virginia has instituted to protect against misuse of this exception to highwall elimination.

Section 515(b)(3) of SMCRA requires that operators restore the "approximate original contour" and that highwalls be eliminated. Section 515(d)(2) requires that "the highwall be eliminated and AOC restored."

There is no indication in these Sections whether or not Congress intended it to encompass previously mined areas. The Secretary believes that SMCRA must be considered as a whole and that, where possible, individual requirements read together to achieve the multiple purposes of SMCRA. Accordingly, the Secretary construes the term "original" or "approximate original contour" to mean the contour existing at the site when present-day operators apply for permits, not that which naturally existed prior to any mining. He also construes the requirement that "the highwall" be eliminated to refer to the highwall by the present-day operator, not that which may have been left by earlier mining. This interpretation is supported by the legislative history, as well as by Congress' desire as expressed in Sections 101(h) and 102(h) that abandoned lands be reclaimed. Congress did not intend that operators be required to disturb other areas in order to obtain sufficient spoil to eliminate highwalls. [H. Rep. No. 95–218, 95th Cong., 1st Sess. 96–1.]

23. EPI *et al.* commented that it was not satisfied with Virginia's response to the concern raised by OSM that Virginia Regulations V816.107 and V817.107 do not assure that all available spoil will be kept on the bench and not placed in fills when mining previously mined areas. The commenter states that Virginia Regulations V816.107 and V817.107 might require highwalls to be left because they require that remaining slope not exceed 1v:2h (50%). However, these regulations relate to backfilling on nonsteep slope, previously mined areas. Virginia Regulation V826.13, which relates to backfilling on *steep slope*, previously mined areas contains no such limitation and provides that the backfill must achieve a 1.3 factor of safety. [See Finding 4(c)(iii), above.]

24. EPI *et al.* asserted that Virginia's regulations on haul roads were inconsistent with the Federal requirements and should, therefore, be disapproved. The commenter pointed out that the haul road regulations included in Virginia's initial proposal were rejected [45 FR 69985; October 22, 1980] and urged that Virginia Regulations V816.150–158 and V817.150–158 of the resubmission be similarly rejected. The commenter further stated that Virginia's regulations are inadequate to protect the environment in the way Congress intended.

The haul road regulations in Virginia's initial submission were disapproved by the Secretary as required by the U.S. District Court for the District of Columbia for the reasons discussed in comment 16 in the *GENERAL* section above. However, the haul road regulations contained in the resubmission were adopted after the date of the Round II District Court decision. The Secretary reviewed them and found that they do not conflict with the requirements of SMCRA. Once OSM has promulgated its regulations on haul roads, Virginia's regulations will be reviewed to determine their consistency with the new regulations. If deficiencies are found, Virginia will be required to amend its program pursuant to 30 CFR 732.17(d).

25. EPI *et al.* questioned Virginia Regulations V816.157 and V817.157, which waive reconstruction requirements for existing roads where it can be demonstrated that reconstruction would result in greater environmental harm. They stated that they disagreed with OSM's acceptance of Virginia's statement that the provision does not provide an exemption to the performance standards for haul roads and argued that the program should not be approved until the provision is deleted. The Secretary's concern with these haul road regulations was that they might be read to exempt operators from meeting environmental performance standards, particularly normal maintenance requirements, with respect to roads that existed prior to the mining operation. Virginia's interpretation that such roads were not exempted does not leave the regulations without effect. The Secretary assumes that under Virginia's interpretation of its

regulations, the operator may not be required to reconstruct roads to meet design standards provided that such roads are maintained in accordance with all other roads and can meet all applicable performance standards.

26. EPI *et al.* stated Virginia Regulations V826.12 (b) and (g) relating to steep slope mining do not provide the same environmental and safety protection as 30 CFR 826.12(b) because they allow the lowering of the static safety factor below 1.3 and allow some highwall to remain if a road or ditch is left at the top of the backfill. The commenter felt that this is contrary to Sections 515 (d)(2) and (e) of SMCRA and that it might create problems of slope failure in the backfill area. The Secretary agrees that Virginia's program is inconsistent with the Federal provisions and has required Virginia to revise its program to correct the deficiency with repect to allowing highwalls to remain. This concern is discussed in greater detail in Finding 4(c)(vii), above. With regard to the lower static safety factor, the Secretary has thoroughly evaluated the additional rationale provided by Virginia in its resubmission and interprets Virginia's provision as requiring a minimum static safety factor of 1.2. Further, the Secretary believes that the environmental safeguards intended by the Federal requirements will be maintained as Virginia requires substantial investigation and planning prior to allowing this lower static factor of safety to be used. Based on the technical justification submitted by the State, the Secretary finds the provision acceptable and will not require a change to the program. [See Finding 4(c)(vii), above.]

27. VMRA stated that for steep slope mining it was unnecessary and unreasonable to require the vertical portion of the highwall to be shaved and blended into the surrounding terrain when roads or drainage structures are located at the top of the backfilled area. The commenter further stated that this practice creates safety hazards for workers, exposes additional area to erosion, and is inconsistent because vertical slopes are allowed on other areas. The Secretary disagrees with this comment because Section 515(b)(3) of SMCRA requires that the mined areas by returned to their approximate original contour at the completion of mining. The Secretary interprets this to mean that all highwalls must be eliminated except in the very narrow circumstances pertaining to previously mined areas as discussed at Finding 4(c)(iii), above.

28. The EPA commented that the effluent limitations contained in the Virginia Coal Surface Mining Technical Handbook pages 244–248 should be identified by units. Virginia Regulation V816.37 states that the effluents shall be governed by the standards set forth in the NPDES program under the Federal Water Pollution Control Act (FWPCA) and the rules and regulations promulgated thereunder, and the units are thereby incorporated by reference.

29. The EPA commented that the requirement for monitoring surface water discharge once per week specified in Virginia Coal Surface Mining Technical Handbook, Surface Water Monitoring Program (p. 250) was inadequate. They felt that in order to properly characterize an effluent, samples would have to be taken more frequently. Virginia Regulation V816.52(b)(1) requires that monitoring be adequate to measure the discharges from the permit area as does 30 CFR 816.52(b)(1). Under 30 CFR 816.52(b)(1), the regulatory authority has discretion to determine the frequency of collection, and the Secrefary is not empowered to require States to go beyond the requirements in his regulations. The frequency of monitoring established in the Technical Handbook is intended to meet EPA reguirements for NPDES permits. [See page 243, Volume II of the Virginia resubmission.]

V. Enforcement

1. EPI *et al.* stated that the Virginia CSMCRA, Section 45.1–251(a) still allows trial *de novo* and should be rejected. Section 45.1–251(a) provides that in the event the jury trial *de novo* provision contained in that section is disapproved by the Secretary, the provision shall be severed from the Virginia act and shall be of no effect. The Virginia resubmission included an opinion of the Virginia Attorney General that the Secretary's disapproval of this provision on October 22, 1980 (45 FR 69998–69999), severed the provision from the Virginia statute. Therefore, the Secretary will not require a change in the Virginia law. [See Finding 4(q)(i), above]

2. EPI *et al.* stated that the narrative portion of Virginia's submission is deficient because it does not provide procedures for processing administrative request, procedures for show cause hearings or procedures in accordance with Section 554 of the Federal Administrative Procedures Act (APA). The Secretary approved this portion of the Virginia program in his initial decision [45 FR 69990–69991]. Thus, this comment is outside the scope of the present decision. Show cause and other administrative review proceedings are handled pursuant to the Virginia Administrative Process Act and specific provisions in the Virginia program which provide procedures similar to those required under SMCRA. The Secretary cannot require the States to duplicate the procedures and provisions of Section 554 of the Federal APA.

3. EPI *et al.* stated that in its resubmission, Virginia failed to designate its inspectors as "Authorized Representatives of the Director" for the purpose of issuing cessation orders as required under the Virginia CSMCRA Sections 45.1–245 (A) and (B). VMRA, on the other hand, stated that it was unacceptable to allow Virginia to authorize its inspectors to issue cessation orders without approval from their supervisors. VMRA contended, based on past experience, that Virginia inspectors are often young, inexperienced, and unqualified to judge complex situations, and felt such a provision would be acceptable only if OSM agreed to accept liability for damages incurred because of improperly issued cessation orders.

In its resubmission, Virginia identifies the authorized representatives of the Director in Volume I, Appendix G. The Secretary found Virginia's designation acceptable except with regard to the issuance of cessation orders for imminent harm or danger. The Secretary has required a change in the Virginia program to allow the inspector to issue such cessation orders even if he or she is unable to contact a supervisor. [See Finding 4(j)(i), above] Virginia has assured the Secretary in its program that it will have adequate qualified staff available to implement the permanent program.

4. EPI *et al.* argued that Virginia Regulation V840 11(d)(1) regarding carrying out of inspections on an irregular basis is deficient because it omits the phrase "so as to monitor compliance at all operations, including those which operate nights, weekends or holidays" as contained in 30 CFR 840.11(d)(1). Further, they stated that the phrase "irregular times" as used in the record of the September 21 and 22, 1981 meeting was not contained in the State's regulations, thereby negating the contention of the State that such inspections are authorized.

The use of the phrase "irregular times" in the record of the September 21 and 22, 1981 meeting was inappropriate since the discussions at the meeting involved the term "irregular basis" as contained in the State regulations. Regardless of this misstatement, the Secretary believes that the assurance by

Virginia officials that their regulation encompasses night, weekend and holiday inspections is adequate and it is a binding part of the conditionally approved program. Based on this policy statement by Virginia, the Secretary accepts the Virginia provision as consistent with the Federal rule.

5. VCBR and EPI *et al.* objected to Virginia Regulation V840.11(e) because it provides for inspection of inactive permits and abandoned sites as deemed necessary, but not less than semi-annually, whereas 30 CFR 840.11 (a) and (b) requires monthly inspections. In addition, no definition of "inactive" site was provided. The commenter further contended that a site should be considered active until the bond is released. EPI also stated that the State requirements were not even consistent with the new rules OSM is about to propose. However, the State need not meet rules which are merely in draft or proposed form. In the September 21 and 22, 1981 meeting, Virginia officials stated that "inactive sites" refers only to those operations which have obtained grading release, have been seeded, and are dormant pending the establishment of vegetation and, thereafter, final bond release. The Secretary finds that this is as effective as the Federal rule in ensuring adequate inspections. Reclaimed sites do not present the same environmental problems as active sites because they are static. There will be minimal activity on reclaimed sites, whereas active operations must be monitored frequently to insure that the full panoply of reclamation requirements are being complied with.

6. EPI *et al.* stated that Virginia Regulation V840.11 improperly omits the requirement of 30 CFR 840.11(d)(3) that inspectors promptly file inspection report, and the requirements of 30 CFR 840.11(c) that the periodic inspections shall include collection of evidence with respect to every violation. Virginia included these provisions in its initial submission and the Secretary found them acceptable (45 FR 69987–69988). In the September 21 and 22, 1981 meeting, Virginia stated that the deletion of the provisions from the resubmission was made on the basis that such requirements are a matter of DMLR policy and procedures and, therefore, need not be reiterated in regulations. Virginia further pointed to the Virginia Procedural Handbook, in particular, Memo I and II, which was contained in the original submission and not deleted from the resubmission, as clearly requiring these procedures. On the basis of Virginia's interpretation of the Procedural Handbook requirements, which is a binding part of the State program, the Secretary finds this acceptable.

7. EPI *et al.* stated that Virginia Regulation V842.11(a) impermissibly limits inspections otherwise required by 30 CFR 842.11 by adding the Phrase "except for good cause shown," which is allegedly not consistent with Section 503(a)(7) of SMCRA. This provision of the Virginia program was approved in the initial decision (45 FR 69977–70000) regarding the Virginia program; thus, this comment is outside the scope of this decision.

8. EPI *et al.* Objected to Virginia Regulation V842.12(c), which provides that a citizen accompanying an inspector does so at his/her own risk and may be required to sign a written acknowledgment that neither the Division nor the operator would be liable for any injury or damage sustained by the citizen. The commenter asserted that such provisions are discriminatory. Secondly, the commenter objected to Virginia's requirement that citizens provide all necessary safety equipment.

The Secretary agrees that the requirement that citizens waive liability is unacceptable and is requiring Virginia to revise its program accordingly. [See Finding 4(l)(ii), above] In regard to the commenter's second concern, neither SMCRA nor the provisions of 30 CFR Chapter VII provide the Secretary the authority to require the regulatory authority, or any third party, to provide citizens accompanying an inspector on the mine site with all safety equipment necessary to comply with safety regulations.

9. EPI *et al.* objected to Virginia Regulation V842.14, which allows the Director of DCED up to thirty days instead of the fifteen days provided in 30 CFR 842.12(d) to render a decision on a citizen's complaint regarding the failure of the regulatory authority to make an adequate inspection. While the time period allowed by Virginia is not identical to the Federal requirement, it is as effective as the Federal regulation. The Secretary notes that the effect of this time difference in enforcement is insignificant because of the Secretary's oversight responsibility mandated under Section 521(a)(1) of SMCRA. If more than 10 days passed without a State inspection, the Secretary would be obligated to act.

10. EPI *et al.* stated that Virginia Regulation V842.12(b) qualifies the confidentiality for citizen complaints at 30 CFR 842.12(b) with the phrase "as a matter relating to criminal investigation" and, argued that this is inconsistent with the Federal requirements. This provision in the Virginia program was approved by the Secretary in his initial decision on October 22, 1980 (45 FR 69977–70000). thus, this comment is outside the scope of this rulemaking. The Secretary notes, however, that even under Federal law, confidentiality is subject to the Federal Freedom of Information Act. Since citizen complaints are given the same protection in Virginia as matters under criminal investigation it would appear confidentiality may be even better protected under the Virginia scheme.

11. One commenter objected to the Virginia Regulation V842.12(b) regarding confidentiality of complaints, alleging that it encourages the filing of irresponsible complaints and that characterizing these complaints as criminal matters would stigmatize the operator. The Secretary disagrees. Confidentiality is required by the Federal program. The fact that Virginia extends the same measure of confidentiality as in a criminal investigation merely establishes the level of protection given to a person requesting confidentiality, not the nature of the violation. It is highly unlikely this would cause anyone to confuse these routine administrative complaints with criminal matters.

12. VMRA argued that confidentiality of citizen complaints would encourage the filing of irresponsible and harrassing complaints against operators. Virginia Regulation V842.12(b) does not enable a citizen to keep his identity from the regulatory authority when supplying information. It merely allows the citizen to request that his name not be disclosed to the public and requires Virginia to honor that request. The citizen supplying information is merely the person who brings the alleged violation to the attention of the regulatory authority. If a violation is observed by an inspector following a complaint by a citizen, it is the inspector who would be confronting the operator and providing the basis for obtaining a penalty against the permittee. Therefore, there is no need for the operator to know the complainant. If the complaint is groundless, no violation will be issued and the operator will not be harrassed. The Secretary disagrees with the commenter's objections and has determined that confidentiality is based upon the belief that many citizens will be reluctant to come forward if they are concerned about harrassment, black-listing, or physical abuse even if such concern is groundless.

13. EPI *et al.* stated that Virginia Regulation V843.12 is not consistent with the Federal regulations and could

easily lead to abuse because of vague and hard to enforce standards such as "lack of diligence" and "intentional delay" being used to determine when an extension of the abatement period is available. These standards are found in Virginia Regulation V843.12(c) The Secretary finds Virginia's provisions to be consistent with the Federal rules because 30 CFR 843.12(c) as amended on August 17, 1981 (46 FR 41705) uses these same standards to determine whether or not to allow an extended abatement period.

14. VCBR and EPI *et al.* commented that the Virginia regulation which allows termination of a Notice of Violation without an on-site inspection should be deleted and that Virginia should be required to submit a written statement that it will conduct on-site inspections to determine abatement. The commenters felt that Virginia's provision is in direct violation of Sections 521, 503(a)(1) and 503(a)(7) of SMCRA. The Secretary agrees that the Virginia provision must be deleted and has conditioned approval of the program on this issue. [See Finding 4(j)(iii), above] In addition, at the September 21 and 22, 1981 meeting the State agreed not to exercise its authority to terminate Notice of Violations without an on-site inspection. The Secretary considers this a binding statement by the State and incorporates it as part of the conditional approval.

15. EPI *et al.* objected to the omission of a requirement for mandatory issuance of a show cause order upon a finding of a pattern of violations as required by 30 CFR 843.13(a)(3). The Secretary agrees with this comment and has required changes in Virginia's program to correct the deficiency. [See Finding 4(j)(iv), above.]

16. EPI *et al.* noted that Virginia Regulation V843.15(g) omits the requirement of 30 CFR 843.15(g) that at a formal review proceeding no evidence as to statements made or evidence produced at an informal public hearing shall be introduced as evidence to impeach a witness. The Federal provision relates to an informal hearing which an operator can request if he has received a cessation order. The hearing is for the operator's benefit, and the rule is designed to encourage operators to speak freely at such hearings (44 FR 15304; March 13, 1979). States are not required to adopt provisions which are solely for the benefit of operators, rather than the public or the environment, as the omission of such a requirement does not render the State program inconsistent with the Federal requirements. *See* Section 505 of SMCRA.

17. EPI *et al.* stated that Virginia should be required to submit a written statement confirming that a notice of any public hearing on a show cause order will be posted at the DMLR office in Big Stone Gap. They further stated that the notice should be posted at the time of issuance of the order. At the September 21 and 22, 1981 meeting, Virginia officials stated that notices would be posted at the time of issuance of show cause orders. They also stated that notices of any hearings would be posted. The Secretary views these statements as binding on the State and incorporates them as part of the conditional approval of the Virginia program.

18. One commenter stated that the Virginia proposal does not clearly authorize access by Virginia inspectors to wildcat operations. Virginia's provisions governing such access have not changed since its original submission. Thus, this comment is outside the scope of this decision. In Finding 4(g) of the initial decision regarding the Virginia program (45 FR 699987), the Secretary found that Virginia inspectors have the authority to enter, inspect, and monitor all coal exploration and surface coal mining and reclamation operations on non-Indian and non-Federal lands within Virginia consistent with the Federal requirements.

VI. Public Participation

1. EPI *et al.* objected to the Virginia CSMCRA Section 45.1–232 which allows persons with financial interests in underground and surface coal mining operations to sit on the Board of Conservation and Economic Development. The commenter argued that such a provision violates citizens' rights to a fair and impartial hearing and would increase the likelihood of biased rulemaking. The Secretary has determined that Virginia has adequately demonstrated that the Board is multi-interest and, therefore, not subject to the conflict of interest provisions of 30 CFR 705. Thus, it is consistent with the Federal requirements. [See Finding 4(m)(i), above]

2. EPI *et al.* stated that Virginia's program does not provide for discovery rights or contain provisions for the intervention by citizens in administrative proceedings consistent with the Federal provisions. The Secretary disagrees for the reasons set forth in Finding 4(q)(iv), above.

3. EPI *et al.* stated that Virginia law does not properly allow assessment of costs and expenses (including attorney fees) against the State, which is a required element for approval of a state program. They also stated that Virginia Regulation V789.1 provided for award of costs only in "administrative proceedings reviewing enforcement actions," rather than in "any administrative proceeding under the Act * * *" as required by Section 525(e) of SMCRA.

The Secretary agrees that Virginia law does not provide for award of costs against the Commonwealth and has required Virginia to correct this deficiency in its program. [See Finding 4(g)(iii), above] However, the Secretary believes the commenter has misread the Virginia regulation, because it provides at subsection (a) that any person may petition for costs and expenses if they participate in *any* administrative proceeding under the Act. The reference to proceedings reviewing *enforcement* actions is found at subsection (e), which refers to payment of costs and expenses to any person from the permittee. This is consistent with Section 525(e) of SMCRA, which allows for recovery of costs and expenses in enforcement actions.

D. Background on Conditional Approval

The Secretary is fully committed to two key aims which underlie SMCRA. SMCRA calls for comprehensive regulation of the effects of surface coal mining on the environment and public health and safety and for the Secretary to assist the States in becoming the primary regulators under SMCRA. To enable the States to achieve that primacy, the Secretary has undertaken many activities, of which several are particularly noteworthy.

The Secretary has worked closely with several State organizations, such as the Interstate Mining Compact Commission, the Council of State Governments, the National Governors Association and the Western Interstate Energy Board. Through these groups, OSM has frequently met with State regulatory authority personnel to discuss informally how SMCRA should be administered, with particular reference to unique circumstances in individual States. Often these meetings have been a way for OSM and the States to test new ideas and for OSM to explain portions of the Federal requirements and how the States might meet them.

The Secretary has dispensed over $8.5 million in program development grants and over $37.6 million in initial program grants to help the States to develop their programs, to administer their initial programs, to train their personnel in the

new requirements, and to purchase new equipment. In several instances, OSM detailed its personnel to States to assist in the preparation of their permanent program submissions. OSM has also met with individual states to determine how best to meet SMCRA's environmental protection standards.

Equally important, the Secretary structured the State program approval process to assist the States in achieving primacy. He voluntarily provided his preliminary views on the adequacy of each State program to identify needed changes and to allow them to be made without penalty to the State. The Secretary adopted a special policy to insure that communication between him and the states remained open and uninhibited at all times (44 FR 54444; September 19, 1979). This policy was critical to avoiding a period of enforced silence between OSM and a State after the close of the public comment period on its program and has been a vital part of the program review process.

The Secretary has also developed in his regulations the critical ability to conditionally approve a State program. Under 30 CFR 732.13 of the Secretary's regulations, conditional approval gives full primacy to a State even though there are minor deficiencies in a program. This power is not expressly authorized by SMCRA; it was adopted through the Secretary's rulemaking authority under 30 U.S.C. 201(c), 501(b), and 503(a)(7).

SMCRA expressly gives the Secretary only two options—to approve or disapprove a State program. Read literally, the Secretary would have no flexibility; he would have to approve those programs that are letter-perfect and disapprove all others. To avoid that result, and in recognition of the difficulty of developing an acceptable program, the Secretary adopted the regulation providing the authority to conditionally approve a program.

Conditional approval has a vital effect for programs approved in the Secretary's initial decision. It results in the implementation of the permanent program in a State months earlier than might otherwise be anticipated. It also avoids the costly and cumbersome problem of implementing Federal programs where the State submittal was deficient in only minor respects. While this may not be significant in States that already have comprehensive surface mining regulatory programs, in many States earlier implementation will initiate a much higher degree of environmental protection. It also implements the rights SMCRA provides to citizens to participate in the regulation of surface coal mining through soliciting their views at hearings and meetings and enabling them to file requests to designate lands as unsuitable for mining if they are fragile, historic, critical to agriculture, or simply cannot be reclaimed to their prior productive capability.

The Secretary considers three factors in deciding whether a program qualifies for conditional approval. First is the State's willingness to make good faith efforts to effect the necessary changes. Without the State's commitment, the option of conditional approval may not be used.

Second, no part of the program can be incomplete. As the preamble to the regulations states, the program, even with deficiencies, must "provide for implementation and administration for all processes, procedures, and systems required by SMCRA and these regulations" [44 FR 14961; March 13, 1979]. That is, a State must be able to operate the basic components of the permanent program: the designation process; the permit and coal exploration systems; the bond and insurance requirements; the performance standards; and the inspection and enforcement systems. In addition, there must be a functional regulatory authority to implement the other parts of the program. If some fundamental component is missing, conditional approval may not be granted.

Third, the deficiencies must be minor. For each deficiency or group of deficiencies, the Secretary considers the significance of the deficiency in light of the particular State in question. Examples of deficiencies that would be minor in virtually all circumstances are correction of clerical errors and resolution of ambiguities.

Other deficiencies require individual consideration. An example of a deficiency that would most likely be major would be a failure to allow meaningful public participation in the permitting process. Although this would not render the permit system incomplete, because permits could still be issued, the lack of any public participation could be such a departure from a fundamental purpose of SMCRA that the deficiency would probably be major.

The granting of conditional approval is not and cannot be a substitute for the adoption of an adequate program. The Federal regulations (30 CFR 732.13(i)), give the Secretary little discretion in terminating programs where the State, in the Secretary's view, fails to fulfill the conditions. The purpose of the conditional approval authority is to assist States in achieving compliance with SMCRA, not to excuse them from compliance.

E. The Secretary's Decision

As indicated above under "Secretary's Findings," there are minor deficiencies in the Virginia program which the Secretary requires be corrected. In all other respects, the Virginia program meets the criteria for approval. The deficiencies identified in prior findings are summarized below and an explanation is given to show why each deficiency is minor, as required by 30 CFR 732.13(i).

(1) As discussed in Finding 4(c)(ii), Virginia utilized the term "best technology reasonably available" which was not consistent with the phrase "best technology currently available" (BTCA). The deficiency is minor because situations where Virginia could require a particular kind of technology under BCTA, but not under its present standard will be few, if any, during the time allowed to make the changes.

(2) As discussed in Finding 4(c)(vi). Virginia submitted an alternative regulation regarding the zone-fill concept which was determined to be inconsistent with Federal requirements. This deficiency is minor since the State is being required not to use the alternative regulations pending formal deletion of the regulations from the program.

(3) As discussed in Finding 4(c)(vii), Virginia submitted a regulation which would allow roads or drainage structures to be left at the top of the backfill area without requiring that any remaining highwall be shaved or blended into the surrounding terrain. This deficiency is minor because in the October 15, 1981 letter, Virginia submitted a policy statement affirming that in the period prior to the promulgation of the required regulatory change, it will require the shaving and blending of highwalls into the natural terrain.

(4) As discussed in Finding 4(c)(x), Virginia regulations and the Virginia Coal Surface Mining Technical Handbook omit the Federal prohibition against locating diversions on areas with landslide potential. This deficiency is minor because Virginia indicated in the September 21 and 22, 1981, meeting with OSM that it is the State's policy to not allow diversion structures to be placed on areas with landslide potential.

(5) As discussed in Finding 4(c)(xi), Virginia regulations allow the regulatory authority to grant exemptions from the requirement that all discharges of water meet all applicable Federal and State laws and regulations. This deficiency is minor because Virginia has agreed not to use its authority to grant this

exemption pending the completion of the required regulatory change.

(6) As discussed in Finding 4(c)(xii), Virginia regulations allow for a scaled distance factor of 50 as opposed to the 60 required in the Federal regulations. This deficiency is minor because Virginia has agreed to use the authority provided in Virginia Regulations V816.65(i) and V817.65(i) to limit ground vibrations from an explosive detonation to 1.0 inch per second pending completion of regulatory change. Since this equates to a scale distance factor of 60 explosive detonations, Virginia would be in compliance with the Federal requirements pending completion of the regulatory change.

(7) As discussed in Finding 4(c)(xii), Virginia regulations allow up to 50 pounds of explosives to be detonated without publishing notice of the operator's blasting schedule. This deficiency is minor because few blasts of between five and 50 pounds of explosives are detonated on surface mining operations. Also, during the interim period, until Virginia can amend this regulation, most operations will be operating under permits issued during the interim regulatory program which require a blasting schedule and do not allow the permittee to detonate more than five pounds of explosives at times other than those in the blasting schedule.

(8) As discussed in Finding 4(c)(xii), Virginia regulations allow the maximum ground vibrations from an explosive detonation to be 2.0 inches per second. This deficiency is minor because Virginia Regulations V816.65(i) and V817.65(i) provide DMLR with authority to reduce the maximum peak particle velocity allowed. Virginia has agreed to use this authority to limit maximum ground vibrations to 1.0 inch per second pending completion of the regulatory change.

(9) As discussed in Finding 4(c)(xiii), Virginia regulations allow for disposal of excess spoil on certain areas other than the permit area at the request of the landowner. This deficiency is minor because Virginia agreed in the October 15, 1981 letter not to exercise its authority to allow such disposal during the time needed to make the necessary change to its regulations.

(10) As discussed in finding 4(c)(xiv), Virginia's Coal Surface Mining Technical Handbook allows for methods of abandoning temporary diversions inconsistent with those provided in the Federal regulations. This issue is minor because surface coal mining operations typically progress toward completion of the operation over an extended period of time. Few, if any, permits would be issued under the permanent program regulations to operations which would reach a stage in the mining process allowing abandonment of a temporary diversion prior to the completion of the required regulatory change.

(11) As discussed in finding 4(j)(i), Virginia stated that its current policy would not allow a field inspector to issue a cessation order for imminent danger or harm if he/she were unable to contact his supervisor or the enforcement manager either by radio or telephone. The deficiency is minor because of the limited number of cessation orders for imminent danger or harm which have been issued in Virginia, and the short time allowed for the State to revise its policy. During calendar year 1981, the OSM issued no such order in Virginia. In calendar year 1980 only two cessation orders were issued. Therefore, the impact of this deficiency is very limited.

(12) As discussed in Finding 4(j)(ii), there are some deficiencies in Virginia's regulations criteria for extending the 90-day abatement period. These deficiencies are minor because Virginia Regulations V843.12 (f)(1) and (f)(6), among other provisions, require that extensions can be granted only when abatement within 90 days would (1) clearly cause more environmental harm than it would prevent; or (2) create an imminent danger or be expected to cause imminent environmental harm. The Secretary knows of no situation where more environmental harm would be created by abatement except when abatement would be affected by climatic conditions. In addition, the Virginia regulations would require compliance with all Mine Safety and Health Act standards. Furthermore, extensions are not mandatory and the State has agreed not to grant extensions in any instances that would be inconsistent with Federal law.

(13) As discussed in finding 4(j)(iii), Virginia's regulations allow the termination of a notice of violation by methods other than the authorized representative of the Director conducting an investigation to confirm the abatement. This deficiency is minor since the State indicated in the September 21 and 22, 1981 meeting that as a matter of policy, it would not terminate notices of violation by means other than an authorized representative's investigation to confirm that all violations have been abated.

(14) As discussed in Finding 4(j)(iv), Virginia regulations provide the regulatory authority with more discretion to determine when a show cause order should be issued than does the corresponding Federal regulation. This deficiency is minor because it is unlikely that any operator will develop a pattern of violations before the deficiency is corrected. Further, the State still has the same authority as OSM to issue discretionary show cause orders.

(15) As discussed in Finding 4(k)(iii), the Virginia definition of significant legal and financial commitments (SLFC) is similar to the Federal regulation except that Virginia provides that the mere ownership of mineral rights prior to August 3, 1977, establishes SLFC. This deficiency is minor since no petition to designate lands unsuitable for mining could be processed prior to the time allowed by the Secretary for correcting this deficiency.

(16) As discussed in Finding 4(l)(ii), Virginia's regulations require a citizen accompanying an inspector to do so at his/her own risk, and also provide that neither the regulatory authority nor its personnel, nor the operator, nor its personnel, shall be liable for any injury or damage. This deficiency is minor since citizen visits are not frequent, and it is unlikely that anyone accompanying an inspector onto a minesite will be injured during the period in which the State has to amend this provision. The Secretary is aware of no instance in which a citizen accompanying an inspector onto a minesite has been injured. Accordingly, few, if any, citizens are likely to be deterred from exercising their statutory right to go onto a minesite pending resolution of this deficiency.

(17) As discussed in Finding 4(q)(iii), the Virginia Coal Surface Mining and Reclamation Act prohibits the awarding of costs and attorneys' fees against the State in judicial and administrative proceedings. This deficiency is minor since the exclusion applies only to awards against the State. Awards against other persons are available. Furthermore, due to the length of time it takes to process administrative and judicial proceedings, the deficiency should be cured before most cases are resolved.

(18) As discussed in Finding 4(s)(i), the Virginia policy on haul roads is ambiguous with respect to the requirement of substantial public use and actual public maintenance. This deficiency is minor since no permanent program permits will be issued during the very short time period provided for the State to revise its policy.

(19) As discussed in Finding 4(s)(iii), Virginia's definition of "affected area" includes only the area which is located above underground mine workings actually affected by subsidence, or

which may be affected by planned subsidence. This deficiency is minor because on October 15, 1981, Virginia submitted material demonstrating that subsidence is an uncommon environmental problem in Virginia and, therefore, the practical difference between the two definitions is minor.

Given the nature of the deficiencies set forth in the Secretary's findings and their magnitude in relation to all the other provisions of the Virginia program, the Secretary of the Interior has concluded that they are minor deficiencies. Accordingly, the program is eligible for conditional approval under 30 CFR 732.13(i) because:

1. The deficiencies are of such a size and nature as to render no part of the Virginia program incomplete;

2. All other aspects of the program meet the requirements of SMCRA and 30 CFR Chapter VII;

3. These deficiencies, which will be promptly corrected, will not directly affect environmental performance at coal mines;

4. Virginia has initiated and is actively proceeding with steps to correct the deficiencies; and

5. Virginia has agreed, by letter dated December 8, 1981, to correct the regulation deficiencies by October 15, 1982, and the statutory deficiencies by July 15, 1983. Other deficiencies, which relate to policy interpretations of the DMLR only, will be corrected by February 15, 1982.

Accordingly, the Secretary is conditionally approving the Virginia program. If regulations correcting the deficiencies are not enacted by October 15, 1982, if State legislation correcting the statutory deficiencies is not enacted by July 15, 1983; and policy interpretations are not corrected by February 15, 1982, the Secretary will take appropriate steps under 30 CFR Part 733 to terminate the State program. This conditional approval is effective on December 15, 1981. Beginning on that date, the Virginia Department of Conservation and Economic Development shall be deemed the regulatory authority in Virginia and all Virginia surface coal mining and reclamation operations on non-Federal and non-Indian lands and all coal exploration on non-Federal and non-Indian lands in Virginia shall be subject to the permanent regulatory program.

On non-Federal and non-Indian lands in Virginia, the permanent regulatory program consists of the State program approved by the Secretary. Following this approval, in accordance with Section 523(c) of SMCRA, Virginia may elect to enter into a cooperative agreement with the Secretary to provide for State regulation of surface coal mining and reclamation operations on Federal lands within the State. The Virginia Regulations V740 through V744 for Federal lands which were submitted as part of the program resubmission have not been considered and are not a part of the Secretary's conditional approval. These regulations may be included in the State's request for a cooperative agreement and will be considered at that time.

The Secretary's approval of the Virginia program relates at this time only to the permanent regulatory program under Title V of SMCRA. The approval does not constitute approval of any provisions related to implementation of Title IV under SMCRA, the abandoned mine lands reclamation program. In accordance with 30 CFR Part 884, Virginia may submit a State reclamation plan now that its permanent program has been approved. At the time of such a submission, all provisions relating to abandoned mined lands reclamation will be reviewed by officials of the Department of the Interior.

Dated: December 10, 1981.

James G. Watt,

Secretary of the Interior.

Accordingly, Part 946 is added to 30 CFR Chapter VII as follows:

PART 946—VIRGINIA

Sec.

946.1 Scope.

946.10 Conditions of State regulatory approval.

946.11 Conditions of State regulatory program approval.

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

§ 946.1 Scope.

This Part contains all rules applicable only within Virginia that have been adopted under the Surface Mining Control and Reclamation Act of 1977.

§ 946.10 Conditions of State regulatory program approval.

The Virginia State program, as submitted on March 3, 1980, as amended and clarified on June 16, 1980, as resubmitted on August 13, 1981, and clarified in a meeting with OSM on September 21 and 22, 1981, and in a letter to Director Harris of October 15, 1981, is conditionally approved, effective December 15, 1981. Beginning on that date, the Department of Conservation and Economic Development, Division of Mined Land Reclamation shall be deemed the regulatory authority in Virginia for all surface coal mining and reclamation operations and all exploration operations on non-Federal and non-Indian lands. Only surface coal mining and reclamation operations on non-Federal and non-Indian lands shall be subject to the provisions of the Virginia permanent regulatory program. Copies of the approved program, together with copies of the letter of the Department of Conservation and Economic Development agreeing to the conditions of 30 CFR 946.11, are available at:

Virginia Division of Mined Land Reclamation, Drawer U, 630 Powell Avenue, Big Stone Gap, Virginia 24219

Virginia Department of Conservation and Economic Development, 1100 State Office Building, Richmond, Virginia 23219

Office of Surface Mining, 603 Morris Street, Charleston, West Virginia 25301

Office of Surface Mining, South Interior Building, 1951 Constitution Avenue, Washington, D.C. 20240

§ 946.11 Conditions of State regulatory program approval.

The approval of the Virginia State program is subject to the State revising its program to correct the deficiencies listed in this Section. The program revisions may be made, as appropriate, to the statute, the regulations, the program narrative, or the Attorney General's opinion. This Section indicates, for the general guidance of the State, the component of the program to which the Secretary recommends the change be made.

(a) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to revise the term "best technology reasonably available" to read "best technology currently available" and to make the definition of "best technology currently available" consistent with Section 515(d)(10)(B)(i) of SMCRA and 30 CFR 701.5.

(b) The approval found in Section 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to delete the regulations concerning the zone-fill concept. Furthermore, pending completion of the above, Virginia may not use its authority to approve such fills.

(c) The approval found in Section 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to require that where roads or

ditches are left at the top of the backfill area, the highwall will be shaved and blended into the surrounding natural terrain.

(d) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to prohibit the construction of diversion ditches on areas with landslide potential as required in 30 CFR 816.43(d) and 30 CFR 817.43(d).

(e) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to clarify that discharges in excess of standards allowed under EPA regulations for coal mining point source will not be allowed. Furthermore, pending completion of the above, Virginia may not use its authority to grant exemptions from effluent limitations, or the approval will terminate.

(f) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to provide for a scale distance factor of 60 as it relates to the maximum pounds of explosives to be used per delay, as required in 30 CFR 817.65(k).

(g) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to allow only five pounds or less of explosive to be detonated without publishing notice of the operator's blasting schedule as required in 30 CFR 816.64(a)(1).

(h) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to require maximum ground vibrations from an explosive detonation to be 1.0 inch per second as required in 30 CFR 816.65(i).

(i) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or other program amendments deleting provisions allowing for disposal of excess spoil on unpermitted areas such as lawns, fields or commercial development sites at the request and approval of the landowner.

(j) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to delete the language in its Coal Surface Mining Technical Handbook, Standards and Specifications for Diversion Ditches, Abandonment Procedures Items 1 and 4 regarding the elimination of temporary diversions to make the State program consistent with 30 CFR 816.43(e), 30 CFR 816.44 (c) and (d), 30 CFR 817.43(e) and 30 CFR 817.44 (c) and (d).

(k) The approval found in § 946.10 will terminate on February 15, 1982, unless Virginia submits to the Secretary by that date a revised policy statement clearly granting field inspectors the authority to issue immediate cessation orders for imminent danger or harm if he/she is unable to contact the supervisor or enforcement manager.

(l) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to provide acceptable criteria for extending the abatement period of violations beyond 90 days in accordance with 30 CFR 843.12(f).

(m) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to require an authorized representative of the Director to conduct an investigation prior to terminating a violation consistent with Section 521(a)(5) of SMCRA and 30 CFR 843:12(e).

(n) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to provide for those situations where the Director shall determine that a pattern of violations exists in a manner consistent with 30 CFR 843.13(a)(3) and (4).

(o) The approval found in § 946.10 will terminate on February 15, 1982, unless Virginia submits to the Secretary by that date provisions which amend its program by deleting the program narrative rationale of "significant legal and financial commitments" (SLFC) which provides that mere ownership of mineral rights or the right to mine constitutes a significant legal and financial commitment and provide affirmative assurance that SLFC will be interpreted in accordance with Federal law. If this is accomplished by a policy statement, it must be accompanied by a legal opinion which states that it is enforceable under existing State law and regulations.

(p) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends it program to delete the language requiring a citizen accompanying an inspector sign a waiver providing that the citizen does so at his or her own risk, and providing that neither the regulatory authority, nor its personnel, nor the operator, nor its personnel shall be liable for any injury or damage sustained by a citizen.

(q) The approval found in § 946.10 will terminate on July 15, 1983, unless Virginia submits to the Secretary by that date copies of enacted law or otherwise amends its program, to provide for the awarding of costs and attorneys' fees against the State in judicial and administrative proceedings consistent with Section 525(e) of SMCRA.

(r) The approval found in § 946.10 will terminate on February 15, 1982, unless Virginia submits to the Secretary by that date copies of a revised policy statement or otherwise amends its program to make its coal haul roads policy consistent with the Federal requirements. This policy must be accompanied by a legal opinion which states that it is enforceable under existing State law and regulations.

(s) The approval found in § 946.10 will terminate on October 15, 1982, unless Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to define the term "affected area" consistent with 30 CFR 701.5.

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 505

[Army Reg. 340-21]

Personal Privacy and Rights of Individuals Regarding Personal Records; Exemptions

AGENCY: Department of the Army, DoD.

ACTION: Final rule.

SUMMARY: This notice amends § 505.9(b) of Title 32 of the Code of Federal Regulations (CFR) by removing the exemptions for the U.S. Army system of records A1015.06DAAG, entitled School Employee File.

EFFECTIVE DATE: December 15, 1981.

FOR FURTHER INFORMATION CONTACT: Mrs. Dorothy Karkanen, Records Management Division, HQDA(DAAG-AMR-S), Hoffman Building 1, 2561 Eisenhower Ave., Alexandria, VA 22331, Telephone 703/325-6163.

SUPPLEMENTARY INFORMATION: System of records A1015.06DAAG, School

Employee File, no longer requires any exemptions from the Privacy Act of 1974, Title 5 United States Code, Section 552a (Pub. Law 93–579; 88 Stat. 1896 *et seq.*).

PART 505—PERSONAL PRIVACY AND RIGHTS OF INDIVIDUALS REGARDING THEIR PERSONAL RECORDS

§ 505.9 [Amended]

Accordingly, § 505.9(b) of 32 CFR is amended by deleting all of the exemptions for record system A1015.06DAAG.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

December 9, 1981.

Department of the Army; Corps of Engineers

33 CFR Part 207

Navigable Waters, Portsmouth Naval Shipyard; Correction

AGENCY: Army Corps of Engineers/ Department of the Army; Defense.

ACTION: Final rule; correction.

SUMMARY: The regulations which establish a restricted area in the waters around the Portsmouth Naval Shipyard, Kittery, Maine, were amended on August 26, 1981 (46 FR 43044–45). That amendment contained an error in a coordinate which defines Area No. 1. Latitude 43°4'47"N should read 43°04'49"N. For clarity the corrected paragraph is reprinted below in its entirety.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard, DAEN–CWO–N, HQDA, Washington, DC 20314, or call (202) 272–0200.

John O. Roach II,

Liaison Officer with the Federal Register.

PART 207—NAVIGATION REGULATIONS

Accordingly, the Corps of Enginers is correcting the description of Area No. 1 in 33 CFR 207.6(a) to read as follows:

§ 207.6 Piscatuqua River at Portsmouth Naval Shipyard, Kittery, Maine; restricted area: (a) The areas.

Area No. 1: The area bounded by a line at a point on the easterly side of Seavey Island at latitude 43°04'37"N, longitude 70°43'44"W, thence to latitude 43°04'36"N; longitude 70°43'40"N, thence to the pier on the westerly side of Clark Island at latitude 43°04'36.5"N, longitude 70°43'34"W; thence along the northerly side of Clark Island to a point on the easterly side at latitude 43°04'37"N, longitude 70°43'25"W, thence northeasterly to the easterly side of Jamaica Island at latitude 43°04'49"N, longitude 70°43'24"W, thence along the southerly and westerly sides of Jamaica Island and thence generally along the easterly side of Seavey Island to the point of beginning.

BILLING CODE 3710–92–M

POSTAL SERVICE

39 CFR Part 601

Procurement of Property and Services; Amendments to Postal Contracting Manual

AGENCY: Postal Service.

ACTION: Amendments to the Postal Contracting Manual.

SUMMARY: The Postal Service hereby announces certain amendments intended to simplify the procedure for recognizing a successor in interest to a Postal Service contract. Also, audit review of cost or pricing data for negotiated procurement actions would not be required if the procurement action is for $250,000 or less. The existing threshhold is $100,000. Finally, a number of minor changes are made to section 19 (Mail Transportation Contracts), and three new, revised, or replacement forms are added.

EFFECTIVE DATE: December 4, 1981.

FOR FURTHER INFORMATION CONTACT: Eugene A. Keller, (202) 245–4818.

SUPPLEMENTARY INFORMATION: The Postal Contracting Manual, which has been incorporated by reference in the Code of Federal Regulations (See 39 CFR 601.100) has been amended by the issuance of PCM Circular 81–7, dated December 4, 1981.

In accordance with 39 CFR 601.105, notice of these changes is hereby published in the **Federal Register** and the text of the changes is filed with the Director, Office of the Federal Register. Subscribers to the basic manual will receive these amendments from the Postal Service. (For other availability of the Postal Contracting Manual, see 39 CFR 601.104).

Explanation of these amendments to the Postal Contracting Manual follows:

Explanation:

—Section 1–404 adds a simplified novation procedure for contracts of $75,000 or less or, in the case of contracts for the performance of services, an annual rate of $75,000 or less. The requirement for a novation agreement in order to recognize a successor in interest to a Postal Service contract is deleted for contracts of $20,000 or less or, in the case of contracts for the performance of services, an annual rate of $20,000 or

less. This new provision supersedes section XI of MI PO–210–79–30, "Recognition of a Successor in Interest" with respect to contract units.

—3–809, which requires audit review of cost or pricing data for negotiated procurement actions exceeding $100,000 in amount, is revised to change the $100,000 threshold to $250,000. This increase in the threshold is not intended to discourage the use of audit services on contracts of lesser size when appropriate. See 3–809(b)(1)(ii).

—19–103.1(b) corrects the reference.

—19–103.2 (a) and (b) correct references.

—19–105.2 revises the definition of an advertised contract.

—19–105.9 revises the definition of a negotiated contract.

—19–310.1, 19–410.1, and 19–1010.1 clarify the terms on which highway, rail, and terminal handling contracts may be renewed.

—Use the following new, revised, or replacement forms immediately when applicable:

Form 7298, *Contract Unit Performance Bond,* September 1981.

Form 7322, *Solicitation, Offer and Award (Construction Contract,* August 1981.

Form 7463, *Cost Statement—Highway Transportation Contracts,* June 1981.

BILLING CODE 7710–12–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–7–FRL–1990–3]

Approval and Promulgation of State Implementation Plans: State of Kansas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: Part D of the Clean Air Act (CAA) as amended in 1977 requires that states revise their State Implementation Plans (SIP) for all areas that have not attained the National Ambient Air Quality Standards (NAAQS). The State of Kansas submitted SIP revisions for attaining the carbon monoxide (CO) NAAQS to EPA on April 16, 1981, in order to satisfy the requirements of Part D for the South Central Kansas Air Quality Control Region, Sedgwick County, Wichita central city nonattainment area. The SIP revision was announced as available for public inspection and comment in the May 22, 1981, **Federal Register** (46 FR 27972). EPA's proposed action on the submittal was published in the August 31, 1981, **Federal Register** (46 FR 43701).

EPA is taking final action to approve all elements of the Kansas plan except one element which EPA conditionally approved in a previous action. A discussion of conditional approval and its practical effect appears in supplements to the General Preamble on July 2, 1979 (44 FR 38583) and November 23, 1979 (44 FR 67182).

DATE: This approval is effective December 15, 1981.

ADDRESSES: Copies of the state submission, all public comments received, and the EPA prepared evaluation report are available during normal business hours at those locations listed in the May 22, 1981 (46 FR 27972) and August 31, 1981 (46 FR 43701), **Federal Registers.**

A copy of the state submission and this notice is available at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Michael T. Marshall, (816) 374–3791, FTS 758–3891.

SUPPLEMENTARY INFORMATION:

A. General Discussion

Part D of the CAA requires states to revise their SIPs for all areas that have not attained the NAAQS. The April 16, 1981, Kansas SIP submission demonstrated the attainment and maintenance of the CO NAAQS by December 31, 1982, for the Wichita nonattainment area. The SIP submittal documents that over 98 percent of the CO emissions in the Wichita area come from transportation sources. There is only one major stationary CO source in the area, and it is controlled to the reasonably available control technology (RACT) level. The federal motor vehicle control program by itself will cause enough CO emissions to be reduced that attainment of the NAAQS will occur by October 1983. An additional CO reduction of 639 tons per year is needed for attainment by December 1982. The SIP submittal commits to the implementation of nine transportation control measures (TCMs) for a CO reduction of 723 tons per year and attainment in 1982. The TCMs being implemented are improved mass transit, expanded carpool/vanpool programs, improved traffic flow projects, and a voluntary inspection and maintenance (I/M) program. The reader should refer to the August 31, 1981, **Federal Register** for a more detailed description of the SIP revision, the criteria for plan approval, and EPA's evaluation and proposed action on the approvability of the Kansas SIP submittal.

B. Conclusion

For the reasons stated in the proposed rulemaking, EPA approves the Kansas SIP revisions for the South Central Kansas Interstate Air Quality Control Region, Wichita nonattainment area, as meeting the requirements of Part D of the CAA, except for the condition in the Kansas Part D SIP promulgated in the April 3, 1981, **Federal Register** (46 FR 20164). The April 3, 1981, condition requires the state to pass legislation and amend its new source permit regulations to establish permanent regulations meeting the requirements of Section 173(3) of the CAA. This condition remains in effect and is not changed by this rulemaking. The reader should refer to the April 3, 1981 and August 31, 1981, **Federal Registers** for more detailed information on the Kansas Part D SIP conditional approval.

EPA's policy on the transition from the pre-1977 CAA requirements and those resulting from the 1977 CAA amendments is described in detail at 46 FR 20169, Column 3, April 3, 1981, relating to the approval of other portions of the Kansas SIP.

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This rule is not "major" because it only approves State actions and imposes no additional substantive requirements which are not currently applicable under State law. Hence it is unlikely to have an annual effect on the economy of $100 million or more, or to have other significant adverse impacts on the national economy.

EPA finds that good cause exists for making these amendments effective immediately for the following reasons:

1. The approvals and conditional approval granted today lift the construction restriction which went into effect on July 1, 1979; and

2. The immediate effectiveness enables sources to proceed with certainty in conducting their affairs and persons seeking judicial review of the amendments may do so without delay.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. This action only approves State actions and imposes no additional substantive requirements.

Under section 307(b)(1) of the Clean Air Act, as amended, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under section 307(b)(2), the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

This notice of final rulemaking is issued under the authority of Sections 110 and 301 of the Clean Air Act, as amended.

Dated: December 8, 1981

Note.—Incorporation by reference of the State Implementation Plan for the State of Kansas was approved by the Director of the Federal Register on July 1, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. Section 52.870 is amended by adding the following paragraph (c)(11):

§ 52.870 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(11) Kansas submitted SIP revisions to attain and maintain the National Ambient Air Quality Standards for carbon monoxide on April 16, 1981, for the South Central Kansas Interstate Air Quality Control Region, Wichita nonattainment area. The plan included commitments to complete transportation control measures for the reduction of carbon monoxide from transportation related sources for the attainment of the national standards by December 31, 1982.

2. Section 52.873 is amended by adding "carbon monoxide" to the second sentence specifying the pollutants for which there are Part D Kansas SIP approvals. The sentence is revised to read as follows:

§ 52.873 Approval status.

* * * Continued satisfaction of the requirements of Part D for the ozone, carbon monoxide, and TSP portions of the Kansas SIP depends on the adoption of the regulatory element of the plan as permanent amendments to the Kansas air quality regulations, the adoption of a regulation covering leaks from tank trucks serving bulk petroleum terminals and vapor recovery system, the adoption and submission of additional reasonably available control technology (RACT) requirements for any source covered by Control Technology Guidelines issued by EPA in the future, the revision of the new source review permit regulation to comply with Section 173(3) of the CAA, and the submission of the results from additional study of the state's determination that all major sources are controlled to a degree representing RACT and of a compliance schedule for recommended actions to bring these sources to RACT, as needed. No action was taken on the non-Part D requirements of the Act.

3. Section 52.879 is amended by revising the attainment date, "c" (presently below standards), for carbon monoxide in the South Central Kansas Interstate air quality control region to "e" (December 31, 1982). The Table is amended to read as follows:

§ 52.879 Attainment dates for national standards.

* * * * *

Air quality control region	Pollutant						
	Particulate matter		Sulfur oxides		Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
	Primary	Secondary	Primary	Secondary			
South Central Kansas Interstate	a	a	c	c	c	e	a

BILLING CODE 6560-38-M

40 CFR Part 52

[A-1-FRL 1987-1]

Approval and Promulgation of Implementation Plans; Sulfur-in Fuel Revision for Eastman Gelatine Corp.; Massachusetts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; State: Massachusetts.

SUMMARY: EPA is approving a revision to the Massachusetts State Implementation Plan (SIP) which was submitted on September 24, 1981 by the Commissioner of the Massachusetts Department of Environmental Quality Engineering. The revision being approved today revises the sulfur-in-fuel limitation for the Eastman Gelatine Corporation, Peabody, Massachusetts from 0.55 pounds to 1.21 pounds of sulfur per million BTU heat release potential. The effect of this revision is to allow Eastman Gelatine to burn less expensive higher sulfur content oil.

DATE: This action will be effective on February 16, 1982, unless notice is received on or before January 14, 1982 that someone wishes to submit adverse or critical comments.

ADDRESSES: Written comments should be addressed to Harley Laing, Chief, Air Branch, EPA Region I (see address below). Copies of the Massachusetts submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Region I, Air Branch, Room 1903, JFK Federal Building, Boston, Massachusetts 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460; Office of the Federal Register, 1100 L Street, NW, Room 8401, Washington, D.C., and Department of Environmental Quality Engineering, Air and Hazardous Materials Division, 1 Winter Street, Boston, Massachusetts 02108.

FOR FURTHER INFORMATION CONTACT: Margaret McDonough, Air Branch, EPA Region I, Room 1903, JFK Federal Building, Boston, Massachusetts, 02203, (617) 223-4448.

SUPPLEMENTARY INFORMATION: On September 24, 1981 the Commissioner of the Massachusetts Department of Environmental Quality Engineering (the Massachusetts Department) submitted a request for approval of a revision to Regulation 7.05(1)(d) "Sulfur Content of Fuel and Control Thereof for the Metropolitan Boston Air Pollution

Control District" (the Met-Boston District) to allow the Eastman Gelatine Corporation to burn higher sulfur content fuel oil. Eastman Gelatine, located in Peabody, Massachusetts, has been limited to the burning of fuel oil having a sulfur content not greater than 0.55 pounds per million British thermal units (Btu) heat release potential (approximately equivalent to 1.0% sulfur content fuel oil by weight). The revision to Regulation 7.05(1)(d) being approved today allows Eastman Gelatine to burn fuel oil having a sulfur content not greater than 1.21 pounds per million Btu heat release potential (approximately equivalent to 2.2% sulfur content fuel oil by weight) in three of the five boilers at Eastman Gelatine.

Technical support for this SIP revision includes an evaluation of compliance with National Ambient Air Quality Standards (NAAQS) for sulfur dioxide (SO_2) using mathematical modeling and monitoring data. NAAQS are maximum ambient pollutant concentrations which are set to protect public health and welfare. The NAAQS for SO_2 are 80 micrograms per cubic meter ($\mu g/m^3$) (annual average); 365 $\mu g/m^3$ (24 hr. average); and 1,300 $\mu g/m^3$ (3 hr. average).

The EPA-approved Industrial Source Complex (ISC) dispersion model was used to predict maximum SO_2 impact on air quality caused by the burning of higher sulfur content fuel oil. The ISC model is the appropriate model to use because of the low height of the the three stacks at the Eastman Gelatine facility. Seven additional major sources (greater than 100 tons per year SO_2 emissions) in the vicinity of Eastman Gelatine were included in the modeling analysis.

Existing background levels of SO_2 were estimated from ambient air monitoring data collected at the nearest representative monitoring sites. These estimated background concentrations were added to SO_2 impacts predicted by the dispersion model.

The predicted ambient SO_2 concentrations, including estimated background concentrations, do not exceed either the primary or secondary NAAQS for SO_2.

Eastman Gelatine Corp. is required to meet Prevention of Significant Deterioration (PSD) increments for SO_2 under EPA's PDS regulations promulgated on August 7, 1980 (45 FR 52676). The PSD increments are allowable incremental increases in ambient pollutant concentrations which are set to limit air quality degradation over baseline levels. Increases in sulfur dioxide emissions resulting from relaxations of sulfur-in-fuel limits must show compliance with PSD increments if the increases occur in or impact on an area in which a baseline date has been established. A baseline date is the date after August 7, 1977 on which the first PSD permit application in that area was filed with EPA by a source subject to the PSD Regulations as amended on August 7, 1980. The baseline date is set in the area designated attainment under Section 107 of the Clean Air Act in which the source subject to the PSD regulations is located and in all Section 107 designated attainment areas on which the source has an annual impact of 1 $\mu g/m^3$ SO_2. A baseline date has been set in Boston, which is a Section 107 designated attainment area. The emissions from Eastman Gelatine impact on this baseline area but do not consume more than the available increment.

Although the burning of 2.2% sulfur content fuel oil will cause an increase in particulate emissions, the current particulate emission limitation (0.12 pounds per million Btu heat input) will not be violated. Eastman Gelatine is required to conduct stack testing to determine compliance with the particulate emission limitation within 60 days from the date on which the use of the higher sulfur oil was commenced.

Since this SiP revision affects only one source and the increase in SO_2 emissions is small and will not cause or contribute to any violation of the NAAQS or a PSD increment, this rulemaking is considered noncontroversial. Based on past experience with similar SIP revisions in Region I, no adverse or critical comments are expected. Therefore, this SIP revision is being published as a final rulemaking without going through proposed rulemaking. EPA believes that publishing a proposed rulemaking is unnecessary.

However, if notice is received on or before January 14, 1982, notice that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective February 16, 1982.

Pursuant to the provisions of 5 U.S.C. 605(b) the Administrator has certified that SIP approvals under Section 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities. 46 FR 8709 (January 27, 1981). The attached rule constitutes a SIP revision approval under the January 27, certification. This action approves only state actions. It imposes no new requirements. In addition, this action only applies to one facility.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. This regulation is not Major since it applies to only one source.

Under Section 307(b)(1) of the Clean Air Act judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought to enforce these requirements.

After evaluation of the State's submittal, the Administrator has determined that the Massachusetts revision meets the requirements of the Clean Air Act and 40 CFR Part 51. Accordingly, this revision is approved as a revision to the Massachusetts State Implementation Plan.

(Sec. 110(a) and sec. 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)))

Note.—Incorporation by reference of the State Implementation Plan for the State of Massachusetts was approved by the Director of the Federal Register on July 1, 1981.

Dated: December 8, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart W—Massachusetts

1. Section 52.1120, paragraph (c) as amended by adding subparagraph (43) as follows:

§ 52.1120 Identification of plan.

* * * * *

(c) * * *

(43) A revision to Regulation 7.05(1)(d) "Sulfur Content of Fuels and Control Thereof for the Metropolitan Boston Air Pollution Control District" allowing the burning of higher sulfur content fuel oil at Eastman Gelatine Corporation, Peabody, submitted on September 24, 1981 by the Commissioner of the

Massachusetts Department of Environmental Quality Engineering.

[FR Doc. 81-35780 Filed 12-14-81; 8:45 am]
BILLING CODE 6560-38-M

40 CFR Part 52

[A-4-FRL-1938-7]

Approval and Promulgation of Implementation Plans; Tennessee: Revised SO_2 Limits

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On February 25, 1977 (42 FR 10994), the Administrator approved revised sulfur dioxide emission limits for the Tennessee implementation plan. The revised plan established a new county classification system with corresponding allowable emission limits for each of the six county classes. On March 13, 1980 (45 FR 27757), EPA proposed to approve and requested comments on a State submittal which added a new Class VII county to the county classification system and the emission limits for the sources in the Class VII county. EPA announces today that it is approving the State of Tennessee's revision of the sulfur dioxide county classification system and the emission limits for the sources in the new Class VII county.

DATES: This action is effective January 14, 1982.

ADDRESSES: Copies of the materials submitted by Tennessee and the public comments received may be examined during normal business hours at the following locations:

The Office of the Federal Register, 1100 L Street, N.W., Room 8401, Washington, D.C. 20408

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460

Library, Environmental Protection Agency, Region IV, 345 Courtland Street, N.E., Atlanta, Georgia 30308

Tennessee Air Pollution Control Division, 256 Capitol Hill Building, Nashville, Tennessee 37219

FOR FURTHER INFORMATION CONTACT: Denise W. Pack, EPA Region IV, Air Programs Branch, 345 Courtland Street, N.E., Atlanta, Georgia 30308, 404/881-3286 or FTS 257-3286.

SUPPLEMENTARY INFORMATION: On February 25, 1977, EPA approved revisions to the sulfur dioxide emission limits in the Tennessee implementation plan. A county classification system was established which divided the State into six classes of counties with emission limits for sources in each class county. On July 1, 1979, the State of Tennessee submitted a SIP revision which would add a Class VII to the classification system. Sources in the Class VII area would be subject to emission limits of 2.8 lbs. per MBTU heat input for sources greater than 1,000 MBTU per hour, and 5.0 lbs. per MBTU heat input for sources 1,000 MBTU or less. At the present, only Roane County has been identified in the new Class VII. This revision represents a relaxation from 1.2 to 2.8 lbs. per MBTU for large sources. The emission limit for smaller sources was not changed. EPA proposed approval of this revision on March 13, 1980.

The major source of sulfur dioxide emissions in Roane County is the Tennessee Valley Authority (TVA) Kingston Power Plant. This plant has been out of compliance with the State emission limits for a period of time and, until the recent tie-in of tall stacks, has caused violations of the sulfur dioxide ambient standards in the area. EPA and TVA developed a compliance schedule leading to the compliance of all TVA power plants including the Kingston plant. The air quality modeling demonstration gave credit for only so much of the stack height as represented good engineering practice (GEP). The emission limit submitted by Tennessee to revise the allowable emissions from 1.2 lb to 2.8 lb per MMBTU for large fuel burners is consistent with the results of EPA's and TVA's analysis.

Several comments were received in response to EPA's proposal. The Tennessee Electric Cooperative Association ("Tennessee Distributors"), commented and objected to the approval of the 2.8 lbs per million BTU emission limitation at the TVA's Kingston Steam Plant on the grounds that the so-called "Baker Amendment" inserted in Section 123(a) of the Clean Air Act, 42 U.S.C. 7423(a), mandates that the Kingston emission limitation be set on the basis of the *actual* stack height which, it contends, would yield a more relaxed 4.0 lbs per MBTU limit.

Since the Baker Amendment gives the State of Tennessee and EPA the right to give less than full credit to the Kingston stack and because this agency, under the United States Supreme Court case of *Union Electric v. EPA*, 427 U.S. 246 (1976), has no right to disapprove an emission limitation more stringent than necessary to attain and maintain ambient air quality standards, the 2.8 lb limit for Kingston will be approved as submitted.

The TVA and the Natural Resources Defense Council, Inc., submitted comments supporting approval of the revision.

After the closing of the comment period, the State of New York filed comments on this SIP revision. The comments alleged that (the State of Tennessee as well as) EPA did not adequately consider the interstate transport problem even though there are long range air quality models available. New York also discussed the transport of sulfates and their contribution to primary and secondary TSP NAAQS violations in the State of New York. Finally, New York requested that EPA consider the cumulative impact on New York's air quality of several pending and final sulfur dioxide SIP revisions for sources in Ohio, Indiana, West Virginia, and Tennessee.

EPA's review and approval of the SIP revision is consistent with Sections 110(a)(2)(E) and 126. TVA modeled the revision for its impact on SO_2 concentrations. The modeling indicated that the three hour concentrations would be the highest and therefore controlling in setting emission limitations for the plants. The three hour highest concentrations of 1163 mg/m^3 occurred at 1.5 km from the plant. The nearest state boundary, that of Georgia is 130 km. The nearest point in New York, that of the far southwest corner, is 926 km.

TVA modeled the Kingston plant using EPA approved reference models. These models are only valid out to 50 km from a source. Other reference techniques have not yet been established for accurately evaluating impacts beyong 50 km. Therefore EPA was unable to model for any possible air quality impacts in border states, or in New York.

New York indicated that it also intended its comments to be considered as a Section 126 Petition. EPA has decided not to respond to New York's comments in the context of this rulemaking as the comments primarily concern the aggregate air quality impact of several sources, rather than the impact of this individual SIP revision. EPA will, however, consider New York's concerns as part of its determination of the Section 126 Petition. EPA held a Section 126 hearing on New York's petition on June 18, and 19, 1981.

All of the comments are available for review at EPA Region IV office, Air Programs Branch.

Action: Accordingly, the Administrator approves Tennessee's revised sulfur dioxide emission limits for the new Class VII county added to the county classification system of Chapter 1200-3-14 (Control of Sulfur Dioxide

Emissions). This action is effective January 14, 1982.

Pursuant to the provisions of 5 U.S.C. 605(b) I hereby certify that the attached rule will not if promulgated have a significant economic impact on a substantial number of small entities. This action only approves state actions. It imposes no new requirements.

Under Executive Order 12291, EPA must judge whether a regulation is major and therefore, subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it merely ratifies State actions and imposes no new burden on sources.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

Under Section 307(b)(1) of the Clean Air Act, judicial review of EPA's approval of Tennessee's SO_2 revision is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Incorporation by reference of the State Implementation Plan for the State of Tennessee was approved by the Director of the Federal Register on July 1, 1981.

(Sec. 110 of the Clean Air Act, as amended (42 U.S.C. 7410))

Dated: December 8, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart RR—Tennessee

In § 52.2220, paragraph (c) is amended by adding subparagraph (35) as follows:

§ 52.2220 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified:

* * * * *

(35) Regulation 1200–3–14–.01, –.02, –.03 for control of sulfur dioxide emissions, adopted on July 1, 1979, with a State effective date of November 16, 1979, and submitted on June 29, 1979, by the Tennessee Department of Public Health.

40 CFR Part 52

[A–4–FRL–1987–3]

Alabama: Approval of Alternative VOC Compliance Schedules Florida: Approval of Gasoline Bulk Plant Rule Revision

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: After public hearings, the Alabama Air Pollution Control Commission adopted alternative schedules of compliance under Parts 6.14 and 6.15 of the Commission's Rules and Regulations on June 23, 1981, for ten sources. The revision was formally submitted to EPA on June 25, 1981. After review of these schedules for achieving compliance with emission limits for volatile organic compounds (VOC), EPA today is approving the revision. On October 15, 1980, Flordia submitted a revision which includes: (1) the adoption of an amendment to section 17–2.16(6)(i), FAC, Nonattainment Areas Emission Limits for Ozone, exempting bulk plants from controls other than submerged fillings of tanks and trucks; (2) the adoption of an addition to section 17–2.16(3), Exemptions to the Nonattainment Areas Emission Limits for Ozone, partially exempting from controls gasoline trucks or trailers with capacities of 4,500 gallons or less. EPA is approving this revision also. These actions will be effective 60 days from this date unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

EFFECTIVE DATE: February 16, 1982.

ADDRESSES: The Alabama and Florida submittals may be examined during normal business hours at the following offices:

Alabama Air Pollution Control Commission, 645 South McDonough Street, Montgomery, Alabama 36130

Florida Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301

Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C. 20408

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460

Library, Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365

FOR FURTHER INFORMATION CONTACT: Waymond A. Blackmon, EPA, Region IV, Air Programs Branch, 345 Courtland Street NE, Atlanta, Georgia 30365, 404–881–2864 or FTS: 257–2864.

SUPPLEMENTARY INFORMATION: After public hearing, the Alabama Air Pollution Control Commission adopted regulations on June 23, 1981, which set forth alternative compliance schedules for ten VOC sources.

The original compliance date for nine of the sources was March 26, 1981. The final compliance date for the tenth source, Revere Brass and Copper, Inc., was January 28, 1981. The ten sources and the revised dates for final compliance are listed below:

- Jefferson County facilities:
  - —Crown Central Petroleum, June 15, 1981
  - —U.S. Steel Corporation (coil coating operation), July 26, 1981
  - —Southeast terminals (Union Oil Company), September 30, 1981
  - —Chevron U.S.A., June 1, 1981
  - —National Can Corporation, May 19, 1982
- Chevron Oil Company (Montgomery and Oxford terminals), July 26, 1981
- La Gloria Oil and Gas Company, October 1, 1981
- Union Oil Company, Southeast Terminals, September 30, 1981
- Revere Brass and Copper, Inc., December 31, 1985

The final compliance dates for all but two of the ten sources have already occurred. The revised dates for the remaining two sources, National Can Corporation and Revere Brass and Copper, Inc., will not interfere with reasonable further progress (RFP) in attaining National Ambient Air Quality Standards.

With regard to the Florida revision, it should be noted that EPA guidance provides that sources with potential emissions under 100 tons/year can be exempted from Reasonably Available Control Technology (RACT) if they are located in nonattainment areas which are projected to become attainment by 1982. The bulk plants to be exempted range in potential emissions from 7–51 tons. Thus, they are well within EPA's recommended cutoff for requiring RACT control. Also, trucks with capacities of 4500 gallons or less are exempted from control under certain circumstances because most truck trailers of this size deliver gasoline to exempted small accounts with monthly through-puts under 20,000 gallons. Even with these

exemptions the Florida RFP curve still shows an adequate cushion for VOC growth in the seven nonattainment counties.

ACTION: Based on the previous information, EPA is today approving the Alabama alternative compliance schedules for VOC emitting sources and the revisions to Florida's gasoline bulk plant rule. The public should be advised that this action will be effective February 16, 1982. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and subsequent notices will be published before the effective date. The subsequent notice will withdraw the final action and begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under section 307(b)(1) of the Clean Air Act, judicial review of EPA's approval of these revisions is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit on or before February 16, 1982. Under section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the attached rule will not have a significant economic impact on a substantial number of small entities. This action only approves State actions. It imposes no new requirements.

Under Executive Order 12291, EPA must judge whether a regulation is major and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it merely ratifies requirements already in effect under State law, and has no significant economic impact.

Incorporation by reference of the State Implementation Plan for the States of Alabama and Florida was approved by the Director of the Federal Register on July 1, 1980.

(Sections 110 and 172 of the Clean Air Act as Amended (42 U.S.C. 7410 and 7502))

Dated: December 8, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

1. In § 52.50, paragraph (c) is amended by adding subparagraph (31) as follows:

§ 52.50 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(31) Alternative compliance schedules for VOC sources, submitted on June 25, 1981, by the Alabama Air Pollution Control Commission.

2. In § 52.520, paragraph (c) is amended by adding subparagraph (35) as follows:

§ 52.520 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(35) Revision of gasoline bulk plant rule, submitted on October 15, 1980, by the Florida Department of Environmental Regulation.

[A-7-FRL-1993-1]

Revision to State Implementation Plan for Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final rulemaking.

SUMMARY: On February 18, 1981, the Missouri Air Conservation Commission granted a variance to Amoco Oil Company for its Sugar Creek refinery. The variance was submitted as a revision to the Missouri State Implementation Plan (SIP) on June 11, 1981. The variance allows continued operation of the facility while the company installs the control equipment necessary to comply with the applicable state regulation. It is believed that the variance will not jeopardize the attainment demonstration set forth by the SIP, nor interfere with the reasonable further progress curve as required by Part D of the 1977 Amendments to the Clean Air Act. The source is to come into final compliance with the state's regulation by June 1, 1982.

A proposal to approve the state's submission was published in the **Federal Register** on September 10, 1981, 46 FR 45158–45159. No comments were received in response to the proposal. The purpose of today's notice is to take final action to approve the submission as a revision to the Missouri SIP.

EFFECTIVE DATE: This action will become effective January 14, 1982.

ADDRESSES: Copies of the state submission are available for inspection during normal business hours at the following locations:

Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW, Washington, D.C. 20460

Environmental Protection Agency, Air, Noise and Radiation Branch, 324 East 11th Street, Kansas City, Missouri 64106

Missouri Department of Natural Resources, Division of Environmental Quality, 2010 Missouri Boulevard, Jefferson City, Missouri 65101.

FOR FURTHER INFORMATION CONTACT: Mary C. Carter at (816) 374–3791 (FTS 758–3791).

SUPPLEMENTARY INFORMATION: On August 13, 1980, the Missouri Air Conservation Commission approved an amendment to regulation 10 CSR 10–2.260. This amendment called for the installation of secondary seals on all floating roof tanks of greater than 40,000 gallons capacity used for the storage of petroleum liquid having a true vapor pressure of greater than 1.5 pounds per square inch. The effective date of the amendment was September 12, 1980, with final compliance to be achieved by not later than October 1, 1981. EPA approved this regulation April 3, 1981, at 46 FR 20172. The American Oil Company (Amoco) refinery in Sugar Creek, Missouri, is the only facility believed to be affected by this amendment.

An inspection by Amoco revealed that out of 16 floating roof tanks requiring the installation of secondary seals, five would require an additional eight months in order to achieve compliance.

On February 18, 1981, after notice and public hearing, the Missouri Air Conservation Commission granted a variance to the Amoco Sugar Creek refinery, allowing continued operation while installing the necessary secondary seals on tank numbers 86, 90, 95, 126, and 176. The variance, effective during the period October 1, 1981, through June 1, 1982, requires that the seals be installed in accordance with the schedule as prescribed in the order.

For reasons more fully discussed in the proposed rulemaking, EPA determined that the variance would not jeopardize the attainment demonstration set forth by the SIP, nor interfere with the reasonable further progress curve as required by Part D of the 1977 Amendments. The proposed EPA approval was published on September 10, 1981. EPA received no comments in response to the proposed rulemaking

and is now taking final action to approve the variance.

Pursuant to the provision of 5 U.S.C. 605(b), I hereby certify that the attached rule will not have a significant economic impact on a substantial number of small entities. The reason for this determination is that it only approves a state regulation and affects only one source.

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This rule is not "major" because it only approves state actions and imposes no additional substantive requirements which are not currently applicable under state law. Hence it is unlikely to have an annual effect on the economy of $100 million or more, or to have other significant adverse impacts on the national economy.

Under Section 307(b)(1) of the Clean Air Act, as amended, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under section 307(b)(2), the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

This notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act as amended.

Dated: December 8, 1981.

Anne M. Gorsuch,

Administrator.

Note.—Incorporation by reference of the State implementation Plan for the State of Missouri was approved by the Director of the Federal Register on July 1, 1981.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart AA—Missouri

1. Section 52.1320 is amended by adding a new paragraph (c)(35) to read as follows:

§ 52.1320 Identification of plan.

(c) The plan revisions listed below were submitted on the dates specified:

* * *

(35) A variance from Missouri Rule 10 CSR 10–2.260, Control of Petroleum Liquid Storage, Loading and Transfer for the Kansas City Metropolitan Area, was submitted by the Missouri Department of Natural Resources on June 11, 1981.

2. Section 52.1335 is amended by adding the following compliance schedule to the end of the existing list in § 1335(a) as follows:

§ 52.1335 Compliance schedules.

(a) * * *

MISSOURI

Source	Location	Regulation involved	Date adopted	Effective date	Final compliance date
American Oil Co. (AMOCO)	Sugar Creek, Mo.	10 CSR 10-2.260	Feb. 18, 1981	Oct. 1, 1981	June 1, 1982

BILLING CODE 6560-38-M

40 CFR Part 52

[A-1-FRL-1993-3]

Revision; Haverhill Paperboard Corp., Haverhill, Massachusetts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a revision to the Massachusetts State Implementation Plan (SIP) which was submitted on July 14, 1981. This revision amends Regulation 7.05(1)(c) "Sulfur Content of Fuels and Control Thereof for the Merrimack Valley Air Pollution Control District" to allow Haverhill Paperboard Corporation, Haverhill, Massachusetts to increase its sulfur-in-fuel content from 1.4% to 2.2% upon completion of a stack extension consistent with EPA's current stack height policy. The effect of this revision is to allow Haverhill Paperboard to burn less expensive fuel.

DATES: This action is effective February 16, 1982.

ADDRESSES: Written comments should be addressed to Harley Laing, Chief, Air Branch, EPA Region 1 (see address below). Copies of the Massachusetts submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Region 1, Air Branch, Room 1903, JFK Federal Building, Boston, Massachusetts 02203; Public Information Reference Unit, Environmental Protection Agency 401 M St., SW., Washington, D.C. 20460; Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. and Department of Environmental Quality Engineering, Division of Air and Hazardous Materials, 1 Winter Street, Boston, Massachusetts 02108.

FOR FURTHER INFORMATION CONTACT: Margaret McDonough, Air Branch, EPA Region 1, Room 1903, JFK Federal Building, Boston, Massachusetts. 02203, (617) 223–4448.

SUPPLEMENTARY INFORMATION: On July 14, 1981 the Commissioner of the Massachusetts Department of Environmental Quality Engineering (the Massachusetts Department) submitted a request for EPA approval of a revision to Regulation 7.05(1) "Sulfur Content of Fuels and Control Thereof" which would allow the Haverhill Paperboard Corporation to burn higher sulfur content fuel oil upon completion of a stack extension. Haverhill Paperboard Corporation, rated at 242 million per hour input capacity, is located in the Merrimack Valley Air Pollution Control District (Merrimack Valley). Regulation 7.05(1)(c) allows approved sources in Merrimack Valley rated at 100 million Btu per hour heat input capacity or greater to burn fuel with a maximum sulfur content of 1.21 pounds per million Btu heat release potential (approximately equivalent to 2.2% sulfur content fuel oil by weight).

EPA approved a SIP revision on May 21, 1979 (44 FR 29453) which allowed Haverhill Paperboard to increase its sulfur-in-fuel content from 1.0% to 1.4% (0.55 and 0.75 lbs sulfur per million Btu, respectively). The technical analysis done in support of this decision indicated that the use of fuel oil having a sulfur content greater than 1.4% would jeopardize air quality standards.

Technical support for the present revision includes an evaluation of compliance with National Ambient Air Quality Standards (NAAQS) for sulfur dioxide (SO_2) based on an increased stack height, using mathematical modeling and monitoring data. NAAQS are maximum ambient pollutant concentrations which are set to protect public health and welfare. The NAAQS for SO_2 are 80 $\mu g/m^3$ (annual average); 365 $\mu g/m^3$ (24-hr. average); and 1300 $\mu g/m^3$ (3-hr. average). Estimated background concentrations were based on monitoring data from the nearest representative monitoring site. The EPA approved CRSTER and ISC mathematical air dispersion models

were used to predict the impact that emissions from Haverhill Paperboard will have on air quality. The modeling analyses considered the effects of stack downwash and the emissions from other major sources near Haverhill Paperboard.

This technical analysis demonstrates that the burning of fuel oil having a sulfur content of 1.21 lbs per million Btu heat release potential (approximately equivalent to 2.2% sulfur content fuel oil by weight) at the Haverhill Paperboard Corporation will not cause or contribute to violations of air quality standards provided the existing 100 ft stack is raised to a total height of 160 ft. The predicted ambient SO_2 concentrations, including estimated background concentrations, are as follows: 47 $\mu g/m^3$ (annual average); 329 $\mu g/m^3$ (24-hr. average); and 708 $\mu g/m^3$ (3-hr. average).

The new stack height of 160 feet will not exceed Good Engineering Practice stack height. Therefore, consistent with current EPA stack height policy, Haverhill Paperboard is allowed to use the new stack height of 160 feet in its mathematical modeling analysis.

Haverhill Paperboard Corp. is required to meet Prevention of Significant Deterioration (PSD) increments under EPA's PSD regulations promulgated on August 7, 1980 (45 FR 52676). The PSD increments are allowable incremental increases in ambient pollutant concentrations which are set to limit air quality degradation over baseline levels The PSD increments for SO_2 are 20 $\mu g/m^3$ (annual average); 91 $\mu g/m^3$ (24-hr. average); and 512 $\mu g/m^3$ (3-hr. average). Increases in sulfur dioxide emissions resulting from relaxations of sulfur-in-fuel limits must show compliance with PSD increments if the increases occur in or impact on an area in which a baseline date has been established. A baseline date is the date after August 7, 1977 on which the first PSD permit application in that area was filed with EPA by a source subject to the PSD regulations as amended on August 7, 1980. The baseline date is set in the area designated attainment under Section 107 of the Clean Air Act in which the source subject to the PSD regulations is located and all Section 107 designated attainment areas on which the source has an annual impact of 1 $\mu g/m^3$ SO_2. A baseline data has been set in Lawrence, Massachusetts which is a Section 107 designated attainment area. The emissions from Haverhill Paperboard impact on the city of Lawrence but do not consume more than the available increment. The total increment consumption in the city of Lawrence, based on conservative mathematical modeling, is as follows: 7 $\mu g/m^3$ (annual average); 32 $\mu g/m^3$ (24-hr. average); 102 $\mu g/m^3$ (3-hr. average).

Although 2.2% fuel oil burning will cause an increase in particulate emissions, the current particulate emission limitation (0.12 pounds per million Btu) will not be violated.

Since this SIP revision affects only one source and the increase in SO_2 emissions is small and will not cause or contribute to any violation of the NAAQS or a PSD increment, this rulemaking is considered noncontroversial. Based on past experience with similar SIP revisions in Region I, no adverse or critical comments are expected. Therefore, this SIP revision is being published as a final rulemaking. EPA believes that publishing a notice of proposed rulemaking will be unnecessary.

However, if notice is received January 14, 1982 that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective February 16, 1982.

Pursuant to the provisions of 5 U.S.C. 605(b) the Administrator has certified that SIP approvals under sections 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities. 46 FR 8709 (January 27, 1981). The attached rule constitutes a SIP revision approval under the January 27, certification. This action approves only state actions. It imposes no new requirements. In addition, this action only applies to one facility.

Under section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought to enforce these requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. This regulation is not Major since it applies to only one source.

After evaluation of the State's submittal, the Administrator has determined that the Massachusetts revision meets the requirements of the Clean Air Act and 40 CFR Part 51. Accordingly, this revision is approved as a revision to the Massachusetts State Implementation Plan.

(Section 110(a) and Section 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)))

Note.—Incorporation by reference of the State Implementation Plan for the State of Massachusetts was approved by the Director of the Federal Register on July 1, 1981.

Dated: December 8, 1981.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations is amended as follows:

1. Section 52.1120, paragraph (c) is amended by adding subparagraph (41) as follows:

§ 52.1120 Identification of Plan.

* * * * *

(c) * * *

* * * * * *

(41) A revision to Regulation 7.05(1)(c) "Sulfur Content of Fuels Control Thereof for the Merrimack Valley Air Pollution Control District" allowing the burning of higher sulfur content fuel oil at Haverhill Paperboard Corporation, Haverhill.

Approval of Implementation Plans Texas: Administrative Revision

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The purpose of this notice is to approve an administrative revision to the Texas State Implementation Plan (SIP). The Texas Air Control Board (TACB) in accordance with 40 CFR 51.6(c) submitted an administrative revision to Section V (Legal Authority) on July 23, 1981. The revision describes the TACB's legal authority to carry out and enforce the Texas Clean Air Act and the Federal Clean Air Act. It is an update which identifies the rules, regulations, and statutes under which TACB operates. This action will be effective on February 16, 1982 unless notice is received within 30 days that

someone wishes to submit adverse or critical comments.

DATE: This action is effective February 16, 1982.

ADDRESSES: Incorporation by reference material is available for inspection during normal business hours at the following locations:

The Office of the Federal Register, 1100 L Street NE., Washington, D.C. Rm. 8401

Environmental Protection Agency, Public Information Reference Unit, EPA Library Rm. 2404, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Estela S. Wackerbarth, Implementation, Plan Section, Environmental Protection Agency, Region 6, Air and Hazardous Materials Division, Air Programs Branch, 1201 Elm Street, Dallas, Texas 75270, (214) 767–1518.

SUPPLEMENTARY INFORMATION: On July 23, 1981, the TACB in accordance with 40 CFR 51.6(c) submitted an administrative revision for Section V (Legal Authority) which deletes and supercedes the existing approved Section V in the Texas SIP. EPA has reviewed the State's submittal and developed an evaluation report,[1] which is based on the legal requirements established in 40 CFR 51.11 legal authority and SIP requirements established in the Clean Air Acts (CAA) of 1977, as amended. This evaluation report is available for inspection by interested parties during normal business hours at the EPA Region 6 Office and the other addresses listed above.

The revision of Section V (Legal Authority) is an update to the Texas SIP and includes a list of laws and regulations providing TACB with legal authority; a description of the principal areas of legal authority provided to the Texas Air Control Board; and a description of the extension of TACB's authority to carry out additional SIP requirements of the 1977 amendments to the Federal Clean Air Act. Approval of this package does not affect any of the December 18, 1979 (44 FR 74830) and March 25, 1980 (45 FR 19231) Part D Approvals or Conditional Approvals.

Since the revision included in this approval notice is considered administrative in nature and minor in substance, EPA is today approving this revision without prior proposal. The public should be advised that this action will be effective February 16, 1982. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the attached proposal will not have a significant economic impact on a substantial number of small entities since it imposes no new requirements.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this final rulemaking is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit by February 16, 1982. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Under Executive Order No. 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. This regulation is not Major because it is merely approving a State action. It will impose no new regulatory requirements.

Incorporation by reference of the State Implementation Plan for the State of Texas was approved by the Director of the Federal Register on July 1, 1981.

This notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act, as amended, 42 U.S.C. 7410.

Dated: December 8, 1981.

Anne M. Gorsuch,
